## City Council Denies Appeal Of 4 E. State St. Demolition Request

\_\_\_\_\_ | The [City of Geneva Development Projects Map](#) has been updated with details about the Jan. 12 special City Council meeting regarding the appeal of the 4 E. State St. Historic Landmark Demolition request.

A reversal or modification of the Historic Preservation Commission's (HPC) determination requires not less than two-thirds of the alderpersons holding office (seven votes). At the City Council meeting, six alderpersons voted in favor of overturning the HPC, and four voted to uphold the HPC's decision.

As such, the appeal failed, and the demolition request was denied.

**Subject:** The Blacksmith Shop

**CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.**

Alderman Marks,

To the members of the Geneva City Council,

Although we live in the 1st Ward, we're writing to all of you because this is an issue that involves all of the City of Geneva: the preservation and repurposing of the historic blacksmith shop on East State St.

When the developer acquired this property, they were quoted in the Daily Herald as recognizing the historic importance of this building and they stated their intention to preserve it. When they demolished the rest of the old Mill Race Inn they took great care to preserve the blacksmith shop which, at that time had been incorporated into the structure of the restaurant.

But then, some time later, they submitted an application to the City to demolish the building. The fact that they submitted their request shortly before Christmas, when people were likely to be distracted by the upcoming holidays, that they knew that the building had no historic preservation protection, and that such a demolition request is frequently issued promptly as a matter of course, one might surmise that they were confident that the request would be granted and the building demolished before preservationists could react.

Fortunately, a concerned citizen learned of the application and worked almost overnight to submit an application to Landmark the old building. That, of course, halted any action to demolish it. The building was then granted Landmark status by HPC and the City Council.

Since then the developer has made many attempts to get the City to revoke the landmark status of the building. In each case the City has firmly rejected each request. And now they are trying yet once again to get the City to reverse itself and once again the HPC has unanimously ejected their request.

We don't understand their reasoning for committing so much time and money over the years in their repeated attempts to get the City to change its mind, but at this point their submitting yet another request seems almost abusive.

This developer has successfully and creatively restored numerous historic buildings in Geneva. These include The Herrington Inn complex, The Riverside Banquets complex, and The Dodson Place complex. Compared with these developments the blacksmith shop is a very small project. In a city that prides itself on historic preservation as an important aspect of its "brand" it would be a shame for the City to cave and allow this building to be demolished now.

We ask you to once again deny the request to demolish this historic structure and to support an honest effort on the part of the developer to restore and repurpose it.

Most sincerely,

Colin C. and Glorianne S. Campbell

## Technology and the Water Industry

The water industry is developing innovative and advanced technology and AI to reduce water and waste in various applications including data centers, water and wastewater facilities and municipalities. National and state regulators are working to sustainably expand data center growth, while researchers, startups and tech companies are working on innovative solutions to address water-use issues surrounding data centers and AI. But there is more to be done.

This Special Report, sponsored by Ecolab, takes a deeper look at the issues surrounding data centers, AI and advanced technology in the water industry.

▶ 0:00

## Future-Ready Cooling for the AI Frontier

Keep your data centers running at peak performance with cooling systems that support uptime and reduce resource use, cutting costs and reducing environmental impact. Ecolab brings the proven expertise and innovation to make it happen. [Discover More](#)

## Trends

### Ecolab lends support to growing data center industry

The rapid expansion of AI data centers is fueling a surge in demand for Ecolab's water treatment chemicals -- and it is moving fast to help support the industry at its Garyville, La., facility. The site ships 227 million pounds of chemical products annually, many of which help ensure efficient water usage at data centers and power plants.

**Full Story:** [The Times-Picayune](#) | [The New Orleans Advocate](#) (12/4)

### Data centers could be powerful economic engines

Data centers are emerging as major drivers of economic development, comparable to the role once played by steel mills and manufacturing facilities, writes Jeff Jakubiak of Vinson & Elkins. However, utility commissions often maintain a conservative approach focused on cost limitation, which can hinder necessary grid investments. Jakubiak discusses the regulatory

bottleneck and why change is needed to ensure states and consumers benefit from the data center boom. For more insights from Jeffrey Jakubiak, tune into his appearance on the most recent episode of the [Renewable Energy SmartPod](#).

(John Macdougall/Getty Images)

Amazon is set to make a \$50 billion investment to expand its cloud infrastructure for US government clients, focusing on AI and high-performance computing. This investment will boost data center capacity by almost 1.3 gigawatts, offering government agencies enhanced AI capabilities and access to AWS and Nvidia hardware. This move aligns with Amazon's ongoing efforts to lead in the AI race, as evidenced by its recent data center expansions.

**Full Story:** [The Wall Street Journal](#) (11/24)

## Closed-loop cooling to cut water use at Nev. data centers

Data center developers near Reno, Nev., are increasingly adopting advanced cooling systems designed to minimize water consumption. The trend is moving toward closed-loop water systems, which reuse water repeatedly rather than relying on constant fresh water input. This shift mirrors a nationwide effort among AI data centers to reduce their water footprint.

**Full Story:** [National Public Radio](#) (12/1)

## Water becomes key in business location decisions

As water scarcity becomes a critical factor in business location decisions, companies are increasingly integrating water management into their overall business strategies. Robert Kimball, industrial process water sector leader at WSP, highlights the importance of water reuse, advanced treatment technologies and the water-energy nexus in achieving sustainability goals. Kimball emphasizes the need for a fit-for-purpose approach to water treatment to minimize costs and carbon emissions.

## Deep Dive

Amazon Web Services data center in Ashburn, Va. (Bloomberg/Getty Images)

The AI data center boom is dramatically transforming the global technology landscape, with tech giants like OpenAI, Meta, Amazon, and Google building massive, next-generation facilities. These data centers are much larger than traditional ones, often spanning areas comparable to Central Park, and are being constructed in both rural and urban locations to handle unprecedented AI workloads. The sector is attracting hundreds of billions of dollars in investment, doubling the number of hyperscale data centers worldwide in just five years. This rapid expansion is not only reshaping physical environments but also redefining economic priorities for both companies and governments worldwide.

**Full Story:** [Bloomberg](#) (11/21)

## Data center expansion key to US AI growth; challenges abound

Data centers are foundational for AI growth, but their expansion faces challenges such as energy and water consumption, costs, critical mineral requirements, permitting and workforce shortages. The United States is the global leader in the number of data centers, with Virginia, Texas and California serving as major hubs due to their proximity to government agencies and access to land and resources. However, tariffs on copper, steel and aluminum have increased construction costs, and White House policies on tariffs and immigration have created additional hurdles for data center development.

**Full Story:** [Brookings Institution](#) (11/5)

## Are forecasts overestimating data center power demand?

Estimates of power demand from data center projects vary widely and are growing due to many early-stage initiatives securing power. However, the actual realization of these projects is uncertain. Projects are on the rise in established hubs like Virginia, Texas, Georgia and Ohio, but also taking root in emerging markets like Pennsylvania and Louisiana. John Wilson of Grid Strategies notes that demand projections are uncertain because utilities are struggling to accurately forecast new loads.

**Full Story:** [Latitude Media](#) (12/2)

---

## Leading the Way

### Laser-cooling tech cuts data centers' water, energy use

Maxwell Labs, a Minnesota startup co-founded by Mike Karpe and Jacob Balma, is pioneering an innovative laser-based technology aimed at cooling computer chip hotspots in data centers. By leveraging photonics and advanced optics, the company's system can precisely target and cool micro hotspots on chips, converting excess heat into light and then back into electricity. This approach is more efficient and targeted than traditional air or liquid cooling methods, potentially unlocking higher chip performance and setting a new standard for thermal management in high-density computing environments.

**Full Story:** [Star Tribune \(Minneapolis\)](#) (11/26)

### Thermal desalination method uses renewable energy

Researchers at McGill University have demonstrated the feasibility of thermally driven reverse osmosis, a method of desalinating seawater using low-grade heat from renewables such as solar thermal and geothermal energy. The process, which uses a piston-based system to push seawater through a membrane, could improve access to water in remote areas where electricity-based desalination is not viable, says McGill's Jonathan Maisonneuve.

**Full Story:** [Tech Xplore](#) (11/14)

### Burnt Island Ventures sees water as climate tech focus

Burnt Island Ventures has closed a \$50 million fund to support early-stage water-technology startups addressing climate-related risks, with most capital already invested in solutions ranging from advanced treatment to infrastructure resilience. The firm is also raising a \$75 million growth fund for later-stage investments. Founder Tom Ferguson says he sees opportunities in metering, advanced water treatment, filtration and infrastructure, and is backing innovations like underwater desalination and AI-powered water utility management, with a focus on supporting founders with both funding and sector expertise.

**Full Story:** [Heatmap News](#) (10/22)

(Getty Images)

Nvidia has introduced Omniverse DSX, a digital twin platform for the design and operation of gigawatt-scale AI data centers. Partnering with Schneider Electric, Nvidia is partnering with Schneider Electric to build an AI Factory Research Center in Virginia to develop this technology. Omniverse DSX creates a digital twin of the entire data center, including power and cooling infrastructure, to optimize performance and sustainability.

**Full Story:** [The Register \(UK\)](#) (10/29)

## AI tool enables earlier data center interconnections

Portland General Electric has partnered with GridCARE to use an AI-enabled flexibility tool that has freed up over 80 megawatts for data center interconnections next year. The tool uses detailed demand modeling and optimized flexible resources, such as batteries and onsite generators, to find spare capacity, allowing PGE to connect data centers years earlier than expected.

## More Resources

### Words on Water: Meeting AI's growing water demands

(WEF) As AI data centers expand, finding ways to save water is becoming increasingly crucial. Listen to this recent episode of WEF's *Words on Water* podcast featuring Rodolfo Sucre, Principal of RSP Engineers, for perspectives on how balancing AI growth with sustainable practices is the key to managing the challenge. [Access this episode as well as all Words on Water conversations at the WEF website.](#)

---

## Policy Update

### National AI rule planned to address data centers

President Donald Trump plans to sign an executive order to establish a national regulatory framework for artificial intelligence, aiming to streamline the approval process for companies. The move comes as states, such as Florida, propose their own regulations to address concerns about privacy, energy costs and water usage. Florida Gov. Ron DeSantis has introduced legislation to limit AI's impact, including preventing utilities from charging more to support data center development.

**Full Story:** [Utility Dive](#) (12/8)

### States seek clearer data center water use reporting

States are intensifying efforts to make data center water usage more transparent, particularly as drought conditions and groundwater depletion threaten water security. Lawmakers argue that without clear reporting, utilities and officials cannot adequately plan for future water needs or weigh the impact of rapidly expanding AI-driven data centers. However, water consumption data is often designated as proprietary by tech companies, and some utilities are bound by nondisclosure agreements, leaving municipalities with incomplete information. This lack of transparency complicates resource planning and fuels bipartisan calls for legislation mandating water use disclosures.

**Full Story:** [E&E News](#) (12/8)

### Lawmakers see liquid cooling as solution for AI, energy

The Liquid Cooling for AI Act, introduced by a bipartisan group of lawmakers, aims to address the growing energy and operational challenges of AI data centers by promoting the adoption of liquid cooling technologies. The bill mandates a comprehensive assessment by the US comptroller general and the Government Accountability Office on the deployment and impact of liquid cooling systems in AI compute clusters. Additionally, it proposes the formation of an industry-led advocacy group to collaborate with federal agencies on establishing nationwide guidelines.

## Today's News

### Trump threatens 5% tariff on Mexico amid water dispute

President Donald Trump has said that Mexico would face a 5% tariff if it fails to meet its water delivery obligations under a 1944 treaty. Mexico owes the US 800,000 acre-feet of water due to violations during the past five years, the president has said, and warned that the tariff would be enacted if Mexico does not release 200,000 acre-feet before Dec. 31.

## Environmental Protection

Treated wastewater in Tijuana. (Guillermo Arias/AFP via Getty Images)

The Tijuana River remains a major pollution source in southern San Diego County, flooding neighborhoods with untreated wastewater and industrial chemicals from Tijuana. Despite upgrades to wastewater treatment facilities on both sides of the border, the river continues to release contaminants into the environment, leading to beach closures and persistent health risks for residents. County Supervisor Paloma Aguirre is calling for funding to address a major pollution hotspot and for new infrastructure to clean up the river on the US side.

## Circular Water Economy

(Cate Gillon/Getty Images)

Up to 220 million people could lose access to clean, piped water by 2050 if urban growth continues in a sprawling, horizontal pattern, according to a study by the Complexity Science Hub and the World Bank. The study analyzed more than 100 cities in Africa, Asia and Latin America, and determined that sprawling cities already see water bills

about 75% higher than their more compact counterparts. It highlights the importance of urban design decisions in future water access.

## Research, Innovation & Technology

### Calif. water agency to convert food waste to energy

Monterey One Water has launched a co-digestion program to turn food waste into renewable energy, supported by a \$4.2 million grant from CalRecycle. The initiative aims to divert up to 51,000 tons of food waste annually from landfills, reducing methane emissions and producing biogas to be converted into electricity and renewable natural gas.

**To:** Malecki, William; Reinecke, Mark  
**Subject:** [THIS EMAIL MAY BE SPAM] The Mill Race Property

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Aldermen Malecki and Reinecke,

The City Code allows for any alderman from the prevailing side to ask for a re-vote. I am hoping you would consider making that motion and seconding it at the next meeting. I believe too much misinformation has worked its way into discussions.

First as an introduction. I have been a resident of Geneva for over 40 years and for fifteen years I attended, in person, every Committee of the Whole and City Council meeting. After COVID I've enjoyed the luxury of watching online from my couch. With the exception of the mayor, no one has attended or watched more meetings than I have. I point this out so you know this isn't a single issue complaint from an activist, it is a well informed opinion of someone who has worked to stay informed on the facts and that cares about Geneva.

Here are a few of my comments:

- This property is not in the Historic District. When the Shodeen's purchased the property, they could have applied for a demo permit and received it before anyone had a chance to comment. Instead, because they knew that there may be remnants of an historic structure inside the building they decided, at great expense to themselves, to expose the structure for inspection. After inspection they decided saving the structure "as is" was not practical. It was only then that a group of people moved to have the site landmarked behind their back. That never should have been allowed to happen. It was certainly an instance of "No good deed goes unpunished".
- It's claimed that the Shodeen's are committing "Demolition by Neglect". This is nonsense. The building is in the same shape that it was in when it was originally exposed.
- It's being ignored that the structure sits in a flood plain. Making use of the structure "as is" and where it is located would be a cost prohibitive and impractical endeavor.
- Opponents to demolition like to refer to it as the Blacksmith Shop. It's had many uses over the years, but they chose to call it that for impact. I believe it was also the site of bathrooms for the Mill Race Inn at one time.
- The Shodeen's have continually showed strong support of Historic Preservation. Geneva on the Dam, their corporate offices on First Street, The Herrington, The Creamery, Dodson Place are all impressive examples of their cooperation. But because in this instance they don't agree with saving the structure as is, they are made to be villains.
- It is often repeated "Show us a plan on how you can incorporate the structure and demolition will be approved". How many tens of thousands of dollars in drawings would have to be presented to get this done? It's like saying I don't know what I want from you, but I'll know when I see it. What they are offering is what you want. They have always been willing to incorporate or pay homage to the history if given the chance.
- Many letters and emails were sent to HPC in support of saving the structure, but more than half were not from Geneva residents. Three times that amount were sent supporting demolition. Those supporting demolition include a former Planning Commissioner, the former Chairman of the Planning Commission, a former Alderman, the former Economic Development Director of Geneva, two Wood Award winners, etc. These are not activists with a single propose, these are residents that care about Geneva.
- Please consider bringing this back up for additional discussion. Asking for a re-vote doesn't mean you have changed your mind. It only means you are willing to listen.

**Subject:** Motion for Reconsideration

\*\*\*\*\*

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

\*\*\*\*\*

I am asking you both, as the rules allow, to request a motion for reconsideration of your vote at your next meeting regarding last night's vote on the Mill Race Inn demolition request. As a past three term member of the Geneva City Council and strong supporter of reasonable historic preservation I hope you consider this request. I participated in the year long discussion of our current HP ordinance and while objecting to the owner consent issue, still voted to approve the ordinance. As a whole it is excellent and I did not wish to throw the baby out with the bath water.

I won't rehash the already exhaustive discussion on the pro and con issues. However, I believe there are 2 strong arguments to be made for your reconsideration.

First is the fact that the sitting majority of Council members who represent the majority of people in Geneva voted for conditional redevelopment/demolition. But for the super majority requirement based on the HPC unanimous vote, the redevelopment would proceed. If conditional demolition and redevelopment did not have such wide support from the council I would not be writing to you.

Second, I believe you are not elected leaders but rather our elected representatives. To borrow from Alderperson Reineck's theme last night, I think there are some things we can all agree upon. Foremost, if the question was put to the voters in a referendum we would no doubt overwhelmingly support the conditional demolition and redevelopment of the property. I understand that your responsibilities on the council exceed simply polling your constituents. However, if you are going to break from them on such an important issue then you should be 100% confident in your position. If not, I think it is best to go with the collective wisdom and support your constituents.

The reality is that you may feel 49% in favor of an issue but since you vote in a whole number you must cast your vote the other way. It is what makes your position challenging at times. So my request again is that in light of the above I respectfully ask you to reconsider your vote and allow the conditional demolition and redevelopment of the Mill Race Inn property.

Thank you for your service and please contact me if you wish to discuss further

**To:** Bowring, Anaïs; Malecki, William

**Subject:** Blacksmith Shop thoughts

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Mrs. Bowring and Mr. Malecki,

I hope the day and New Year find you both well! As a constituent of the Ward 1, I am reaching out to you both as you prepare to consider the demolition and removal of the Blacksmith Shop this coming Monday. I'll not occupy a lot of your time as I know you both are likely receiving a great deal of feedback from the public on this issue. Just a quick background. My wife Janet and I have been residents at 427 Anderson Boulevard since 1999 where we raised a son (Jonah) and daughter (Sarah) both terrific kids (yikes...now adults!) who were byproducts of the Geneva public school system. I am an architect with a residential practice that has been blessed with many projects in Geneva's historic district. As well I've been teaching architecture at Judson University since 2008. Below are a few points to consider as your mull over your decision.

1) The demolition and permanent removal of the structure will greatly undermine the authority and purpose of the Historic Preservation Commission, a group that has been a key partner in the success of our downtown business district and residential district. I could go on and on with this point but I'll only note that having been a member of the HPC for 11 years (2000-2011) we had frequent incursions with the Shodeen organization as they pursued the removal the East View house, the Dodson mansion (once a hospital) and the many other structures. Shodeen now highlights the Dodson mansion as part of the Dodson Place retail development. The East View house is now the grande dame of homes along Route 31...hard to imagine them not there now. Can Shodeen work with and transform historic structures...you betcha they can. Is it easier to tear them down and erase their memory from our community, I guess this must be the case since they wish to do this with the blacksmith shop, but it's an odd argument to make in light of their successes. Certainly we can't predict the future, it seems likely though, that if Shodeen is given the authority to remove the blacksmith shop, there will inevitably be other applicants in the future requesting a similar fate for other historic structures in our community.

2) The property was purchased knowing full well that this structure was something important and would likely present the Shodeen organization with community interest and push back if they decided to remove the structure, yet little to no effort was made to placate the public that was and has been concerned about this. The organization it seems has done little to acknowledge the significance of the structure and even less as far as giving creative consideration for its reuse. It's clear they can do it as seen in their work with the Harrington Inn, Riverside Receptions and others throughout the Fox Valley.

3) It seems that there has been little to no compromise by Shodeen in relation to the repurposing of the blacksmith shop. The argument that was initially set forward was an issue of the cost of reusing the structure. The argument now has shifted to the structure being a public nuisance, a pretty easy argument to make when it's intentionally left unprotected and further compromised. It's been noted by both sides that the property is "unsightly", yet who currently owns the property? Who has ignored legal and financial consequences?...well you get the gist.

4) There aren't many artifacts like this one in our City, for that matter in the Fox Valley. It's easy to lose sight of this one as we hurdle toward being a City that has great potential and building it out to that potential will push structures like this into oblivion. Obviously once it's gone, it's gone and it's really our one chance to protect it.

5) Geneva has become and will likely even more so become a significant player in attracting residential and business interest in the years to come. As far as cities along the Fox River, trying to be objective about this, Geneva's downtown is and will be the most desirable location for both homeowners and businesses along the Fox River. That said, the long term financial upside for this site is enormous. Our City leadership should leverage this with the Shodeen organization. I do understand that this site is a challenging one to build on, but the folks at Shodeen purchased it knowing this. I believe that this parcel will be a significant generator of income for the Shodeen organization so money spent now for the restoration or repurposing of the blacksmith shop will be minimal when seen through the lens of time and the future.

I'm sure there are many other arguments that can be made for keeping the blacksmith shop but the five noted above came to my mind initially. As I noted above, I served on the HPC for 11 years and I so appreciate and understand the significant commitment of your time and energy on behalf of our community. So at the end of the day you can put me in the camp of keeping the blacksmith shop.

Warmly and grateful for your service!

**To:** Malecki, William  
**Subject:** The Blacksmith Shop

**CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.**

Alderman Malecki,

To the members of the Geneva City Council,

Although we live in the 1st Ward, we're writing to all of you because this is an issue that involves all of the City of Geneva: the preservation and repurposing of the historic blacksmith shop on East State St.

When the developer acquired this property, they were quoted in the Daily Herald as recognizing the historic importance of this building and they stated their intention to preserve it. When they demolished the rest of the old Mill Race Inn they took great care to preserve the blacksmith shop which, at that time had been incorporated into the structure of the restaurant.

But then, some time later, they submitted an application to the City to demolish the building. The fact that they submitted their request shortly before Christmas, when people were likely to be distracted by the upcoming holidays, that they knew that the building had no historic preservation protection, and that such a demolition request is frequently issued promptly as a matter of course, one might surmise that they were confident that the request would be granted and the building demolished before preservationists could react.

Fortunately, a concerned citizen learned of the application and worked almost overnight to submit an application to Landmark the old building. That, of course, halted any action to demolish it. The building was then granted Landmark status by HPC and the City Council.

Since then the developer has made many attempts to get the City to revoke the landmark status of the building. In each case the City has firmly rejected each request. And now they are trying yet once again to get the City to reverse itself and once again the HPC has unanimously ejected their request.

We don't understand their reasoning for committing so much time and money over the years in their repeated attempts to get the City to change its mind, but at this point their submitting yet another request seems almost abusive.

This developer has successfully and creatively restored numerous historic buildings in Geneva. These include The Herrington Inn complex, The Riverside Banquets complex, and The Dodson Place complex. Compared with these developments the blacksmith shop is a very small project. In a city that prides itself on historic preservation as an important aspect of its "brand" it would be a shame for the City to cave and allow this building to be demolished now.

We ask you to once again deny the request to demolish this historic structure and to support an honest effort on the part of the developer to restore and repurpose it.

Most sincerely,

Colin C. and Glorianne S. Campbell  
18 S. 6th. St.  
Geneva, IL

**Sent:** Friday, January 16, 2026 1:53:06 PM  
**To:** James Radecki; Reinecke, Mark  
**Subject:** Re: Motion for Reconsideration

Mr. Radecki,

Thanks for your email and for your past service as alderperson as well.

I apologize for the delayed response.

I've been keeping a careful eye on this over the years and did not take my vote lightly. I understand the arguments from both sides and received thoughtful responses from a variety of residents.

I took great care in revisiting the lengthy discussions and the decisions that my predecessors had made in regard to this property and this specific historical landmark. The structure was designated a historical landmark by the city through the proper channels, and the applicant has failed to de-designate the property as such. The issue has been brought up repeatedly, and the city has remained steadfast, collectively through the HPC and via City Council.

No matter the condition of the structure, it is still deemed a historical landmark and that carried a significant weight as I personally deliberated over the topic at hand.

Respectfully,

**CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.**

?

Dear Alderspersons,

The current demolition request for 4 E. State is going to be decided on January 12th, and I wanted to share my thoughts on the matter with you.

I realize you all are aware of the previous votes on this matter, as well as the legal decisions that have been issued in the last year or so. All of these votes/decisions were to maintain and protect the landmark status of the blacksmith structure.

While I agree with the past decisions, I also believe that the current petition presents a threat to the City's landmark ordinance.

1. The landmark status was granted without any time limit for redevelopment. The City has worked with the owner to determine a potential redevelopment project, and viable options were identified.
2. City Code 10-6-10 Part 13 C states that buildings and structures designated as a historic landmark shall be maintained and protected from demolition that results from neglect or undeterred deterioration of the exterior features or structural elements. This Duty to Maintain specifically requires the owner of record to repair any deficient element contributing to material deterioration of the structure. I see the refusal of the owner to properly protect the structure from the elements as evidence of this breach. The courts agreed.
3. To my knowledge, the owner has not presented a redevelopment plan since the conclusion of the charette project. A presentation of a plan would allow for the City and the owner to work through some of the potential obstacles to moving forward. One key point to work through would be the extent that TIF financing is available for this redevelopment. A key provision to our landmark ordinance is that demolition is considered only when all other redevelopment options have been exhausted. (CC 10-6-10 4) How can all options be considered exhausted when none have been presented? It seems like a decision to allow demolition at this point in time is rewarding the owner for not maintaining the structure, as well as for not presenting any type of redevelopment plan. Would the City allow this failure to maintain our historic, protected, structures in the Historic District to occur for years?
4. The landmark owner stated at the last HPC meeting that no redevelopment plan will be presented as long as the blacksmith shop remains. This statement indicates a complete refusal to even attempt to exhaust all redevelopment options. This intransigence should not be rewarded. The historic preservation and landmark ordinances of the City deserve support and compliance.

Finally, I do not believe that demolition of the blacksmith structure is in the best interest of the majority of residents. There are many ways to evaluate this question, and arguments for both sides of demolition could be considered valid.

Is the best interest of the majority of residents determined by the highest EAV for the property? The greatest sales tax generated? The largest draw of out-of-town visitors? The priceless value of the sightline of the riverfront and the downtown? The potential benefits of being the only Fox River town with a renovated pre-Civil War industrial structure that once was the life blood of most river towns?

Demolition of the structure would eliminate some of the positive outcomes for residents that I mentioned above. I do not believe that the passage of time, and deterioration of the structure from neglect, should become the main drivers to evaluate the best interests of the majority of residents. Clearly, the majority of residents want the current status of the site to be improved. That does not mean that demolition is the only path forward to resolving this impasse.

I appreciate all of your efforts and work. You have a difficult, but clear, decision to make on Monday.

Thanks,

Bob Swanson

Alderman Malecki,

To the members of the Geneva City Council,

Although we live in the 1st Ward, we're writing to all of you because this is an issue that involves all of the City of Geneva: the preservation and repurposing of the historic blacksmith shop on East State St.

When the developer acquired this property, they were quoted in the Daily Herald as recognizing the historic importance of this building and they stated their intention to preserve it. When they demolished the rest of the old Mill Race Inn they took great care to preserve the blacksmith shop which, at that time had been incorporated into the structure of the restaurant.

But then, some time later, they submitted an application to the City to demolish the building. The fact that they submitted their request shortly before Christmas, when people were likely to be distracted by the upcoming holidays, that they knew that the building had no historic preservation protection, and that such a demolition request is frequently issued promptly as a matter of course, one might surmise that they were confident that the request would be granted and the building demolished before preservationists could react.

Fortunately, a concerned citizen learned of the application and worked almost overnight to submit an application to Landmark the old building. That, of course, halted any action to demolish it. The building was then granted Landmark status by HPC and the City Council.

Since then the developer has made many attempts to get the City to revoke the landmark status of the building. In each case the City has firmly rejected each request. And now they are trying yet once again to get the City to reverse itself and once again the HPC has unanimously ejected their request.

We don't understand their reasoning for committing so much time and money over the years in their repeated attempts to get the City to change its mind, but at this point their submitting yet another request seems almost abusive.

This developer has successfully and creatively restored numerous historic buildings in Geneva. These include The Herrington Inn complex, The Riverside Banquets complex, and The Dodson Place complex. Compared with these developments the blacksmith shop is a very small project. In a city that prides itself on historic preservation as an important aspect of its "brand" it would be a shame for the City to cave and allow this building to be demolished now.

We ask you to once again deny the request to demolish this historic structure and to support an honest effort on the part of the developer to restore and repurpose it.

Most sincerely,

Colin C. and Glorianne S. Campbell  
18 S. 6th. St.  
Geneva, IL

Mr. Leahigh,

Thank you for taking the time to meet with us last Sunday.

As you mentioned, I think at this time we should see how the upcoming HPC meeting goes.

Stay warm this weekend!

-Billy

Anaïs --

That would be fabulous. I'm wondering, though, if it would be best to wait until after Shodeen presents its case, which will be in their petition for demolition and presentation to the Historic Preservation Commission next Tuesday. We'll then have more information about whether, when and how to move forward.

Also after next week, a decision could be made on my possible meeting with David Pazelt to show and discuss the model, as we discussed. Perhaps that should occur before a presentation to the City council. I just don't know the best strategy until after this coming week.

Dear Alderspersons Bowring and Malecki,

Thank you again for your visit on Sunday. I'm glad that we could get together to preview the architectural model of the Alexander brothers' foundry and blacksmith shop and to discuss related issues.

I'll keep in touch, and probably contact you after the Historic Preservation Commission holds its hearing next week. We'll know by then what's in the newest petition for demolition and what the commissioners have to say about it.

I appreciate your time. I think this is important for the community.

**Subject:** RE: Special City Council Meeting - Monday, January 12, 2026

Good Morning Mayor & City Council (bcc'd):

I have received questions regarding 4 E. State Street from various Council members. As is the practice, I am providing the answers to the entire City Council.

***Previous meeting dates regarding 4 E. State Street:***

Please see page 2 of the staff report (page 21 of [this meeting packet](#)) for a summary of prior meetings including the landmark nomination, charrette, landmark boundary amendment, and demolition request.

***Previous discussions about integrating the structure into future projects:***

The short answer is that Shodeen was presenting this information to support their previous request for demolition, claiming that they met standard 3 and that the "retention of the structure would cause the owner undue economic hardship". The plan to adaptively reuse the structure was submitted with a detailed proforma to show the high cost per square foot to bring the building to a habitable condition and the low return on that investment. The HPC and CC denied demolition based on economic hardship because the applicant did not factor in that the structure as part of a larger redevelopment site where TIF assistance is needed, and concluded (with the help of a 3<sup>rd</sup> party consultant review the proforma) that preserving the structure as part of a larger redevelopment site with TIF assistance would not cause undue economic hardship.

Thank you, wishing you all a safe and Happy New Year!

Good morning Mayor & City Council (bcc'd):

Please mark your calendars for a Special City Council Meeting on **Monday, January 12, 2026**. A summary of the meeting purpose has been provided below by Director DeGroot.

*On December 16<sup>th</sup> the Historic Preservation Commission unanimously voted to deny the demolition of the historic landmark located at 4 E State Street. On December 17<sup>th</sup> the applicant requested an appeal of the decision. The ordinance requires that the appeal be considered by the City Council within 30 days. A special City Council meeting will be held on January 12<sup>th</sup> where both the applicant and the historic preservation commission will have the right to be heard. A reversal or modification of the commission's determination requires not less than 2/3 of the alderpersons holding office.*

*Information on the case can be found on the [development projects page](#) and in the [agenda center](#).*

Please do not hesitate to reach out with any questions.

Thank you,

Alex

**Subject:** vote no to petition to demolish historic Blacksmith shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello,  
I am contacting you to encourage you to say no to the most recent petition from the Shodeen group to demolish the Blacksmith Shop on the site of the previous Mill Race Inn property. The Historical Preservation Committee has denied this request on multiple occasions. I implore to honor their sound reasoning for this and uphold their decision. In a recent HPC meeting, the following was stated:

"In its arguments in front of the HPC, the owner noted that a large number of letters supporting demolition had been submitted to the HPC and therefore met criterion four in 10-6-10-B of the city code, "The retention of a building, structure, object, improvement or site **is not in the best interest of the majority of the community.**" Nothing materially had changed in the demolition request since the owner's last request in 2023, according to the HPC, other than the growing fine the owner is incurring for violating Geneva's building maintenance code. Furthermore, the HPC determined it was not the best body to determine what is in the best interest of the community. For these reasons, the HPC denied the demolition request."

**Shodeen shot down in showdown: Judge affirms Geneva ruling on 1840s blac...**

Kane County Circuit Judge Elizabeth Flood ruled this week that Geneva developer Shodeen Group cannot evade the c...

There are many reasons to uphold the HPC decision. In support of them, I provide the following rationale:

1. The good work of the HBC makes it clear that the Shodden/Patzelt have not been honest with Geneva for years. The company has changed, plans have been changed, *they have made no effort to pay their \$300K fine, even though there is a court order to do so*. I am confused as to why a public entity is allowed to disregard the law and why the local governing body allows this. Collected fines could be used to repair/save the structure. They made it clear at the last HBC meeting that they would not fix the building or pay the fines, as ordered. It seems clear their strategy is to win by petition or until the building falls down. Ignoring the law will pay off and set a clear and dangerous precedent.
2. The claim that the "majority of the community" sees the structure as needing to go was based on zero evidence. None could be produced at the HBC meeting. When asked about the "eye-sore" argument, that also fell flat as why weren't other vacant buildings (Campana, Little Owl) being demolished? This was an empty argument (although clearly some people would see it demolished.).
3. Why destroy this building/site when there is no clear offer of a plan for what will replace it? Will it come to sit vacant like the lot on the corner of Wilson and Washington in Batavia? The lot that once held a historic church and that was demolished for what? Bad or no planning dictates failure.
4. Historical structures having meaning in place. The historic house removed to make way for the "Roosevelt" on 38 is now a residence over on E. Side Dr. It has lost all meaning as a historical structure. Now the space and area it once occupied are ahistorical. Demolition of the Shop will accomplish the demolition of the area as a historical area, period. This, it seems, was not part of that original plan - Shodden himself (quoted in the Tribune in 2014) was supposedly dedicated to working with/preserving historical sites.
5. The Shodeen/Patzelt group has not pursued any available funding from historical societies. There are grants available from a number of resources that have been mentioned to this group at a previous HPC meeting *by representatives from the state historical entities*. These suggestions and resources have been blatantly ignored.
6. Why destroy a historical building and site if we have no idea what will replace it and if those plans will even move forward with IL State approval? It is on a floodplain, would require allowances for ingress and egress for two state highways, and no environmental impact study has been completed. Until these items are completed, why is a "possible construction project" even being considered?

I have sat through most of the petitions and heard arguments for and against. I cannot see how Shodden/Patzelt's most recent series of arguments have changed anything. I strongly encourage you, therefore, to say no to the demolition of this building without further effort from the owner. Geneva claims to be a historical community. It is time to keep history from being destroyed.

Respectfully,  
Erica Eysturlid

Dear Erica,  
Thank you very much for your thoughtful note regarding this evening's vote on the Blacksmith Shop. I appreciate your comments and insights, and hope you will be able to join us this evening.  
Very best to you,  
Mark Reinecke

**Subject:** vote no to petition to demolish historic Blacksmith shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello,  
I am contacting you to encourage you to say no to the most recent petition from the Shodeen group to demolish the Blacksmith Shop on the site of the previous Mill Race Inn property. The Historical Preservation Committee has denied this request on multiple occasions. I implore to honor their sound reasoning for this and uphold their decision. In a recent HPC meeting, the following was stated:

"In its arguments in front of the HPC, the owner noted that a large number of letters supporting demolition had been submitted to the HPC and therefore met criterion four in 10-6-10-B of the city code, "The retention of a building, structure, object, improvement or site **is not in the best interest of the majority of the community.**" Nothing materially had changed in the demolition request since the owner's last request in 2023, according to the HPC, other than the [growing fine the owner is incurring for violating Geneva's building maintenance code](#). Furthermore, the HPC determined it was not the best body to determine what is in the best interest of the community. For these reasons, the HPC denied the demolition request."

There are many reasons to uphold the HPC decision. In support of them, I provide the following rationale:

1. The good work of the HBC makes it clear that the Shodden/Patzelt have not been honest with Geneva for years. The company has changed, plans have been changed, *they have made no effort to pay their \$300K fine, even though there is a court order to do so*. I am confused as to why a public entity is allowed to disregard the law and why the local governing body allows this. Collected fines could be used to repair/save the structure. They made it clear at the last HBC meeting that they would not fix the building or pay the fines, as ordered. It seems clear their strategy is to win by petition or until the building falls down. Ignoring the law will pay off and set a clear and dangerous precedent.
2. The claim that the "majority of the community" sees the structure as needing to go was based on zero evidence. None could be produced at the HBC meeting. When asked about the "eye-sore" argument, that also fell flat as why weren't other vacant buildings (Campana, Little Owl) being demolished? This was an empty argument (although clearly some people would see it demolished.).
3. Why destroy this building/site when there is no clear offer of a plan for what will replace it? Will it come to sit vacant like the lot on the corner of Wilson and Washington in Batavia? The lot that once held a historic church and that was demolished for what? Bad or no planning dictates failure.
4. Historical structures having meaning in place. The historic house removed to make way for the "Roosevelt" on 38 is now a residence over on E. Side Dr. It has lost all meaning as a historical structure. Now the space and area it once occupied are ahistorical. Demolition of the Shop will accomplish the demolition of the area as a historical area, period. This, it seems, was not part of that original plan - Shodden himself (quoted in the Tribune in 2014) was supposedly dedicated to working with/preserving historical sites.
5. The Shodeen/Patzelt group has not pursued any available funding from historical societies. There are grants available from a number of resources that have been mentioned to this group at a previous HPC meeting *by representatives from the state historical entities*. These suggestions and resources have been blatantly ignored.
6. Why destroy a historical building and site if we have no idea what will replace it and if those plans will even move forward with IL State approval? It is on a floodplain, would require allowances for ingress and egress for two state highways, and no environmental impact study has been completed. Until these items are completed, why is a "possible construction project" even being considered?

I have sat through most of the petitions and heard arguments for and against. I cannot see how Shodden/Patzelt's most recent series of arguments have changed anything. I strongly encourage you, therefore, to say no to the demolition of this building without further effort from the owner. Geneva claims to be a historical community. It is time to keep history from being destroyed.

Respectfully,  
Erica Eysturlid

**Subject:** Re: vote no to petition to demolish historic Blacksmith shop

Hi Erica

This is the only email that I have on this account. You mentioned that you text me also. I could not find any text messages . I would like you to resend the text to 6303637854.

I do respond to people in Geneva that reach out to my email or text. Some questions are directed to multiple people and if someone else sends the question to the responsible party, I usually do not duplicate the message. I also talk to people while out in the community.

I would be available to meet with you to talk about the Mill Race Inn or any other issues.

Thanks

Larry Furnish

Good Morning Mayor & City Council (bcc'd):

I have received questions regarding 4 E. State Street from various Council members. As is the practice, I am providing the answers to the entire City Council.

**Previous meeting dates regarding 4 E. State Street:**

Please see page 2 of the staff report (page 21 of [this meeting packet](#)) for a summary of prior meetings including the landmark nomination, charrette, landmark boundary amendment, and demolition request.

**Previous discussions about integrating the structure into future projects:**

The short answer is that Shodeen was presenting this information to support their previous request for demolition, claiming that they met standard 3 and that the "retention of the structure would cause the owner undue economic hardship". The plan to adaptively reuse the structure was submitted with a detailed proforma to show the high cost per square foot to bring the building to a habitable condition and the low return on that investment. The HPC and CC denied demolition based on economic hardship because the applicant did not factor in that the structure as part of a larger redevelopment site where TIF assistance is needed, and concluded (with the help of a 3<sup>rd</sup> party consultant review the proforma) that preserving the structure as part of a larger redevelopment site with TIF assistance would not cause undue economic hardship.

Thank you, wishing you all a safe and Happy New Year!

Alex

Good morning Mayor & City Council (bcc'd):

Please mark your calendars for a Special City Council Meeting on **Monday, January 12, 2026**. A summary of the meeting purpose has been provided below by Director DeGroot.

*On December 16<sup>th</sup> the Historic Preservation Commission unanimously voted to deny the demolition of the historic landmark located at 4 E State Street. On December 17<sup>th</sup> the applicant requested an appeal of the decision. The ordinance requires that the appeal be considered by the City Council within 30 days. A special City Council meeting will be held on January 12<sup>th</sup> where both the applicant and the historic preservation commission will have the right to be heard. A reversal or modification of the commission's determination requires not less than 2/3 of the alderpersons holding office.*

*Information on the case can be found on the [development projects page](#) and in the [agenda center](#).*

Please do not hesitate to reach out with any questions.

Thank you,

Alex

**Subject:** RE: Special City Council Meeting - Monday, January 12, 2026

Good Morning Mayor & City Council (bcc'd):

I have received questions regarding 4 E. State Street from various Council members. As is the practice, I am providing the answers to the entire City Council.

***Previous meeting dates regarding 4 E. State Street:***

Please see page 2 of the staff report (page 21 of [this meeting packet](#)) for a summary of prior meetings including the landmark nomination, charrette, landmark boundary amendment, and demolition request.

***Previous discussions about integrating the structure into future projects:***

The short answer is that Shodeen was presenting this information to support their previous request for demolition, claiming that they met standard 3 and that the "retention of the structure would cause the owner undue economic hardship". The plan to adaptively reuse the structure was submitted with a detailed proforma to show the high cost per square foot to bring the building to a habitable condition and the low return on that investment. The HPC and CC denied demolition based on economic hardship because the applicant did not factor in that the structure as part of a larger redevelopment site where TIF assistance is needed, and concluded (with the help of a 3<sup>rd</sup> party consultant review the proforma) that preserving the structure as part of a larger redevelopment site with TIF assistance would not cause undue economic hardship.

Thank you, wishing you all a safe and Happy New Year!

Alex

Good morning Mayor & City Council (bcc'd):

Please mark your calendars for a Special City Council Meeting on **Monday, January 12, 2026**. A summary of the meeting purpose has been provided below by Director DeGroot.

*On December 16<sup>th</sup> the Historic Preservation Commission unanimously voted to deny the demolition of the historic landmark located at 4 E State Street. On December 17<sup>th</sup> the applicant requested an appeal of the decision. The ordinance requires that the appeal be considered by the City Council within 30 days. A special City Council meeting will be held on January 12<sup>th</sup> where both the applicant and the historic preservation commission will have the right to be heard. A reversal or modification of the commission's determination requires not less than 2/3 of the alderpersons holding office.*

*Information on the case can be found on the [development projects page](#) and in the [agenda center](#).*

Please do not hesitate to reach out with any questions.

Thank you,

Alex

Sounds fine.

Since I am across the street, I can certainly stop by. I also can bring along a plan that I had prepared that I thought I would share with the Council that provides some initial thoughts on paper of 3 different ideas of the legacy/homage/memory monument, plaque, benches, etc. I won't leave a copy of the plan but as they say, a picture is worth thousand words. The picture certainly helps define pictorially what I was describing when we last met.

Otherwise, if you don't want me to stop in, call my desk phone number which is 630-444-8252

**To:** Lee Eysturlid  
**Subject:** Re: Petition to demolish Geneva's 1840s blacksmith shop

Dear Lee,

Thank you so much for your thoughtful note in support of preserving the Blacksmith Shop. I greatly appreciate your perspectives on this issue. You raise a number of excellent questions regarding what constitutes the "best interest" of the community, how one determines a community's views, and the absence of an alternative plan for evaluation. All give us pause.

Thank you again.

Very best to you,

Mark

**To:** Kilburg, Dean; Furnish, Larry; Reinecke, Mark; Palmquist, Jeff; Paschke, Martha  
**Subject:** Petition to demolish Geneva's 1840s blacksmith shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

This is my plea to you to uphold the good work of Geneva's Historical Preservation Commission (HPC) in its, and ideally your, denial of the request to demolish the 1840s Blacksmith shop.

I quote:

"In its arguments in front of the HPC, the owner noted that a large number of letters supporting demolition had been submitted to the HPC and therefore met criterion four in 10-6-10-B of the city code, "The retention of a building, structure, object, improvement or site **is not in the best interest of the majority of the community.**" Nothing materially had changed in the demolition request since the owner's last request in 2023, according to the HPC, other than the growing fine the owner is incurring for violating Geneva's building maintenance code. Furthermore, the HPC determined it was not the best body to determine what is in the best interest of the community. For these reasons, the HPC denied the demolition request."

The reasons to say no, I would offer, are:

1. The good work of the HBC makes it clear that the Shodden/Patzelt have not been honest with Geneva for years. The company has changed, plans have been changed, they have made no effort to pay their \$300K fine (why not? There was a court order. What happened here? Collected fines could be used to repair/save the structure.). They made it clear at the last HBC meeting that they would not fix the building or pay the fines, as ordered. It seems clear their strategy is to win by petition or until the building falls down. Ignoring the law will pay off and set a clear and dangerous precedent.
2. The claim that the "majority of the community" sees the structure as needing to go was based on zero evidence. None could be produced at the HBC meeting. When asked about the "eye-sore" argument (it's an eyes-sore, don't you know?) that also fell flat in that why weren't other vacant buildings (Capana, Little Owl) being demolished? This was an empty argument (although clearly some people would see it demolished.).
3. Why destroy this building/site when there is no clear offer of a plan for what will replace it? Will it come to sit vacant like the lot on the corner of Wilson and Washington in Batavia? The lot that once held a historic church and that was demolished for what? Bad or no planning dictates failure.
4. The idea of "moving" of a historic structure sounds good, but it clearly robs the site and the building of their historic meaning. Historical structures having meaning in place. The historic house removed to make way for the "Roosevelt" on 38 is now a residence over on E. Side Dr, but does anyone know or care? It has lost all meaning as a historical structure. And now the space and area it once occupied are ahistorical. Demolition of the Shop will accomplish the demolition of the area as a historical area, period. This, it seems, was not part of that original plan - Shodden himself (quoted in the Tribune in 2014) was supposedly dedicated to working with/preserving historical sites.
5. Why do this until we know for sure what will replace it and if those plans will even move forward with IL State approval. It is on a floodplain, for example.

I have sat through most of the petitions and heard arguments for and against. I cannot see how Shodden/Patzelt's most recent series of arguments have changed anything. I strongly encourage you, therefore, to say no to the demolition of this building without further effort from the owner.

Thank you,

Hi Mary,

We are working on the public hearing notification process this week, and it looks like this folder link has been removed or sharing permissions have changed. Is it possible to get the link reactivated so that we can download the digital copy? If not, I can scan the hard copy we have, but I believe the digital copy had a higher image resolution which is useful for reviewers.

Thank you,

Hi Mary,

This looks to be correct, other than two things which I quickly fixed. It does include the check for the Mill Race gazebo, which I removed after speaking with Dave as that is for a different case. It also doesn't include the addition of item 2.i, the cost for site rehabilitation, but I was able to scan that in from the paper copy and include it. I saved the document to my files right away this time so I shouldn't have to reach out for that link again.

Hi Emily:

Here is the link to the final packet delivered on 10/31/25. I believe this is the correct one – 250 pages. I had saved a couple of versions, but this was the final version. If you could confirm this for me that would be great.

**Subject:** RE: Mill Race Demo packet

Hi Mary,

We are working on the public hearing notification process this week, and it looks like this folder link has been removed or sharing permissions have changed. Is it possible to get the link reactivated so that we can download the digital copy? If not, I can scan the hard copy we have, but I believe the digital copy had a higher image resolution which is useful for reviewers.

Thank you,

Hi Emily:

Here is the link to the final packet delivered on 10/31/25. I *believe* this is the correct one – 250 pages. I had saved a couple of versions, but this was the final version. If you could confirm this for me that would be great.

Hi Mary,

This looks to be correct, other than two things which I quickly fixed. It does include the check for the Mill Race gazebo, which I removed after speaking with Dave as that is for a different case. It also doesn't include the addition of item 2.i, the cost for site rehabilitation, but I was able to scan that in from the paper copy and include it. I saved the document to my files right away this time so I shouldn't have to reach out for that link again.

Thank you,

Dave Patzelt with Shodeen will meet with any council members interested in meeting prior to the 1/12 meeting as appropriate (no more than 3). This provides a chance for raising possibly your questions or ideas not appropriate for the special meeting and for Dave to hear your thoughts and share possible ideas for the historic piece. Are you available next week to possible meet?

I was asked and just trying to facilitate communication to find a path forward.

Let me know if interested and possible days that would work next week for you. Thanks.

Hi,

Thanks for your response. What time would work if you are interested in meeting? I'm sure that David would make himself available if you have questions or ideas that might help resolve the development impasse.

**From:** Stood, Emily  
**Sent:** Monday, December 15, 2025 8:44:30 AM  
**To:** 'Dave Patzelt'  
**Subject:** RE: HPC meeting

Good morning,

Our meetings air live on Geneva Broadcast Network, which can be viewed on Comcast Ch. 10, AT&T U-Verse Ch. 99, or the City's YouTube Channel. They are also posted as a recording the day after for viewing after the fact.

**Emily Stood**

Preservation Planner

**Sent:** Friday, December 12, 2025 12:19 PM  
**To:** Stood, Emily <estood@geneva.il.us>  
**Subject:** HPC meeting

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Good afternoon.

Can you tell me if the HPC meetings are broadcasted live or if they are only available as a recording on YouTube?

If broadcasted live, do they get to the link from the HPC Agenda Center?

---

Hi Jeanne:

Thanks much. Because the City's response to this request will likely be replete with legally protected materials, I want to make sure we do not release attorney-client materials accidentally. So, please let me know when we have gathered responsive emails/documents (including responsive personal emails) and I will come review the same to make sure our response is appropriate.

Thanks.

Ron

Ron, this came in earlier today. Alex asked that I forward to legal to review and respond. (I am out of the office next week and the following Monday). Pete (copied here) will search emails and provide the documents to be reviewed for redactions.

With the holiday, this would be due Mon., Jan. 26.

Thanks so much,

**Sent:** Friday, January 16, 2026 12:05 PM  
**To:** foia <[foia@geneva.il.us](mailto:foia@geneva.il.us)>  
**Subject:** FOIA request, Aurora Beacon-News

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Dear FOIA Officer:

Please consider this a freedom of information request for the following records:

All emails sent or received by Dean Kilburg, Mark Reinecke, Anaïs Bowring, William Malecki, Richard Marks, Brad Kosirog, Larry Furnish, Martha Paschke, Amy Mayer, Jeff Palmquist and Kevin Burns between Dec. 1, 2025 and Jan. 16, 2026, that include any of the following search terms in the subject, body or attachments of the email (please do individual searches for these keywords if possible):

"Shodeen"  
"Dave Patzelt"  
"HPC"  
"evidentiary record"

If this search would yield a burdensome amount of results, please contact me, as I am willing to narrow the scope of my request.

Please note: I know of no exemption that would allow these records to not be released, absent pinpoint redactions for private information such as Social Security Numbers. If your agency believes any parts of any records are exempt from disclosure, please provide an explanation to justify the redaction or withholding, and then provide the rest of the records. Please note that statute does not allow your agency to withhold documents in their entirety if only parts of the records may be exempt.

I'm requesting the records in electronic format, if they can be provided in that format. Otherwise, please provide the records in whatever format they are kept.

I am a member of the news media doing research in the public interest and request fees be waived. Please call me if you believe this request will cost more than \$50 to fulfill.

Please contact me with any questions at [mmorrow@chicagotribune.com](mailto:mmorrow@chicagotribune.com) or (312) 237-6299. Thank you very much.

Best,  
Molly Morrow

**Subject:** RE: City of Geneva Community Development; Historic Preservation Commission Meeting - 12/16/2025

Hello Planet Depos,

I am attaching an edited version of the **Historic Preservation Commission Meeting 121625 Full Size 611338 (Corrected)** file which was sent to us last Wednesday, December 24<sup>th</sup>. I just checked and it has the same contents as the file of the same name sent last Friday, December 26<sup>th</sup>. There are still errors in some of the names of the speakers. I highlighted the errors and wrote the correct name in the comments. Additionally, I included the correct spelling for the names of the public comment speakers (which would not have been available to the recorder). Please correct these errors as outlined in my comments, in all versions of this transcript. I only edited the Full Size version but the errors are the same in the condensed and other versions.

Thank you,

**Jessie Malkosky**

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

5th Ward Councilman Reinecke,  
Prior to last weeks city council vote on the above I mistakenly understood I was located in the 1st ward , I wasn't aware the ward maps had changed and I am now in your ward, the 5th ward. Below is my transmittal to who I thought were my council representatives before the vote.  
Since you voted to deny the demolition application appeal, I respectfully ask that you reconsider the vote and bring this matter up to again to the council, and vote to approve the appeal.  
Despite the rhetoric, the reality is the property owners will not and cannot be forced into this ill considered building rehabilitation. We, the citizens of Geneva will be forced to look at this blighted partially demolished building for the indefinite future unless this vote is overturned. If a poll of citizens was to be taken I believe a majority would support the demolition and subsequent development of this property. As with politics it seems to be a small vocal minority has managed to make their voices heard over the number they actually represent.  
Please take the action necessary.

Thank you,

Joel Erickson  
301 Burgess Rd.  
Geneva, IL 60134

\*\*\*\*\*

1st Ward Council Members Bowring and Malecki

I was in attendance at the last Historic Preservation Commission meeting where the commission voted 7-0 to deny the blacksmith shop demolition application that had been submitted by the property owner, a Shodeen controlled entity. My understanding is that Shodeen will be appealing this decision to city council in the near future.

Not withstanding the antagonism shown toward the applicant by the commission, I did not hear a compelling reason for denying the application. Dave Patzelt from Shodeen stated that they would not be restoring the blacksmith shop building and their position has not changed from when the building was designated an historic landmark in 2018.

Their reason was clear, it is not economically feasible to restore the building with architects estimating the restoration cost to be in the \$1000 psf range. The project would entail a new building foundation, rebuilt walls (the current walls would need to be dismantled and rebuilt with new mortar), new doors and windows, interior finish out, roof joists and roof with HVAC, electrical and plumbing.

In essence a new building would be constructed, with the only material remaining from the original building would be the limestone wall blocks reassembled in the new walls. My question how can this reconstructed building than be considered historic.

In the eight years since the historic designation, no third party including the Geneva Park District has shown any interest in incurring the expense of the building restoration. How much longer should this go and why. I'm sure there are certain parties including the lawyers involved in the various litigation who would be happy to see the issue remain unresolved and continue into the future indefinitely. I doubt if the citizens of Geneva that you represent support that.

The building needs to come down and allow the overall development to proceed. To allow the present situation to continue is not acceptable.

Thank you,

Joel Erickson

1st Ward Council Members Bowring and Malecki

I was in attendance at the last Historic Preservation Commission meeting where the commission voted 7-0 to deny the blacksmith shop demolition application that had been submitted by the property owner, a Shodeen controlled entity. My understanding is that Shodeen will be appealing this decision to city council in the near future.

Notwithstanding the antagonism shown toward the applicant by the commission, I did not hear a compelling reason for denying the application. Dave Patzelt from Shodeen stated that they would not be restoring the blacksmith shop building and their position has not changed from when the building was designated an historic landmark in 2018.

Their reason was clear, it is not economically feasible to restore the building with architects estimating the restoration cost to be in the \$1000 psf range. The project would entail a new building foundation, rebuilt walls (the current walls would need to be dismantled and rebuilt with new mortar), new doors and windows, interior finish out, roof joists and roof with HVAC, electrical and plumbing.

In essence a new building would be constructed, with the only material remaining from the original building would be the limestone wall blocks reassembled in the new walls. My question how can this reconstructed building than be considered historic.

In the eight years since the historic designation, no third party including the Geneva Park District has shown any interest in incurring the expense of the building restoration. How much longer should this go and why. I'm sure there are certain parties including the lawyers involved in the various litigation who would be happy to see the issue remain unresolved and continue into the future indefinitely. I doubt if the citizens of Geneva that you represent support that.

The building needs to come down and allow the overall development to proceed. To allow the present situation to continue is not acceptable.

Thank you,

Joel Erickson

Hi Joe

I agree . This has cost the city too much to continue the fight . I watched the meeting . Historical Preservation did not come up with an economical way of saving the shop. There only argument was that they had public support to save the blacksmith shop. But when asked how much support they did not answer .

Thanks for the support to demo .

Larry Furnish

Dear Mr. Erickson,

Thank you for sharing your perspective on the proposed demolition of the historic structure at 4 East State Street. I appreciate hearing from constituents on issues that come before the council, and will take your thoughts into consideration as we review this issue.

Hi Al,

Yes, an appeal has been filed. We don't have an official date for the appeal yet, but that will be announced on the City website when we do. In any case, code gives 30 days for an appeal to be reviewed by council once it is received, so it will be within the month.

Since the public hearing is closed, I've been pointing anyone with comments to their alderpersons. Just wanted to let you know since I know you've been keeping your members updated and included my contact as well! Of course, I can always help answer questions or point people towards resources like meeting videos, but the HPC itself has made their official decision on this application so any comment on the appeal is more for City Council at this point.

Thanks, and happy holidays if I don't hear from you!

Hi Emily,

In an article in the Kane County Chronicle last week, David Patzelt indicated that he intended to appeal HPC's denial of a demolition permit on December 16, 2025. Has the appeal been filed, and when would you expect it to come before the City Council?

Thanks!

**Subject:** RE: 4 East State Street letters from the public

Good morning,

The materials posted online include everything that was received by the City up to the point of their posting. The letter you attached was received by the City yesterday, after the application materials were posted. I attached a screenshot with a timestamp to allay your concerns.

Typical practice is to post letters in a compiled set for efficiency and to make those materials more clear for community members. In following that practice, any additional letters we receive, including the one you attached, will be posted in a set next week before the meeting.

Of course, continue to send any additional letters you would like to be included, and those will be added to that list.

Good morning.

I was provided a copy of another letter that was apparently sent to the HPC on 12/2/25. I did not see this letter posted on the City website. A copy is attached. This made me wonder if there are other letters that have been sent to the HPC that are not on the website or included in the record. Is there some way to verify or confirm that all letters have been provided for the public?

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Good morning.

Not to push or pressure the city in their review of the application for the demolition of the gazebo at the former Mill Race site, as some of you may be aware, Shodeen has submitted a different application for demolition of the stone remnant structure again as well. I would hope that we could obtain the gazebo demolition soon so that it does not get wrapped up in the debate/discussions of the stone remnant structure application process with the public at large. Is there any estimated schedule of the review and response to the gazebo demolition permit application?

Thank you in advance.

Dave

**Subject:** RE: 4 E State St - Kane County Stormwater Worksheet

Dave,

The request to review the applicability of the Kane County stormwater review has been completed.

The Kane County Stormwater Ordinance allows for nine (9) exemptions as to what "Development" does not include:

**Development**, however, does not include:

- A. **Site Maintenance** and repair of existing **Buildings** or facilities located outside of the **Floodplain**;
- B. **Site Maintenance** of existing parking lots, pedestrian trails and bikeways outside the **Floodplain** provided that no new **Impervious Areas** are added, there is no increase in peak flows, and there is no change in the location of the stormwater discharge;
- C. **Site Maintenance**, including resurfacing of streets and highways outside the **Floodplain**;
- D. **Site Maintenance**, including resurfacing of publicly owned streets and highways within the **Floodplain** provided the difference between the elevation of the road surface after resurfacing and the elevation of the road surface on the **Effective Date** is not more than two inches (2");
- E. Maintenance of existing **Stormwater Management Measures** (e.g. sediment removal, shoreline stabilization, etc.), to restore to or improve: 1) the permitted function and condition, or 2) if completed prior to the **Effective Date** of this Chapter, the verifiable constructed function and condition;
- F. Paving over an existing permitted or grandfathered **Impervious Area**, provided no change in peak discharge or location of discharge;
- G. For agricultural uses, maintenance of existing drainage systems for the limited purpose of maintaining cultivated areas and crop production;
- H. For agricultural uses, improvements undertaken pursuant to a written **NRCS** conservation plan provided they are outside of the **Floodplain**; and
- I. Plowing, cultivation and similar agricultural practices that do not involve filling, grading or the construction of levees.

Removal of a structure is not included within the above listed exemptions. Therefore, a stormwater review is applicable and that a deposit escrow would also be applicable within existing City standards.

While I understand that this is the desired outcome, once the escrow has been secured then the review process can begin.

Dave,

Your request that the Kane County Stormwater Ordinance is not applicable to your project will be reviewed as resources allow.

When that determination has been made, you will be advised on the status of the project review.

**Subject:** RE: 4 E State St - Kane County Stormwater Worksheet

Hi Dave,

The escrow is pursuant to Title 13, Flood Control, specifically 13-2-2.3.B [https://library.municode.com/il/geneva/codes/code\\_of\\_ordinances?nodeId=TIT13FLCO](https://library.municode.com/il/geneva/codes/code_of_ordinances?nodeId=TIT13FLCO)

The Kane County Stormwater Ordinance requires that we review this site for a Floodplain Permit as indicated previously. The escrow is provided to cover the costs of the review. Once the project is completed, the remaining escrow (less the costs of the review) is returned. Kane County's ordinance is available for your review on their website: <https://www.kanecountyil.gov/fder/pages/environmentalresources/waterresources/stormwater.aspx>

Thanks,  
Brian

Per Step 5 in the attached worksheet and discussion with our stormwater consultant, please have Shodeen provide a \$2500 escrow to Finance referencing this address, and provide a floodplain submittal for our review. WBK indicated because it is only demo and no fill it should be fairly straightforward, but we do want to issue a permit.

Lisa,

No worries! I didn't expect any quick responses last week.

That's perfect that you're already planning on being there. I'm attaching the script that Jewel used during the last appeal, if that's helpful in making up a new script. Happy to help pull together an updated version for this time around if you'd like. I can always hop on a call or set up a meeting if that's easier as well. I think the goal would be similar to the HPC meeting in making sure we really stick to the current application and emphasize everyone's conclusions from the meeting.

Either way, I'll keep you updated if anything changes as we get closer to the meeting!

Thank you,

Hi Lisa,

Hope you're doing well, and that your holiday season has been good! I have an ask for you.

As you know, the appeal was submitted for 4 E State Street, and will be going before the City Council on January 12. The HPC has a right to give a statement at this meeting, along with the applicant. Paul is not available to attend the meeting, so we're looking for another member to attend and make that statement. Would you be available to speak at the meeting? You would basically have to read off a summary of the conclusions you all reached when the demolition was denied on the 16<sup>th</sup>. We thought you would be great because you have experience with this project and you have a knack for summing things up well in meetings. I would of course be happy to talk with you about the meeting process or a statement before hand as well. If you're not available, just let me know and I can ask someone else.

Thank you in advance!

Dave,

Yes, this would need to go before HPC. The due date for materials for the 1/21/2026 meeting was 1/6/2026, so adding this proposal would not be possible for the January meeting, and would have to be considered for a later date.

D?ave Patzelt with Shodeen is meeting with any council members interested in meeting prior to the 1/12meeting as appropriate (no more than 3). This provides a chance for raising your questions not appropriate for the special meeting and for Dave to share possible ideas for the historic piece. Are you available next week during an afternoon? There is a meeting set for 1/5 at 1:30 and another 1/7 at 1:30. Would either work or a possible time for you that would? I'm just trying to facilitate communication to find a path forward. Let me know...

**Subject:** Petition to demolish Geneva's 1840s blacksmith shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:  
This is my plea to you to uphold the good work of Geneva's Historical Preservation Commission (HPC) in its, and ideally your, denial of the request to demolish the 1840s Blacksmith shop.

I quote:

"In its arguments in front of the HPC, the owner noted that a large number of letters supporting demolition had been submitted to the HPC and therefore met criterion four in 10-6-10-B of the city code, "The retention of a building, structure, object, improvement or site **is not in the best interest of the majority of the community.**" Nothing materially had changed in the demolition request since the owner's last request in 2023, according to the HPC, other than the growing fine the owner is incurring for violating Geneva's building maintenance code. Furthermore, the HPC determined it was not the best body to determine what is in the best interest of the community. For these reasons, the HPC denied the demolition request."

The reasons to say no, I would offer, are:

1. The good work of the HBC makes it clear that the Shodden/Patzelt have not been honest with Geneva for years. The company has changed, plans have been changed, they have made no effort to pay their \$300K fine (why not? There was a court order. What happened here? Collected fines could be used to repair/save the structure.). They made it clear at the last HBC meeting that they would not fix the building or pay the fines, as ordered. It seems clear their strategy is to win by petition or until the building falls down. Ignoring the law will pay off and set a clear and dangerous precedent.
2. The claim that the "majority of the community" sees the structure as needing to go was based on zero evidence. None could be produced at the HBC meeting. When asked about the "eye-sore" argument (it's an eyes-sore, don't you know?) that also fell flat in that why weren't other vacant buildings (Capana, Little Owl) being demolished? This was an empty argument (although clearly some people would see it demolished.).
3. Why destroy this building/site when there is no clear offer of a plan for what will replace it? Will it come to sit vacant like the lot on the corner of Wilson and Washington in Batavia? The lot that once held a historic church and that was demolished for what? Bad or no planning dictates failure.
4. The idea of "moving" of a historic structure sounds good, but it clearly robs the site and the building of their historic meaning. Historical structures having meaning in place. The historic house removed to make way for the "Roosevelt" on 38 is now a residence over on E. Side Dr, but does anyone know or care? It has lost all meaning as a historical structure. And now the space and area it once occupied are ahistorical. Demolition of the Shop will accomplish the demolition of the area as a historical area, period. This, it seems, was not part of that original plan - Shodden himself (quoted in the Tribune in 2014) was supposedly dedicated to working with/preserving historical sites.
5. Why do this until we know for sure what will replace it and if those plans will even move forward with IL State approval. It is on a floodplain, for example.

I have sat through most of the petitions and heard arguments for and against. I cannot see how Shodden/Patzelt's most recent series of arguments have changed anything. I strongly encourage you, therefore, to say no to the demolition of this building without further effort from the owner.

Thank you,  
Lee W. Eysturlid

**Subject:** Petition to demolish Geneva's 1840s blacksmith shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:  
This is my plea to you to uphold the good work of Geneva's Historical Preservation Commission (HPC) in its, and ideally your, denial of the request to demolish the 1840s Blacksmith shop.

I quote:

"In its arguments in front of the HPC, the owner noted that a large number of letters supporting demolition had been submitted to the HPC and therefore met criterion four in 10-6-10-B of the city code, "The retention of a building, structure, object, improvement or site **is not in the best interest of the majority of the community.**" Nothing materially had changed in the demolition request since the owner's last request in 2023, according to the HPC, other than the growing fine the owner is incurring for violating Geneva's building maintenance code. Furthermore, the HPC determined it was not the best body to determine what is in the best interest of the community. For these reasons, the HPC denied the demolition request."

The reasons to say no, I would offer, are:

1. The good work of the HBC makes it clear that the Shodden/Patzelt have not been honest with Geneva for years. The company has changed, plans have been changed, they have made no effort to pay their \$300K fine (why not? There was a court order. What happened here? Collected fines could be used to repair/save the structure.). They made it clear at the last HBC meeting that they would not fix the building or pay the fines, as ordered. It seems clear their strategy is to win by petition or until the building falls down. Ignoring the law will pay off and set a clear and dangerous precedent.
2. The claim that the "majority of the community" sees the structure as needing to go was based on zero evidence. None could be produced at the HBC meeting. When asked about the "eye-sore" argument (it's an eyes-sore, don't you know?) that also fell flat in that why weren't other vacant buildings (Capana, Little Owl) being demolished? This was an empty argument (although clearly some people would see it demolished.).
3. Why destroy this building/site when there is no clear offer of a plan for what will replace it? Will it come to sit vacant like the lot on the corner of Wilson and Washington in Batavia? Dean,

Several other alderpersons have made me aware and inquired whether I'd be attending a meeting that you've organized with Dave Patzelt. My response is simple, I was not invited or made aware of this meeting.

Can you fill me in or did you exclude me for a reason?

Thanks,  
Amy

Dave Patzelt with Shodeen will meet with any council members interested in meeting prior to the 1/12 meeting as appropriate (no more than 3). This provides a chance for raising possibly your questions or ideas not appropriate for the special meeting and for Dave to hear your thoughts and share possible ideas for the historic piece. Are you available next week to possible meet?

I was asked and just trying to facilitate communication to find a path forward.

Let me know if interested and possible days that would work next week for you. Thanks.

From the Aurora Beacon-News:

## Geneva commission again denies demolition request for landmarked structure at old Mill Race Inn site

Linda Girardi/The Beacon-News

The remains of a limestone structure at 4 E. State St. in Geneva on the northern edge of the former Mill Race Inn property are seen in a photo from 2023. (Linda Girardi/For The Beacon-News)

By [Molly Morrow](#) | [mmorrow@chicagotribune.com](mailto:mmorrow@chicagotribune.com) | Aurora Beacon-News

PUBLISHED: December 26, 2025 at 6:00 AM CST

Some say it's an eyesore. Others appeal to its history. Some want to see it repurposed, others call for its demolition.

But before it became a site for public debates, the limestone structure at 4 E. State St. [had](#) many lives, according to the city of Geneva: it was a blacksmith shop in the 1840s, a carriage painting shop shortly after the turn of the 20th century and was part of the property of a longstanding Geneva restaurant that operated from the 1930s until it shuttered in 2011.

In more recent years, what remains of the limestone building on the northern edge of the former Mill Race Inn property has been a source of contention in Geneva. Its owner has on several occasions appealed to the city to tear it down, the city has denied its requests, and preservationists have joined the mix in attempts to keep it standing.

Last week, the city's Historic Preservation Commission unanimously shot down another request by Dave Patzelt, the president of Geneva-based Shodeen Group, to demolish the structure.

Its future remains uncertain, however, as Shodeen has already filed an appeal of the commission's decision, meaning the Geneva City Council could still override the commission and vote to allow demolition. Discussion at the Dec. 16 meeting also led to a number of calls for redeveloping the property — another matter that's come before the city in the past.

These debates about the structure at the former Mill Race Inn property in downtown Geneva have been years in the making.

According to the city, the limestone building [was](#) first the Alexander Brothers' Blacksmith Shop in the mid-19th century. Among other things, it later was used as a wagon manufacturing and blacksmithing shop, a cooperage and a carriage painting shop.

The site of the property later was incorporated into an iconic restaurant, the Mill Race Inn.

After almost 80 years, the Mill Race Inn closed in 2011, and the property [was eventually acquired](#) by Geneva-based development company Shodeen Group. Demolition of most of the property [began](#) in 2016. At the time, city officials [said](#) the developer would evaluate the 1840s-era limestone sections to determine if the structure could be considered a historic landmark or be incorporated within any future development of the property.

In 2017, Shodeen [looked to demolish](#) the limestone building that had been part of the restaurant property, but the matter was put on hold early in 2018 after a Geneva resident [moved to get it designated as a historic landmark](#).

Later that year, the building [got](#) a landmark designation from the city, and preservationists advocated for repurposing the site for another use.

A residential development at the site [was considered](#) in 2019, but [later rejected](#) by the Geneva City Council.

Fast forward a few years, the Shodeen Family Foundation again requested permission to demolish the building, but it [was unanimously shot down](#) by the city's Historic Preservation Commission. Following an appeal by the developer, the City Council [affirmed](#) the commission's decision in 2023.

Later that year, the city [cited](#) the property owner for code violations, per documents from the city, and a ruling was made on the case in September 2025 in the city's favor, requiring that the building be made weather-tight.

Then, in recent months, Shodeen made a request for demolition again. The [application](#) by Patzelt claims that the stone structure "stands in the way of" redevelopment goals for the property and that "no positive impacts have been accomplished" in the eight years of discussions regarding the structure. The application asks the city to consider the demolition request on the grounds that the structure "is not in the best interest of the majority of the community."

At the Dec. 16 meeting Patzelt noted that, previously, part of the hold on the future of the building was to give residents additional time to find something that could be done with the structure.

"I would suggest that, whatever amount of time, that time has passed," Patzelt said. "It's been long enough. There's been several different attempts ... whether it's to find a buyer, to move the structure, to find somebody that is interested in renovating the structure or ... using it for some specific use."

He argued that the cost to repair the structure is in excess of what it's worth.

"The time has come that we need to make some further decisions on it," he said.

Several of the commissioners offered their opinions on the request at last week's meeting, and considered what the future of the property might look like.

Commissioner Jewel Jensen — pointing to the portion of Shodeen's application related to a failed stakeholder input initiative about the site — suggested that taxpayer-funded efforts to determine the property's future were not successful because the owner didn't ultimately submit development plans for approval, has not protected the structure from the elements and has not agreed to work with a study group about the site.

Jensen also noted the fine the owner has incurred from the city, questioning whether the city would have to pay it if the demolition request were to be approved.

Jensen also asked about the ownership, and Patzelt clarified that the property is no longer owned by Shodeen itself, but by the Mill Race Land Company, LLC. Shodeen [remains listed](#) as the contractor on the original application for demolition from October.

Some of the response to the request for demolition centered around the criticism that there had been no significant change since the last time Shodeen came to the city asking to tear down the structure.

"I just want to make clear ... that nothing has changed since 2023 in August when this commission denied demolition, with the exception of, I'm assuming, additional letters that are in favor of demolition being submitted to the commission," said Commissioner Kevin Phillips.

Patzelt said he would "admit that there's maybe no change," but reiterated that there had been a request for more time, more time had been given, and no solution has since materialized.

Phillips argued that, because that request for additional time didn't come from the commission, it was "irrelevant" from anything being different from its latest decision in 2023.

"Since that time, Shodeen has done nothing except drag the city into hearings in courts and question the (commission's) decision, and, in the meantime, has allowed that building to deteriorate such, to the point where, now, maybe many people in ... the community view it as an eyesore," Phillips said. "You're asking us to approve a demolition that basically is based on an eyesore that you've created."

Patzelt said he doesn't think much has changed from deterioration.

Commissioner Lisa McManus suggested that there should have been work on a development plan for the property.

"It's just not a property, right now, that's in good shape," she said. "And the reality is that we need, rather than have these conversations about taking the building down, for years we could've just presented something ... Shodeen could be making money on this property, but yet here we are entertaining another demo request."

Patzelt said that, to do so, Shodeen would need to know what is to be done with the structure in order to make a redevelopment plan.

And Commissioner Mike Riebe asked whether, if the structure must remain, Shodeen plans to let the property sit as is, rather than develop the site.

Patzelt said they would, and noted that structural engineers have said the walls and footings are not capable of sustaining any additional load, so they couldn't put an addition on the building.

During the meeting, a number of residents — split between those in favor and those against demolition — also advanced their suggestions about the site and what they hoped would come of it.

Several of those opposed to demolition spoke of their hopes that the site would ultimately be redeveloped.

"If the (commission) were to deny this demolition application, there is an opportunity for the former blacksmith shop to be part of a larger redevelopment at a minimal cost to the property owner," said Al Watts, the community engagement director of local nonprofit Preservation Partners of the Fox Valley. "Collaboration between the public and the owner with that goal in mind would likely accomplish something the community could be proud of that both honors the legacy of Geneva's industrial past and stimulates Geneva's future."

Alan Leahigh, of Geneva, said Shodeen is bringing forward a "false choice" between keeping the structure or demolition, suggesting that efforts to restore or redevelop the building would be "much more favorably received" by the community.

And Lee Eysturlid, who said he lives across the street from the structure, said whether the building is an "eyesore" is subjective, and criticized the "stonewalling of the process" as setting a precedent for the future. He also spoke about his view on preservation, including what the future of the site could end up as.

"It's not just the present of the history ... that you preserve, but it's the future of the history you preserve," Eysturlid said. "And it's not just the building, it's the space. And by removing the building, you open this space up to a six-story monolith. And I know that's not part of the point, but it is the point, because history is also into the future. Otherwise, why are we preserving anything?"

Some individuals from the area felt otherwise, criticizing in particular the impact the deteriorating structure has on the neighborhood and the city's economic position.

Herb Nachreiner, of Elgin, said that even decades ago, the blacksmith shop "was a piece of junk, and it's even worse today." He noted that the site is essentially the gateway to Geneva's business district, and that businesses "never get a second chance at a first impression."

"Move on," Nachreiner said. "We're beating a dead horse with this building."

Similarly, Patrice Bertheau, of Geneva, pointed out that there is "no progress being made" on the property, and it is having an impact on "neighborhood pride and economic potential, as it discourages investment and tourism."

Another nearby resident of the structure, Ed Streibig, said he hopes there will be a sidewalk by the site for safety reasons, and that he is "here looking for progress."

"When I think about progress, the quickest way to progress seems like demolition," Streibig said. He suggested taking the stone blocks from the structure and incorporating them into a new structure.

Ultimately, after the public hearing on the proposal for demolition, the commission again considered the possibility, but ultimately landed in opposition to Patzelt's request.

Riebe said they haven't gotten a "good faith proposal" for redeveloping the site and suggested that Shodeen has just been "waiting and waiting and waiting to strongarm — whether it's us or City Council to give in, give them what they want."

"The differences between the petition ... to demo a few years ago versus today is that the property has sat longer," McManus added.

The commission also considered how it could judge what the consensus from the community is, and Jensen suggested that the owner and community don't have to be in opposition going forward.

"I believe that we can come to a solution if we do work together on this," Jensen said.

The commission ultimately unanimously shot down the demolition permit request on Tuesday.

But Patzelt, in an email to The Beacon-News, says an appeal has been filed with the City Council, which the city also confirmed. A city spokesman said the date the council will consider the matter has not yet been determined.

The City Council has the ability to uphold, amend or reverse the commission's decision, Historic Preservation Commission Chair Paul Zellmer noted at the Dec. 16 meeting.

Per the city, the council [must vote](#) on the commission's determination within 30 calendar days of an appeal being made. A reversal or modification of the commission's decision requires a two-thirds majority of the aldermen.

## Geneva commission again denies demolition request for landmarked structure at old Mill Race Inn site

Linda Girardi/The Beacon-News

The remains of a limestone structure at 4 E. State St. in Geneva on the northern edge of the former Mill Race Inn property are seen in a photo from 2023. (Linda Girardi/For The Beacon-News)

PUBLISHED: December 26, 2025 at 6:00 AM CST

Some say it's an eyesore. Others appeal to its history. Some want to see it repurposed, others call for its demolition.

But before it became a site for public debates, the limestone structure at 4 E. State St. [had](#) many lives, according to the city of Geneva: it was a blacksmith shop in the 1840s, a carriage painting shop shortly after the turn of the 20th century and was part of the property of a longstanding Geneva restaurant that operated from the 1930s until it shuttered in 2011.

In more recent years, what remains of the limestone building on the northern edge of the former Mill Race Inn property has been a source of contention in Geneva. Its owner has on several occasions appealed to the city to tear it down, the city has denied its requests, and preservationists have joined the mix in attempts to keep it standing.

Last week, the city's Historic Preservation Commission unanimously shot down another request by Dave Patzelt, the president of Geneva-based Shodeen Group, to demolish the structure.

Its future remains uncertain, however, as Shodeen has already filed an appeal of the commission's decision, meaning the Geneva City Council could still override the commission and vote to allow demolition. Discussion at the Dec. 16 meeting also led to a number of calls for redeveloping the property — another matter that's come before the city in the past.

These debates about the structure at the former Mill Race Inn property in downtown Geneva have been years in the making.

According to the city, the limestone building [was](#) first the Alexander Brothers' Blacksmith Shop in the mid-19th century. Among other things, it later was used as a wagon manufacturing and blacksmithing shop, a cooperage and a carriage painting shop.

The site of the property later was incorporated into an iconic restaurant, the Mill Race Inn.

After almost 80 years, the Mill Race Inn closed in 2011, and the property [was eventually acquired](#) by Geneva-based development company Shodeen Group. Demolition of most of the property [began](#) in 2016. At the time, city officials [said](#) the developer would evaluate the 1840s-era limestone sections to determine if the structure could be considered a historic landmark or be incorporated within any future development of the property.

In 2017, Shodeen [looked to demolish](#) the limestone building that had been part of the restaurant property, but the matter was put on hold early in 2018 after a Geneva resident [moved to get it designated as a historic landmark](#).

Later that year, the building [got](#) a landmark designation from the city, and preservationists advocated for repurposing the site for another use.

A residential development at the site [was considered](#) in 2019, but [later rejected](#) by the Geneva City Council.

Fast forward a few years, the Shodeen Family Foundation again requested permission to demolish the building, but it [was unanimously shot down](#) by the city's Historic Preservation Commission. Following an appeal by the developer, the City Council [affirmed](#) the commission's decision in 2023.

Later that year, the city [cited](#) the property owner for code violations, per documents from the city, and a ruling was made on the case in September 2025 in the city's favor, requiring that the building be made weather-tight.

Then, in recent months, Shodeen made a request for demolition again. The [application](#) by Patzelt claims that the stone structure "stands in the way of" redevelopment goals for the property and that "no positive impacts have been accomplished" in the eight years of discussions regarding the structure. The application asks the city to consider the demolition request on the grounds that the structure "is not in the best interest of the majority of the community."

At the Dec. 16 meeting Patzelt noted that, previously, part of the hold on the future of the building was to give residents additional time to find something that could be done with the structure.

"I would suggest that, whatever amount of time, that time has passed," Patzelt said. "It's been long enough. There's been several different attempts ... whether it's to find a buyer, to move the structure, to find somebody that is interested in renovating the structure or ... using it for some specific use."

He argued that the cost to repair the structure is in excess of what it's worth.

"The time has come that we need to make some further decisions on it," he said.

Several of the commissioners offered their opinions on the request at last week's meeting, and considered what the future of the property might look like.

Commissioner Jewel Jensen — pointing to the portion of Shodeen's application related to a failed stakeholder input initiative about the site — suggested that taxpayer-funded efforts to determine the property's future were not successful because the owner didn't ultimately submit development plans for approval, has not protected the structure from the elements and has not agreed to work with a study group about the site.

Jensen also noted the fine the owner has incurred from the city, questioning whether the city would have to pay it if the demolition request were to be approved.

Jensen also asked about the ownership, and Patzelt clarified that the property is no longer owned by Shodeen itself, but by the Mill Race Land Company, LLC. Shodeen [remains listed](#) as the contractor on the original application for demolition from October.

Some of the response to the request for demolition centered around the criticism that there had been no significant change since the last time Shodeen came to the city asking to tear down the structure.

"I just want to make clear ... that nothing has changed since 2023 in August when this commission denied demolition, with the exception of, I'm assuming, additional letters that are in favor of demolition being submitted to the commission," said Commissioner Kevin Phillips.

Patzelt said he would "admit that there's maybe no change," but reiterated that there had been a request for more time, more time had been given, and no solution has since materialized.

Phillips argued that, because that request for additional time didn't come from the commission, it was "irrelevant" from anything being different from its latest decision in 2023.

"Since that time, Shodeen has done nothing except drag the city into hearings in courts and question the (commission's) decision, and, in the meantime, has allowed that building to deteriorate such, to the point where, now, maybe many people in ... the community view it as an eyesore," Phillips said. "You're asking us to approve a demolition that basically is based on an eyesore that you've created."

Patzelt said he doesn't think much has changed from deterioration.

Commissioner Lisa McManus suggested that there should have been work on a development plan for the property.

"It's just not a property, right now, that's in good shape," she said. "And the reality is that we need, rather than have these conversations about taking the building down, for years we could've just presented something ... Shodeen could be making money on this property, but yet here we are entertaining another demo request."

Patzelt said that, to do so, Shodeen would need to know what is to be done with the structure in order to make a redevelopment plan.

And Commissioner Mike Riebe asked whether, if the structure must remain, Shodeen plans to let the property sit as is, rather than develop the site.

Patzelt said they would, and noted that structural engineers have said the walls and footings are not capable of sustaining any additional load, so they couldn't put an addition on the building.

During the meeting, a number of residents — split between those in favor and those against demolition — also advanced their suggestions about the site and what they hoped would come of it.

Several of those opposed to demolition spoke of their hopes that the site would ultimately be redeveloped.

"If the (commission) were to deny this demolition application, there is an opportunity for the former blacksmith shop to be part of a larger redevelopment at a minimal cost to the property owner," said Al Watts, the community engagement director of local nonprofit Preservation Partners of the Fox Valley. "Collaboration between the public and the owner with that goal in mind would likely accomplish something the community could be proud of that both honors the legacy of Geneva's industrial past and stimulates Geneva's future."

Alan Leahigh, of Geneva, said Shodeen is bringing forward a "false choice" between keeping the structure or demolition, suggesting that efforts to restore or redevelop the building would be "much more favorably received" by the community.

And Lee Eysturlid, who said he lives across the street from the structure, said whether the building is an "eyesore" is subjective, and criticized the "stonewalling of the process" as setting a precedent for the future. He also spoke about his view on preservation, including what the future of the site could end up as.

"It's not just the present of the history ... that you preserve, but it's the future of the history you preserve," Eysturlid said. "And it's not just the building, it's the space. And by removing the building, you open this space up to a six-story monolith. And I know that's not part of the point, but it is the point, because history is also into the future. Otherwise, why are we preserving anything?"

Some individuals from the area felt otherwise, criticizing in particular the impact the deteriorating structure has on the neighborhood and the city's economic position.

Herb Nachreiner, of Elgin, said that even decades ago, the blacksmith shop "was a piece of junk, and it's even worse today." He noted that the site is essentially the gateway to Geneva's business district, and that businesses "never get a second chance at a first impression."

"Move on," Nachreiner said. "We're beating a dead horse with this building."

Similarly, Patrice Bertheau, of Geneva, pointed out that there is "no progress being made" on the property, and it is having an impact on "neighborhood pride and economic potential, as it discourages investment and tourism."

Another nearby resident of the structure, Ed Streibig, said he hopes there will be a sidewalk by the site for safety reasons, and that he is "here looking for progress."

"When I think about progress, the quickest way to progress seems like demolition," Streibig said. He suggested taking the stone blocks from the structure and incorporating them into a new structure.

Ultimately, after the public hearing on the proposal for demolition, the commission again considered the possibility, but ultimately landed in opposition to Patzelt's request.

Riebe said they haven't gotten a "good faith proposal" for redeveloping the site and suggested that Shodeen has just been "waiting and waiting and waiting to strongarm — whether it's us or City Council to give in, give them what they want."

"The differences between the petition ... to demo a few years ago versus today is that the property has sat longer," McManus added.

The commission also considered how it could judge what the consensus from the community is, and Jensen suggested that the owner and community don't have to be in opposition going forward.

"I believe that we can come to a solution if we do work together on this," Jensen said.

The commission ultimately unanimously shot down the demolition permit request on Tuesday.

But Patzelt, in an email to The Beacon-News, says an appeal has been filed with the City Council, which the city also confirmed. A city spokesman said the date the council will consider the matter has not yet been determined.

PUBLISHED: January 14, 2026 at 3:09 PM CST

The landmarked structure at 4 E. State St. in Geneva — part of what was once the Mill Race Inn — will remain for now, after the Geneva City Council on Monday denied an appeal seeking its demolition.

On Monday, the City Council was tasked with whether to overturn [a ruling of the city's Historic Preservation Commission in December](#) that denied a request by Dave Patzelt, president of Geneva-based Shodeen Group, for demolition of the building.

Following a lengthy discussion on Monday evening, the appeal that would allow for demolition failed in a 6-4 vote, with council members Martha Paschke, Mark Reinecke, Anaïs Bowring and William Malecki voting against it. A supermajority of seven or more council members would have been needed to overturn the Historic Preservation Commission's decision.

The City Council vote on Monday is the latest in what has been years of discussion about the structure, [previously part of](#) the Mill Race Inn restaurant, which operated from the 1930s until it shuttered in 2011.

Though perhaps most famously a part of the popular restaurant, the building [existed](#) long before that. It first housed a blacksmith shop in the 1840s, but, before it became part of the longstanding Geneva restaurant, housed a number of other businesses too, such as a wagon manufacturing and blacksmithing shop, a cooperage and a carriage painting shop.

The site [was later acquired](#) by the Shodeen Group, and demolition of most of the property [began](#) in 2016. The 1840s-era limestone sections, at the time, were to be evaluated as to whether they could be considered a historic landmark or be incorporated within any future development of the property.

Since then, what remains of the limestone building — which [was designated](#) as a landmark in 2018 — [weathered](#) multiple requests by its owner to demolish it over the years, none of which were ultimately successful.

Then, in October, Patzelt again [asked](#) the city to demolish the structure. The request for demolition came to the city's Historic Preservation Commission last month, and [was again shot down](#).

The property is no longer owned by Shodeen itself, Patzelt [has said](#), but by the Mill Race Land Company, LLC, though Shodeen Construction Company [remains listed](#) as the contractor on the original application for demolition from October.

Patzelt [appealed](#) to the City Council the day after the Preservation Commission determination was made, meaning the matter went to the City Council for a vote.

The commission's decision in December, and the subsequent appeal by Patzelt, generated a response from some community members — a small group, for example, that was advocating for preservation of the structure completed an architectural model of it and [held a community meeting just days before Monday's City Council meeting](#), making a last-minute pitch to turn the building into a visitor information center.

At Monday's meeting, Geneva Mayor Kevin Burns emphasized that the council's role was not to serve in its usual function but in a “quasi-appellate court capacity.” He discouraged the council from considering any evidence or information beyond that which was considered at the December Historic Preservation Commission meeting.

At the meeting, Patzelt again presented his case for demolition of the structure.

He said that the records included in the application seeking demolition include things like a list of the irreparable and deteriorated building features, a cost estimate for rehabilitating the structure and a narrative on steps that have been taken to potentially relocate it.

He also pointed to the city's previous parameters for using the site, and noted the possibility of the structure being deconstructed and put up somewhere else nearby.

“It has been eight years since we first started talking about this structure,” Patzelt said at Monday's meeting. “And, after over 20 ... public meetings, there has been no progress made by either of these parties involved in this site.”

He pointed to residents speaking out about the issue, and said that he thinks the majority reflect a desire for the structure to be demolished.

Paul Zellmer, the chair of the Historic Preservation Commission, also spoke at Monday's meeting, sharing the commission's reasons for its decision.

Zellmer said that public testimony showed divided views among the community, and “did not establish an objective or measurable basis to conclude that the majority of the community supports demolition.”

He also said that the applicant “did not present concrete development proposals and (demonstrate) that demolition is necessary to achieve community benefit, nor did the record establish reasonable alternatives to the demolition had been exhausted.”

Zellmer also said that deterioration of the structure does not demonstrate that demolition is in the best interest of the community, citing concerns about long-term neglect of the property, and noted that there was concern approving the demolition would “risk establishing precedent inconsistent with the intent of the historic preservation ordinance.”

In response, Patzelt acknowledged that public opinion was divided, but said that the commission was tasked with weighing how public opinion was split, and said he feels the majority are in favor of demolition.

As to the lack of a redevelopment plan, Patzelt said the developer can't prepare one without knowing whether they are allowed to demolish the structure, but that they would do so if granted a demolition permit.

"We are also committed to trying to pay homage or pay some legacy or some documentation — visual, as well as physical — of the historic remnant structure," Patzelt also said at Monday's meeting. He noted the possibility of reincorporating its stone into some kind of directory map that tells the story of the historic blacksmith structure. Patzelt declined The Beacon-News' request for comment on Tuesday about Monday's decision and what's next for the structure.

But, while Monday's vote narrowly came out in favor of the structure remaining, many of the council members shared their frustrations with the status quo when it comes to the structure's current state.

"What remains is a partial remnant that has been significantly altered over time and is no longer functionally or physically connected to that which gave it historic significance," Ald. Brad Kosiog, who voted in favor of demolition, said. "The code does not require preservation at any cost, nor does it require maintaining a structure where reuse is impractical and unsupported by the site's current condition."

Bowring, who voted against demolition, said she came to a different conclusion, arguing that the petitioner did not present sufficient evidence that demolition would be in the community's interest.

"I think a question that remains in my mind and a lot of minds is: what is next?" Bowring asked. "I think that is part of the consideration of community interest."

She suggested that a redevelopment that incorporates the historic structure or a new development were possibilities, and said the fact that the community would like to see changes to the site "is not the standard that they needed to demonstrate in order for (her) to support demolition."

"I don't think that (the developer needs) to feel as stuck as they claim to be absent granting of their demolition request," Bowring said. "That winds up feeling like they are holding this important site hostage and saying that, if you do not give us this demolition request, we will sit on this site for an indefinite period, which is, I think, not in this community's best interest."

Reinecke attributed some of the contentiousness to a conflict between economic development and historic preservation.

"The thing that troubles me about this is that they are seen as being against one another, rather than as an opportunity for solution-focused thinking and collaboration, and it's been that way for some time," he said.

But, though he said he thinks the structure can be preserved and that he doesn't support demolition, Reinecke also noted that the community has grown "impatient."

"All of us would like to see something of value and use placed onto that site," he said. "And it's been taking a long time. And I don't think there's anyone who's (saying), 'Let's just let it float for a bit.' That's not the tone of the community right now."

Malecki, who also voted against allowing demolition, questioned whether the vote was "basically as a matter of convenience to push things forward."

Other council members spoke more favorably of demolition.

Ald. Richard Marks, later in the meeting, suggested that it was "hard to see some practical reuse of the building as it stands now."

And Ald. Dean Kilburg, who said he supports demolition, reiterated that progress needs to be made on the site.

"After eight years, we're not making any progress," Kilburg said, "and I think that contributes to the pushback from the community that something needs to be done, that that's a responsibility now that falls upon us."

But even those who voted in favor of overruling the commission's determination and allowing for demolition acknowledged the community's concerns.

"I can say with clarity there's no clarity," Ald. Jeff Palmquist said. "It really is a split opinion of our residents."

Palmquist said, however, that he would support demolition "with the optimism that we will ultimately get at a better place than we would otherwise if we did not."

"People definitely want something to happen," Ald. Amy Mayer added to the discussion. "What I've been told is that they'd like City Council and the city of Geneva to excuse themselves and get out of the way of progress from happening."

Saying that Patzelt's plans to pay homage to the structure and to form a redevelopment plan are not enforceable, Mayer requested that the stone structure being made available for a memorial of some kind be part of the conditions for demolition, about which there was some discussion.

Paschke, for example, said she didn't support that change and didn't "feel comfortable making that a condition." Both she and Bowring suggested that those conditions by the petitioner to pay homage to the structure and create a redevelopment plan for the site could have been brought forward anytime before in the years the site has been considered.

Paschke, who opposed the demolition, similar to Bowring, argued that there wasn't enough evidence that keeping the structure is not in the best interest of the community, and suggested that it "sets a bad precedent" to "demolish a designated historic structure for nothing."

Following Monday's narrow vote, the structure will remain for now, though its future remains uncertain. But, over the course of Monday's meeting, members of the council repeatedly emphasized their desire to resolve the situation going forward, rather than continuing to allow the site to sit unchanged.

"We really do want something to happen here," Mayer said at Monday's meeting. "I really hope that this doesn't cause the proverbial ... board game to get tossed in the air and walked away from."

From the Aurora Beacon-News:

## Some Geneva residents still pushing to save structure at old Mill Race Inn site, with demolition vote looming

Alan Leahigh talks to a group of residents about plans to try and save a landmarked structure in Geneva, at the site of the old Mill Race Inn, on Jan. 8, 2026. (Molly Morrow/The Beacon-News)

By [Molly Morrow](#) | [mmorrow@chicagotribune.com](mailto:mmorrow@chicagotribune.com) | Aurora Beacon-News

PUBLISHED: January 9, 2026 at 5:17 PM CST

In a last-minute effort to save a landmarked structure along the Fox River from being torn down, a group of Geneva residents is proposing the structure be turned into a visitor information center.

On Monday evening, the Geneva City Council is expected to vote on whether the limestone structure, formerly part of the Mill Race Inn, can be demolished. Last month, the city's Historic Preservation Commission [unanimously shot down](#) a request by Dave Patzelt, the president of Geneva-based Shodeen Group, to demolish the structure. Patzelt then appealed the decision, which is why the matter now goes to the full council for a vote.

But, before the meeting on Jan. 12, some Geneva residents have pulled together a pitch to save the landmark structure.

The structure in question [was previously part of](#) the Mill Race Inn restaurant, which operated from the 1930s until it shuttered in 2011.

Though perhaps most famously a part of the popular eatery, the building [existed](#) long before that. It first housed a blacksmith shop in the 1840s, but, before it became part of the longstanding Geneva restaurant, housed a number of other businesses too: a wagon manufacturing and blacksmithing shop, a cooperage and a carriage painting shop, for example.

But, after the former Mill Race Inn site [was acquired](#) by Geneva-based development company Shodeen Group, demolition of most of the property [began](#) in 2016. The 1840s-era limestone sections, at the time, were to be evaluated as to whether they could be considered a historic landmark or be incorporated within any future development of the property.

What remains of the limestone building — which [was designated](#) as a landmark in 2018 — [weathered](#) multiple requests by its owner to demolish it over the years, none of which ultimately came to fruition.

Then, in October, Patzelt again [asked](#) the city to demolish the structure, arguing that keeping the structure is no longer in the majority of the community's best interest. The matter came to the city's Historic Preservation Commission last month, and was again shot down.

The property is no longer owned by Shodeen itself, according to Patzelt, but by the Mill Race Land Company, LLC, though Shodeen Construction Company [remains listed](#) as the contractor on the original application for demolition from October.

Patzelt [appealed](#) to the City Council the day after the Preservation Commission determination was made. The council can now vote to uphold, amend or reverse entirely the commission's decision, but a reversal or modification requires a two-thirds majority of the aldermen to vote for it. The vote [must occur](#) within 30 calendar days of an appeal being made.

So, in advance of [Monday's planned vote](#), a group of Geneva residents has come together in an attempt to stop the structure from being torn down — complete with an architectural model of what the blacksmith shop may have once looked like.

As a downpour carried on outside, around two dozen residents — including a few members of the Historic Preservation Commission and Geneva Ald. Mark Reinecke — gathered for a meeting on Thursday at the Comfort Inn & Suites in Geneva to talk about the proposal, and the fate of what was once the Alexander Brothers' Blacksmith Shop.

With the architectural model of the Blacksmith Shop front and center in the meeting room, the residents listened to Alan Leahigh, a preservation advocate who lives in Geneva's 1st Ward, where the structure [is located](#). Leahigh is one of the residents behind the recent push to preserve the Blacksmith Shop.

Leahigh said that, because "unfortunately, (they) don't have a time machine," making a model was "the next best thing."

The model itself was constructed by Craig Elliott, who also joined the resident meeting on Thursday. It was meant to represent what the Alexander Brothers' Blacksmith Shop may have looked like in the 1840s. It features the shop itself, as well as the nearby mill race.

Also displayed at the meeting was a watercolor painting by Chuck Cassell of the old Blacksmith Shop. Leahigh said a conversation with Cassell was part of what prompted this recent effort to save the structure.

"The trouble is that everybody sees these ruins, these remnants, and they're ugly," Leahigh said at the meeting on Thursday. "Let's get (rid of) the ugliness, and I think most people really agree with that, but people didn't have much of a vision of what it might have looked like (in) the beginning."

Thus, following some research into the structure's history, the architectural model and the painting ultimately came about, Leahigh explained.

"We think this is a pretty good representation," Leahigh said. "We've done measurements, so ... the ratios are all correct and so forth."

These efforts had been in progress before the most recent demolition request from Shodeen, Leahigh explained, but upon hearing about the request, the involved residents finished up the project for the public to see.

"The problem is that people don't, all they see is the ruins there, and don't see the possibilities of what it was and what it could be," Leahigh said.

But, even if the council votes to keep the structure standing, Leahigh noted that there needs to be a vision for how it could be used.

His group's suggestion? A visitor information center for the tri-cities: Geneva, St. Charles and Batavia.

Leahigh pointed to how such a project could serve those using the nearby Fox River trail, canoers and kayakers and other visitors to downtown Geneva.

He also pointed to how it could serve as a sort of bicentennial project in the coming years. James and Charity Herrington and their family, often considered the founders of Geneva, first arrived in the area in 1835, according to [the city's history](#).

How does such a project come to fruition? Leahigh, on Thursday, said that is "not (their) expertise" and that the expected costs are "a little out of (their) lane," but said that "the city's got to grab hold and do something" if the developer will not.

Patzelt, in an email to The Beacon-News, on Friday said that week was "the first that (he has) heard of" the visitor center idea. Pointing to previous requests from those in favor of preserving the structure for additional time to determine how it might be used, Patzelt said that no one "willing to rehabilitate, relocate, reuse, or repurpose materials ... has come forward" in the years since.

As for the reuse of the building in general, Patzelt cited a 2022 estimate of \$1.5 million to renovate and restore the structure, saying that there is "nobody that (Shodeen is) aware of who will fund paying to restore the structure and then pay to continue to maintain the structure."

"It is unfortunate that the remnant structure is simply not (reusable)," Patzelt said in the email.

At Thursday's meeting, some residents questioned whether the project would be feasible or desired by Shodeen, and discussed what could be done in advance of Monday's meeting.

Reinecke, who represents the 5th Ward, suggested at the meeting that residents who are opposed to the structure being torn down should "keep (their) eye on" the fact that they do not want the structure torn down, and that whatever comes next can be negotiated in the future.

On Monday, the council [is to decide](#) whether to grant or deny the demolition request "upon consideration of the written record of the commission's decision and the applicant's appeal," per the city.

"Monday's special City Council meeting will be tightly managed to ensure due process is followed every step of the way," Geneva Mayor Kevin Burns told The Beacon-News on Friday.

The City Council meeting will take place at 7 p.m. Monday, Jan. 12, at 109 James St. in Geneva.

Thanks,

K\*

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

This weekend I happened to be in downtown Glen Ellyn and stumbled upon a monument that the Developer provided for the Legacy Development (townhome and condominium development) provided in memory of the Grist Mill that once stood on their site. I thought I would share a photograph of it. It is not too far off from what we are talking about.

Is this something that I should share with the Council?

Amy,

No slight intended here. I forwarded an email with same info as below to your personal address with 2000 in it. Apparently it was not received for some reason. Obviously the same invitation is extended to you. Is there a day and time that would work well for you this week. I'm sure they are interested in your thoughts. My apology for the missed communication. Call if you would like to discuss.

**Subject: Meeting Invitation**

?Dave Patzelt with Shodeen will meet with any council members interested in meeting prior to the 1/12 meeting as appropriate (no more than 3). This provides a chance for raising possibly your questions or ideas not appropriate for the special meeting and for Dave to hear your thoughts and share possible ideas for the historic piece. Are you available next week to possible meet?

I was asked and just trying to facilitate communication to find a path forward.

Let me know if interested and possible days that would work next week for you. Thanks.

1st Ward Council Members Bowring and Malecki

I was in attendance at the last Historic Preservation Commission meeting where the commission voted 7-0 to deny the blacksmith shop demolition application that had been submitted by the property owner, a Shodeen controlled entity. My understanding is that Shodeen will be appealing this decision to city council in the near future.

Notwithstanding the antagonism shown toward the applicant by the commission, I did not hear a compelling reason for denying the application. Dave Patzelt from Shodeen stated that they would not be restoring the blacksmith shop building and their position has not changed from when the building was designated an historic landmark in 2018.

Their reason was clear, it is not economically feasible to restore the building with architects estimating the restoration cost to be in the \$1000 psf range. The project would entail a new building foundation, rebuilt walls (the current walls would need to be dismantled and rebuilt with new mortar), new doors and windows, interior finish out, roof joists and roof with HVAC, electrical and plumbing.

In essence a new building would be constructed, with the only material remaining from the original building would be the limestone wall blocks reassembled in the new walls. My question how can this reconstructed building than be considered historic.

In the eight years since the historic designation, no third party including the Geneva Park District has shown any interest in incurring the expense of the building restoration. How much longer should this go and why. I'm sure there are certain parties including the lawyers involved in the various litigation who would be happy to see the issue remain unresolved and continue into the future indefinitely. I doubt if the citizens of Geneva that you represent support that.

The building needs to come down and allow the overall development to proceed. To allow the present situation to continue is not acceptable.

Thank you,

Joel Erickson

Dear FOIA Officer:

Please consider this a freedom of information request for the following records:

All emails sent or received by Dean Kilburg, Mark Reinecke, Anaïs Bowring, William Malecki, Richard Marks, Brad Kosiog, Larry Furnish, Martha Paschke, Amy Mayer, Jeff Palmquist and Kevin Burns between Dec. 1, 2025 and Jan. 16, 2026, that include any of the following search terms in the subject, body or attachments of the email (please do individual searches for these keywords if possible):

"Shodeen"

"Dave Patzelt"

"HPC"

"evidentiary record"

If this search would yield a burdensome amount of results, please contact me, as I am willing to narrow the scope of my request.

Please note: I know of no exemption that would allow these records to not be released, absent pinpoint redactions for private information such as Social Security Numbers. If your agency believes any parts of any records are exempt from disclosure, please provide an explanation to justify the redaction or withholding, and then provide the rest of the records. Please note that statute does not allow your agency to withhold documents in their entirety if only parts of the records may be exempt.

I'm requesting the records in electronic format, if they can be provided in that format. Otherwise, please provide the records in whatever format they are kept.

I am a member of the news media doing research in the public interest and request fees be waived. Please call me if you believe this request will cost more than \$50 to fulfill.

Please contact me with any questions at [mmorrow@chicagotribune.com](mailto:mmorrow@chicagotribune.com) or (312) 237-6299. Thank you very much.

Best,  
Molly Morrow

I assume that the proposed structure will need to go before HPC as it is within the footprint of the historic structure.

If so, is it too late to be on the 1/21/2026 HPC agenda?

**Subject:** FOIA request, Aurora Beacon-News

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Dear FOIA Officer:

Please consider this a freedom of information request for the following records:

All emails sent or received by Dean Kilburg, Mark Reinecke, Anaïs Bowring, William Malecki, Richard Marks, Brad Kosiog, Larry Furnish, Martha Paschke, Amy Mayer, Jeff Palmquist and Kevin Burns between Dec. 1, 2025 and Jan. 16, 2026, that include any of the following search terms in the subject, body or attachments of the email (please do individual searches for these keywords if possible):

"Shodeen"  
"Dave Patzelt"  
"HPC"  
"evidentiary record"

If this search would yield a burdensome amount of results, please contact me, as I am willing to narrow the scope of my request.

Please note: I know of no exemption that would allow these records to not be released, absent pinpoint redactions for private information such as Social Security Numbers. If your agency believes any parts of any records are exempt from disclosure, please provide an explanation to justify the redaction or withholding, and then provide the rest of the records. Please note that statute does not allow your agency to withhold documents in their entirety if only parts of the records may be exempt.

I'm requesting the records in electronic format, if they can be provided in that format. Otherwise, please provide the records in whatever format they are kept.

I am a member of the news media doing research in the public interest and request fees be waived. Please call me if you believe this request will cost more than \$50 to fulfill.

Please contact me with any questions at [mmorrow@chicagotribune.com](mailto:mmorrow@chicagotribune.com) or (312) 237-6299. Thank you very much.

Best,  
Molly Morrow

**From:** joel erickson  
**Sent:** Thursday, January 15, 2026 10:14:38 AM  
**To:** Reinecke, Mark  
**Subject:** Blacksmith Shop Demolition Application Appeal

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

5th Ward Councilman Reinecke,  
Prior to last weeks city council vote on the above I mistakenly understood I was located in the 1st ward , I wasn't aware the ward maps had changed and I am now in your ward, the 5th ward. Below is my transmittal to who I thought were my council representatives before the vote.  
Since you voted to deny the demolition application appeal, I respectfully ask that you reconsider the vote and bring this matter up to again to the council, and vote to approve the appeal.  
Despite the rhetoric, the reality is the property owners will not and cannot be forced into this ill considered building rehabilitation. We, the citizens of Geneva will be forced to look at this blighted partially demolished building for the indefinite future unless this vote is overturned. If a poll of citizens was to be taken I believe a majority would support the demolition and subsequent development of this property. As with politics it seems to be a small vocal minority has managed to make their voices heard over the number they actually represent.  
Please take the action necessary.

Thank you,

Joel Erickson  
301 Burgess Rd.  
Geneva, IL 60134

\*\*\*\*\*

1st Ward Council Members Bowring and Malecki

I was in attendance at the last Historic Preservation Commission meeting where the commission voted 7-0 to deny the blacksmith shop demolition application that had been submitted by the property owner, a Shodeen controlled entity. My understanding is that Shodeen will be appealing this decision to city council in the near future.

Not withstanding the antagonism shown toward the applicant by the commission, I did not hear a compelling reason for denying the application. Dave Patzelt from Shodeen stated that they would not be restoring the blacksmith shop building and their position has not changed from when the building was designated an historic landmark in 2018.

Their reason was clear, it is not economically feasible to restore the building with architects estimating the restoration cost to be in the \$1000 psf range. The project would entail a new building foundation, rebuilt walls (the current walls would need to be dismantled and rebuilt with new mortar), new doors and windows, interior finish out, roof joists and roof with HVAC, electrical and plumbing.

In essence a new building would be constructed, with the only material remaining from the original building would be the limestone wall blocks reassembled in the new walls. My question how can this reconstructed building than be considered historic.

In the eight years since the historic designation, no third party including the Geneva Park District has shown any interest in incurring the expense of the building restoration. How much longer should this go and why. I'm sure there are certain parties including the lawyers involved in the various litigation who would be happy to see the issue remain unresolved and continue into the future indefinitely. I doubt if the citizens of Geneva that you represent support that.

The building needs to come down and allow the overall development to proceed. To allow the present situation to continue is not acceptable.

Thank you,

Joel Erickson

Hi Larry,  
It appears there are five solid votes for the council to approve the demolition permit appeal (including your vote), if seven are needed hopefully the motion will carry.

Thanks,  
Joel Erickson

1st Ward Council Members Bowring and Malecki

I was in attendance at the last Historic Preservation Commission meeting where the commission voted 7-0 to deny the blacksmith shop demolition application that had been submitted by the property owner, a Shodeen controlled entity. My understanding is that Shodeen will be appealing this decision to city council in the near future.

Notwithstanding the antagonism shown toward the applicant by the commission, I did not hear a compelling reason for denying the application. Dave Patzelt from Shodeen stated that they would not be restoring the blacksmith shop building and their position has not changed from when the building was designated an historic landmark in 2018.

Their reason was clear, it is not economically feasible to restore the building with architects estimating the restoration cost to be in the \$1000 psf range. The project would entail a new building foundation, rebuilt walls (the current walls would need to be dismantled and rebuilt with new mortar), new doors and windows, interior finish out, roof joists and roof with HVAC, electrical and plumbing.

In essence a new building would be constructed, with the only material remaining from the original building would be the limestone wall blocks reassembled in the new walls. My question how can this reconstructed building than be considered historic.

In the eight years since the historic designation, no third party including the Geneva Park District has shown any interest in incurring the expense of the building restoration. How much longer should this go and why. I'm sure there are certain parties including the lawyers involved in the various litigation who would be happy to see the issue remain unresolved and continue into the future indefinitely. I doubt if the citizens of Geneva that you represent support that.

The building needs to come down and allow the overall development to proceed. To allow the present situation to continue is not acceptable.

Thank you,

Joel Erickson  
301 Burgess Road  
1st Ward

1st Ward Council Members Bowring and Malecki

I was in attendance at the last Historic Preservation Commission meeting where the commission voted 7-0 to deny the blacksmith shop demolition application that had been submitted by the property owner, a Shodeen controlled entity. My understanding is that Shodeen will be appealing this decision to city council in the near future.

Notwithstanding the antagonism shown toward the applicant by the commission, I did not hear a compelling reason for denying the application. Dave Patzelt from Shodeen stated that they would not be restoring the blacksmith shop building and their position has not changed from when the building was designated an historic landmark in 2018.

Their reason was clear, it is not economically feasible to restore the building with architects estimating the restoration cost to be in the \$1000 psf range. The project would entail a new building foundation, rebuilt walls (the current walls would need to be dismantled and rebuilt with new mortar), new doors and windows, interior finish out, roof joists and roof with HVAC, electrical and plumbing.

In essence a new building would be constructed, with the only material remaining from the original building would be the limestone wall blocks reassembled in the new walls. My question how can this reconstructed building than be considered historic.

In the eight years since the historic designation, no third party including the Geneva Park District has shown any interest in incurring the expense of the building restoration. How much longer should this go and why. I'm sure there are certain parties including the lawyers involved in the various litigation who would be happy to see the issue remain unresolved and continue into the future indefinitely. I doubt if the citizens of Geneva that you represent support that.

The building needs to come down and allow the overall development to proceed. To allow the present situation to continue is not acceptable.

Thank you,

**Subject:** Blacksmith Shop Demo Permit & Reversing HPC's Denial of Same

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Dear Mr. Reinecke,

Please find attached a letter supporting the Geneva City Council's reconsideration of its January 12, 2026 vote which failed to reverse the City's Historic Preservation Commission's decision to deny ShoDeen's request for a permit to demolish the former Alexander Blacksmith building.

As a resident and voting constituent of the City's Fifth Ward, I ask that you make and/or support a motion for the Council to reconsider this question at its next City Council Meeting.

Chris Aiston

**Subject:** Blacksmith Shop demo appeal?

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hi Emily,

In an article in the Kane County Chronicle last week, David Patzelt indicated that he intended to appeal HPC's denial of a demolition permit on December 16, 2025. Has the appeal been filed, and when would you expect it to come before the City Council?

Thanks!

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Good morning.

I was provided a copy of another letter that was apparently sent to the HPC on 12/2/25. I did not see this letter posted on the City website. A copy is attached. This made me wonder if there are other letters that have been sent to the HPC that are not on the website or included in the record. Is there some way to verify or confirm that all letters have been provided for the public?

I assume that the proposed structure will need to go before HPC as it is within the footprint of the historic structure.

If so, is it too late to be on the 1/21/2026 HPC agenda?

Dave Patzelt with Shodeen will meet with any council members interested in meeting prior to the 1/12 meeting as appropriate (no more than 3). This provides a chance for raising possibly your questions or ideas not appropriate for the special meeting and for Dave to hear your thoughts and share possible ideas for the historic piece. Are you available next week to possible meet?

I was asked and just trying to facilitate communication to find a path forward.

Let me know if interested and possible days that would work next week for you. Thanks.

Let's stop wasting money and time. I hate giving into Shodeen company's underhanded dealings, but this ugly building has been the gateway to our community for too long. Save the building materials and incorporate them into something income/tax producing. I've been a resident long enough to remember the same controversy when the hospital was demolished, the building along the river, the creamery, etc. Now hardly anyone remembers what was there before. Basically, no one else has com forward with the money to repurpose the building.

Pat

**Subject:** [THIS EMAIL MAY BE SPAM] BLACKSMITH SHOP

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

I certainly do NOT want the blacksmith shop destroyed after all the destruction has occurred on this site. All the adjacent buildings are gone and the restaurant basement where parties and lovely family memories were made is not visible-maybe it's underwater by now with all of the neglect. So it's not just the buildings that need love and attention and protection from ambitious developers but the land itself. Whatever happened to that restaurant? We know what happened to the bike and thrift shop. Was it wise to tear things down and give Shodeen the upper hand to assume they could keep tearing down ALL structures? Can you get me up to speed here and check my attitude? This has all been unfortunate. How can we move past all of this in a positive manner?

I think enough destruction has occurred on this property. We need the blacksmith shop-even if we use only the stones to recreate the foundation. Can the city or some friendly entity legally buy the property back from Shodeen? And can this entity plan for the construction and development of this historic site that can be enjoyed by the citizens of Geneva and anyone who visits our charming town? This can be an investment in tourism-for real. The Cooperage made barrels- maybe let's plan a brewery there. Let's find an architectural plan for a real blacksmith shop again and have a real blacksmith create functional art and sell it on site-fences, locks, pots and pans...Let's plan for maybe a glassworks shop with artists making glass wares and selling them. There's more to consider...just think of the possibilities. We need a positive way forward.

I know-I'm an optimist.

December 08, 2025 | [Read Online](#)

Welcome to Tri-Cities Central, a twice-weekly newsletter highlighting local happenings in Batavia, Geneva, St. Charles and surrounding communities.

**Get yours:** [subscribe here](#). **Refer a friend:** [share this link](#).

**Interested in advertising?** [Let's talk](#).

Good morning!

Evidently, cold and snowy winters are still a thing around here.

Last year at this point, we'd only experienced one measurable snow with zero accumulation. After this weekend's storm, we've already gotten about 15 inches with well over six inches of current snow depth. And it's only December 8 — pretty wild.

**Friendly reminder:** If you're ever looking for recent Tri-Cities Central articles, past newsletters, live music roundups, or any other content we've published, you can always visit (and bookmark) our website at [tricitiescentral.com](http://tricitiescentral.com).

?? Need to contact me with questions, tips or suggestions? [Get in touch here](#).

---

## ?? Tell us about your local holiday traditions

Tri-Cities Central readers have shared a ton of interesting thoughts, stories, and ideas with me over the past couple of years. I really should do a better job of sharing some of that material with the wider newsletter audience.

With that in mind, **I'd love to hear about your local holiday traditions** — with a focus on the Tri-Cities area.

Is there a particular restaurant you return to every year for a holiday gathering? A shop where you always stock up on gifts? An annual event, a special activity, or an unforgettable memory from a past holiday?

Feel free to be creative. I'll make sure to feature some of the responses in a future issue.

Share your thoughts here

## ? Award-winning brunch at an unbeatable price — and a Holiday Look Book for you to explore

Sunday brunch is a time-honored tradition — and you won't find a better value in the Tri-Cities than at [The Little Traveler's Atrium Café](#). In fact, it was named Best Brunch in West Suburban Living's 2024 Best of the West.

For just \$12.95, enjoy a full spread of fresh, house-made favorites, from fluffy omelets with crispy bacon to Swedish pancakes and Crab Cakes Benedict. Trust me, there's a reason so many local folks have been coming back for decades.

?? **Holiday Almanack is out!** Check out The Little Traveler's 2025 [Holiday Almanack & Look Book](#) for upcoming events and festive new products.

[See the Sunday Brunch menu](#)

---

## ?? Thursday's most popular links

?? **Holiday light shows:** In Geneva and the greater Chicago area, an array of popular regional light shows are happening through December — and several are just a quick hop from the Tri-Cities. [Check out this list](#) and plan your winter adventure.

?? **New Real ID rules:** Starting February 1, Illinois travelers flying without a REAL ID or other acceptable form of ID will [have to pay a \\$45 TSA fee](#) for alternative identity verification at airport security.

---

## ?? News to use

?? **Development progress:** Campton Hills officials unanimously advanced preliminary plans for a [900-home Shodeen development](#), giving the project its first major zoning approval while final reviews, conditions, and a future TIF decision still remain.

?? **Major city discussion:** Geneva City Council will [hold a special meeting on Monday](#) (12/8) to discuss whether to send a \$59.4M police facility bond question to the March 2026 ballot and launch a citywide home rule education effort.

?? **Charlestowne Mall:** St. Charles released a comprehensive [Charlestowne Mall Redevelopment webpage](#) that provides up-to-date project details and background resources — basically everything you'd want to know about where things stand.

?? **Plant life protection:** Illinois added the highly invasive Callery pear tree to its exotic weeds list, meaning it will be illegal to buy, sell, distribute, or plant them starting in 2028. [See what other plants](#) made the list this year.

?? **Prison sentence:** A St. Charles man was [sentenced to 16 years in prison](#) after pleading guilty to child pornography charges. He must register as a sex offender for life.

**?? IL Tollway resources:** You can visit the Kane County Government Center in Geneva on Wednesday (12/10) from 12-4PM to get free ?I-PASS Sticker Tags, open an account, or pay invoices without fees or fines. No appointment necessary.

Well, that was an interesting way to waste everyone's time last night. I believe you were in the audience, and I applaud your attendance. It was hard to hear some of the back and forth, but if I heard correctly, Shodeen sold that property to a new LLC. I'll have to dig into the parcel records, but if so, the City just got played again. This likely means that they sold it at an appreciated price to take the remainder of their basis on the original buy, and stepped up their basis with the new LLC, likely including the liability accrued for the fines. It then restarts the clock on the basis for loss amortization for the new LLC. Just supposition until I'm willing to suffer the brain damage of looking it all up this weekend.

Here is my question. It is explicitly clear that they have no plans to do anything with that property until they are certain about the eyesore. That very important property to the City in terms of what impact it has on visitors will sit there and look like a stain on the downtown. Who is going to take the lead to get adults in the damn room and try to figure something out? The lawsuit is a BS excuse. You can have Counsel there and have any conversations covered as "settlement discussions" which are not allowable in court. Last year all Ms. Mayer said about Duke and Lee's was "it's the fastest way to get shovels in the ground." We give lip service to revenue sources and needing Home Rule to solve every problem, but we have a very important property sitting vacant because of egos. Let's call it what it is. The game was started when the City landmarked one of the biggest developer's private property without his consent in a rigged process to stop him from developing. Great job, you stopped him. Now what?

 Book time to meet with me

Dave Patzelt with Shodeen will meet with any council members interested in meeting prior to the 1/12 meeting as appropriate (no more than 3). This provides a chance for raising possibly your questions or ideas not appropriate for the special meeting and for Dave to hear your thoughts and share possible ideas for the historic piece. Are you available next week to possible meet?

I was asked and just trying to facilitate communication to find a path forward.

Let me know if interested and possible days that would work next week for you. Thanks.

Aldermen Malecki and Reinecke,

The City Code allows for any alderman from the prevailing side to ask for a re-vote. I am hoping you would consider making that motion and seconding it at the next meeting. I believe too much misinformation has worked its way into discussions.

First as an introduction. I have been a resident of Geneva for over 40 years and for fifteen years I attended, in person, every Committee of the Whole and City Council meeting. After COVID I've enjoyed the luxury of watching online from my couch. With the exception of the mayor, no one has attended or watched more meetings than I have. I point this out so you know this isn't a single issue complaint from an activist, it is a well informed opinion of someone who has worked to stay informed on the facts and that cares about Geneva.

Here are a few of my comments:

- This property is not in the Historic District. When the Shodeen's purchased the property, they could have applied for a demo permit and received it before anyone had a chance to comment. Instead, because they knew that there may be remnants of an historic structure inside the building they decided, at great expense to themselves, to expose the structure for inspection. After inspection they decided saving the structure "as is" was not practical. It was only then that a group of people moved to have the site landmarked behind their back. That never should have been allowed to happen. It was certainly an instance of "No good deed goes unpunished".
- It's claimed that the Shodeen's are committing "Demolition by Neglect". This is nonsense. The building is in the same shape that it was in when it was originally exposed.
- It's being ignored that the structure sits in a flood plain. Making use of the structure "as is" and where it is located would be a cost prohibitive and impractical endeavor.
- Opponents to demolition like to refer to it as the Blacksmith Shop. It's had many uses over the years, but they chose to call it that for impact. I believe it was also the site of bathrooms for the Mill Race Inn at one time.
- The Shodeen's have continually showed strong support of Historic Preservation. Geneva on the Dam, their corporate offices on First Street, The Herrington, The Creamery, Dodson Place are all impressive examples of their cooperation. But because in this instance they don't agree with saving the structure as is, they are made to be villains.
- It is often repeated "Show us a plan on how you can incorporate the structure and demolition will be approved". How many tens of thousands of dollars in drawings would have to be presented to get this done? It's like saying I don't know what I want from you, but I'll know when I see it. What they are offering is what you want. They have always been willing to incorporate or pay homage to the history if given the chance.
- Many letters and emails were sent to HPC in support of saving the structure, but more than half were not from Geneva residents. Three times that amount were sent supporting demolition. Those supporting demolition include a former Planning Commissioner, the former Chairman of the Planning Commission, a former Alderman, the former Economic Development Director of Geneva, two Wood Award winners, etc. These are not activists with a single propose, these are residents that care about Geneva.
- Please consider bringing this back up for additional discussion. Asking for a re-vote doesn't mean you have changed your mind. It only means you are willing to listen.

**From:** Catherine Eaton  
**Sent:** Wednesday, December 17, 2025 7:14:17 PM  
**To:** Furnish, Larry  
**Subject:** 1840's Blacksmith shop on Roosevelt

\*\*\*\*\*

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.  
\*\*\*\*\*

?Hi Mr. Furnish,

I live on Sandholm St. and recently saw some news that the owner of where the Mill Race used to be wants to demolish the remaining blacksmith shop.

I don't believe that's in Geneva's best interest. There's a pride in historic buildings here and justifiably so. That building is rare and historically important and once it's gone, it's gone forever.

I'm deeply disappointed that Shodeen hasn't yet donated that parcel of land to the park district. Setting up a park there would give that greedy man and his family a small positive legacy in this town and increase the beauty of Island Park, one of the nicest places here.

I hope the building can be preserved and perhaps by some miracle, Shodeen will donate that land instead of putting yet another ugly oversized building on a tiny piece of property. It would affect the park greatly.

Thanks for taking the time to consider my opinion. I hope he doesn't win.

Take care and happy holidays,  
Catherine Eaton

I assume that the proposed structure will need to go before HPC as it is within the footprint of the historic structure.

If so, is it too late to be on the 1/21/2026 HPC agenda?

**To:** 'Mike Riebe'  
**Subject:** 4 E State Pro Forma Analysis

Hi Mike,

Attached is the 4 E State Street Pro Forma Analysis which was presented on June 20, 2023, as I mentioned on the phone. Shodeen's application is focused more towards the "best interest of the majority of the community" point, but this might help clarify some questions about the history of this case. The recording of this meeting, including this presentation, is also available on the Agenda Center.

Thanks,

***Emily Stood***

Hi Emily,  
Is the plat of survey for the Shodeen property at 4 East State available online?

I'd like very much to see it if possible. Please let me know how I'd be able to access it.

Thanks so much,  
Karen Lando.

Good morning.

I was provided a copy of another letter that was apparently sent to the HPC on 12/2/25. I did not see this letter posted on the City website. A copy is attached. This made me wonder if there are other letters that have been sent to the HPC that are not on the website or included in the record. Is there some way to verify or confirm that all letters have been provided for the public?

**Subject:** ATTORNEY CLIENT PRIVILEGE WORK PRODUCT - DRAFT AMENDMENT or AGREEMENT for DEMOLITION OF STRUCTURE at 4 E. STATE STREET

Alex, David & Ron,

Below is a stream of consciousness amendment/agreement related to the demolition of the structure at 4 E. State Street relevant to the advancement of redevelopment of property along the southeastern shore of Rt. 25 & Rt. 38.

There's a lot to digest so just let me know when you'd like to discuss and dissect. J

KB

**DRAFT Demolition Permit Amendment/Agreement Toward Advancing Redevelopment of 4 E. State Street Property**

-

-

1. Upon careful and responsible disassembling of the structure (avoiding merely bulldozing), materials deemed worthy of preserving for monument design, development and installation shall be relocated from 4. E. State parcel and stored in a location agreed upon and authorized by the City. Costs associated with such work shall be paid for with TIF funds.
2. Remaining material from the disassembled structure will be offered to the GHM as a right-of-first-refusal to be used for purposes including but not limited to, collections, fundraising (selling pieces), etc.
3. Preserve sufficient material from structure to design and develop and educational structure (monument) recognizing the erstwhile Blacksmith Shop and its relationship to the City for public benefit and place said structure (monument) on or in close proximity to the redevelopment of the 4 E. State parcel.

4. Design of said monument to be directed by a panel of citizens appointed by the City and will include at least 2 representatives of the City Council, 1 representative from GHM , 1 representative of the Shodeen Group/Foundation (??? not sold on Shodeen rep), 1 representative from the City’s Historic Preservation Commission and 1 one at-large community representative.
5. All costs associated with the design, development and installation of said monument will be paid for by a grant from the Shodeen Foundation and not to exceed \$\_\_\_\_\_

***or...***

All costs associated with the design, development and installation of said monument will be paid for by TIF funds as the monument is a “public benefit”. Costs associated thereto will be deducted from the anticipated TIF request by Mill Race Land Company/Shodeen.

6. Perpetual care of said monument shall be paid for by TIF funds and upon expiration of the TIF said costs shall be transferred to the City (just as the “Rain Man” statute on S. Third Street).
7. Payment of fines assigned to the Mill Race Land Company shall be recouped by the City (effective dates of aggregate fines tbd) by means of subtracting said amount of fines from anticipated TIF request by Mill Race Land Company/Shodeen and approved by the City.

**NOTE:**

*Per our own code we need to add dates and expectations of when disassembling of structure must commence.*

*Notice that I have not included any redevelopment deadline submittal date...should I/we?*

\*\*\*\*\*

Hi Billy,

I should've contacted you weeks ago, but I keep getting interrupted by other things. My opinion on the blacksmith shop is that there are just some things that you can't save. It's unfortunate that it sits where it sits, but it does. I'm very uncomfortable with the fact that Shodeen seems to have been left with this problem to self. I feel like we've been waiting for a century although it's only just almost a decade for something to happen on that property. Nothing is gonna happen until this problem is solved. I really want to see some redevelopment of that property. And I honestly don't think there's anything that could be done with that building. That would be a draw to a large number of people or even a small number of people. I'm on Shodeen's side on this one so whether I'm late to the party or not and no matter which way the vote goes I just wanted to give you my two cents.

**Subject:** Blacksmith Shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hi,

I respect our historic preservationists but not everything in this town can be preserved or salvaged.

I urge you to please allow the demolition of the blacksmith shop. The Mill Race corner has been a dilapidated eyesore for too long. It seems the preservation committee is not really interested in developing this corner and instead wants to block Shodeen out of spite. Lets not forget he is the one who developed the old hospital into a vibrant area that has added to the charm and economic growth of 3rd St. He is also responsible for The Herrington. I don't think anyone would argue that these were unfavorable developments.

It's time to move on and let go. Stop with the vendetta against Shodeen and let's move forward with developing this gateway to our downtown.

Sincerely,

Amanda Jones

Hi Emily,

We live in a historic home in Geneva. While repairs are often more expensive and materials harder to find, we believe this is the beauty of preserving the past.

We are strongly opposed to Shodeen or any other company demolishing the blacksmith shop. It is such an iconic and irreplaceable part of Geneva's legacy that its loss would be tragic.

Best regards,

Carl King

Dear Emily,

I'm not sure how you are going to figure out if the majority of Genevans are for the demolition of the blacksmith shop, but you can put me down for NOT demolishing it. Once a historic building is gone you can NEVER get it back. I believe Shodeen is gaslighting the citizens of Geneva by doing nothing to preserve the building and that they are waiting for it to fall over so they can say it's not safe and needs to go. I also believe a person/business MUST pay the fines levied, but apparently Shodeen believes the law doesn't apply to them.

Thank you for trying to preserve the blacksmith shop.

Amy,

I just returned from the presentation on the blacksmith shop at the Comfort Inn. There has been a lot of press on the subject of the demolition and I would like to say I am totally against demolition. I hope you looked at the mock up of the shop and read their vision for it. It was quite interesting.

I believe Shodeen is waiting for the building to just fall over so they can say it has to be bulldozed. I still don't understand how they can get away with not securing a tarp or paying the fines after a judge said they must.

Thank you for listening,

\*\*\*\*\*

Good Afternoon,

I am one of your constituents and a long time resident of Geneva.

First of all, thank you for your public service.

While I understand the property where the blacksmith shop lies is currently unattractive, Shodeen is allowing it to deteriorate and flaunting city ordinances.

This piece of Geneva's history can never be replaced. Shodeen has requested a demolition permit from the city multiple times and the council has voted it down each time. What has changed? What new proposal does Shodeen have? Nothing.

It should not be treated any differently from anyone else when it comes to city ordinances. Shodeen has been playing a waiting game, trying to stir up the public's ire about a situation of its own creation.

Consultants have shown that with funding from a TIF district in a public-private partnership, the structure could be saved and repurposed. If Shodeen isn't willing to come up with a plan to incorporate at least part of the blacksmith shop in a development, they can choose to sell the land. There will be a creative developer out there who can come up with a fresh development that incorporates our history.

One of the things that makes Geneva special is the pride we take in our history. Please don't allow Shodeen to tear down one of oldest standing parts of it.

Please vote against the demolition tonight. Could you please confirm you received this email?

Thank you for your consideration.

**Subject:** Blacksmith shop debate this evening

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Miss Stood,

Tear it down, don't tear it down, tear it down, don't tear it down. In Mayor Burns we have a Richard J. and Richard M. Daley who has been in office twenty years to long.

My name is Tom Burgan and I am a 35 year resident of Geneva. I enjoyed Mill Race Inn back in the day. I enjoyed Island Park until it became a crappy pass through on the trails, which by the way I frequent nearly daily on foot, bike and rollerblades. This standoff has got to end and unfortunately I guess I am going to side with Shodeen, who I think is shady developer in his own right, used to getting his way. SO my thinking...

1. Tear it down, but make Shodeen celebrate its existence by keeping all of the pieces and doing something for the community out of it in that location somewhere not buried in a corner.
2. I do NOT want to see his crappy condos or whatever else he has planned on that location without paying homage to the residents who are giving him THEIR permission to do so. This means public space for passerby's on the trail to take in and enjoy much like was possible years ago when Mill Race was a vibrant destination on the river trail, especially the gazebo.
3. Finally, Island Park has become a mess with the yearly flooding of the river. We're all so worried about taking out the dam, that we lose sight of the fact that the Army Corp will NOT allow any raising of Island Park to help with the annual flooding and mud making machine. I remember well summer concerts there and other events that brought out the residents. The pavilion building just had the bathrooms rebuilt by I assume The Geneva Park District. Time to finish the job and improve the park itself. I believe Shodeen should be a part of this renovation of the park, with his money and his company's mouth. Face it, he has name recognition and I'd like to see it put to use for THE PEOPLE of Geneva. **That location is a jewel of a gem and we need to polish it, NOT destroy it for personal gain.**

I cannot attend tonight's meeting, but I thank you for your time and effort in heading the discussion this evening.

\*\*\*\*\*

1st Ward Council Members Bowring and Malecki

I was in attendance at the last Historic Preservation Commission meeting where the commission voted 7-0 to deny the blacksmith shop demolition application that had been submitted by the property owner, a Shodeen controlled entity. My understanding is that Shodeen will be appealing this decision to city council in the near future.

Not withstanding the antagonism shown toward the applicant by the commission, I did not hear a compelling reason for denying the application. Dave Patzelt from Shodeen stated that they would not be restoring the blacksmith shop building and their position has not changed from when the building was designated an historic landmark in 2018.

Their reason was clear, it is not economically feasible to restore the building with architects estimating the restoration cost to be in the \$1000 psf range. The project would entail a new building foundation, rebuilt walls (the current walls would need to be dismantled and rebuilt with new mortar), new doors and windows, interior finish out, roof joists and roof with HVAC, electrical and plumbing.

In essence a new building would be constructed, with the only material remaining from the original building would be the limestone wall blocks reassembled in the new walls. My question how can this reconstructed building than be considered historic.

In the eight years since the historic designation, no third party including the Geneva Park District has shown any interest in incurring the expense of the building restoration. How much longer should this go and why. I'm sure there are certain parties including the lawyers involved in the various litigation who would be happy to see the issue remain unresolved and continue into the future indefinitely. I doubt if the citizens of Geneva that you represent support that.

The building needs to come down and allow the overall development to proceed. To allow the present situation to continue is not acceptable.

Thank you,

Joel Erickson  
301 Burgess Road  
1st Ward

Their reason was clear, it is not economically feasible to restore the building with architects estimating the restoration cost to be in the \$1000 psf range. The project would entail a new building foundation, rebuilt walls (the current walls would need to be dismantled and rebuilt with new mortar), new doors and windows, interior finish out, roof joists and roof with HVAC, electrical and plumbing.

In essence a new building would be constructed, with the only material remaining from the original building would be the limestone wall blocks reassembled in the new walls. My question how can this reconstructed building than be considered historic.

In the eight years since the historic designation, no third party including the Geneva Park District has shown any interest in incurring the expense of the building restoration. How much longer should this go and why. I'm sure there are certain parties including the lawyers involved in the various litigation who would be happy to see the issue remain unresolved and continue into the future indefinitely. I doubt if the citizens of Geneva that you represent support that.

The building needs to come down and allow the overall development to proceed. To allow the present situation to continue is not acceptable.

Thank you,

Joel Erickson

1st Ward Council Members Bowring and Malecki

I was in attendance at the last Historic Preservation Commission meeting where the commission voted 7-0 to deny the blacksmith shop demolition application that had been submitted by the property owner, a Shodeen controlled entity. My understanding is that Shodeen will be appealing this decision to city council in the near future.

Not withstanding the antagonism shown toward the applicant by the commission, I did not hear a compelling reason for denying the application. Dave Patzelt from Shodeen stated that they would not be restoring the blacksmith shop building and their position has not changed from when the building was designated an historic landmark in 2018.

Their reason was clear, it is not economically feasible to restore the building with architects estimating the restoration cost to be in the \$1000 psf range. The project would entail a new building foundation, rebuilt walls (the current walls would need to be dismantled and rebuilt with new mortar), new doors and windows, interior finish out, roof joists and roof with HVAC, electrical and plumbing.

In essence a new building would be constructed, with the only material remaining from the original building would be the limestone wall blocks reassembled in the new walls. My question how can this reconstructed building than be considered historic.

Hi Larry,  
It appears there are five solid votes for the council to approve the demolition permit appeal (including your vote), if seven are needed hopefully the motion will carry.

Thanks,  
Joel Erickson

**Subject:** Blacksmith Shop Demolition Application Appeal

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

5th Ward Councilman Reinecke,  
Prior to last weeks city council vote on the above I mistakenly understood I was located in the 1st ward , I wasn't aware the ward maps had changed and I am now in your ward, the 5th ward. Below is my transmittal to who I thought were my council representatives before the vote.  
Since you voted to deny the demolition application appeal, I respectfully ask that you reconsider the vote and bring this matter up to again to the council, and vote to approve the appeal.  
Despite the rhetoric, the reality is the property owners will not and cannot be forced into this ill considered building rehabilitation. We, the citizens of Geneva will be forced to look at this blighted partially demolished building for the indefinite future unless this vote is overturned. If a poll of citizens was to be taken I believe a majority would support the demolition and subsequent development of this property. As with politics it seems to be a small vocal minority has managed to make their voices heard over the number they actually represent.  
Please take the action necessary.

Thank you,

Joel Erickson

Mrs. Bowring and Mr. Malecki,

I hope the day and New Year find you both well! As a constituent of the Ward 1, I am reaching out to you both as you prepare to consider the demolition and removal of the Blacksmith Shop this coming Monday. I'll not occupy a lot of your time as I know you both are likely receiving a great deal of feedback from the public on this issue. Just a quick background. My wife Janet and I have been residents at 427 Anderson Boulevard since 1999 where we raised a son (Jonah) and daughter (Sarah) both terrific kids (yikes...now adults!) who were byproducts of the Geneva public school system. I am an architect with a residential practice that has been blessed with many projects in Geneva's historic district. As well I've been teaching architecture at Judson University since 2008. Below are a few points to consider as your mull over your decision.

1) The demolition and permanent removal of the structure will greatly undermine the authority and purpose of the Historic Preservation Commission, a group that has been a key partner in the success of our downtown business district and residential district. I could go on and on with this point but I'll only note that having been a member of the HPC for 11 years (2000-2011) we had frequent incursions with the Shodeen organization as they pursued the removal the East View house, the Dodson mansion (once a hospital) and the many other structures. Shodeen now highlights the Dodson mansion as part of the Dodson Place retail development. The East View house is now the grande dame of homes along Route 31...hard to imagine them not there now. Can Shodeen work with and transform historic structures...you betcha they can. Is it easier to tear them down and erase their memory from our community, I guess this must be the case since they wish to do this with the blacksmith shop, but it's an odd argument to make in light of their successes. Certainly we can't predict the future, it seems likely though, that if Shodeen is given the authority to remove the blacksmith shop, there will inevitably be other applicants in the future requesting a similar fate for other historic structures in our community.

2) The property was purchased knowing full well that this structure was something important and would likely present the Shodeen organization with community interest and push back if they decided to remove the structure, yet little to no effort was made to placate the public that was and has been concerned about this. The organization it seems has done little to acknowledge the significance of the structure and even less as far as giving creative consideration for its reuse. It's clear they can do it as seen in their work with the Harrington Inn, Riverside Receptions and others throughout the Fox Valley.

3) It seems that there has been little to no compromise by Shodeen in relation to the repurposing of the blacksmith shop. The argument that was initially set forward was an issue of the cost of reusing the structure. The argument now has shifted to the structure being a public nuisance, a pretty easy argument to make when it's intentionally left unprotected and further compromised. It's been noted by both sides that the property is "unsightly", yet who currently owns the property? Who has ignored legal and financial consequences?...well you get the gist.

4) There aren't many artifacts like this one in our City, for that matter in the Fox Valley. It's easy to lose sight of this one as we hurdle toward being a City that has great potential and building it out to that potential will push structures like this into oblivion. Obviously once it's gone, it's gone and it's really our one chance to protect it.

5) Geneva has become and will likely even more so become a significant player in attracting residential and business interest in the years to come. As far as cities along the Fox River, trying to be objective about this, Geneva's downtown is and will be the most desirable location for both homeowners and businesses along the Fox River. That said, the long term financial upside for this site is enormous. Our City leadership should leverage this with the Shodeen organization. I do understand that this site is a challenging one to build on, but the folks at Shodeen purchased it knowing this. I believe that this parcel will be a significant generator of income for the Shodeen organization so money spent now for the restoration or repurposing of the blacksmith shop will be minimal when seen through the lens of time and the future.

I'm sure there are many other arguments that can be made for keeping the blacksmith shop but the five noted above came to my mind initially. As I noted above, I served on the HPC for 11 years and I so appreciate and understand the significant commitment of your time and energy on behalf of our community. So at the end of the day you can put me in the camp of keeping the blacksmith shop.

Warmly and grateful for your service!  
Sean

Cam,

Bob reviewed the first section of what I filtered and says the attached list is what need to be sent out.

Can you please help me out and print the address labels for this mailing round.

Also I know nothing about a letter folding machine.

Would it be easier if I came to PW and work through this with you?

All I need to do is date the letter being sent out and we are good to go

**Subject:** Campbell St. Apron

Good afternoon Bill,

I am writing regarding the failing asphalt condition at the entrance to the alley that accesses the rear of 207 S. 3<sup>rd</sup> St. from Campbell St. It sounds like there has been years of back and forth on whether the City is responsible for the repair of this asphalt section or if that responsibility belongs to the property owner. I am confirming for you now that, much like a homeowner is responsible for the repair of their driveway apron, this driveway apron is the responsibility of the property owner regardless of being located on City-owned property. I have included a satellite image and a photo from today to confirm the location in question as well as the current condition of the asphalt apron. The City does not repair private driveway aprons.

Thanks,

**Cc:** Furnish, Larry; Kilburg, Dean; Lee Eysturlid; Voigt, Alex  
**Subject:** Construction/digging/damage on 108 Oak st

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

***Rich Babica***

Subject: Re: Construction/digging/damage on 108 Oak st

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12?PM Lee Eysturlid <[leysturl@imsa.edu](mailto:leysturl@imsa.edu)> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a

phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturid

**From:** Babica, Rich  
**Sent:** Thursday, January 08, 2026 8:54:55 AM  
**To:** 'Lee Eysturlid'  
**Cc:** Furnish, Larry; Kilburg, Dean; Lee Eysturlid; Voigt, Alex  
**Subject:** Construction/digging/damage on 108 Oak st

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

**Rich Babica**  
Director of Public Works

Subject: Re: Construction/digging/damage on 108 Oak st

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12?PM Lee Eysturlid <[leysturl@imsa.edu](mailto:leysturl@imsa.edu)> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

Lee Eysturlið

On Thu, Dec 25, 2025 at 8:17?AM Dean Kilburg <[dkilburg49@gmail.com](mailto:dkilburg49@gmail.com)> wrote:

Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

On Mon, Dec 22, 2025 at 3:22?PM Landers, Nate <[nlanders@geneva.il.us](mailto:nlanders@geneva.il.us)> wrote:

Good afternoon Lee,

The work that is currently taking place on Oak and Chrissey is being performed by Archon who is a contractor for AT&T. This is a result of the E. State St project and the relocation of the utilities to accommodate that work. This information was published to resident's on the city's website and can be found at this link which is updated weekly.

#### E. State Street Reconstruction Updates

All work is occurring in the public right of way and not on any private property. Construction is scheduled to be wrapped up tomorrow and then restoration of the area will begin. Any existing piles will be removed and the area will be leveled back out. Unfortunately, full restoration will not occur until spring.

While I don't have time to meet with you today, I am available tomorrow for further discussion if you would like.

Thanks,

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a

phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturid

Dustin,

I readded 109 N. 3<sup>rd</sup> St. to the DAR. Looks like it was removed from the DAR on October 1<sup>st</sup> but after going there last night for a call, it has not been addressed. It was originally added to the DAR on 12/14/2022.

They have built storage area for their residents in the basement and the wall is approximately 12 to 14 inches away from the outside wall, where the FACP is located. Very difficult to get back there to use panel in gear. Would be virtually impossible in any smoke conditions.

**Subject:** Data Center Move / I.T. Planning

All:

For discussion's sake, I just wanted to flesh out some upcoming needs/requirements/wants and make sure they are on the radar for the big picture. Most of this is spit-balling, but it needs to be part of the space needs and financial planning thoughts. Since Finance **staff** will also be impacted, there may be shared space opportunities to consider. Much of this is contingent upon what the plans are for the Police Station after a future move.

Data Center: Upon completion of a new GPDHQ, it would seem there are a few options:

- Keep Data Center at old police station temporarily and move me over there to free up office space @ City Hall. Potentially, if Pete Adams was at PW full time, this would open three offices on the stage. (The Data Center has to be relocated BEFORE that building is sold or demolished, and since moving the data center is costly, it's something we really only want to do once).
- Move Data Center & IT Offices to:
  - City Hall - If I.T. **staff** are not initially located at City Hall, the data center should ideally move here. It can be relocated within whatever shape an updated City Hall takes at minimal cost in the future. This not ideal but we can make it work on a temporary basis until more permanent offices are available.
  - Library Building (assuming its future merge with City Hall)
  - Somewhere on PD/PW Campus
  - Some leased-to-own, dead, retail (think brick Shodeen building N/E of current PD on Rt. 38.)

As I await more detailed costing, I think I can make some fairly broad costing estimates that would serve for planning purposes.

- New Core Fiber Switch and programming: 100k
- Relocation of fiber head end to City Hall /Library: 100k
- Relocation of fiber head end anywhere else:
  - Engineering study to address current fiber usage across plant & any "make ready" work across Geneva utility poles/easements: 50k
  - Actual fiber construction: 100 to 200k

Assuming a new Data Center build, regardless of location, I.T. staff should move with it. Making some broad future assumptions about staffing, I'd suggest the consideration of the following, long-term space needs:

- Office for I.T. Manager
- Office for I.T. Analyst
- Office for I.T./Video Tech
- Server room
- Storage Room
- Workspace for new machine deployment
- If I.T. were tasked with managing G.I.S. functions, 3 offices for G.I.S. staff.
- Access to Bathrooms/Meeting Rooms facilities

While we could live anywhere, I think it's important that we get ahead on thinking about where and when the data center is relocated, and where the I.T. Analyst will be relocated to in that future. There may be a possibility to share temporary facilities with Finance, wherever they go.

While much of this may have been considered when we were looking at this from a “City Facilities Referendum”, I don’t know how much of it carried over into cost estimates for relocating GPDHQ. My guess is that the Police have not considered any changes to absorb I.T. requirements, even on a temporary basis, into their designs (should that be the plan.)

As I’ve professed in the past, as a branch of Admin Services (and historically being under the direct lead of Administration), I.T. would hope to continue to exist in that scenario, and so our preference would be to keep the “data” under that guidance and control on a daily basis, and it’s probably cheaper to keep us as “Near West Siders” from the get go.

I’m certainly happy to sit down and discuss all, but I wanted to make sure this wasn’t missed as we move ahead.

Regards,

**To:** Burns, Kevin  
**Subject:** Demolition request

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

We strongly urge city council members to confirm the Dec 16 decision of Geneva's Historic Preservation Comm, denying the Shodeen corporation's proposal to demolish the original blacksmith shop.

In their third application to get approval for demolition, the Corp has not presented any new factors that would override earlier decisions,

In 2014, the Chicago Tribune quoted Shodeen's intention to respect and retain the historic features of this site. Instead, he has defied the will of the community and the courts ---- and the end result may well be ***demolition by neglect***.

If the demolition proposal is rejected , then the community can pursue creative options for future development of the site.

With gratitude for all the time and energy you devote to community issues,

Liz and Carl Safanda  
630-853-1765

P.S. I am sure you are aware of the letter writing campaign orchestrated by Patrice Berteau and her minions, arguing for demolition.

**Subject:** Demolition request

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

We strongly urge city council members to confirm the Dec 16 decision of Geneva's Historic Preservation Comm, denying the Shodeen corporation proposal to demolish the original blacksmith shop.

In his third application to get approval for demolition, the Corp has not presented any new factors that would override earlier decisions,

In 2014, the Chicago Tribune quoted Shodeen's intention to respect and retain the historic features of this site. Instead, he has defied the will of the community and the courts ---- and the end result may well be ***demolition by neglect***.

If the demolition proposal is rejected ( with your help), then the community can pursue creative options for future development of the site.

With gratitude for all the time and energy you devote to community issues:

Carl and Liz Safanda

HPC denies Shodeen Demo Permit

December 17, 2025

Shodeen Files Appeal to Council on HPC Decision

-

January 3-5, 2026

Alder Kilburg sends the following email message to Council members (2x2) via his personal email account:

*From:* Dean Kilburg <[dkilburg49@gmail.com](mailto:dkilburg49@gmail.com)>  
*Date:* January 3, 2026 at 2:14:20?PM CST  
*To:* \_\_\_\_\_  
*Subject:* Meeting Invitation

*?Dave Patzelt with Shodeen will meet with any council members interested in meeting prior to the 1/12 meeting as appropriate (no more than 3). This provides a chance for raising possibly your questions or ideas not appropriate for the special meeting and for Dave to hear your thoughts and share possible ideas for the historic piece. Are you available next week to possible meet?*

*I was asked and just trying to facilitate communication to find a path forward.*

*Let me know if interested and possible days that would work next week for you. Thanks.*

*Dean  
(630) 208-1682*

*Sent from my iPhone*

-

January 5, 2026

City Attorney Ron Sandack sends letter to City Council warning of conflicts real or perceived related to invitations to meet with Shodeen as follows:

*I am informed of several written communications by and between Council Members relating to the above referenced matter which is before the Council on January 12, 2026.*

*I am further advised there may have been verbal communications as well and that one or more face-to-face meetings may be contemplated with a representative of the Petitioner in attendance. All of the above are potentially problematic and is the reason for this Memorandum.*

*Given the sensitive nature of the item coming before the Council on the 12th, I believe it is important that I remind the Council that on the 12th, the Council will be sitting in a quasi-appellate court capacity, and not in its typical legislative capacity. More specifically, the Council's only role is to determine whether to sustain or overrule a decision from the HPC.*

*In that capacity, it is instructive to again reiterate that the Council and Mayor understand that the entirety of the evidentiary record has already been adduced and no further evidence may now be introduced or re-visited, including any individual fact-finding, presentations or interviewing of witnesses by Council members. That is, all Council deliberations should be focused singularly on the record and not on anything outside of that record. Doing otherwise may jeopardize the deliberative process and result. In sum, no impermissible outside processes/information or the like should be entertained.*

*Thus, I strongly suggest that all Council members refrain from any other actions or activities and constrain themselves only to the written record and the transcript of proceedings before the HPC, because that - only that - comprises the official record for Council's review, deliberations and decision-making process. I am happy to speak with any Council member about its limited but important purview should they desire.*

###

January 8, 2026

City Councilmember Mark Reinecke attends "open house" at Geneva based Comfort Inn & Suites hosted by preservationists who developed a replica model of the old Alexander Brothers Blacksmith Shop (the structure at 4 E. State Street and subject to appeal by Shodeen of the HPC's denial of a demolition permit 12.16.25 and to be heard by Council on 1.12.26). The "open house" was covered by the Chicago Tribune and references Councilmember Reinecke's presence and public comments accordingly in an article entitled: *Some Geneva still pushing to save structure at old Mill Race Inn site, with demolition vote looming*

*Reinecke, who represents the 5th Ward, suggested at the meeting that residents who are opposed to the structure being torn down should "keep (their) eye on" the fact that they do not want the structure torn down, and that whatever comes next can be negotiated in the future. On Monday, the council is to decide whether to grant or deny the demolition request "upon consideration of the written record of the commission's decision and the applicant's appeal," per the city (Molly Morrow, Chicago Tribune/Aurora Beacon News 1.9.26)*

**From:** Collins, Peter  
**Sent:** Tuesday, December 02, 2025 10:53:38 AM  
**To:** McCready, Benjamin  
**Subject:** DRAFT: Data Center Move / I.T. Planning

All:

For discussion's sake, I just wanted to flesh out some upcoming needs/requirements/wants and make sure they are on the radar for the big picture. Most of this is spit-balling, but it needs to be in your planning thoughts.

Data Center: Upon completion of a new GPDHQ, it would seem there are a few options:

- Close Police functions of building, close off the Admin sections (everything under the flat roof), and leave Finance & Data Center (and move all of I.T.) in the existing arched roof section of the building. Flat roof section could be demo'd and removed.
- Close all functions of PD/Finance building. Demo. Move Data Center & IT to:
  - City Hall
  - Library Building
  - Somewhere on PD/PW Campus
  - Some leased-to-own dead retail (think brick Shodeen building N/E of current PD on Rt. 38).

As I await more detailed costing, I think I can make some fairly broad costing estimates that would serve for planning purposes.

- New Core Fiber Switch and programming: 100k
- Relocation of fiber head end to City Hall /Library: 100k
- Relocation of fiber head end anywhere else:
  - Engineering study to address current fiber usage across plant & any "make ready" work across Geneva utility poles/easements: 50k
  - Actual fiber construction: 100 to 200k

Assuming a new Data Center build, regardless of location, I.T. staff should move with it. Making some broad future assumptions about staffing, I'd suggest the consideration of the following, long-term space needs:

- Office for I.T. Manager
- Office for I.T. Analyst
- Office for I.T./Video Tech
- Server room
- Storage Room
- Workspace for new machine deployment
- If I.T. were tasked with managing G.I.S. functions, 3 offices for G.I.S. staff.
- Meeting Room
- Bathroom facilities

While we could live anywhere, I think it's important that we get ahead of the design/discussion process for new facilities.

While much of this may have been considered when we were looking at this from a "City Facilities Referendum", I don't know how much of it carried over when we shifted to a "GPD referendum." My guess is that the Police have not made any changes to absorb I.T. needs to their designs (should that be the plan.)

As I've professed in the past, as a branch of Admin Services (and historically being under the direct lead of Administration), I.T. would hope to continue to exist in that scenario, and so our preference would be to keep the "data" under that guidance and control on a daily basis, and it's probably cheaper to keep us as "Near West Siders" from the get go.

December 29, 2025 | [Read Online](#)

Welcome to Tri-Cities Central, a twice-weekly newsletter highlighting local happenings in Batavia, Geneva, St. Charles and surrounding communities.

**Get yours:** [subscribe here](#). **Refer a friend:** [share this link](#).

**Interested in advertising?** [Let's talk](#).

Good morning!

Hope you had a wonderful holiday week with family and friends.

Speaking of, we met up with friends for a holiday dinner at [Fortunato](#), a North Aurora seafood and Italian spot that opened in 2024 — our first visit. They bill themselves as “upscale and edgy yet comfortable,” which honestly felt pretty spot-on. I’d recommend giving it a try if you haven’t been.

**Holiday housekeeping reminder:** There will be no newsletter sent on Thursday (New Year’s Day). The normal schedule will resume on Monday, January 5.

?? Need to contact me with questions, tips or suggestions? [Get in touch here](#).

## ? Big stories and popular pieces from 2025

*Dunham Castle in Wayne. ?? Credit: Wikimedia Commons*

As the year wraps up, let’s look back at what resonated most with Tri-Cities Central readers.

From breaking local news to stories and anecdotes that sparked conversation, these were some of the most popular stories of 2025. Topics included new restaurants, major developments, deep dives into local history, and community favorites — prompting plenty of clicks and shares.

Here are 12 of those pieces — a snapshot of what resonated most in our community last year.

[Read more](#)

---

## ?? Hundred Oaks Farm: Friendly, local, and now taking reservations for spring

If “local” matters to you, [Hundred Oaks Farm](#) is a small, family-run farm on the east side of Geneva, raising livestock on rotating pasture under old oak trees.

### Their approach is simple:

- A small number of animals, raised outdoors in a calm environment
- Better, richer flavor thanks to natural foraging
- Local, sustainably sourced food you can feel good serving

**Spring reservations are now open** for pork and lamb boxes, whole chickens, and eggs — all raised right here in Geneva, with first pickups expected in April. [Follow along on Instagram](#) for farm updates as spring approaches.

Reserve for spring

---

## ?? Last week’s most popular links

**?? New 3rd Street spot:** In his latest video, local realtor Chris Wallace [takes us through Bread & Vine](#), the new Geneva bistro now open in the former Graham’s 318 Coffeehouse space.

**?? Airport tragedy:** A small twin-engine plane [crashed shortly after takeoff](#) from DuPage Airport in West Chicago just east of Geneva, killing both people onboard and prompting an investigation.

---

## ?? News to use

*The ?? symbol indicates a potential paywall.*

**?? Murder investigation:** Batavia police [charged a 37-year-old Batavia man](#) with murder after finding a woman with life-threatening injuries in a Church Street apartment last week (she died at the scene). The man had called dispatchers saying he had killed his wife.

**?? New laws to know:** An [expansive list of new Illinois laws](#) taking effect on January 1 will bring changes to public safety, housing, schools, health care, and policing — many of which will likely impact residents across the Tri-Cities.

**?? Storefront crash:** A Jeep [crashed into Rosati’s Pizza](#) in Batavia on Christmas Eve, damaging the restaurant and sending two employees and the driver to the hospital. Police said the driver may have been experiencing a medical issue when he crashed.

**?? Riverfront makeover:** St. Charles officials continue to explore redevelopment options for the former police station site along the Fox River downtown, [hiring a public engagement firm](#) to

gather community input on possible projects.

**?? Emergency alerts:** Kane County launched a new public safety alert system that lets residents sign up for free, real-time emergency notifications by text, phone, email, or app. [Get more info and sign up.](#)

**?? Vanity vanquished:** In what's become a humorous annual tradition, Illinois rejected more than 550 vanity license plate requests (out of 56K total) in 2025 for being offensive, confusing, or hard to read. [See which ones topped the list.](#)

**?? Debate continues:** Geneva City Council is set for a special meeting on January 12 to hear the case from developer Shodeen Group after they filed an appeal to overturn the denial of a demolition request for the 4 E. State St. blacksmith shop in Geneva.

---

## ??? In the community

**?? Immigrant rally:** Local activist organizations have planned [community rally in downtown St. Charles](#) on January 3 aimed at celebrating immigrants and their contributions to the area.

**?? Local holiday magic:** A new children's book by St. Charles author Suzanna Palmer brings Geneva's [Christmas Walk tradition to life](#) by telling the story behind Bob's Candy Cane Parade, which was created by the owner of Graham's Chocolates.

**?? Artistic explosion:** The Geneva Chamber is organizing an "Art Explosion" event for May 2 where downtown shops and restaurants will feature pop-up galleries, live demos, and a wide range of local art. [Local artists can apply here](#) to get involved.

**?? Keeper of history:** Ken Shepro has begun work as Kane County's new, unpaid historian, focusing on preserving local history and preparing for the nation's 250th anniversary. [Learn how he got here](#) and what's to come.

**?? Winner winner:** According to the Illinois Lottery, one of the \$50K winning tickets from the recent \$1.87 billion Powerball jackpot drawing was sold at a [7-Eleven location in St. Charles](#).

**?? Elementary school refresh:** Batavia School officials approved a [summer 2026 renovation plan](#) at Louise White School that adds security upgrades, new classrooms, and significant infrastructure improvements.

---

## ?? Live music

Another week, another unusual holiday schedule. This rundown once again features the full week (Monday through Sunday) since we don't be sending a newsletter on Thursday (New Year's Day).

Plenty of fun performances to choose from through the weekend — enjoy!

[See the full schedule](#)

---

*SPONSORED CONTENT*

# ? Award-winning brunch at an unbeatable price — and a Holiday Look Book for you to explore

Sunday brunch is a time-honored tradition — and you won't find a better value in the Tri-Cities than at [The Little Traveler's Atrium Café](#). In fact, it was named Best Brunch in West Suburban Living's 2024 Best of the West.

For just \$12.95, enjoy a full spread of fresh, house-made favorites, from fluffy omelets with crispy bacon to Swedish pancakes and Crab Cakes Benedict. Trust me, there's a reason so many local folks have been coming back for decades.

?? **Holiday Almanack is out!** Check out The Little Traveler's 2025 [Holiday Almanack & Look Book](#) for upcoming events and festive new products.

See the Sunday brunch menu

---

## ?? Local biz

*The ?? symbol indicates sponsored content.*

?? **Recall alert:** A Geneva-based sweets company [recalled two types of holiday bark](#) sold at Aldi stores nationwide after a packaging mix-up led to undeclared allergens that could pose serious health risks.

?? **Career booster for veterans:** Fermilab in Batavia will receive \$8 million from the U.S. Department of Energy to [expand its VALOR program](#), which trains and places military veterans into technical careers at the lab.

?? **Upgrade your Bears gear:** The Chicago Bears made the playoffs — make sure you prepare accordingly! Urban Artisan in Geneva has the hoodies, shirts, coasters, decor, and other items you need to support your hometown team in style. [View their sports selection.](#)

---

## ??? Un-classifieds

*The ?? symbol indicates sponsored content.*

?? **Local home sales:** See [recent property sales](#) for Kane County — including this [nearly \\$1M estate](#) with private lake access on Old Homestead Road in St. Charles.

?? **Need a trustworthy local realtor?** Get in touch with Tri-Cities expert **Chris Wallace** at [chriswallace@atproperties.com](mailto:chriswallace@atproperties.com) or [chriswallacere.com](mailto:chriswallacere.com).

?? **Local obits:** [Recent obituaries](#) posted by Tri-Cities funeral homes.

?? **Police reports:** View [police reports and arrest logs](#) for Batavia, Geneva, St. Charles and Campton Hills.

**From:** Morrow, Molly  
**Sent:** Friday, January 16, 2026 12:04:48 PM  
**To:** foia  
**Subject:** FOIA request, Aurora Beacon-News

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Dear FOIA Officer:

Please consider this a freedom of information request for the following records:

All emails sent or received by Dean Kilburg, Mark Reinecke, Anaïs Bowring, William Malecki, Richard Marks, Brad Kosirog, Larry Furnish, Martha Paschke, Amy Mayer, Jeff Palmquist and Kevin Burns between Dec. 1, 2025 and Jan. 16, 2026, that include any of the following search terms in the subject, body or attachments of the email (please do individual searches for these keywords if possible):

"Shodeen"  
"Dave Patzelt"  
"HPC"  
"evidentiary record"

If this search would yield a burdensome amount of results, please contact me, as I am willing to narrow the scope of my request.

Please note: I know of no exemption that would allow these records to not be released, absent pinpoint redactions for private information such as Social Security Numbers. If your agency believes any parts of any records are exempt from disclosure, please provide an explanation to justify the redaction or withholding, and then provide the rest of the records. Please note that statute does not allow your agency to withhold documents in their entirety if only parts of the records may be exempt.

I'm requesting the records in electronic format, if they can be provided in that format. Otherwise, please provide the records in whatever format they are kept.

I am a member of the news media doing research in the public interest and request fees be waived. Please call me if you believe this request will cost more than \$50 to fulfill.

Please contact me with any questions at [mmorrow@chicagotribune.com](mailto:mmorrow@chicagotribune.com) or (312) 237-6299. Thank you very much.

Best,  
Molly Morrow

I assume that the proposed structure will need to go before HPC as it is within the footprint of the historic structure.

If so, is it too late to be on the 1/21/2026 HPC agenda?

Hey Bob,

Attached is a spreadsheet that contains all of the water services. I used the filter in excel to show water services that only contain lead, galvanized or suspected or unknown on either the customer or city side. I also have only filtered it to show ones that had letters sent out before 2025.

Feel free to adjust any filters if you need to but this is just a snapshot of our GIS water service data.

Cam or Ian,

The list you sent did not give me galvanized services that have been sent letters. It might be because there is no date in the field for many of these addresses. Please take a look.

I also need a list of addresses that we have no customer or city side material in the data base for the address.

Thanks

Subject: Addresses lead letter

From the data base that I update the material list map there is a section on when letters have been sent to people with lead or galvanized services. Needs to be sent annually.

Now, ones that I have sent out with a date of 2025 don't need to be sent a letter.

Can you send me a list that has address with a date before 2025 for both lead and galvanized services.

**Subject:** ATTORNEY CLIENT PRIVILEGE WORK PRODUCT - DRAFT AMENDMENT or AGREEMENT for DEMOLITION OF STRUCTURE at 4 E. STATE STREET  
**Importance:** High

Alex, David & Ron,

Below is a stream of consciousness amendment/agreement related to the demolition of the structure at 4 E. State Street relevant to the advancement of redevelopment of property along the southeastern shore of Rt. 25 & Rt. 38.

There's a lot to digest so just let me know when you'd like to discuss and dissect. J

KB

**DRAFT Demolition Permit Amendment/Agreement Toward Advancing Redevelopment of 4 E. State Street Property**

-

-

~~1. Upon careful and responsible disassembling of the structure (avoiding merely bulldozing), materials deemed worthy of preserving for monument design, development and installation shall be relocated from 4. E. State parcel and stored in a location agreed upon and authorized by the City. Costs associated with such work shall be paid for with TIF funds. *I don't think we should commit to this.*~~

2. Remaining material from the disassembled structure will be offered to the GHM as a right-of-first-refusal to be used for purposes including but not limited to, collections, fundraising (selling pieces), etc.
3. Preserve sufficient material from structure to design and develop and educational structure (monument) recognizing the erstwhile Blacksmith Shop and its relationship to the City for public benefit and place said structure (monument) on or in close proximity to the redevelopment of the 4 E. State parcel. *Does it have to be a separate monument? Or can it be incorporated into the structure and signed as such, or something along those lines?*
4. Design of said monument to be directed by a panel of citizens appointed by the City and will include at least 2 representatives of the City Council, 1 representative from GHM , 1 representative of the Shodeen Group/Foundation (??? not sold on Shodeen rep), 1 representative from the City's Historic Preservation Commission and 1 one at-large community representative. *I would like to discuss this more, this part makes me nervous. We need a process that will help "rebuild" the relationship between the community and Shodeen – this could inhibit this. I like the spirit of it, but given the poor relationship would need to be very carefully managed.*

5. All costs associated with the design, development and installation of said monument will be paid for by a grant from the Shodeen Foundation and not to exceed \$\_\_\_\_\_

***or...***

All costs associated with the design, development and installation of said monument will be paid for by TIF funds as the monument is a “public benefit”. Costs associated thereto will be deducted from the anticipated TIF request by Mill Race Land Company/Shodeen. ***I think the approval and or proposal to use public funds with the fines out in the wind would be a bad idea.***

6. Perpetual care of said monument shall be paid for by TIF funds and upon expiration of the TIF said costs shall be transferred to the City (just as the “Rain Man” statute on S. Third Street). ***Same comment as above.***
7. Payment of fines assigned to the Mill Race Land Company shall be recouped by the City (effective dates of aggregate fines tbd) by means of subtracting said amount of fines from anticipated TIF request by Mill Race Land Company/Shodeen and approved by the City. **This needs to be front and center and carefully articulated. Top of the fold as they say.**

**NOTE:**

*Per our own code we need to add dates and expectations of when disassembling of structure must commence.*

*Notice that I have not included any redevelopment deadline submittal date...should I/we?*

**Subject:** cautionary letter?

Hi Ron,

Someone provided me with this, stating it was a letter from you on Jan. 5 to the Geneva City Council members regarding the Jan. 12 expected action on the Shodeen demolition proposed for the old blacksmith shop.

Can you confirm that you sent this letter on Jan. 5?

*I am informed of several written communications by and between Council Members relating to the above referenced matter which is before the Council on January 12, 2026.*

*I am further advised there may have been verbal communications as well and that one or more face-to-face meetings may be contemplated with a representative of the Petitioner in attendance.*

*All of the above are potentially problematic and is the reason for this Memorandum.*

*Given the sensitive nature of the item coming before the Council on the 12th, I believe it is important that I remind the Council that on the 12th, the Council will be sitting in a quasi-appellate court capacity, and not in its typical legislative capacity.*

*More specifically, the Council's only role is to determine whether to sustain or overrule a decision from the HPC.*

*In that capacity, it is instructive to again reiterate that the Council and Mayor understand that the entirety of the evidentiary record has already been adduced and no further evidence may now be introduced or re-visited, including any individual fact-finding, presentations or interviewing of witnesses by Council members.*

*That is, all Council deliberations should be focused singularly on the record and not on anything outside of that record.*

*Doing otherwise may jeopardize the deliberative process and result.*

*In sum, no impermissible outside processes/information or the like should be entertained.*

*Thus, I strongly suggest that all Council members refrain from any other actions or activities and constrain themselves only to the written record and the transcript of proceedings before the HPC, because that - only that - comprises the official record for Council's review, deliberations and decision-making process.*

*I am happy to speak with any Council member about its limited but important purview should they desire.*

I also received information that on Jan. 3, Dean Kilburg invited council members - no more than three at a time - to meet privately with Dave Patzelt.

*"I was asked and just trying to facilitate communication to find a path forward. ... This provides a chance for raising possibly your questions or ideas not appropriate for the special meeting and for Dave to hear your thoughts and share possible ideas for the historic piece,"* according to the information I received.

Was your memorandum in response to Dean's effort to meet privately with Patzelt?

Thank you.

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12?PM Lee Eysturlid <[leysturl@imsa.edu](mailto:leysturl@imsa.edu)> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in

ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlið

**Subject:** Construction/digging/damage on 108 Oak st

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

***Rich Babica***

**Subject:** Re: Construction/digging/damage on 108 Oak st

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12?PM Lee Eysturlid <[leysturl@imsa.edu](mailto:leysturl@imsa.edu)> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in

ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlið

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlið

**Subject:** Construction/digging/damage on 108 Oak st

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

***Rich Babica***

**Subject:** Re: Construction/digging/damage on 108 Oak st

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12?PM Lee Eysturlid <[leysturl@imsa.edu](mailto:leysturl@imsa.edu)> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

Lee Eysturid

On Thu, Dec 25, 2025 at 8:17?AM Dean Kilburg <[dkilburg49@gmail.com](mailto:dkilburg49@gmail.com)> wrote:

Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

Dean

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

That was a lot. I am not sure what my takeaway is supposed to be. I guess you are telling me the city failed in a number of its responsibilities to a resident/taxpayer/property owner that has striven for 25 years to maintain that property and a small greenspace, and what? Dean Kilburg said that you and he would come and talk with me, face-to-face (it was in the email), will that happen? I have recorded the events (including the gas main break - which you don't address - the Sonoma guys told me they were given inadequate maps..) in pictures of the area; it is now a serious mess. I know that after this kind of thing the city usually just levels the ground and throws grass seed. Worthless. It means that I get to do the recovery work. Also, I have spoken with most of the contractors, especially several of the men from Sonoma Underground (who were, they told me, contracted by Geneva Electric/Power - they were all very cordial, btw.). When I told them about the city's treatment of me and the property, they rolled their eyes and said "this always happens, cities don't care and do as they want..." A damning indictment.

I would still like to meet with you, Rich, and at least one of my aldermen (I assume that would be Dean, he has been very good about communication) here, so I can show you the destruction. I would like a definitive idea of what parts of the property aren't worth fixing (Sonoma said they would return to run power lines from the new pole at some point - more destruction), so I know exactly what you all control and what I have left to me. Finally, if the Roosevelt is this much of a mess, can you imagine the construction of a six story apartment block on the Mill Race lot?

Sincerely,

Lee W. Eysturlid

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

Hello:

So this doesn't address my questions. And now there are police and fire trucks as their is gas leak. No one could bother to tell me that either, although when I went to ask I was told to go away. How would I know to go read that? Clearly I am bothering you, sorry.

Do call or come by tomorrow if you can manage it.

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlid

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

That was a lot. I am not sure what my takeaway is supposed to be. I guess you are telling me the city failed in a number of its responsibilities to a resident/taxpayer/property owner that has striven for 25 years to maintain that property and a small greenspace, and what? Dean Kilburg said that you and he would come and talk with me, face-to-face (it was in the email), will that happen? I have recorded the events (including the gas main break - which you don't address - the Sonoma guys told me they were given inadequate maps..) in pictures of the area; it is now a serious mess. I know that after this kind of thing the city usually just levels the ground and throws grass seed. Worthless. It means that I get to do the recovery work. Also, I have spoken with most of the contractors, especially several of the men from Sonoma Underground (who were, they told me, contracted by Geneva Electric/Power - they were all very cordial, btw.). When I told them about the city's treatment of me and the property, they rolled their eyes and said "this always happens, cities don't care and do as they want..." A damning indictment.

I would still like to meet with you, Rich, and at least one of my aldermen (I assume that would be Dean, he has been very good about communication) here, so I can show you the destruction. I would like a definitive idea of what parts

of the property aren't worth fixing (Sonoma said they would return to run power lines from the new pole at some point - more destruction), so I know exactly what you all control and what I have left to me. Finally, if the Roosevelt is this much of a mess, can you imagine the construction of a six story apartment block on the Mill Race lot?

Sincerely,

Lee W. Eysturlid

108 Oak St.

On Thu, Jan 8, 2026 at 8:55?AM Babica, Rich <[rbabica@geneva.il.us](mailto:rbabica@geneva.il.us)> wrote:

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

**Subject:** Re: Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

Lee W. Eysturlid

630-254-3327

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Hello:

That was a lot. I am not sure what my takeaway is supposed to be. I guess you are telling me the city failed in a number of its responsibilities to a resident/taxpayer/property owner that has striven for 25 years to maintain that property and a small greenspace, and what? Dean Kilburg said that you and he would come and talk with me, face-to-face (it was in the email), will that happen? I have recorded the events (including the gas main break - which you don't address - the Sonoma guys told me they were given inadequate maps..) in pictures of the area; it is now a serious mess. I know that after this kind of thing the city usually just levels the ground and throws grass seed. Worthless. It means that I get to do the recovery work. Also, I have spoken with most of the contractors, especially several of the men from Sonoma Underground (who were, they told me, contracted by Geneva Electric/Power - they were all very cordial, btw.). When I told them about the city's treatment of me and the property, they rolled their eyes and said "this always happens, cities don't care and do as they want..." A damning indictment.

I would still like to meet with you, Rich, and at least one of my aldermen (I assume that would be Dean, he has been very good about communication) here, so I can show you the destruction. I would like a definitive idea of what parts of the property aren't worth fixing (Sonoma said they would return to run power lines from the new pole at some point - more destruction), so I know exactly what you all control and what I have left to me. Finally, if the Roosevelt is this much of a mess, can you imagine the construction of a six story apartment block on the Mill Race lot?

Sincerely,

Lee W. Eysturlid

108 Oak St.

On Thu, Jan 8, 2026 at 8:55?AM Babica, Rich <[rbabica@geneva.il.us](mailto:rbabica@geneva.il.us)> wrote:

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

***Rich Babica***

**Subject:** Re: Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12?PM Lee Eysturlid <[levsturl@imsa.edu](mailto:levsturl@imsa.edu)> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware

of information on the website. Who am I to trust and where am I to seek correct information?

3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.

4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.

5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

On Thu, Dec 25, 2025 at 8:17?AM Dean Kilburg <[dkilburg49@gmail.com](mailto:dkilburg49@gmail.com)> wrote:

Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

Dean

Hello:

So this doesn't address my questions. And now there are police and fire trucks as their is gas leak. No one could bother to tell me that either, although when I went to ask I was told to go away. How would I know to go read that? Clearly I am bothering you, sorry.

Do call or come by tomorrow if you can manage it.

Lee

On Mon, Dec 22, 2025 at 3:22?PM Landers, Nate <[nlanders@geneva.il.us](mailto:nlanders@geneva.il.us)> wrote:

Good afternoon Lee,

The work that is currently taking place on Oak and Chrissey is being performed by Archon who is a contractor for AT&T. This is a result of the E. State St project and the relocation of the utilities to accommodate that work. This information was published to resident's on the city's website and can be found at this link which is updated weekly.

[E. State Street Reconstruction Updates](#)

All work is occurring in the public right of way and not on any private property. Construction is scheduled to be wrapped up tomorrow and then restoration of the area will begin. Any existing piles will be removed and the area will be leveled back out. Unfortunately, full restoration will not occur until spring.

While I don't have time to meet with you today, I am available tomorrow for further discussion if you would like.

Thanks,

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlid

(How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.

5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlid

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

That was a lot. I am not sure what my takeaway is supposed to be. I guess you are telling me the city failed in a number of its responsibilities to a resident/taxpayer/property owner that has striven for 25 years to maintain that property and a small greenspace, and what? Dean Kilburg said that you and he would come and talk with me, face-to-face (it was in the email), will that happen? I have recorded the events (including the gas main break - which you don't address - the Sonoma guys told me they were given inadequate maps..) in pictures of the area; it is now a serious mess. I know that after this kind of thing the city usually just levels the ground and throws grass seed. Worthless. It means that I get to do the recovery work. Also, I have spoken with most of the contractors, especially several of the men from Sonoma Underground (who were, they told me, contracted by Geneva Electric/Power - they were all very cordial, btw.). When I told them about the city's treatment of me and the property, they rolled their eyes and said "this always happens, cities don't care and do as they want..." A damning indictment.

I would still like to meet with you, Rich, and at least one of my aldermen (I assume that would be Dean, he has been very good about communication) here, so I can show you the destruction. I would like a definitive idea of what parts of the property aren't worth fixing (Sonoma said they would return to run power lines from the new pole at some

point - more destruction), so I know exactly what you all control and what I have left to me. Finally, if the Roosevelt is this much of a mess, can you imagine the construction of a six story apartment block on the Mill Race lot?

Sincerely,

Lee W. Eysturlid

108 Oak St.

On Thu, Jan 8, 2026 at 8:55?AM Babica, Rich <[rbabica@geneva.il.us](mailto:rbabica@geneva.il.us)> wrote:

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

**Rich Babica**

**Subject:** Re: Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

Lee W. Eysturlid

630-254-3327

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

I guess you are telling me the city failed in a number of its responsibilities to a resident/taxpayer/property owner that has striven for 25 years to maintain that property and a small greenspace, and what? Dean Kilburg said that you and he would come and talk with me, face-to-face (it was in the email), will that happen? I have recorded the events (including the gas main break - which you don't address - the Sonoma guys told me they were given inadequate maps..) in pictures of the area; it is now a serious mess. I know that after this kind of thing the city usually just levels the ground and throws grass seed. Worthless. It means that I get to do the recovery work. Also, I have spoken with most of the contractors, especially several of the men from Sonoma Underground (who were, they told me, contracted by Geneva Electric/Power - they were all very cordial, btw.). When I told them about the city's treatment of me and the property, they rolled their eyes and said "this always happens, cities don't care and do as they want..." A damning indictment.

I would still like to meet with you, Rich, and at least one of my aldermen (I assume that would be Dean, he has been very good about communication) here, so I can show you the destruction. I would like a definitive idea of what parts of the property aren't worth fixing (Sonoma said they would return to run power lines from the new pole at some

point - more destruction), so I know exactly what you all control and what I have left to me. Finally, if the Roosevelt is this much of a mess, can you imagine the construction of a six story apartment block on the Mill Race lot?

Sincerely,

Lee W. Eysturlid

108 Oak St.

On Thu, Jan 8, 2026 at 8:55?AM Babica, Rich <[rbabica@geneva.il.us](mailto:rbabica@geneva.il.us)> wrote:

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

**Rich Babica**

**Subject:** Re: Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

Lee W. Eysturlid

630-254-3327

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

On Thu, Dec 25, 2025 at 8:17?AM Dean Kilburg <[dkilburg49@gmail.com](mailto:dkilburg49@gmail.com)> wrote:

Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

On Mon, Dec 22, 2025 at 3:22?PM Landers, Nate <[nlanders@geneva.il.us](mailto:nlanders@geneva.il.us)> wrote:

Good afternoon Lee,

The work that is currently taking place on Oak and Chrissey is being performed by Archon who is a contractor for AT&T. This is a result of the E. State St project and the relocation of the utilities to accommodate that work. This information was published to resident's on the city's website and can be found at this link which is updated weekly.

[E. State Street Reconstruction Updates](#)

All work is occurring in the public right of way and not on any private property. Construction is scheduled to be wrapped up tomorrow and then restoration of the area will begin. Any existing piles will be removed and the area will be leveled back out. Unfortunately, full restoration will not occur until spring.

While I don't have time to meet with you today, I am available tomorrow for further discussion if you would like.

Thanks,

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlid

Dear FOIA Officer:

Please consider this a freedom of information request for the following records:

All emails sent or received by Dean Kilburg, Mark Reinecke, Anaïs Bowring, William Malecki, Richard Marks, Brad Kosirog, Larry Furnish, Martha Paschke, Amy Mayer, Jeff Palmquist and Kevin Burns between Dec. 1, 2025 and Jan. 16, 2026, that include any of the following search terms in the subject, body or attachments of the email (please do individual searches for these keywords if possible):

"Shodeen"

"Dave Patzelt"

"HPC"

"evidentiary record"

If this search would yield a burdensome amount of results, please contact me, as I am willing to narrow the scope of my request.

Please note: I know of no exemption that would allow these records to not be released, absent pinpoint redactions for private information such as Social Security Numbers. If your agency believes any parts of any records are exempt from disclosure, please provide an explanation to justify the redaction or withholding, and then provide the rest of the records. Please note that statute does not allow your agency to withhold documents in their entirety if only parts of the records may be exempt.

I'm requesting the records in electronic format, if they can be provided in that format. Otherwise, please provide the records in whatever format they are kept.

I am a member of the news media doing research in the public interest and request fees be waived. Please call me if you believe this request will cost more than \$50 to fulfill.

Please contact me with any questions at [mmorrow@chicagotribune.com](mailto:mmorrow@chicagotribune.com) or (312) 237-6299. Thank you very much.

Best,

Molly Morrow

**Subject:** RE: Appeal of CASE 2025-114: 4 E. State Street

?

Mr. Kilburg,

While the vote last night was the outcome that Landmarks Illinois hoped for, I completely appreciate that the lack of movement at this site is frustrating for all parties. As far as funding, Landmarks Illinois has two grant programs that 4 E. State Street is geographically eligible for. Our [Preservation Heritage Fund](#) is for brick and mortar work, while the [Donnelley Fund](#) is for project planning. Private entities like Shodeen are not eligible for either of these programs, but the City of Geneva would be an eligible applicant. We prioritize funding for places that have appeared on our Most Endangered Historic Places in Illinois list in the past, as 4 E. State Street has. We also have the [Reinvestment Program](#), a revolving loan fund that helps to fill gaps in financing for historic preservation projects. At present we're able to make loans of up to \$200,000 in communities outside of Chicago. We would also welcome the opportunity to help identify other potential funding sources, which depend in part on a proposed use and whether the building will continue to be privately owned.

Best,

**Kendra Parzen**

Ms. Parzen,

Thanks for your memo regarding the Geneva's special meeting last night. Your points are all appropriate and well taken. Unfortunately, we have had grid-lock and the site will remain an eye sore for our community. Without communication and some level of compromise, we are probably looking at the status quo for at least a few more years. I believe memorializing the structure as proposed will eventually play into the eventual development of the Mill Race. Some may call that would be surrendering to the Shodeen's (the developer), my vote reflected accepting the reality of the situation we find ourselves in. Denying demolition for nearly a decade hasn't worked. Maybe we need those very passionate about the preservation of these historic structures to provide financial resources so we can consider a different approach. What funding resources do you have available?

Thanks for your communication and interest with this very challenging issue for the city and our elected officials.

Dean Kilburg

Kathleen,

The following memo from Landmarks Illinois contains information on funding historic preservation projects for municipalities. Has Geneva explored or submitted application for such funding that could play a possible role in reaching a possible resolution with the Blacksmith structure?

Thanks.

Dean

?

Mr. Kilburg,

While the vote last night was the outcome that Landmarks Illinois hoped for, I completely appreciate that the lack of movement at this site is frustrating for all parties. As far as funding, Landmarks Illinois has two grant programs that 4 E. State Street is geographically eligible for. Our [Preservation Heritage Fund](#) is for brick and mortar work, while the [Donnelley Fund](#) is for project planning. Private entities like Shodeen are not eligible for either of these programs, but the City of Geneva would be an eligible applicant. We prioritize funding for places that have appeared on our Most Endangered Historic Places in Illinois list in the past, as 4 E. State Street has. We also have the [Reinvestment Program](#), a revolving loan fund that helps to fill gaps in financing for historic preservation projects. At present we're able to make loans of up to \$200,000 in communities outside of Chicago. We would also welcome the opportunity to help identify other potential funding sources, which depend in part on a proposed use and whether the building will continue to be privately owned.

Best,

Kendra Parzen

Ms. Parzen,

Thanks for your memo regarding the Geneva's special meeting last night. Your points are all appropriate and well taken. Unfortunately, we have had grid-lock and the site will remain an eye sore for our community. Without communication and some level of compromise, we are probably looking at the status quo for at least a few more years. I believe memorializing the structure as proposed will eventually play into the eventual development of the Mill Race. Some may call that would be surrendering to the Shodeen's (the developer), my vote reflected accepting the reality of the situation we find ourselves in. Denying demolition for nearly a decade hasn't worked. Maybe we need those very passionate about the preservation of these historic structures to provide financial resources so we can consider a different approach. What funding resources do you have available?

Thanks for your communication and interest with this very challenging issue for the city and our elected officials.

**Subject:** RE: Landmarks Illinois Funding

Good Morning,

Thank you for sending this information. We have explored these funding options in the past and have discussed them with the owner's representative. As we understand, owner participation is needed because an applicant must own or control the subject property for a project to be eligible for funding.

Thanks, Cathleen

Kathleen,

The following memo from Landmarks Illinois contains information on funding historic preservation projects for municipalities. Has Geneva explored or submitted application for such funding that could play a possible role in reaching a possible resolution with the Blacksmith structure?

Thanks.

Dean

**Subject:** RE: Appeal of CASE 2025-114: 4 E. State Street

?

Mr. Kilburg,

While the vote last night was the outcome that Landmarks Illinois hoped for, I completely appreciate that the lack of movement at this site is frustrating for all parties. As far as funding, Landmarks Illinois has two grant programs that 4 E. State Street is geographically eligible for. Our [Preservation Heritage Fund](#) is for brick and mortar work, while the [Donnelley Fund](#) is for project planning. Private entities like Shodeen are not eligible for either of these programs, but the City of Geneva would be an eligible applicant. We prioritize funding for places that have appeared on our Most Endangered Historic Places in Illinois list in the past, as 4 E. State Street has. We also have the [Reinvestment Program](#), a revolving loan fund that helps to fill gaps in financing for historic preservation projects. At present we're able to make loans of up to \$200,000 in communities outside of Chicago. We would also welcome the opportunity to help identify other potential funding sources, which depend in part on a proposed use and whether the building will continue to be privately owned.

Best,

**Kendra Parzen**

Ms. Parzen,

Thanks for your memo regarding the Geneva's special meeting last night. Your points are all appropriate and well taken. Unfortunately, we have had grid-lock and the site will remain an eye sore for our community. Without communication and some level of compromise, we are probably looking at the status quo for at least a few more years. I believe memorializing the structure as proposed will eventually play into the eventual development of the Mill Race. Some may call that would be surrendering to the Shodeen's (the developer), my vote reflected accepting the reality of the situation we find ourselves in. Denying demolition for nearly a decade hasn't worked. Maybe we need those very passionate about the preservation of these historic structures to provide financial resources so we can consider a different approach. What funding resources do you have available?

Thanks for your communication and interest with this very challenging issue for the city and our elected officials.

Dean Kilburg

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Kathleen,

The following memo from Landmarks Illinois contains information on funding historic preservation projects for municipalities. Has Geneva explored or submitted application for such funding that could play a possible role in reaching a possible resolution with the Blacksmith structure?

Thanks.

Dean

**Subject:** RE: Appeal of CASE 2025-114: 4 E. State Street

?

Mr. Kilburg,

While the vote last night was the outcome that Landmarks Illinois hoped for, I completely appreciate that the lack of movement at this site is frustrating for all parties. As far as funding, Landmarks Illinois has two grant programs that 4 E. State Street is geographically eligible for. Our [Preservation Heritage Fund](#) is for brick and mortar work, while the [Donnelley Fund](#) is for project planning. Private entities like Shodeen are not eligible for either of these programs, but the City of Geneva would be an eligible applicant. We prioritize funding for places that have appeared on our Most Endangered Historic Places in Illinois list in the past, as 4 E. State Street has. We also have the [Reinvestment Program](#), a revolving loan fund that helps to fill gaps in financing for historic preservation projects. At present we're able to make loans of up to \$200,000 in communities outside of Chicago. We would also welcome the opportunity to help identify other potential funding sources, which depend in part on a proposed use and whether the building will continue to be privately owned.

Best,

**Kendra Parzen**

Ms. Parzen,

Thanks for your memo regarding the Geneva's special meeting last night. Your points are all appropriate and well taken. Unfortunately, we have had grid-lock and the site will remain an eye sore for our community. Without communication and some level of compromise, we are probably looking at the status quo for at least a few more years. I believe memorializing the structure as proposed will eventually play into the eventual development of the Mill Race. Some may call that would be surrendering to the Shodeen's (the developer), my vote reflected accepting the reality of the situation we find ourselves in. Denying demolition for nearly a decade hasn't worked. Maybe we need those very passionate about the preservation of these historic structures to provide financial resources so we can consider a different approach. What funding resources do you have available?

Thanks for your communication and interest with this very challenging issue for the city and our elected officials.

Dean Kilburg

**Subject:** Shodeen's fine

Hi Ron,

Shodeen's fine from Oct. 17, 2024 to today is 426 days, which, at \$750 per day is \$319,500.

So ... is anybody going to make a move to have Shodeen pay it, or is it just going to keep rising?

And if there's no move to enforce collecting the fine, then maybe the city shouldn't cite anybody and nobody should pay any fines for property code violations.

Thanks.

**Subject:** RE: Special City Council Meeting - Monday, January 12, 2026

Good Morning Mayor & City Council (bcc'd):

I have received questions regarding 4 E. State Street from various Council members. As is the practice, I am providing the answers to the entire City Council.

***Previous meeting dates regarding 4 E. State Street:***

Please see page 2 of the staff report (page 21 of [this meeting packet](#)) for a summary of prior meetings including the landmark nomination, charrette, landmark boundary amendment, and demolition request.

***Previous discussions about integrating the structure into future projects:***

The short answer is that Shodeen was presenting this information to support their previous request for demolition, claiming that they met standard 3 and that the "retention of the structure would cause the owner undue economic hardship". The plan to adaptively reuse the structure was submitted with a detailed proforma to show the high cost per square foot to bring the building to a habitable condition and the low return on that investment. The HPC and CC denied demolition based on economic hardship because the applicant did not factor in that the structure as part of a larger redevelopment site where TIF assistance is needed, and concluded (with the help of a 3<sup>rd</sup> party consultant review the proforma) that preserving the structure as part of a larger redevelopment site with TIF assistance would not cause undue economic hardship.

Thank you, wishing you all a safe and Happy New Year!

Alex

Good morning Mayor & City Council (bcc'd):

Please mark your calendars for a Special City Council Meeting on **Monday, January 12, 2026**. A summary of the meeting purpose has been provided below by Director DeGroot.

*On December 16<sup>th</sup> the Historic Preservation Commission unanimously voted to deny the demolition of the historic landmark located at 4 E State Street. On December 17<sup>th</sup> the applicant requested an appeal of the decision. The ordinance requires that the appeal be considered by the City Council within 30 days. A special City Council meeting will be held on January 12<sup>th</sup> where both the applicant and the historic preservation commission will have the right to be heard. A reversal or modification of the commission's determination requires not less than 2/3 of the alderpersons holding office.*

*Information on the case can be found on the [development projects page](#) and in the [agenda center](#).*

Please do not hesitate to reach out with any questions.

Thank you,

Alex

Amy,

I wanted to confirm my comment from Monday evening that I had no intent to exclude you from my efforts to facilitate a dialogue with Shodeen's. Here is the 1/2 memo you apparently didn't receive. Hopeful we can work together to bring a resolution to this development challenge. Enjoy the nice weather.

Dave Patzelt with Shodeen is meeting with any council members interested in meeting prior to the 1/12 meeting as appropriate (no more than 3). This provides a chance for raising your questions not appropriate for the special meeting and for Dave to share possible ideas for the historic piece. Are you available next week during an afternoon? There is a meeting set for 1/5 at 1:30 and another 1/7 at 1:30. Would either work or a possible time for you that would? I'm just trying to facilitate communication to find a path forward. Let me know...

?

Hey Bob,

I added a field (Column AH in the attached spreadsheet) that has customer-city as one field for easier filtering. I also sorted the spread sheet based on notified date. I have a filter set to show the relevant materials you outlined in the original email.

Cam,

I don't understand why more galvanized are not showing up? 627 Campbell St. is just an example. We have over 100 galvanized.

**Subject:** RE: Addresses lead letter

Hey Bob,

Attached is a spreadsheet that contains all of the water services. I used the filter in excel to show water services that only contain lead, galvanized or suspected or unknown on either the customer or city side. I also have only filtered it to show ones that had letters sent out before 2025.

Feel free to adjust any filters if you need to but this is just a snapshot of our GIS water service data.

Cam or Ian,

The list you sent did not give me galvanized services that have been sent letters. It might be because there is no date in the field for many of these addresses. Please take a look.

I also need a list of addresses that we have no customer or city side material in the data base for the address.

Thanks

Subject: Addresses lead letter

From the data base that I update the material list map there is a section on when letters have been sent to people with lead or galvanized services. Needs to be sent annually.

Now, ones that I have sent out with a date of 2025 don't need to be sent a letter.

Can you send me a list that has address with a date before 2025 for both lead and galvanized services.

1st Ward Council Members Bowring and Malecki

I was in attendance at the last Historic Preservation Commission meeting where the commission voted 7-0 to deny the blacksmith shop demolition application that had been submitted by the property owner, a Shodeen controlled entity. My understanding is that Shodeen will be appealing this decision to city council in the near future.

Notwithstanding the antagonism shown toward the applicant by the commission, I did not hear a compelling reason for denying the application. Dave Patzelt from Shodeen stated that they would not be restoring the blacksmith shop building and their position has not changed from when the building was designated an historic landmark in 2018.

Their reason was clear, it is not economically feasible to restore the building with architects estimating the restoration cost to be in the \$1000 psf range. The project would entail a new building foundation, rebuilt walls (the current walls would need to be dismantled and rebuilt with new mortar), new doors and windows, interior finish out, roof joists and roof with HVAC, electrical and plumbing.

In essence a new building would be constructed, with the only material remaining from the original building would be the limestone wall blocks reassembled in the new walls. My question how can this reconstructed building than be considered historic.

In the eight years since the historic designation, no third party including the Geneva Park District has shown any interest in incurring the expense of the building restoration. How much longer should this go and why. I'm sure there are certain parties including the lawyers involved in the various litigation who would be happy to see the issue remain unresolved and continue into the future indefinitely. I doubt if the citizens of Geneva that you represent support that.

The building needs to come down and allow the overall development to proceed. To allow the present situation to continue is not acceptable.

Thank you,

Joel Erickson  
301 Burgess Road  
1st Ward

To: <[abowring@geneva.il.us](mailto:abowring@geneva.il.us)>, <[wmalecki@geneva.il.us](mailto:wmalecki@geneva.il.us)>

Mrs. Bowring and Mr. Malecki,  
I hope the day and New Year find you both well! As a constituent of the Ward 1, I am reaching out to you both as you prepare to consider the demolition and removal of the Blacksmith Shop this coming Monday. I'll not occupy a lot of your time as I know you both are likely receiving a great deal of feedback from the public on this issue. Just a quick background. My wife Janet and I have been residents at 427 Anderson Boulevard since 1999 where we raised a son (Jonah) and daughter (Sarah) both terrific kids (yikes...now adults!) who were byproducts of the Geneva public school system. I am an architect with a residential practice that has been blessed with many projects in Geneva's historic district. As well I've been teaching architecture at Judson University since 2008. Below are a few points to consider as your mull over your decision.

- 1) The demolition and permanent removal of the structure will greatly undermine the authority and purpose of the Historic Preservation Commission, a group that has been a key partner in the success of our downtown business district and residential district. I could go on and on with this point but I'll only note that having been a member of the HPC for 11 years (2000-2011) we had frequent incursions with the Shodeen organization as they pursued the removal the East View house, the Dodson mansion (once a hospital) and the many other structures. Shodeen now highlights the Dodson mansion as part of the Dodson Place retail development. The East View house is now the grande dame of homes along Route 31...hard to imagine them not there now. Can Shodeen work with and transform historic structures...you betcha they can. Is it easier to tear them down and erase their memory from our community, I guess this must be the case since they wish to do this with the blacksmith shop, but it's an odd argument to make in light of their successes. Certainly we can't predict the future, it seems likely though, that if Shodeen is given the authority to remove the blacksmith shop, there will inevitably be other applicants in the future requesting a similar fate for other historic structures in our community.
- 2) The property was purchased knowing full well that this structure was something important and would likely present the Shodeen organization with community interest and push back if they decided to remove the structure, yet little to no effort was made to placate the public that was and has been concerned about this. The organization it seems has done little to acknowledge the significance of the structure and even less as far as giving creative consideration for its reuse. It's clear they can do it as seen in their work with the Harrington Inn, Riverside Receptions and others throughout the Fox Valley.
- 3) It seems that there has been little to no compromise by Shodeen in relation to the repurposing of the blacksmith shop. The argument that was initially set forward was an issue of the cost of reusing the structure. The argument now has shifted to the structure being a public nuisance, a pretty easy argument to make when it's intentionally left unprotected and further compromised. It's been noted by both sides that the property is "unsightly", yet who currently owns the property? Who has ignored legal and financial consequences?...well you get the gist.
- 4) There aren't many artifacts like this one in our City, for that matter in the Fox Valley. It's easy to lose sight of this one as we hurdle toward being a City that has great potential and building it out to that potential will push structures like this into oblivion. Obviously once it's gone, it's gone and it's really our one chance to protect it.
- 5) Geneva has become and will likely even more so become a significant player in attracting residential and business interest in the years to come. As far as cities along the Fox River, trying to be objective about this, Geneva's downtown is and will be the most desirable location for both homeowners and businesses along the Fox River. That said, the long term financial upside for this site is enormous. Our City leadership should leverage this with the Shodeen organization. I do understand that this site is a challenging one to build on, but the folks at Shodeen purchased it knowing this. I believe that this parcel will

be a significant generator of income for the Shodeen organization so money spent now for the restoration or repurposing of the blacksmith shop will be minimal when seen through the lens of time and the future.

I'm sure there are many other arguments that can be made for keeping the blacksmith shop but the five noted above came to my mind initially. As I noted above, I served on the HPC for 11 years and I so appreciate and understand the significant commitment of your time and energy on behalf of our community. So at the end of the day you can put me in the camp of keeping the blacksmith shop.

Warmly and grateful for your service!

Sean

Rich,

Mr. Eysturlid has again reached out expressing concerns surrounding the work taking place adjacent to his property at Crissey and Oak. Would it be possible to schedule a time when we could meet with him? I feel it is important to address his questions in person and provide a time line for the completion of the work that is in progress? Let me know your schedule and I will make myself available.

Thank you,

Dean

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,  
Lee W. Eysturlid  
630-254-3327

On Thu, Dec 25, 2025 at 9:12 PM Lee Eysturlid <leysturl@imsa.edu> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.

2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost?), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that? However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

Lee Eysturid

On Thu, Dec 25, 2025 at 8:17?AM Dean Kilburg <[dkilburg49@gmail.com](mailto:dkilburg49@gmail.com)> wrote:

Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

Hello:

So this doesn't address my questions. And now there are police and fire trucks as their is gas leak. No one could bother to tell me that either, although when I went to ask I was told to go away. How would I know to go read that? Clearly I am bothering you, sorry.

Do call or come by tomorrow if you can manage it.

Lee

On Mon, Dec 22, 2025 at 3:22?PM Landers, Nate <[nlanders@geneva.il.us](mailto:nlanders@geneva.il.us)> wrote:

Good afternoon Lee,

The work that is currently taking place on Oak and Chrissey is being performed by Archon who is a contractor for AT&T. This is a result of the E. State St project and the relocation of the utilities to accommodate that work. This information was published to resident's on the city's website and can be found at this link which is updated weekly.

[E. State Street Reconstruction Updates](#)

All work is occurring in the public right of way and not on any private property. Construction is scheduled to be wrapped up tomorrow and then restoration of the area will begin. Any existing piles will be removed and the area will be leveled back out. Unfortunately, full restoration will not occur until spring.

While I don't have time to meet with you today, I am available tomorrow for further discussion if you would like.

Thanks,

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or

replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlid

Rich,

Mr. Eysturlid has again reached out expressing concerns surrounding the work taking place adjacent to his property at Crissey and Oak. Would it be possible to schedule a time when we could meet with him? I feel it is important to address his questions in person and provide a time line for the completion of the work that is in progress? Let me know your schedule and I will make myself available.

Thank you,

Dean

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,  
Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12 PM Lee Eysturlid <leysturl@imsa.edu> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.

2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that? However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

Good afternoon Lee,

The work that is currently taking place on Oak and Chrissey is being performed by Archon who is a contractor for AT&T. This is a result of the E. State St project and the relocation of the utilities to accommodate that work. This information was published to resident's on the city's website and can be found at this link which is updated weekly.

[E. State Street Reconstruction Updates](#)

All work is occurring in the public right of way and not on any private property. Construction is scheduled to be wrapped up tomorrow and then restoration of the area will begin. Any existing piles will be removed and the area will be leveled back out. Unfortunately, full restoration will not occur until spring.

While I don't have time to meet with you today, I am available tomorrow for further discussion if you would like.

Thanks,

Rich,

Mr. Eysturlid has again reached out expressing concerns surrounding the work taking place adjacent to his property at Crissey and Oak. Would it be possible to schedule a time when we could meet with him? I feel it is important to address his questions in person and provide a time line for the completion of the work that is in progress? Let me know your schedule and I will make myself available.

Thank you,

Dean

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,  
Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12 PM Lee Eysturlid <leysturl@imsa.edu> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.

2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost?), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that? However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or

replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlid

Lee,

I'm encouraged that you have received a response from city staff that they accept responsibility for the poor communication with Crissey and Oak residents impacted primarily by the Roosevelt development site. Larry and I have been involved in communicating with staff that residents deserve a better explanation of what transpired and sooner rather than later. We also felt responsible providing staff with some space for this follow up to take place. This is a positive step. We still are waiting for details around the gas leak and the safety concerns and lack of communication surrounding around that event apart from the earlier excavation issues. I have requested the recent FOIA request details submitted by a neighborhood resident. Larry and I would be happy to meet with you (at a good time for you) to try and address any questions you might have and discuss sidewalk, parkway and private property restoration in the spring. Let me know.

**Subject:** Construction/digging/damage on 108 Oak st

?

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlid

?

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

We strongly urge city council members to confirm the Dec 16 decision of Geneva's Historic Preservation Comm, denying the Shodeen corporation's proposal to demolish the original blacksmith shop.

In their third application to get approval for demolition, the Corp has not presented any new factors that would override earlier decisions,

In 2014, the Chicago Tribune quoted Shodeen's intention to respect and retain the historic features of this site. Instead, he has defied the will of the community and the courts ---- and the end result may well be **demolition by neglect**.

If the demolition proposal is rejected, then the community can pursue creative options for future development of the site.

With gratitude for all the time and energy you devote to community issues,

Liz and Carl Safanda  
630-853-1765

P.S. I am sure you are aware of the letter writing campaign orchestrated by Patrice Berteau and her minions, arguing for demolition.

Amy,

No slight intended here. I forwarded an email with same info as below to your personal address with 2000 in it. Apparently it was not received for some reason. Obviously the same invitation is extended to you. Is there a day and time that would work well for you this week. I'm sure they are interested in your thoughts. My apology for the missed communication. Call if you would like to discuss.

**Subject: Meeting Invitation**

?Dave Patzelt with Shodeen will meet with any council members interested in meeting prior to the 1/12 meeting as appropriate (no more than 3). This provides a chance for raising possibly your questions or ideas not appropriate for the special meeting and for Dave to hear your thoughts and share possible ideas for the historic piece. Are you available next week to possible meet?

I was asked and just trying to facilitate communication to find a path forward.

Let me know if interested and possible days that would work next week for you. Thanks.

**Subject:** Fwd: Model Presentation

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

P.S. I see on the city's website that a Committee of the Whole is already scheduled for January 5. If the agenda is full for that meeting, perhaps there could be a special meeting of the Council and COW on the following Monday, January 12. The issue is important enough.

My understanding is that the Council must vote within 30 days of the demolition applicant's appeal, which I believe would place the deadline on January 16.

Dear Alderpersons Bowring and Malecki,

My understanding is that the Shodeen Group has filed with the city an appeal of the decision of the Historic Preservation Commission.

As we discussed, would you be willing, as representatives of the First Ward, to suggest to the City Council that the Alexander brothers' blacksmith shop (Mill Race Inn) at 4 East State Street be placed on the agenda for a Committee of the Whole presentation? We're ready and very eager to give that presentation.

The justification for placing the blacksmith shop on the agenda is that we are a local group that wants everyone to understand the historic and future value of the structure, rather than view it as the unsightly ruin that it is today. We have created a museum-quality architectural model representing how the shop originally appeared when opened for business along the mill race 180 years ago, the year in which Geneva was incorporated as a city. Of course there was no photography back then. The creation of the model — exterior, interior and the adjacent mill race — is based on measurements and analysis of the structure's remains and historical records, and was guided by volunteers who have expertise in pioneer-era blacksmithing, historic preservation and architectural modeling. This will be new information that has not been presented any place before. Some have said that no one has stepped forward with viable recommendations for repurposing the landmark that benefits the overall community. We wish to offer recommendations.

For your own information, our intended presentation will be totally positive and educational. No mention of Shodeen, or fines, or ordinances, etc. We would present the model and briefly discuss its genesis, the task force, the research, the deliberations and the fabrication. We can then answer questions about the model, and follow up with a vision for the future. In other words, basically what I presented to you during your visit.

I know the timing for a Committee of the Whole presentation could be difficult this time of year and only 30 day in which to accomplish it. But I hope you agree that it would be important that the presentation occurs before a City Council vote on the appeal.

If the mayor, other alderpersons or anyone else wishes to see the model in advance, I'm more than happy to host additional visits as you did to my house. Please contact me if you need more information or wish to discuss.

Cordially,

— Alan

Hi Rich -

I spoke to the project manager from Sonoma who was onsite during the gas leak. He personally spoke to the homeowner and said the homeowner did express frustration that the City did not contact him about this work and implied that Sonoma was working for the City. The project manager corrected him and explained the situation, specifically explaining (a) Sonoma was not employed by the City (b) the work was related to The Roosevelt development and (c) Sonoma was employed by us, a private developer. My project manager said he remembers this interaction very clearly, the homeowner assumed this was City work which prompted Sonoma to explain. The homeowner accepted this response, he didn't appear to debate it & it wasn't discussed further.

Based on this detailed account from Sonoma, I'm inclined to believe him. Furthermore, this interaction was with a supervisor who is one of two of my primary contacts. He knows the job, who employs him etc. There would be no motivation from Sonoma to claim they were employed by the City.

Apologies this has gotten out of hand and is wasting City time and resources. We would like to make this right with our neighbor and propose restoring the landscaping. A Google picture from 2022 is below. The prior landscaping is a bit of an organized mess of ground cover, I'm confident we can come to an agreement with the homeowner on restoration.

Thanks,

I am sending you a rather lengthy email chain regarding the interactions we have had with this resident, and I have removed their name, emails and contact information to provide you the basis for and the latest issue.

From the City perspective, we cannot allow for a contractor not working for the City state to a resident that they are. I need you to discuss this with Sonoma Construction, and determine how best to correct his mis-statement. Also, the project team should be aware that there is at least one unhappy neighbor to your project:

01/08

Hello:

That was a lot. I am not sure what my takeaway is supposed to be. I guess you are telling me the city failed in a number of its responsibilities to a resident/taxpayer/property owner that has striven for 25 years to maintain that property and a small greenspace, and what? Dean Kilburg said that you and he would come and talk with me, face-to-face (it was in the email), will that happen? I have recorded the events (including the gas main break - which you don't address - the Sonoma guys told me they were given inadequate maps..) in pictures of the area; it is now a serious mess. I know that after this kind of thing the city usually just levels the ground and throws grass seed. Worthless. It means that I get to do the recovery work. Also, I have spoken with most of the contractors, especially several of the men from Sonoma Underground (who were, they told me, contracted by Geneva Electric/Power - they were all very cordial, btw.). When I told them about the city's treatment of me and the property, they rolled their eyes and said "this always happens, cities don't care and do as they want..." A damning indictment.

I would still like to meet with you, Rich, and at least one of my aldermen (I assume that would be Dean, he has been very good about communication) here, so I can show you the destruction. I would like a definitive idea of what parts of the property aren't worth fixing (Sonoma said they would return to run power lines from the new pole at some point - more destruction), so I know exactly what you all control and what I have left to me. Finally, if the Roosevelt is this much of a mess, can you imagine the construction of a six story apartment block on the Mill Race lot?

01/08

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

**Rich Babica**

Director of Public Works

01/02

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

12/25

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.

5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

12/22

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

***Rich Babica***

Subject: Shodeen Blacksmith Shop Demolition Request  
To: <[preservation@geneva.il.co](mailto:preservation@geneva.il.co)>

To: Historic Preservation Commission  
From: John Martin, 1017 Brigham Way, Geneva, Illinois

Members of the Commission:

I am unable to attend the December 16th meeting and am submitting this letter in support of the Shodeen petition to demolish the Mill Race blacksmith shop.

By way of introduction, my wife Jane and I have lived in Geneva for over 50 years and are both supporters of the Commission's efforts to constructively preserve and protect our community's architectural heritage. I have had the privilege of serving on the City's Plan Commission, Zoning Commission and Affordable Housing Committee. Additionally, I served two terms on the County Board, have been involved in many of the City's volunteer organizations and have a deep respect and love for this community.

Cutting to the chase, I am in complete support of this structure's demolition. Remembering its only marginal utility when part of the Mill Race Inn, attempting to integrate this remnant of history into a new project, in my opinion is little more than a fool's errand. Constructive re-use, such as the Pure Oil stations conversion into a bank drive-thru, leaves history visible and preserved. Embedding this structure into the walls of new construction, will preserve no truly visible architecture and be a waste of money and effort.

Cognizant of the fact that demolition is a difficult decision for a "preservation" commission I nonetheless respectfully urge that this body realistically and constructively grant the petition.

John Martin

Dear Mayor Burns and Aldermen,

In 1983 my husband and I moved our family to Geneva. After only one visit we knew it was exactly where we wanted to raise our children. We never once regretted our decision. Geneva was a dream come true small town. The Fox River, tree lined streets, train, wonderful shops, a great school system, and very important to us, it was dotted with history throughout the town. Every one of my friends and neighbors feels the same way. We all chose Geneva.

Geneva can continue on its plan for growth without removing its history.

The Alexander Blacksmith Shop is an essential part of the towns history.

It's well documented that Kent Shodeen said he would incorporate the shop in whatever he was allowed to build on the Mill Race property. He adaptively reused Community Hospital, The Rock Springs Creamery and Pump House.

There is no reason why the Blacksmith Shop can't be reused.

The Shodeen Group claims its condition is too severe. That responsibility is a direct result of them not doing one thing to protect it since the Mill Race in was demolished.

They have the means and the opportunity to right this wrong and keep their promise to the City and its residents. They also have the means to pay the fines they have incurred on the property.

I'm very concerned an unfortunate precedent will be set for future developers here if the Shodeen Family is allowed to renege on their original commitment, and the monetary obligations with seemingly no regard for Geneva and the residents.

Gentlemen,

As a resident of Geneva's 3rd Ward, I just wanted to state how much I appreciate all that has been done to preserve the blacksmith location along the river. It is apparent that Shodeen has allowed that location to become an eyesore in an attempt to clear the way to develop that site without any preservation restrictions. I believe that with some creative thinking the property could be developed in a way that preserves some of Geneva's history and is an asset to our community. I hope that Geneva will continue to stand strong and search for a solution that will embrace our history and not erase it.

Thank you for your service to our community,

From the Aurora Beacon-News:

## Some Geneva residents still pushing to save structure at old Mill Race Inn site, with demolition vote looming

Alan Lehigh talks to a group of residents about plans to try and save a landmarked structure in Geneva, at the site of the old Mill Race Inn, on Jan. 8, 2026. (Molly Morrow/The Beacon-News)

By [Molly Morrow](#) | [mmorrow@chicagotribune.com](mailto:mmorrow@chicagotribune.com) | Aurora Beacon-News

PUBLISHED: January 9, 2026 at 5:17 PM CST

In a last-minute effort to save a landmarked structure along the Fox River from being torn down, a group of Geneva residents is proposing the structure be turned into a visitor information center.

On Monday evening, the Geneva City Council is expected to vote on whether the limestone structure, formerly part of the Mill Race Inn, can be demolished. Last month, the city's Historic Preservation Commission [unanimously shot down](#) a request by Dave Patzelt, the president of Geneva-based Shodeen Group, to demolish the structure.

Patzelt then appealed the decision, which is why the matter now goes to the full council for a vote.

But, before the meeting on Jan. 12, some Geneva residents have pulled together a pitch to save the landmark structure.

The structure in question [was previously part of](#) the Mill Race Inn restaurant, which operated from the 1930s until it shuttered in 2011.

Though perhaps most famously a part of the popular eatery, the building [existed](#) long before that. It first housed a blacksmith shop in the 1840s, but, before it became part of the longstanding Geneva restaurant, housed a number of other businesses too: a wagon manufacturing and blacksmithing shop, a cooperage and a carriage painting shop, for example.

But, after the former Mill Race Inn site [was acquired](#) by Geneva-based development company Shodeen Group, demolition of most of the property [began](#) in 2016. The 1840s-era limestone sections, at the time, were to be evaluated as to whether they could be considered a historic landmark or be incorporated within any future development of the property.

What remains of the limestone building — which [was designated](#) as a landmark in 2018 — [weathered](#) multiple requests by its owner to demolish it over the years, none of which ultimately came to fruition.

Then, in October, Patzelt again [asked](#) the city to demolish the structure, arguing that keeping the structure is no longer in the majority of the community's best interest. The matter came to the city's Historic Preservation Commission last month, and was again shot down.

The property is no longer owned by Shodeen itself, according to Patzelt, but by the Mill Race Land Company, LLC, though Shodeen Construction Company [remains listed](#) as the contractor on the original application for demolition from October.

Patzelt [appealed](#) to the City Council the day after the Preservation Commission determination was made. The council can now vote to uphold, amend or reverse entirely the commission's decision, but a reversal or modification requires a two-thirds majority of the aldermen to vote for it. The vote [must occur](#) within 30 calendar days of an appeal being made.

So, in advance of [Monday's planned vote](#), a group of Geneva residents has come together in an attempt to stop the structure from being torn down — complete with an architectural model of what the blacksmith shop may have once looked like.

As a downpour carried on outside, around two dozen residents — including a few members of the Historic Preservation Commission and Geneva Ald. Mark Reinecke — gathered for a meeting on Thursday at the Comfort Inn & Suites in Geneva to talk about the proposal, and the fate of what was once the Alexander Brothers' Blacksmith Shop.

With the architectural model of the Blacksmith Shop front and center in the meeting room, the residents listened to Alan Leahigh, a preservation advocate who lives in Geneva's 1st Ward, where the structure [is located](#). Leahigh is one of the residents behind the recent push to preserve the Blacksmith Shop.

Leahigh said that, because “unfortunately, (they) don't have a time machine,” making a model was “the next best thing.”

The model itself was constructed by Craig Elliott, who also joined the resident meeting on Thursday. It was meant to represent what the Alexander Brothers' Blacksmith Shop may have looked like in the 1840s. It features the shop itself, as well as the nearby mill race.

Also displayed at the meeting was a watercolor painting by Chuck Cassell of the old Blacksmith Shop. Leahigh said a conversation with Cassell was part of what prompted this recent effort to save the structure.

“The trouble is that everybody sees these ruins, these remnants, and they're ugly,” Leahigh said at the meeting on Thursday. “Let's get (rid of) the ugliness, and I think most people really agree with that, but people didn't have much of a vision of what it might have looked like (in) the beginning.”

Thus, following some research into the structure's history, the architectural model and the painting ultimately came about, Leahigh explained.

“We think this is a pretty good representation,” Leahigh said. “We've done measurements, so ... the ratios are all correct and so forth.”

These efforts had been in progress before the most recent demolition request from Shodeen, Leahigh explained, but upon hearing about the request, the involved residents finished up the project for the public to see.

“The problem is that people don't, all they see is the ruins there, and don't see the possibilities of what it was and what it could be,” Leahigh said.

But, even if the council votes to keep the structure standing, Leahigh noted that there needs to be a vision for how it could be used.

His group's suggestion? A visitor information center for the tri-cities: Geneva, St. Charles and Batavia.

Leahigh pointed to how such a project could serve those using the nearby Fox River trail, canoers and kayakers and other visitors to downtown Geneva.

He also pointed to how it could serve as a sort of bicentennial project in the coming years. James and Charity Herrington and their family, often considered the founders of Geneva, first arrived in the area in 1835, according to [the city's history](#).

How does such a project come to fruition? Leahigh, on Thursday, said that is “not (their) expertise” and that the expected costs are “a little out of (their) lane,” but said that “the city’s got to grab hold and do something” if the developer will not.

Patzelt, in an email to The Beacon-News, on Friday said that week was “the first that (he has) heard of” the visitor center idea. Pointing to previous requests from those in favor of preserving the structure for additional time to determine how it might be used, Patzelt said that no one “willing to rehabilitate, relocate, reuse, or repurpose materials ... has come forward” in the years since.

As for the reuse of the building in general, Patzelt cited a 2022 estimate of \$1.5 million to renovate and restore the structure, saying that there is “nobody that (Shodeen is) aware of who will fund paying to restore the structure and then pay to continue to maintain the structure.”

“It is unfortunate that the remnant structure is simply not (reusable),” Patzelt said in the email.

At Thursday’s meeting, some residents questioned whether the project would be feasible or desired by Shodeen, and discussed what could be done in advance of Monday’s meeting.

Reinecke, who represents the 5th Ward, suggested at the meeting that residents who are opposed to the structure being torn down should “keep (their) eye on” the fact that they do not want the structure torn down, and that whatever comes next can be negotiated in the future.

On Monday, the council [is to decide](#) whether to grant or deny the demolition request “upon consideration of the written record of the commission’s decision and the applicant’s appeal,” per the city.

“Monday’s special City Council meeting will be tightly managed to ensure due process is followed every step of the way,” Geneva Mayor Kevin Burns told The Beacon-News on Friday.

The City Council meeting will take place at 7 p.m. Monday, Jan. 12, at 109 James St. in Geneva.

Thanks,

K\*

## Geneva City Council denies appeal to demolish landmarked structure at old Mill Race Inn site

The landmarked structure at 4 E. State St. in Geneva, seen on Jan. 12, 2026, was formerly part of the Mill Race Inn. The structure, which dates back to the mid-19th century according to the city, has weathered several requests for demolition in recent years. (Molly Morrow/The Beacon-News)

By [Molly Morrow](#) | [mmorrow@chicagotribune.com](mailto:mmorrow@chicagotribune.com) | Aurora Beacon-News

PUBLISHED: January 14, 2026 at 3:09 PM CST

The landmarked structure at 4 E. State St. in Geneva — part of what was once the Mill Race Inn — will remain for now, after the Geneva City Council on Monday denied an appeal seeking its demolition.

On Monday, the City Council was tasked with whether to overturn [a ruling of the city's Historic Preservation Commission in December](#) that denied a request by Dave Patzelt, president of Geneva-based Shodeen Group, for demolition of the building.

Following a lengthy discussion on Monday evening, the appeal that would allow for demolition failed in a 6-4 vote, with council members Martha Paschke, Mark Reinecke, Anaïs Bowring and William Malecki voting against it. A supermajority of seven or more council members would have been needed to overturn the Historic Preservation Commission's decision.

The City Council vote on Monday is the latest in what has been years of discussion about the structure, [previously part of](#) the Mill Race Inn restaurant, which operated from the 1930s until it shuttered in 2011.

Though perhaps most famously a part of the popular restaurant, the building [existed](#) long before that. It first housed a blacksmith shop in the 1840s, but, before it became part of the longstanding Geneva restaurant, housed a number of other businesses too, such as a wagon manufacturing and blacksmithing shop, a cooperage and a carriage painting shop.

The site [was later acquired](#) by the Shodeen Group, and demolition of most of the property [began](#) in 2016. The 1840s-era limestone sections, at the time, were to be evaluated as to whether they could be considered a historic landmark or be incorporated within any future development of the property.

Since then, what remains of the limestone building — which [was designated](#) as a landmark in 2018 — [weathered](#) multiple requests by its owner to demolish it over the years, none of which were ultimately successful.

Then, in October, Patzelt again [asked](#) the city to demolish the structure. The request for demolition came to the city’s Historic Preservation Commission last month, and [was again shot down](#).

The property is no longer owned by Shodeen itself, Patzelt [has said](#), but by the Mill Race Land Company, LLC, though Shodeen Construction Company [remains listed](#) as the contractor on the original application for demolition from October.

Patzelt [appealed](#) to the City Council the day after the Preservation Commission determination was made, meaning the matter went to the City Council for a vote.

The commission’s decision in December, and the subsequent appeal by Patzelt, generated a response from some community members — a small group, for example, that was advocating for preservation of the structure completed an architectural model of it and [held a community meeting just days before Monday’s City Council meeting](#), making a last-minute pitch to turn the building into a visitor information center.

At Monday’s meeting, Geneva Mayor Kevin Burns emphasized that the council’s role was not to serve in its usual function but in a “quasi-appellate court capacity.” He discouraged the council from considering any evidence or information beyond that which was considered at the December Historic Preservation Commission meeting.

At the meeting, Patzelt again presented his case for demolition of the structure.

He said that the records included in the application seeking demolition include things like a list of the irreparable and deteriorated building features, a cost estimate for rehabilitating the structure and a narrative on steps that have been taken to potentially relocate it.

He also pointed to the city’s previous parameters for using the site, and noted the possibility of the structure being deconstructed and put up somewhere else nearby.

“It has been eight years since we first started talking about this structure,” Patzelt said at Monday’s meeting. “And, after over 20 ... public meetings, there has been no progress made by either of these parties involved in this site.”

He pointed to residents speaking out about the issue, and said that he thinks the majority reflect a desire for the structure to be demolished.

Paul Zellmer, the chair of the Historic Preservation Commission, also spoke at Monday’s meeting, sharing the commission’s reasons for its decision.

Zellmer said that public testimony showed divided views among the community, and “did not establish an objective or measurable basis to conclude that the majority of the community supports demolition.”

He also said that the applicant “did not present concrete development proposals and (demonstrate) that demolition is necessary to achieve community benefit, nor did the record establish reasonable alternatives to the demolition had been exhausted.”

Zellmer also said that deterioration of the structure does not demonstrate that demolition is in the best interest of the community, citing concerns about long-term neglect of the property, and noted that there was concern approving the demolition would “risk establishing precedent inconsistent with the intent of the historic preservation ordinance.”

In response, Patzelt acknowledged that public opinion was divided, but said that the commission was tasked with weighing how public opinion was split, and said he feels the majority are in favor of demolition.

As to the lack of a redevelopment plan, Patzelt said the developer can’t prepare one without knowing whether they are allowed to demolish the structure, but that they would do so if granted a demolition permit.

“We are also committed to trying to pay homage or pay some legacy or some documentation — visual, as well as physical — of the historic remnant structure,” Patzelt also said at Monday’s meeting. He noted the possibility of reincorporating its stone into some kind of directory map that tells the story of the historic blacksmith structure.

Patzelt declined The Beacon-News' request for comment on Tuesday about Monday's decision and what's next for the structure.

But, while Monday's vote narrowly came out in favor of the structure remaining, many of the council members shared their frustrations with the status quo when it comes to the structure's current state.

"What remains is a partial remnant that has been significantly altered over time and is no longer functionally or physically connected to that which gave it historic significance," Ald. Brad Kosirog, who voted in favor of demolition, said. "The code does not require preservation at any cost, nor does it require maintaining a structure where reuse is impractical and unsupported by the site's current condition."

Bowring, who voted against demolition, said she came to a different conclusion, arguing that the petitioner did not present sufficient evidence that demolition would be in the community's interest.

"I think a question that remains in my mind and a lot of minds is: what is next?" Bowring asked. "I think that is part of the consideration of community interest."

She suggested that a redevelopment that incorporates the historic structure or a new development were possibilities, and said the fact that the community would like to see changes to the site "is not the standard that they needed to demonstrate in order for (her) to support demolition."

"I don't think that (the developer needs) to feel as stuck as they claim to be absent granting of their demolition request," Bowring said. "That winds up feeling like they are holding this important site hostage and saying that, if you do not give us this demolition request, we will sit on this site for an indefinite period, which is, I think, not in this community's best interest."

Reinecke attributed some of the contentiousness to a conflict between economic development and historic preservation.

"The thing that troubles me about this is that they are seen as being against one another, rather than as an opportunity for solution-focused thinking and collaboration, and it's been that way for some time," he said.

But, though he said he thinks the structure can be preserved and that he doesn't support demolition, Reinecke also noted that the community has grown "impatient."

"All of us would like to see something of value and use placed onto that site," he said. "And it's been taking a long time. And I don't think there's anyone who's (saying), 'Let's just let it float for a bit.' That's not the tone of the community right now."

Malecki, who also voted against allowing demolition, questioned whether the vote was "basically as a matter of convenience to push things forward."

Other council members spoke more favorably of demolition.

Ald. Richard Marks, later in the meeting, suggested that it was "hard to see some practical reuse of the building as it stands now."

And Ald. Dean Kilburg, who said he supports demolition, reiterated that progress needs to be made on the site.

"After eight years, we're not making any progress," Kilburg said, "and I think that contributes to the pushback from the community that something needs to be done, that that's a responsibility now that falls upon us."

But even those who voted in favor of overruling the commission's determination and allowing for demolition acknowledged the community's concerns.

"I can say with clarity there's no clarity," Ald. Jeff Palmquist said. "It really is a split opinion of our residents."

Palmquist said, however, that he would support demolition "with the optimism that we will ultimately get at a better place than we would otherwise if we did not."

“People definitely want something to happen,” Ald. Amy Mayer added to the discussion. “What I’ve been told is that they’d like City Council and the city of Geneva to excuse themselves and get out of the way of progress from happening.”

Saying that Patzelt’s plans to pay homage to the structure and to form a redevelopment plan are not enforceable, Mayer requested that the stone structure being made available for a memorial of some kind be part of the conditions for demolition, about which there was some discussion.

Paschke, for example, said she didn’t support that change and didn’t “feel comfortable making that a condition.” Both she and Bowring suggested that those conditions by the petitioner to pay homage to the structure and create a redevelopment plan for the site could have been brought forward anytime before in the years the site has been considered.

Paschke, who opposed the demolition, similar to Bowring, argued that there wasn’t enough evidence that keeping the structure is not in the best interest of the community, and suggested that it “sets a bad precedent” to “demolish a designated historic structure for nothing.”

Following Monday’s narrow vote, the structure will remain for now, though its future remains uncertain. But, over the course of Monday’s meeting, members of the council repeatedly emphasized their desire to resolve the situation going forward, rather than continuing to allow the site to sit unchanged.

“We really do want something to happen here,” Mayer said at Monday’s meeting. “I really hope that this doesn’t cause the proverbial ... board game to get tossed in the air and walked away from.”

## Geneva commission again denies demolition request for landmarked structure at old Mill Race Inn site

Linda Girardi/The Beacon-News

The remains of a limestone structure at 4 E. State St. in Geneva on the northern edge of the former Mill Race Inn property are seen in a photo from 2023. (Linda Girardi/For The Beacon-News)

PUBLISHED: December 26, 2025 at 6:00 AM CST

Some say it's an eyesore. Others appeal to its history. Some want to see it repurposed, others call for its demolition.

But before it became a site for public debates, the limestone structure at 4 E. State St. [had](#) many lives, according to the city of Geneva: it was a blacksmith shop in the 1840s, a carriage painting shop shortly after the turn of the 20th century and was part of the property of a longstanding Geneva restaurant that operated from the 1930s until it shuttered in 2011.

In more recent years, what remains of the limestone building on the northern edge of the former Mill Race Inn property has been a source of contention in Geneva. Its owner has on several occasions appealed to the city to tear it down, the city has denied its requests, and preservationists have joined the mix in attempts to keep it standing.

Last week, the city's Historic Preservation Commission unanimously shot down another request by Dave Patzelt, the president of Geneva-based Shodeen Group, to demolish the structure.

Its future remains uncertain, however, as Shodeen has already filed an appeal of the commission's decision, meaning the Geneva City Council could still override the commission and vote to allow demolition. Discussion at the Dec. 16 meeting also led to a number of calls for redeveloping the property — another matter that's come before the city in the past.

These debates about the structure at the former Mill Race Inn property in downtown Geneva have been years in the making.

According to the city, the limestone building [was](#) first the Alexander Brothers' Blacksmith Shop in the mid-19th century. Among other things, it later was used as a wagon manufacturing and blacksmithing shop, a cooperage and a carriage painting shop.

The site of the property later was incorporated into an iconic restaurant, the Mill Race Inn.

After almost 80 years, the Mill Race Inn closed in 2011, and the property [was eventually acquired](#) by Geneva-based development company Shodeen Group. Demolition of most of the property [began](#) in 2016. At the time, city officials [said](#) the developer would evaluate the 1840s-era limestone sections to determine if the structure could be considered a historic landmark or be incorporated within any future development of the property.

In 2017, Shodeen [looked to demolish](#) the limestone building that had been part of the restaurant property, but the matter was put on hold early in 2018 after a Geneva resident [moved to get it designated as a historic landmark](#).

Later that year, the building [got](#) a landmark designation from the city, and preservationists advocated for repurposing the site for another use.

A residential development at the site [was considered](#) in 2019, but [later rejected](#) by the Geneva City Council.

Fast forward a few years, the Shodeen Family Foundation again requested permission to demolish the building, but it [was unanimously shot down](#) by the city's Historic Preservation Commission. Following an appeal by the developer, the City Council [affirmed](#) the commission's decision in 2023.

Later that year, the city [cited](#) the property owner for code violations, per documents from the city, and a ruling was made on the case in September 2025 in the city's favor, requiring that the building be made weather-tight.

Then, in recent months, Shodeen made a request for demolition again. The [application](#) by Patzelt claims that the stone structure "stands in the way of" redevelopment goals for the property and that "no positive impacts have been accomplished" in the eight years of discussions regarding the structure. The application asks the city to consider the demolition request on the grounds that the structure "is not in the best interest of the majority of the community."

At the Dec. 16 meeting Patzelt noted that, previously, part of the hold on the future of the building was to give residents additional time to find something that could be done with the structure.

"I would suggest that, whatever amount of time, that time has passed," Patzelt said. "It's been long enough. There's been several different attempts ... whether it's to find a buyer, to move the structure, to find somebody that is interested in renovating the structure or ... using it for some specific use."

He argued that the cost to repair the structure is in excess of what it's worth.

"The time has come that we need to make some further decisions on it," he said.

Several of the commissioners offered their opinions on the request at last week's meeting, and considered what the future of the property might look like.

Commissioner Jewel Jensen — pointing to the portion of Shodeen's application related to a failed stakeholder input initiative about the site — suggested that taxpayer-funded efforts to determine the property's future were not successful because the owner didn't ultimately submit development plans for approval, has not protected the structure from the elements and has not agreed to work with a study group about the site.

Jensen also noted the fine the owner has incurred from the city, questioning whether the city would have to pay it if the demolition request were to be approved.

Jensen also asked about the ownership, and Patzelt clarified that the property is no longer owned by Shodeen itself, but by the Mill Race Land Company, LLC. Shodeen [remains listed](#) as the contractor on the original application for demolition from October.

Some of the response to the request for demolition centered around the criticism that there had been no significant change since the last time Shodeen came to the city asking to tear down the structure.

"I just want to make clear ... that nothing has changed since 2023 in August when this commission denied demolition, with the exception of, I'm assuming, additional letters that are in favor of demolition being submitted to the commission," said Commissioner Kevin Phillips.

Patzelt said he would “admit that there’s maybe no change,” but reiterated that there had been a request for more time, more time had been given, and no solution has since materialized.

Phillips argued that, because that request for additional time didn’t come from the commission, it was “irrelevant” from anything being different from its latest decision in 2023.

“Since that time, Shodeen has done nothing except drag the city into hearings in courts and question the (commission’s) decision, and, in the meantime, has allowed that building to deteriorate such, to the point where, now, maybe many people in ... the community view it as an eyesore,” Phillips said. “You’re asking us to approve a demolition that basically is based on an eyesore that you’ve created.”

Patzelt said he doesn’t think much has changed from deterioration.

Commissioner Lisa McManus suggested that there should have been work on a development plan for the property.

“It’s just not a property, right now, that’s in good shape,” she said. “And the reality is that we need, rather than have these conversations about taking the building down, for years we could’ve just presented something ... Shodeen could be making money on this property, but yet here we are entertaining another demo request.”

Patzelt said that, to do so, Shodeen would need to know what is to be done with the structure in order to make a redevelopment plan.

And Commissioner Mike Riebe asked whether, if the structure must remain, Shodeen plans to let the property sit as is, rather than develop the site.

Patzelt said they would, and noted that structural engineers have said the walls and footings are not capable of sustaining any additional load, so they couldn’t put an addition on the building.

During the meeting, a number of residents — split between those in favor and those against demolition — also advanced their suggestions about the site and what they hoped would come of it.

Several of those opposed to demolition spoke of their hopes that the site would ultimately be redeveloped.

“If the (commission) were to deny this demolition application, there is an opportunity for the former blacksmith shop to be part of a larger redevelopment at a minimal cost to the property owner,” said Al Watts, the community engagement director of local nonprofit Preservation Partners of the Fox Valley. “Collaboration between the public and the owner with that goal in mind would likely accomplish something the community could be proud of that both honors the legacy of Geneva’s industrial past and stimulates Geneva’s future.”

Alan Leahigh, of Geneva, said Shodeen is bringing forward a “false choice” between keeping the structure or demolition, suggesting that efforts to restore or redevelop the building would be “much more favorably received” by the community.

And Lee Eysturlid, who said he lives across the street from the structure, said whether the building is an “eyesore” is subjective, and criticized the “stonewalling of the process” as setting a precedent for the future. He also spoke about his view on preservation, including what the future of the site could end up as.

“It’s not just the present of the history ... that you preserve, but it’s the future of the history you preserve,” Eysturlid said. “And it’s not just the building, it’s the space. And by removing the building, you open this space up to a six-story monolith. And I know that’s not part of the point, but it is the point, because history is also into the future. Otherwise, why are we preserving anything?”

Some individuals from the area felt otherwise, criticizing in particular the impact the deteriorating structure has on the neighborhood and the city’s economic position.

Herb Nachreiner, of Elgin, said that even decades ago, the blacksmith shop “was a piece of junk, and it’s even worse today.” He noted that the site is essentially the gateway to Geneva’s business district, and that businesses “never get a second chance at a first impression.”

“Move on,” Nachreiner said. “We’re beating a dead horse with this building.”

Similarly, Patrice Bertheau, of Geneva, pointed out that there is “no progress being made” on the property, and it is having an impact on “neighborhood pride and economic potential, as it discourages investment and tourism.”

Another nearby resident of the structure, Ed Streibig, said he hopes there will be a sidewalk by the site for safety reasons, and that he is “here looking for progress.”

“When I think about progress, the quickest way to progress seems like demolition,” Streibig said. He suggested taking the stone blocks from the structure and incorporating them into a new structure.

Ultimately, after the public hearing on the proposal for demolition, the commission again considered the possibility, but ultimately landed in opposition to Patzelt’s request.

Riebe said they haven’t gotten a “good faith proposal” for redeveloping the site and suggested that Shodeen has just been “waiting and waiting and waiting to strongarm — whether it’s us or City Council to give in, give them what they want.”

“The differences between the petition ... to demo a few years ago versus today is that the property has sat longer,” McManus added.

The commission also considered how it could judge what the consensus from the community is, and Jensen suggested that the owner and community don’t have to be in opposition going forward.

“I believe that we can come to a solution if we do work together on this,” Jensen said.

The commission ultimately unanimously shot down the demolition permit request on Tuesday.

But Patzelt, in an email to The Beacon-News, says an appeal has been filed with the City Council, which the city also confirmed. A city spokesman said the date the council will consider the matter has not yet been determined.

The City Council has the ability to uphold, amend or reverse the commission’s decision, Historic Preservation Commission Chair Paul Zellmer noted at the Dec. 16 meeting.

Per the city, the council [must vote](#) on the commission’s determination within 30 calendar days of an appeal being made. A reversal or modification of the commission’s decision requires a two-thirds majority of the aldermen.

Good morning everyone,

Attached is the Internal Newsletter for Winter 2025-2026. The newsletter, as well as previous issues, can be found on the City's [Intranet](#) as well.

I also attached an updated phone directory. The only changes from were just some name/title changes.

Have a great rest of the year and stay warm out there!

Kathleen,

The following memo from Landmarks Illinois contains information on funding historic preservation projects for municipalities. Has Geneva explored or submitted application for such funding that could play a possible role in reaching a possible resolution with the Blacksmith structure?

Thanks.

Dean

?

Mr. Kilburg,

While the vote last night was the outcome that Landmarks Illinois hoped for, I completely appreciate that the lack of movement at this site is frustrating for all parties. As far as funding, Landmarks Illinois has two grant programs that 4 E. State Street is geographically eligible for. Our [Preservation Heritage Fund](#) is for brick and mortar work, while the [Donnelley Fund](#) is for project planning. Private entities like Shodeen are not eligible for either of these programs, but the City of Geneva would be an eligible applicant. We prioritize funding for places that have appeared on our Most Endangered Historic Places in Illinois list in the past, as 4 E. State Street has. We also have the [Reinvestment Program](#), a revolving loan fund that helps to fill gaps in financing for historic preservation projects. At present we're able to make loans of up to \$200,000 in communities outside of Chicago. We would also welcome the opportunity to help identify other potential funding sources, which depend in part on a proposed use and whether the building will continue to be privately owned.

Best,

Kendra Parzen

Ms. Parzen,

Thanks for your memo regarding the Geneva's special meeting last night. Your points are all appropriate and well taken. Unfortunately, we have had grid-lock and the site will remain an eye sore for our community. Without communication and some level of compromise, we are probably looking at the status quo for at least a few more years. I believe memorializing the structure as proposed will eventually play into the eventual development of the Mill Race. Some may call that would be surrendering to the Shodeen's (the developer), my vote reflected accepting the reality of the situation we find ourselves in. Denying demolition for nearly a decade hasn't worked. Maybe we need those very passionate about the preservation of these historic structures to provide financial resources so we can consider a different approach. What funding resources do you have available?

Thanks for your communication and interest with this very challenging issue for the city and our elected officials.

Dean Kilburg

Hi Alex,

This is the information we were able to pull from the legal bills historically. One thing that caught my attention is we haven't paid a retainer in 2025. I'm not sure if we are coding the invoices differently in 2025 but with our limited access to the legal invoices- we may need to figure out what happened to the monthly retainer....

Good morning.

Apparently, there is at least one and may be more letters about the demolition of the Blacksmith shop floating around that I have not seen and that have not been posted on the City website. A copy of one example is attached. This was not included in the batch I provided to you. I have reached out to Emily to find out if there are more letters than this one.

**From:** Thomas Burgan  
**Sent:** Monday, January 12, 2026 9:05:53 AM  
**To:** Malecki, William  
**Subject:** Letting Shodeen win again?

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Mr Malecki,

Please put me in the camp of someone who is fed up with Shodeen Properties.

The City Council are nuts if they allow him to demolish the blacksmith building AND to also waive the fines that are due because of his distractions and resistance to properly prepare that building during this period of dispute. NO WAY does he get out of those fines. I was on record at the preservation meeting for tearing it down, having changed my mind after years of saying NO WAY. Then I listened the history teacher give the best presentation of the night about history erased, is history gone and NOW I am firmly back in the camp of KEEPING IT. The approach to the river is already marred by the ugly three story building blocking the view at the crest of the hill, so I can tolerate the look of the blacksmith shop as is until Shodeen does the right thing and preserves a patch of original Geneva the size of a postage stamp.

If, as I suspect, the council allow him to tear it down in tonight's meeting, DO NOT let him skate from his fines payable to Geneva, PLUS interest!!

Thanks for your time and consideration with regards to this decision.

Dave Patzelt with Shodeen is meeting with any council members interested in meeting prior to the 1/12 meeting as appropriate (no more than 3). This provides a chance for raising your questions not appropriate for the special meeting and for Dave to share possible ideas for the historic piece. Are you available next week during an afternoon? There is a meeting set for 1/5 at 1:30 and another 1/7 at 1:30. Would either work or a possible time for you that would? I'm just trying to facilitate communication to find a path forward. Let me know...

Mark,

To say that I'm disappointed in your vote to further forestall development at the Mill Race Inn site is an understatement. You've told me several times that you are fiscally conservative. If that were true and you truly understood the financial cliff that the City is marching towards, you'd be looking at any and every means possible to bring in new tax revenue and more residents. You might also take into consideration how this process unfolded and that this is a completely unforced error by the City. Landmarking the property against the owner's wishes when he worked with the City to preserve the structure, then throwing away \$300k plus on the charade, rather charrette. Shodeen is not my favorite person, as I've done business with him, but imagine what the south end of 3<sup>rd</sup> would look like today and what sales tax revenues would be without their developments. If they are willing to build something within code, and further from my understanding, within the bounds of the charrette, then the City should be doing everything in its power to make this happen, not delaying progress.

Every incremental dollar of revenue for the City takes the burden off of the residential taxes. "Affordability" of housing stock does not matter if the tax burden pushes it out of reach. While the City percentage is low, the raw dollars are not. The percentage is only a derivative of the high EAV which was magically and uniformly increased by 10% across the board last year in a random sample of 50 homes. I'd argue the assessor did the dirty work and the City thinks this looks good. Guess what, nobody cares. They are not informed, don't see it, and don't care. They see the total tax bill. They don't even know how it gets allocated generally speaking.

While I cannot run myself, I will be encouraging others to do so, and assisting anyone financially and with social media who chooses to run against any of the 4 of you who voted to continue this reckless path.

 Book time to meet with me

**From:** FRANK J MUGNAINI  
**Sent:** Saturday, January 17, 2026 9:07:01 PM  
**To:** Stood, Emily  
**Subject:** Mill Race Inn Blacksmith site

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Good morning Emily,

My name is Frank J. Mugnaini and although I'm only a short time resident of Geneva, having moved in over 3 years ago, we have visited Geneva innumerable times over the decades for the awesome shops, restaurants, festivals and events!

I was at the historical meeting in mid December and arrived later due to a Christmas party and unfortunately missed the first 45 minutes and especially wanted to hear what Dan Shodeen had to impart on the process of the demolition and the plans to finally move Geneva forward with the Mill Race Inn site project.

After hearing the numerous resident's pleas and petitions, most in favor of demolition and finally moving on, I was appalled that your committee pretty much voted unanimously to kick the can down the road yet again! It's been 15 years since Mill Race Inn has closed and despite this time that has passed and the dilapidated state that the structure and site is in, it reflects the inept state of progress within Geneva! There is an old adage that basically says, what would Jesus do? I've revised it to, what would St. Charles do? I'm sure you've notice how they've transformed their downtown with phenomenal development and riverside attractions over the past several years that have made it a centerpiece and destination stop for residents and non-residents alike. I realize that historic site consideration/redevelopment may not have been an issue but none the less, they have redeveloped their core downtown into nothing less than an entertainment mecca with nary an eyesore in sight!

I'm not sure just how many of your committee reside in Geneva but you all seem older, as I am, and have probably driven by the site numerous times. Does not it's condition and the fact that nothing has been proposed to develop this site into a beautiful gateway development showcasing Geneva, and especially the Fox River, not irritate any of you? Not just a persistent eyesore, it could pose as an adventure interest for inquisitive kids or as shelter for an unhoused person with, God forbid, the remote possibility of collapse causing injury or death and a GREAT multi-million dollar liability settlement against Geneva or Shodeen or both!

I saw a news story about the site just last week and just heard recently that it's pretty much received final approval to remain as a historical preservation site. Mayor Kevin Burns may have previously sided with your opinion since had he dissented, I feel the ball would have moved on this project years ago. He was quoted in the June 2021 issue of Geneva Living, after having won his 6th term earlier in April of 2021, as saying " Geneva is a good community and is always striving to do better." This can't be further from the truth as other projects in the Tri-City area have broken ground and been completed over the past decade, especially as I mentioned earlier, with St. Charles exhibiting great civic pride and foresight in developing their downtown.

There is significant foregone real estate tax revenue and sales tax revenue that could have been used to fund other projects within Geneva, or as impossible as it sounds, to help hold the line on residents' real estate tax bills as that site probably would have contributed hundreds of thousands of dollars or more in beneficial tax revenue to the community. The former site of Duke and Lee's has also been caught in a political quagmire ( causing loss of significant tax revenue as well ) but that's another issue and not one that concerns your historical committee. There now also is the backdrop of the city looking to fund an over \$50 million new police station with an increased tax referendum...it never ends for the overly taxed residents.

Let me conclude with a couple of suggestions so I can cut to the chase while trying to maintain the recently sealed fate of the blacksmith shop:

1> The city needs a showplace, flagship development on the east side of the approach into downtown Geneva. The development of the site as a mixed use project, with a setback off the street, possibly with a fountain courtyard, leading to an arched pass-through underneath the building at ground level from State St. back down to the rivers edge, would provide just that destination if done right. Incorporating a restaurant with a dual decked patio section in the back of the building would provide unique, actual river side dining, drinking and relaxation unparalleled in either Batavia or St.Charles ( St.Charles dining options are up at ground level while Batavia's only actual riverside offering is a very unkempt and unattractive patio section at Pal Joey's). The proximity of this site at the rivers edge, which overlooks the State St. Bridge, and the back of the Harrington Hotel along with it being adjacent to the walking and biking paths, would make it a singular attraction in the area. The site could be developed with ground level shops on both State St. and Rt. 25 with several upper floors containing condominiums. The restored or shored up Blacksmith shop could therein be self contained and incorporated into the design to double as a historic museum offering entrance to this restaurant off of State St.

2> Batavia's historic windmill was moved from another site to where it resides presently. A consideration would be to move the Blacksmith Shop somewhere there to create yet another museum and to further enhance the windmill site as a stronger draw for people interested in visiting and learning about the area's great history.

3> Moving the Blacksmith Shop to the empty lot site on 3rd St. right across from the old Kane County Courthouse. It would stand out as a unique building in downtown Geneva, developed into a museum to complement the existing Geneva Historical Museum across and up the street.

I would think one of these ideas could advance the site into finally being developed for the betterment of the Geneva community, our taxpayers, Shodeen and our surrounding towns anchoring Geneva with something in addition to historic 3rd St.

Another saying, what came first, the chicken or the egg? Without a coordinated effort, which supports the wishes of our residents, the continued delays and what's viewed as Geneva's ineptness in getting "the job done", is just another black eye of embarrassment in the eyes of neighboring communities seeing us mired in years of senseless litigation over such issues as this site's development, that of Duke and Lee's and the Geneva Dam issue. The project on east State St. that will contain a flooring store and residences above it is being finalized and the massive apartment construction project north of State St. and just east of Rt.31 is in the breaking ground stages. I realize those did not have any historic site considerations but nonetheless, it's nice to see projects come to fruition soon.

Please make 2026 the year of change and doing better for Geneva by finally moving this project one way or another but to finally break ground. I choose # 1 Emily.

I'm here as a sounding block for you and your committee as we have become dyed in the wool Geneva residents in a short period of time and want to see significant progress taking Geneva beyond just what's on 3rd St. I know the residents and business owners on the east side of State St. strongly agree!

Thank you for taking the time to hear me out,

Sincerely,

Frank J. Mugnaini

1510 Turnberry Ct

**Subject:** Model Presentation

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Dear Alderpersons Bowring and Malecki,

My understanding is that the Shodeen Group has filed with the city an appeal of the decision of the Historic Preservation Commission.

As we discussed, would you be willing, as representatives of the First Ward, to suggest to the City Council that the Alexander brothers' blacksmith shop (Mill Race Inn) at 4 East State Street be placed on the agenda for a Committee of the Whole presentation? We're ready and very eager to give that presentation.

The justification for placing the blacksmith shop on the agenda is that we are a local group that wants everyone to understand the historic and future value of the structure, rather than view it as the unsightly ruin that it is today. We have created a museum-quality architectural model representing how the shop originally appeared when opened for business along the mill race 180 years ago, the year in which Geneva was incorporated as a city. Of course there was no photography back then. The creation of the model — exterior, interior and the adjacent mill race — is based on measurements and analysis of the structure's remains and historical records, and was guided by volunteers who have expertise in pioneer-era blacksmithing, historic preservation and architectural modeling. This will be new information that has not been presented any place before. Some have said that no one has stepped forward with viable recommendations for repurposing the landmark that benefits the overall community. We wish to offer recommendations.

For your own information, our intended presentation will be totally positive and educational. No mention of Shodeen, or fines, or ordinances, etc. We would present the model and briefly discuss its genesis, the task force, the research, the deliberations and the fabrication. We can then answer questions about the model, and follow up with a vision for the future. In other words, basically what I presented to you during your visit.

I know the timing for a Committee of the Whole presentation could be difficult this time of year and only 30 day in which to accomplish it. But I hope you agree that it would be important that the presentation occurs before a City Council vote on the appeal.

If the mayor, other alderpersons or anyone else wishes to see the model in advance, I'm more than happy to host additional visits as you did to my house. Please contact me if you need more information or wish to discuss.

Cordially,

— Alan

Dear Alderpersons Bowring and Malecki,

Thank you again for your visit on Sunday. I'm glad that we could get together to preview the architectural model of the Alexander brothers' foundry and blacksmith shop and to discuss related issues.

I'll keep in touch, and probably contact you after the Historic Preservation Commission holds its hearing next week. We'll know by then what's in the newest petition for demolition and what the commissioners have to say about it.

I appreciate your time. I think this is important for the community.

## Residential Stop Service / Move-Out Form

### Utility Account Move Out Request

*When canceling an account, please keep in mind that the City needs two business days to process request. In the event a refund is due from a final bill, please be sure to include accurate forwarding and contact information. If you have any questions, please contact the Finance Department at 630-232-0854 during our operational hours or email [financeemail@geneva.il.us](mailto:financeemail@geneva.il.us)*

Filer First Name	Dave
Filer Last Name	Hellyer
Relationship to Utility Account Holder	Self
Email Address	drhellyer@gmail.com
Phone Number	6303279271
(Section Break)	
Closing Date/Lease End Date	12/2/2025
Service Address	500 S. Third Streeet Apt. 308
(Section Break)	
Utility Account Number	0305001503-014
Relationship	Tenant/Renter
Utility Account First Name	Dave
Utility Account Last Name	Hellyer
Forwarding Address	514 Main St
City	Batavia
State	IL
Zip	60510
(Section Break)	

### Landlord Information

*If you are a tenant or renter, please select "Tenant/Renter" in the relationship field, and please fill out the information below.*

Landlord First Name	Shodeen
Landlord Last Name	Group
Landlord Mailing Address	77 N. 1st Street

City	Geneva
State	IL
Zip	60134
Landlord Phone Number	630-232-7883
(Section Break)	
Additional Information	<i>Field not completed.</i>
Terms of Agreement	By clicking this box, I agree to the terms and conditions as set out in this application and in the Geneva City Code.

*I acknowledge that this constitutes written application for termination of utility service at the address above, pursuant to the Geneva City Code, 9-1-1A. Further, I acknowledge that I agree to pay all charges for services rendered as a result of this request. I understand and agree that failure to pay any amount due to the City of Geneva can result in discontinuation of services until such time as payment has been received.*

**Subject:** Oppose Blacksmith Shop Demolition

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Dear Alderpersons Bowring and Malecki,

My name is Sherri Johnson, and I reside at 121 Peyton Street. I have been a resident of Geneva since 2013. The purpose of this email is to voice my opinion: please do not allow demolition of the Blacksmith Shop.

I agree again with the Commission's decision to deny Shodeen's request to demolish this structure. That was Shodeen's third request, and I agree with the Commission that nothing has changed since the first request. Shodeen has offered no redevelopment plans for the property, with or without the blacksmith shop, since the Charrette in 2019. More importantly, Shodeen has allowed the structure to deteriorate, against the directives from the City. This strategy has led to many Geneva residents to view it as an eyesore, which I believe has been part of Shodeen's plan to eventually be granted a demolition permit.

Thank you,  
Sherri Johnson

**Subject:** Petition to demolish Geneva's 1840s blacksmith shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

This is my plea to you to uphold the good work of Geneva's Historical Preservation Commission (HPC) in its, and ideally your, denial of the request to demolish the 1840s Blacksmith shop.

I quote:

"In its arguments in front of the HPC, the owner noted that a large number of letters supporting demolition had been submitted to the HPC and therefore met criterion four in 10-6-10-B of the city code, "The retention of a building, structure, object, improvement or site **is not in the best interest of the majority of the community.**" Nothing materially had changed in the demolition request since the owner's last request in 2023, according to the HPC, other than the growing fine the owner is incurring for violating Geneva's building maintenance code. Furthermore, the HPC determined it was not the best body to determine what is in the best interest of the community. For these reasons, the HPC denied the demolition request."

The reasons to say no, I would offer, are:

1. The good work of the HBC makes it clear that the Shodden/Patzelt have not been honest with Geneva for years. The company has changed, plans have been changed, they have made no effort to pay their \$300K fine (why not? There was a court order. What happened here? Collected fines could be used to repair/save the structure.). They made it clear at the last HBC meeting that they would not fix the building or pay the fines, as ordered. It seems clear their strategy is to win by petition or until the building falls down. Ignoring the law will pay off and set a clear and dangerous precedent.
2. The claim that the "majority of the community" sees the structure as needing to go was based on zero evidence. None could be produced at the HBC meeting. When asked about the "eye-sore" argument (it's an eyes-sore, don't you know?) that also fell flat in that why weren't other vacant buildings (Capana, Little Owl) being demolished? This was an empty argument (although clearly some people would see it demolished.).
3. Why destroy this building/site when there is no clear offer of a plan for what will replace it? Will it come to sit vacant like the lot on the corner of Wilson and Washington in Batavia? The lot that once held a historic church and that was demolished for what? Bad or no planning dictates failure.
4. The idea of "moving" of a historic structure sounds good, but it clearly robs the site and the building of their historic meaning. Historical structures having meaning in place. The historic house removed to make way for the "Roosevelt" on 38 is now a residence over on E. Side Dr, but does anyone know or care? It has lost all meaning as a historical structure. And now the space and area it once occupied are ahistorical. Demolition of the Shop will accomplish the demolition of the area as a historical area, period. This, it seems, was not part of that original plan - Shodden himself (quoted in the Tribune in 2014) was supposedly dedicated to working with/preserving historical sites.
5. Why do this until we know for sure what will replace it and if those plans will even move forward with IL State approval. It is on a floodplain, for example.

I have sat through most of the petitions and heard arguments for and against. I cannot see how Shodden/Patzelt's most recent series of arguments have changed anything. I strongly encourage you, therefore, to say no to the demolition of this building without further effort from the owner.

Thank you,

Lee W. Eysturlid

**To:** furnish@ameritech.net; Kilburg, Dean; Candace Moline  
**Subject:** Please don't vote to demolish blacksmith shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Dean and Larry,

Following up my voicemails to both of you today:

First of all, thank you for your public service.

While I understand the property where the blacksmith shop lies is currently unattractive, Shodeen is allowing it to deteriorate and flaunting city ordinances.

This piece of Geneva's history can never be replaced. Shodeen has requested a demolition permit from the city multiple times and the council has voted it down each time. What has changed? What new proposal does Shodeen have? Nothing.

It should not be treated any differently from anyone else when it comes to city ordinances. Shodeen has been playing a waiting game, trying to stir up the public's ire about a situation of its own creation.

Consultants have shown that with funding from a TIF district in a public-private partnership, the structure could be saved and repurposed. If Shodeen isn't willing to come up with a plan to incorporate at least part of the blacksmith shop in a development, they can choose to sell the land. There will be a creative developer out there who can come up with a fresh development that incorporates our history.

One of the things that makes Geneva special is the pride we take in our history. Please don't allow Shodeen to tear down one of oldest standing parts of it. (At least it's standing at the moment.)

Please vote against the demolition tonight. Could you please confirm you received this email?

Thank you for your consideration.

Hi Kevin and Emily

This is Molly Morrow from the Aurora Beacon-News. I hope you're doing well.

I'm reaching out because I've heard that Shodeen has filed an appeal on the demolition request for the Mill Race Inn structure, which was shot down by the Historic Preservation Commission on Tuesday. I was wondering if you could confirm whether that's the case, and, if so, let me know when the issue is set to come before the City Council?

If you could let me know this afternoon sometime, I would appreciate it. Thank you as always!

Best,  
Molly

Amy,

I wanted to confirm my comment from Monday evening that I had no intent to exclude you from my efforts to facilitate a dialogue with Shodeen's. Here is the 1/2 memo you apparently didn't receive. Hopeful we can work together to bring a resolution to this development challenge. Enjoy the nice weather.

D?ave Patzelt with Shodeen is meeting with any council members interested in meeting prior to the 1/12meeting as appropriate (no more than 3). This provides a chance for raising your questions not appropriate for the special meeting and for Dave to share possible ideas for the historic piece. Are you available next week during an afternoon? There is a meeting set for 1/5 at 1:30 and another 1/7 at 1:30. Would either work or a possible time for you that would? I'm just trying to facilitate communication to find a path forward. Let me know...

Let's stop wasting money and time. I hate giving into Shodeen company's underhanded dealings, but this ugly building has been the gateway to our community for too long. Save the building materials and incorporate them into something income/tax producing. I've been a resident long enough to remember the same controversy when the hospital was demolished, the building along the river, the creamery, etc. Now hardly anyone remembers what was there before. Basically, no one else has come forward with the money to repurpose the building.

Pat

I certainly do NOT want the blacksmith shop destroyed after all the destruction has occurred on this site. All the adjacent buildings are gone and the restaurant basement where parties and lovely family memories were made is not visible-maybe it's underwater by now with all of the neglect. So it's not just the buildings that need love and attention and protection from ambitious developers but the land itself. Whatever happened to that restaurant? We know what happened to the bike and thrift shop. Was it wise to tear things down and give Shodeen the upper hand to assume they could keep tearing down ALL structures? Can you get me up to speed here and check my attitude? This has all been unfortunate. How can we move past all of this in a positive manner?

I think enough destruction has occurred on this property. We need the blacksmith shop-even if we use only the stones to recreate the foundation. Can the city or some friendly entity legally buy the property back from Shodeen? And can this entity plan for the construction and development of this historic site that can be enjoyed by the citizens of Geneva and anyone who visits our charming town? This can be an investment in tourism-for real. The Cooperage made barrels- maybe let's plan a brewery there. Let's find an architectural plan for a real blacksmith shop again and have a real blacksmith create functional art and sell it on site-fences, locks, pots and pans...Let's plan for maybe a glassworks shop with artists making glass wares and selling them. There's more to consider...just think of the possibilities. We need a positive way forward.

I know-I'm an optimist.

**To:** Fagans-4  
**Subject:** Re: [THIS EMAIL MAY BE SPAM] The Mill Race Property

Dear Joe,

Thank you so much for your thoughtful note regarding last night's vote on the referendum. I'm always open to more discussion and to considering alternative ways of resolving issues. I'll share this with other members of the City Council to see if there is an interest in revisiting the vote. My understanding is that the issues you bring up, while important, would not have been appropriate to raise at this week's meeting. By statute, we could only consider the question of whether the HPC's vote was incorrect, and decide this based on one issue--Does demolition of the site serve the "best interests" of the "majority of the community?" Beyond this, the testimony had to be in the record of the HPC prior to their last vote. We were limited, then, in the questions we could ask and the information we could use to make a decision. That said, I believe there is a path forward that will enable development on the site to begin. I would be open to talking with the developers and members of the City Council about strategies that might be of help in accomplishing this. My approach is collaborative. This is a solvable problem.

Thank you again for your suggestion. I greatly appreciate it.

Very best to you,

Mark Reinecke

Aldermen Malecki and Reinecke,

The City Code allows for any alderman from the prevailing side to ask for a re-vote. I am hoping you would consider making that motion and seconding it at the next meeting. I believe too much misinformation has worked its way into discussions.

First as an introduction. I have been a resident of Geneva for over 40 years and for fifteen years I attended, in person, every Committee of the Whole and City Council meeting. After COVID I've enjoyed the luxury of watching online from my couch. With the exception of the mayor, no one has attended or watched more meetings than I have. I point this out so you know this isn't a single issue complaint from an activist, it is a well informed opinion of someone who has worked to stay informed on the facts and that cares about Geneva.

Here are a few of my comments:

- This property is not in the Historic District. When the Shodeen's purchased the property, they could have applied for a demo permit and received it before anyone had a chance to comment. Instead, because they knew that there may be remnants of an historic structure inside the building they decided, at great expense to themselves, to expose the structure for inspection. After inspection they decided saving the structure "as is" was not practical. It was only then that a group of people moved to have the site landmarked behind their back. That never should have been allowed to happen. It was certainly an instance of "No good deed goes unpunished".
- It's claimed that the Shodeen's are committing "Demolition by Neglect". This is nonsense. The building is in the same shape that it was in when it was originally exposed.
- It's being ignored that the structure sits in a flood plain. Making use of the structure "as is" and where it is located would be a cost prohibitive and impractical endeavor.
- Opponents to demolition like to refer to it as the Blacksmith Shop. It's had many uses over the years, but they chose to call it that for impact. I believe it was also the site of bathrooms for the Mill Race Inn at one time.
- The Shodeen's have continually showed strong support of Historic Preservation. Geneva on the Dam, their corporate offices on First Street, The Herrington, The Creamery, Dodson Place are all impressive examples of their cooperation. But because in this instance they don't agree with saving the structure as is, they are made to be villains.

- It is often repeated “Show us a plan on how you can incorporate the structure and demolition will be approved”. How many tens of thousands of dollars in drawings would have to be presented to get this done? It’s like saying I don’t know what I want from you, but I’ll know when I see it. What they are offering is what you want. They have always been willing to incorporate or pay homage to the history if given the chance.

- Many letters and emails were sent to HPC in support of saving the structure, but more than half were not from Geneva residents. Three times that amount were sent supporting demolition. Those supporting demolition include a former Planning Commissioner, the former Chairman of the Planning Commission, a former Alderman, the former Economic Development Director of Geneva, two Wood Award winners, etc. These are not activists with a single propose, these are residents that care about Geneva.

- Please consider bringing this back up for additional discussion. Asking for a re-vote doesn’t mean you have changed your mind. It only means you are willing to listen.

Joe

Dave,

Yes, this would need to go before HPC. The due date for materials for the 1/21/2026 meeting was 1/6/2026, so adding this proposal would not be possible for the January meeting, and would have to be considered for a later date.

I assume that the proposed structure will need to go before HPC as it is within the footprint of the historic structure.

If so, is it too late to be on the 1/21/2026 HPC agenda?

Lisa,

No worries! I didn't expect any quick responses last week.

That's perfect that you're already planning on being there. I'm attaching the script that Jewel used during the last appeal, if that's helpful in making up a new script. Happy to help pull together an updated version for this time around if you'd like. I can always hop on a call or set up a meeting if that's easier as well. I think the goal would be similar to the HPC meeting in making sure we really stick to the current application and emphasize everyone's conclusions from the meeting.

Either way, I'll keep you updated if anything changes as we get closer to the meeting!

Thank you,

Hi Lisa,

Hope you're doing well, and that your holiday season has been good! I have an ask for you.

As you know, the appeal was submitted for 4 E State Street, and will be going before the City Council on January 12. The HPC has a right to give a statement at this meeting, along with the applicant. Paul is not available to attend the meeting, so we're looking for another member to attend and make that statement. Would you be available to speak at the meeting? You would basically have to read off a summary of the conclusions you all reached when the demolition was denied on the 16<sup>th</sup>. We thought you would be great because you have experience with this project and you have a knack for summing things up well in meetings. I would of course be happy to talk with you about the meeting process or a statement before hand as well. If you're not available, just let me know and I can ask someone else.

Thank you in advance!

Good afternoon Dave,

I am spending some time today cleaning up my files and I do not see that we ever sent the response to this submittal. I apologize for any inconvenience that has caused you. If we did send it already, sorry for the double transmittal.

Thanks and happy New Year,

**Brian Davids**

Good morning.

Not to push or pressure the city in their review of the application for the demolition of the gazebo at the former Mill Race site, as some of you may be aware, Shodeen has submitted a different application for demolition of the stone remnant structure again as well. I would hope that we could obtain the gazebo demolition soon so that it does not get wrapped up in the debate/discussions of the stone remnant structure application process with the public at large. Is there any estimated schedule of the review and response to the gazebo demolition permit application?

Thank you in advance.

Dave

**Subject:** RE: 4 E State St - Kane County Stormwater Worksheet

Dave,

The request to review the applicability of the Kane County stormwater review has been completed.

The Kane County Stormwater Ordinance allows for nine (9) exemptions as to what "Development" does not include:

**Development**, however, does not include:

- A. **Site Maintenance** and repair of existing **Buildings** or facilities located outside of the **Floodplain**;
- B. **Site Maintenance** of existing parking lots, pedestrian trails and bikeways outside the **Floodplain** provided that no new **Impervious Areas** are added, there is no increase in peak flows, and there is no change in the location of the stormwater discharge;
- C. **Site Maintenance**, including resurfacing of streets and highways outside the **Floodplain**;
- D. **Site Maintenance**, including resurfacing of publicly owned streets and highways within the **Floodplain** provided the difference between the elevation of the road surface after resurfacing and the elevation of the road surface on the **Effective Date** is not more than two inches (2");
- E. Maintenance of existing **Stormwater Management Measures** (e.g. sediment removal, shoreline stabilization, etc.), to restore to or improve: 1) the permitted function and condition, or 2) if completed prior to the **Effective Date** of this Chapter, the verifiable constructed function and condition;
- F. Paving over an existing permitted or grandfathered **Impervious Area**, provided no change in peak discharge or location of discharge;
- G. For agricultural uses, maintenance of existing drainage systems for the limited purpose of maintaining cultivated areas and crop production;
- H. For agricultural uses, improvements undertaken pursuant to a written **NRCS** conservation plan provided they are outside of the **Floodplain**; and
- I. Plowing, cultivation and similar agricultural practices that do not involve filling, grading or the construction of levees.

Removal of a structure is not included within the above listed exemptions. Therefore, a stormwater review is applicable and that a deposit escrow would also be applicable within existing City standards.

While I understand that this is the desired outcome, once the escrow has been secured then the review process can begin.

**Subject:** RE: 4 E State St - Kane County Stormwater Worksheet

Hi Dave,

The escrow is pursuant to Title 13, Flood Control, specifically 13-2-2.3.B [https://library.municode.com/il/geneva/codes/code\\_of\\_ordinances?nodeId=TIT13FLCO](https://library.municode.com/il/geneva/codes/code_of_ordinances?nodeId=TIT13FLCO)

The Kane County Stormwater Ordinance requires that we review this site for a Floodplain Permit as indicated previously. The escrow is provided to cover the costs of the review. Once the project is completed, the remaining escrow (less the costs of the review) is returned. Kane County's ordinance is available for your review on their website: <https://www.kanecountvil.gov/fder/pages/environmentalresources/waterresources/stormwater.aspx>

Thanks,

Brian

Hi Karen,

The Demolition application is required to include a plat of survey, so it is still available with those documents on the Developments webpage, linked below. I believe the plat itself is in the Permit Request section.

<https://www.geneva.il.us/1667/4-E-State-Street-Historic-Landmark-Demol>

Have a good weekend!

Hi Emily,  
Is the plat of survey for the Shodeen property at 4 East State available online?

I'd like very much to see it if possible. Please let me know how I'd be able to access it.

Thanks so much,  
Karen Lando.

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Good morning.

I know that some residents have sent emails and letters directly to the City. Can I please obtain copies of all the letters that are on file for this application request?

Good morning,

The materials posted online include everything that was received by the City up to the point of their posting. The letter you attached was received by the City yesterday, after the application materials were posted. I attached a screenshot with a timestamp to allay your concerns.

Typical practice is to post letters in a compiled set for efficiency and to make those materials more clear for community members. In following that practice, any additional letters we receive, including the one you attached, will be posted in a set next week before the meeting.

Of course, continue to send any additional letters you would like to be included, and those will be added to that list.

Good morning.

I was provided a copy of another letter that was apparently sent to the HPC on 12/2/25. I did not see this letter posted on the City website. A copy is attached. This made me wonder if there are other letters that have been sent to the HPC that are not on the website or included in the record. Is there some way to verify or confirm that all letters have been provided for the public?

Hey Bob,

Attached is a spreadsheet that contains all of the water services. I used the filter in excel to show water services that only contain lead, galvanized or suspected or unknown on either the customer or city side. I also have only filtered it to show ones that had letters sent out before 2025.

Feel free to adjust any filters if you need to but this is just a snapshot of our GIS water service data.

Subject: Addresses lead letter

From the data base that I update the material list map there is a section on when letters have been sent to people with lead or galvanized services. Needs to be sent annually.  
Now, ones that I have sent out with a date of 2025 don't need to be sent a letter.  
Can you send me a list that has address with a date before 2025 for both lead and galvanized services.

Here you go. Below is the filter that was run on the data before export. Let me know if you need anything adjusted.

The screenshot shows a query builder interface for 'Query 1'. It features a table of filter clauses with columns for logical operators, field names, comparison operators, and values. The clauses are:

Operator	Field	Comparison	Value	Action
Where	City Material	is equal to	'Pb - Lead'	X
Or	City Material	is equal to	'GAL - Galvanized'	X
Or	Customer Material	is equal to	'Pb - Lead'	X
Or	Customer Material	is equal to	'GAL - Galvanized'	X
And	Customer Notified Date	is on or before	12/31/2024 12:00:00 AM	X

At the bottom, there is a '+ Add Clause' button and 'Apply' and 'Cancel' buttons.

Hey Bob,

I added a field (Column AH in the attached spreadsheet) that has customer-city as one field for easier filtering. I also sorted the spread sheet based on notified date. I have a filter set to show the relevant materials you outlined in the original email.

Hey Bob,

Attached is a spreadsheet that contains all of the water services. I used the filter in excel to show water services that only contain lead, galvanized or suspected or unknown on either the customer or city side. I also have only filtered it to show ones that had letters sent out before 2025.

Feel free to adjust any filters if you need to but this is just a snapshot of our GIS water service data.

Cam or Ian,

The list you sent did not give me galvanized services that have been sent letters. It might be because there is no date in the field for many of these addresses. Please take a look.

I also need a list of addresses that we have no customer or city side material in the data base for the address.

Thanks

Anaïs --

That would be fabulous. I'm wondering, though, if it would be best to wait until after Shodeen presents its case, which will be in their petition for demolition and presentation to the Historic Preservation Commission next Tuesday. We'll then have more information about whether, when and how to move forward.

Also after next week, a decision could be made on my possible meeting with David Pazelt to show and discuss the model, as we discussed. Perhaps that should occur before a presentation to the Ccity ouncil. I just don't know the best strategy until after this coming week.

Dear Alderspersons Bowring and Malecki,

Thank you again for your visit on Sunday. I'm glad that we could get together to preview the architectural model of the Alexander brothers' foundry and blacksmith shop and to discuss related issues.

I'll keep in touch, and probably contact you after the Historic Preservation Commission holds its hearing next week. We'll know by then what's in the newest petition for demolition and what the commissioners have to say about it.

I appreciate your time. I think this is important for the community.

1. Upon careful and responsible disassembling of the structure (avoiding merely bulldozing), materials deemed worthy of preserving for monument design, development and installation shall be relocated from 4. E. State parcel and stored in a location agreed upon and authorized by the City. ~~Costs associated with such work shall be paid for with TIF funds.~~ ***I don't think we should commit to this.***
  2. Remaining material from the disassembled structure will be offered to the GHM as a right-of-first-refusal to be used for purposes including but not limited to, collections, fundraising (selling pieces), etc.
  3. Preserve sufficient material from structure to design and develop and educational structure (monument) recognizing the erstwhile Blacksmith Shop and its relationship to the City for public benefit and place said structure (monument) on or in close proximity to the redevelopment of the 4 E. State parcel. ***Does it have to be a separate monument? Or can it***

***be incorporated into the structure and signed as such, or something along those lines?***

4. Design of said monument to be directed by a panel of citizens appointed by the City and will include at least 2 representatives of the City Council, 1 representative from GHM , 1 representative of the Shodeen Group/Foundation (??? not sold on Shodeen rep), 1 representative from the City's Historic Preservation Commission and 1 one at-large community representative. ***I would like to discuss this more, this part makes me nervous. We need a process that will help "rebuild" the relationship between the community and Shodeen – this could inhibit this. I like the spirit of it, but given the poor relationship would need to be very carefully managed.***
5. All costs associated with the design, development and installation of said monument will be paid for by a grant from the Shodeen Foundation and not to exceed \$\_\_\_\_\_

***or...***

All costs associated with the design, development and installation of said monument will be paid for by TIF funds as the monument is a "public benefit". Costs associated thereto will be deducted from the anticipated TIF request by Mill Race Land Company/Shodeen. ***I think the approval and or proposal to use public funds with the fines out in the wind would be a bad idea.***

6. Perpetual care of said monument shall be paid for by TIF funds and upon expiration of the TIF said costs shall be transferred to the City (just as the "Rain Man" statute on S. Third Street). ***Same comment as above.***
7. Payment of fines assigned to the Mill Race Land Company shall be recouped by the City (effective dates of aggregate fines tbd) by means of subtracting said amount of fines from anticipated TIF request by Mill Race Land Company/Shodeen and approved by the City. ***This needs to be front and center and carefully articulated. Top of the fold as they say.***

**NOTE:**

*Per our own code we need to add dates and expectations of when disassembling of structure must commence.*

*Notice that I have not included any redevelopment deadline submittal date...should I/we?*

Hi,  
I respect our historic preservationists but not everything in this town can be preserved or salvaged.  
I urge you to please allow the demolition of the blacksmith shop. The Mill Race corner has been a dilapidated eyesore for too long. It seems the preservation committee is not really interested in developing this corner and instead wants to block Shodeen out of spite. Lets not forget he is the one who developed the old hospital into a vibrant area that has added to the charm and economic growth of 3rd St. He is also responsible for The Herrington. I don't think anyone would argue that these were unfavorable developments.  
It's time to move on and let go. Stop with the vendetta against Shodeen and let's move forward with developing this gateway to our downtown.  
Sincerely,  
Amanda Jones  
Geneva Resident

Dear Martha,

I watched the HPC meeting on the blacksmith shop demolition and I'm not sure how you are going to figure out if the majority of Genevans are for the demolition of the blacksmith shop, but you can put me down for NOT demolishing it. Once a historic building is gone you can NEVER get it back. I believe Shodeen is gaslighting the citizens of Geneva by doing nothing to preserve the building and that they are waiting for it to fall over so they can say it's not safe and needs to go. I also believe a person/business MUST pay the fines levied, but apparently Shodeen believes the law doesn't apply to them.

If Shodeen petitions the city council for demolition I hope you vote to preserve the blacksmith shop.

On another note, I watched a past city council meeting where you mentioned a get together with the citizens of ward 4 but unfortunately I didn't see the video until after the fact. If you have another one could you please email me so I can attend.

Thank you,  
Kim March

Good Afternoon,

I am one of your constituents and a long time resident of Geneva.

First of all, thank you for your public service.

While I understand the property where the blacksmith shop lies is currently unattractive, Shodeen is allowing it to deteriorate and flaunting city ordinances.

This piece of Geneva's history can never be replaced. Shodeen has requested a demolition permit from the city multiple times and the council has voted it down each time. What has changed? What new proposal does Shodeen have? Nothing.

It should not be treated any differently from anyone else when it comes to city ordinances. Shodeen has been playing a waiting game, trying to stir up the public's ire about a situation of its own creation.

Consultants have shown that with funding from a TIF district in a public-private partnership, the structure could be saved and repurposed. If Shodeen isn't willing to come up with a plan to incorporate at least part of the blacksmith shop in a development, they can choose to sell the land. There will be a creative developer out there who can come up with a fresh development that incorporates our history.

One of the things that makes Geneva special is the pride we take in our history. Please don't allow Shodeen to tear down one of oldest standing parts of it.

Please vote against the demolition tonight. Could you please confirm you received this email?

Thank you for your consideration.

Candace Moline

Dear Emily,

I'm not sure how you are going to figure out if the majority of Genevans are for the demolition of the blacksmith shop, but you can put me down for NOT demolishing it. Once a historic building is gone you can NEVER get it back. I believe Shodeen is gaslighting the citizens of Geneva by doing nothing to preserve the building and that they are waiting for it to fall over so they can say it's not safe and needs to go. I also believe a person/business MUST pay the fines levied, but apparently Shodeen believes the law doesn't apply to them.

Thank you for trying to preserve the blacksmith shop.

Kim March

Hi Emily,

We live in a historic home in Geneva. While repairs are often more expensive and materials harder to find, we believe this is the beauty of preserving the past.

We are strongly opposed to Shodeen or any other company demolishing the blacksmith shop. It is such an iconic and irreplaceable part of Geneva's legacy that its loss would be tragic.

Best regards,

Carl King

Miss Stood,

Tear it down, don't tear it down, tear it down, don't tear it down. In Mayor Burns we have a Richard J. and Richard M. Daley who has been in office twenty years to long.

My name is Tom Burgan and I am a 35 year resident of Geneva. I enjoyed Mill Race Inn back in the day. I enjoyed Island Park until it became a crappy pass through on the trails, which by the way I frequent nearly daily on foot, bike and rollerblades. This standoff has got to end and unfortunately I guess I am going to side with Shodeen, who I think is shady developer in his own right, used to getting his way. SO my thinking...

1. Tear it down, but make Shodeen celebrate its existence by keeping all of the pieces and doing something for the community out of it in that location somewhere not buried in a corner.
2. I do NOT want to see his crappy condos or whatever else he has planned on that location without paying homage to the residents who are giving him THEIR permission to do so. This means public space for passerby's on the trail to take in and enjoy much like was possible years ago when Mill Race was a vibrant destination on the river trail, especially the gazebo.
3. Finally, Island Park has become a mess with the yearly flooding of the river. We're all so worried about taking out the dam, that we lose sight of the fact that the Army Corp will NOT allow any raising of Island Park to help with the annual flooding and mud making machine. I remember well summer concerts there and other events that brought out the residents. The pavilion building just had the bathrooms rebuilt by I assume The Geneva Park District. Time to finish the job and improve the park itself. I believe Shodeen should be a part of this renovation of the park, with his money and his company's mouth. Face it, he has name recognition and I'd like to see it put to use for THE PEOPLE of Geneva. **That location is a jewel of a gem and we need to polish it, NOT destroy it for personal gain.**

I cannot attend tonight's meeting, but I thank you for your time and effort in heading the discussion this evening.

Hi Joe

I agree . This has cost the city too much to continue the fight . I watched the meeting . Historical Preservation did not come up with an economical way of saving the shop. There only argument was that they had public support to save the blacksmith shop. But when asked how much support they did not answer .

Thanks for the support to demo .

1st Ward Council Members Bowring and Malecki

I was in attendance at the last Historic Preservation Commission meeting where the commission voted 7-0 to deny the blacksmith shop demolition application that had been submitted by the property owner, a Shodeen controlled entity. My understanding is that Shodeen will be appealing this decision to city council in the near future.

Not withstanding the antagonism shown toward the applicant by the commission, I did not hear a compelling reason for denying the application.

Dave Patzelt from Shodeen stated that they would not be restoring the blacksmith shop building and their position has not changed from when the building was designated an historic landmark in 2018.

Their reason was clear, it is not economically feasible to restore the building with architects estimating the restoration cost to be in the \$1000 psf range. The project would entail a new building foundation, rebuilt walls (the current walls would need to be dismantled and rebuilt with new mortar), new doors and windows, interior finish out, roof joists and roof with HVAC, electrical and plumbing.

In essence a new building would be constructed, with the only material remaining from the original building would be the limestone wall blocks reassembled in the new walls. My question how can this reconstructed building than be considered historic.

In the eight years since the historic designation, no third party including the Geneva Park District has shown any interest in incurring the expense of the building restoration. How much longer should this go and why. I'm sure there are certain parties including the lawyers involved in the various litigation who would be happy to see the issue remain unresolved and continue into the future indefinitely. I doubt if the citizens of Geneva that you represent support that.

The building needs to come down and allow the overall development to proceed. To allow the present situation to continue is not acceptable.

Thank you,

Joel Erickson  
301 Burgess Road  
1st Ward

Dear Mr. Erickson,

Thank you for sharing your perspective on the proposed demolition of the historic structure at 4 East State Street. I appreciate hearing from constituents on issues that come before the council, and will take your thoughts into consideration as we review this issue.

Best,

Anaïs Bowring (she/her)

1st Ward Council Members Bowring and Malecki

I was in attendance at the last Historic Preservation Commission meeting where the commission voted 7-0 to deny the blacksmith shop demolition application that had been submitted by the property owner, a Shodeen controlled entity. My understanding is that Shodeen will be appealing this decision to city council in the near future.

Not withstanding the antagonism shown toward the applicant by the commission, I did not hear a compelling reason for denying the application.

Dave Patzelt from Shodeen stated that they would not be restoring the blacksmith shop building and their position has not changed from when the building was designated an historic landmark in 2018.

Their reason was clear, it is not economically feasible to restore the building with architects estimating the restoration cost to be in the \$1000 psf range. The project would entail a new building foundation, rebuilt walls (the current walls would need to be dismantled and rebuilt with new mortar), new doors and windows, interior finish out, roof joists and roof with HVAC, electrical and plumbing.

In essence a new building would be constructed, with the only material remaining from the original building would be the limestone wall blocks reassembled in the new walls. My question how can this reconstructed building than be considered historic.

In the eight years since the historic designation, no third party including the Geneva Park District has shown any interest in incurring the expense of the building restoration. How much longer should this go and why. I'm sure there are certain parties including the lawyers involved in the various litigation who would be happy to see the issue remain unresolved and continue into the future indefinitely. I doubt if the citizens of Geneva that you represent support that.

The building needs to come down and allow the overall development to proceed. To allow the present situation to continue is not acceptable.

Thank you,

Joel Erickson

5th Ward Councilman Reinecke,

Prior to last weeks city council vote on the above I mistakenly understood I was located in the 1st ward , I wasn't aware the ward maps had changed and I am now in your ward, the 5th ward. Below is my transmittal to who I thought were my council representatives before the vote.

Since you voted to deny the demolition application appeal, I respectfully ask that you reconsider the vote and bring this matter up to again to the council, and vote to approve the appeal.

Despite the rhetoric, the reality is the property owners will not and cannot be forced into this ill considered building rehabilitation. We, the citizens of Geneva will be forced to look at this blighted partially demolished building for the indefinite future unless this vote is overturned. If a poll of citizens was to be taken I believe a majority would support the demolition and subsequent development of this property. As with politics it seems to be a small vocal minority has managed to make their voices heard over the number they actually represent.

Please take the action necessary.

Thank you,

Joel Erickson

Mrs. Bowring and Mr. Malecki,  
I hope the day and New Year find you both well! As a constituent of the Ward 1, I am reaching out to you both as you prepare to consider the demolition and removal of the Blacksmith Shop this coming Monday. I'll not occupy a lot of your time as I know you both are likely receiving a great deal of feedback from the public on this issue. Just a quick background. My wife Janet and I have been residents at 427 Anderson Boulevard since 1999 where we raised a son (Jonah) and daughter (Sarah) both terrific kids (yikes...now adults!) who were byproducts of the Geneva public school system. I am an architect with a residential practice that has been blessed with many projects in Geneva's historic district. As well I've been teaching architecture at Judson University since 2008. Below are a few points to consider as your mull over your decision.

1) The demolition and permanent removal of the structure will greatly undermine the authority and purpose of the Historic Preservation Commission, a group that has been a key partner in the success of our downtown business district and residential district. I could go on and on with this point but I'll only note that having been a member of the HPC for 11 years (2000-2011) we had frequent incursions with the Shodeen organization as they pursued the removal the East View house, the Dodson mansion (once a hospital) and the many other structures. Shodeen now highlights the Dodson mansion as part of the Dodson Place retail development. The East View house is now the grande dame of homes along Route 31...hard to imagine them not there now. Can Shodeen work with and transform historic structures...you betcha they can. Is it easier to tear them down and erase their memory from our community, I guess this must be the case since they wish to do this with the blacksmith shop, but it's an odd argument to make in light of their successes. Certainly we can't predict the future, it seems likely though, that if Shodeen is given the authority to remove the blacksmith shop, there will inevitably be other applicants in the future requesting a similar fate for other historic structures in our community.

2) The property was purchased knowing full well that this structure was something important and would likely present the Shodeen organization with community interest and push back if they decided to remove the structure, yet little to no effort was made to placate the public that was and has been concerned about this. The organization it seems has done little to acknowledge the significance of the structure and even less as far as giving creative consideration for its reuse. It's clear they can do it as seen in their work with the Harrington Inn, Riverside Receptions and others throughout the Fox Valley.

3) It seems that there has been little to no compromise by Shodeen in relation to the repurposing of the blacksmith shop. The argument that was initially set forward was an issue of the cost of reusing the structure. The argument now has shifted to the structure being a public nuisance, a pretty easy argument to make when it's intentionally left unprotected and further compromised. It's been noted by both sides that the property is "unsightly", yet who currently owns the property? Who has ignored legal and financial consequences?...well you get the gist.

4) There aren't many artifacts like this one in our City, for that matter in the Fox Valley. It's easy to lose sight of this one as we hurdle toward being a City that has great potential and building it out to that potential will push structures like this into oblivion. Obviously once it's gone, it's gone and it's really our one chance to protect it.

5) Geneva has become and will likely even more so become a significant player in attracting residential and business interest in the years to come. As far as cities along the Fox River, trying to be objective about this, Geneva's downtown is and will be the most desirable location for both homeowners and businesses along the Fox River. That said, the long term financial upside for this site is enormous. Our City leadership should leverage this with the Shodeen organization. I do understand that this site is a challenging one to build on, but the folks at Shodeen purchased it knowing this. I believe that this parcel will be a significant generator of income for the Shodeen organization so money spent now for the restoration or repurposing of the blacksmith shop will be minimal when seen through the lens of time and the future.

I'm sure there are many other arguments that can be made for keeping the blacksmith shop but the five noted above came to my mind initially. As I noted above, I served on the HPC for 11 years and I so appreciate and understand the significant commitment of your time and energy on behalf of our community. So at the end of the day you can put me in the camp of keeping the blacksmith shop.

Warmly and grateful for your service!  
Sean

**Subject:** Re: Blacksmith Shop thoughts

Dear Sean,

Thank you for your thoughtful note in support of preserving the Blacksmith Shop. I greatly appreciate your work in the area and your insights on development of historically important structures.

Thank you again.

Have a very good evening,

Mark

Mrs. Bowring and Mr. Malecki,

I hope the day and New Year find you both well! As a constituent of the Ward 1, I am reaching out to you both as you prepare to consider the demolition and removal of the Blacksmith Shop this coming Monday. I'll not occupy a lot of your time as I know you both are likely receiving a great deal of feedback from the public on this issue. Just a quick background. My wife Janet and I have been residents at 427 Anderson Boulevard since 1999 where we raised a son (Jonah) and daughter (Sarah) both terrific kids (yikes...now adults!) who were byproducts of the Geneva public school system. I am an architect with a residential practice that has been blessed with many projects in Geneva's historic district. As well I've been teaching architecture at Judson University since 2008. Below are a few points to consider as you mull over your decision.

1) The demolition and permanent removal of the structure will greatly undermine the authority and purpose of the Historic Preservation Commission, a group that has been a key partner in the success of our downtown business district and residential district. I could go on and on with this point but I'll only note that having been a member of the HPC for 11 years (2000-2011) we had frequent incursions with the Shodeen organization as they pursued the removal the East View house, the Dodson mansion (once a hospital) and the many other structures. Shodeen now highlights the Dodson mansion as part of the Dodson Place retail development. The East View house is now the grande dame of homes along Route 31...hard to imagine them not there now. Can Shodeen work with and transform historic structures...you betcha they can. Is it easier to tear them down and erase their memory from our community, I guess this must be the case since they wish to do this with the blacksmith shop, but it's an odd argument to make in light of their successes. Certainly we can't predict the future, it seems likely though, that if Shodeen is given the authority to remove the blacksmith shop, there will inevitably be other applicants in the future requesting a similar fate for other historic structures in our community.

2) The property was purchased knowing full well that this structure was something important and would likely present the Shodeen organization with community interest and push back if they decided to remove the structure, yet little to no effort was made to placate the public that was and has been concerned about this. The organization it seems has done little to acknowledge the significance of the structure and even less as far as giving creative consideration for its reuse. It's clear they can do it as seen in their work with the Harrington Inn, Riverside Receptions and others throughout the Fox Valley.

3) It seems that there has been little to no compromise by Shodeen in relation to the repurposing of the blacksmith shop. The argument that was initially set forward was an issue of the cost of reusing the structure. The argument now has shifted to the structure being a public nuisance, a pretty easy argument to make when it's intentionally left unprotected and further compromised. It's been noted by both sides that the property is "unsightly", yet who currently owns the property? Who has ignored legal and financial consequences?...well you get the gist.

4) There aren't many artifacts like this one in our City, for that matter in the Fox Valley. It's easy to lose sight of this one as we hurdle toward being a City that has great potential and building it out to that potential will push structures like this into oblivion. Obviously once it's gone, it's gone and it's really our one chance to protect it.

5) Geneva has become and will likely even more so become a significant player in attracting residential and business interest in the years to come. As far as cities along the Fox River, trying to be objective about this, Geneva's downtown is and will be the most desirable location for both homeowners and businesses along the Fox River. That said, the long term financial upside for this site is enormous. Our City leadership should leverage this with the Shodeen organization. I do understand that this site is a challenging one to build on, but the folks at Shodeen purchased it knowing this. I believe that this parcel will be a significant generator of income for the Shodeen organization so money spent now for the restoration or repurposing of the blacksmith shop will be minimal when seen through the lens of time and the future.

I'm sure there are many other arguments that can be made for keeping the blacksmith shop but the five noted above came to my mind initially. As I noted above, I served on the HPC for 11 years and I so appreciate and understand the significant commitment of your time and energy on behalf of our community. So at the end of the day you can put me in the camp of keeping the blacksmith shop.

Warmly and grateful for your service!  
Sean

Hi David,

Unfortunately, I figured that the City of Geneva would not be repairing that apron area ( even though it is on City owned land ) so I plan on replacing that bad section of asphalt this spring/summer.

**Subject:** Campbell St. Apron

Good afternoon Bill,

I am writing regarding the failing asphalt condition at the entrance to the alley that accesses the rear of 207 S. 3<sup>rd</sup> St. from Campbell St. It sounds like there has been years of back and forth on whether the City is responsible for the repair of this asphalt section or if that responsibility belongs to the property owner. I am confirming for you now that, much like a homeowner is responsible for the repair of their driveway apron, this driveway apron is the responsibility of the property owner regardless of being located on City-owned property. I have included a satellite image and a photo from today to confirm the location in question as well as the current condition of the asphalt apron. The City does not repair private driveway aprons.

Thanks,  
**Brian Davids**

Brian - Sorry for the delay. Please see attached. Also please see the floorplan from the landlord.

I thought I owed you more docs, but I only see this one attached. I know we handled the sign permit separately. Am I forgetting one?

Best,

Tom

Tom,

I was looking at occupancies and it was noted that we have not received your "change of tenant" permit application. I've attached the application for your use. Please send a floor plan that shows exits, exit/emergency lights and fire extinguishers along with the application. Please feel free to reach out with any questions.

Thank you

Good morning Dave,

We have received your request for an appeal. We are tentatively looking at a meeting on Monday, January 12<sup>th</sup>. Would that work for you?

We will order the transcripts and I trust the court reporter will accurately reflect comments made from the dais.

**David DeGroot**

Director of Community Development

**Subject:** Re: Construction/digging/damage on 108 Oak st

**CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.**

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost?), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

Good afternoon Lee,

The work that is currently taking place on Oak and Chrissey is being performed by Archon who is a contractor for AT&T. This is a result of the E. State St project and the relocation of the utilities to accommodate that work. This information was published to resident's on the city's website and can be found at this link which is updated weekly.

[E. State Street Reconstruction Updates](#)

All work is occurring in the public right of way and not on any private property. Construction is scheduled to be wrapped up tomorrow and then restoration of the area will begin. Any existing piles will be removed and the area will be leveled back out. Unfortunately, full restoration will not occur until spring.

While I don't have time to meet with you today, I am available tomorrow for further discussion if you would like.

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,  
Lee Eysturlid

**Subject:** Re: Construction/digging/damage on 108 Oak st

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,  
Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12?PM Lee Eysturlid <[leysturl@imsa.edu](mailto:leysturl@imsa.edu)> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct then the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost?), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

So this doesn't address my questions. And now there are police and fire trucks as there is a gas leak. No one could bother to tell me that either, although when I went to ask I was told to go away. How would I know to go read that? Clearly I am bothering you, sorry.

Do call or come by tomorrow if you can manage it.

On Mon, Dec 22, 2025 at 3:22?PM Landers, Nate <[nlanders@geneva.il.us](mailto:nlanders@geneva.il.us)> wrote:

Good afternoon Lee,

The work that is currently taking place on Oak and Chrissey is being performed by Archon who is a contractor for AT&T. This is a result of the E. State St project and the relocation of the utilities to accommodate that work. This information was published to residents on the city's website and can be found at this link which is updated weekly.

[E. State Street Reconstruction Updates](#)

All work is occurring in the public right of way and not on any private property. Construction is scheduled to be wrapped up tomorrow and then restoration of the area will begin. Any existing piles will be removed and the area will be leveled back out. Unfortunately, full restoration will not occur until spring.

While I don't have time to meet with you today, I am available tomorrow for further discussion if you would like.

Thanks,

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlid

4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost?), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlid

Rich,

Is there any further follow up planned regarding the concerns of Mr. Eysturlid? I realized that Nate met with him but it seems that with more recent developments another meeting is warranted. I saw that more construction was taking place in the immediate area in question on Monday, 1/5. Today it seems work has been completed and the area restored to a point where it's about all that can be done until spring. Would you agree that with all the construction that took place resulting from the East State and Roosevelt projects, a public relations outreach might be helpful in this neighborhood?  
Your thoughts?

Larry and I are prepared to attend and support you if you agree. Call if you would like to discuss.

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,  
Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12?PM Lee Eysturlid <leysturl@imsa.edu> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and

then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost?), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

Dean

Hello:

So this doesn't address my questions. And now there are police and fire trucks as there is a gas leak. No one could bother to tell me that either, although when I went to ask I was told to go away. How would I know to go read that? Clearly I am bothering you, sorry.

Do call or come by tomorrow if you can manage it.

Lee

Good afternoon Lee,

The work that is currently taking place on Oak and Chrissey is being performed by Archon who is a contractor for AT&T. This is a result of the E. State St project and the relocation of the utilities to accommodate that work. This information was published to residents on the city's website and can be found at this link which is updated weekly.

[E. State Street Reconstruction Updates](#)

All work is occurring in the public right of way and not on any private property. Construction is scheduled to be wrapped up tomorrow and then restoration of the area will begin. Any existing piles will be removed and the area will be leveled back out. Unfortunately, full restoration will not occur until spring.

While I don't have time to meet with you today, I am available tomorrow for further discussion if you would like.

Thanks,

**Nate Landers**

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,  
Lee Eysturlid

Rich,

Is there any further follow up planned regarding the concerns of Mr. Eysturlid? I realized that Nate met with him but it seems that with more recent developments another meeting is warranted. I saw that more construction was taking place in the immediate area in question on Monday, 1/5. Today it seems work has been completed and the area restored to a point where it's about all that can be done until spring. Would you agree that with all the construction that took place resulting from the East State and Roosevelt projects, a public relations outreach might be helpful in this neighborhood?  
Your thoughts?

Larry and I are prepared to attend and support you if you agree. Call if you would like to discuss.

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,  
Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12?PM Lee Eysturlid <leysturl@imsa.edu> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and

then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sunglasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all). Please feel free to contact me if you want to discuss this. I am not the only person affected.

Hello:

So this doesn't address my questions. And now there are police and fire trucks as there is gas leak. No one could bother to tell me that either, although when I went to ask I was told to go away. How would I know to go read that? Clearly I am bothering you, sorry.

Do call or come by tomorrow if you can manage it.

Lee

On Mon, Dec 22, 2025 at 3:22?PM Landers, Nate <[nlanders@geneva.il.us](mailto:nlanders@geneva.il.us)> wrote:

Good afternoon Lee,

The work that is currently taking place on Oak and Chrissey is being performed by Archon who is a contractor for AT&T. This is a result of the E. State St project and the relocation of the utilities to accommodate that work. This information was published to resident's on the city's website and can be found at this link which is updated weekly.

[E. State Street Reconstruction Updates](#)

All work is occurring in the public right of way and not on any private property. Construction is scheduled to be wrapped up tomorrow and then restoration of the area will begin. Any existing piles will be removed and the area will be leveled back out. Unfortunately, full restoration will not occur until spring.

While I don't have time to meet with you today, I am available tomorrow for further discussion if you would like.

Thanks,

**Nate Landers**

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,  
Lee Eysturlid

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

That was a lot. I am not sure what my takeaway is supposed to be. I guess you are telling me the city failed in a number of its responsibilities to a resident/taxpayer/property owner that has striven for 25 years to maintain that property and a small greenspace, and what? Dean Kilburg said that you and he would come and talk with me, face-to-face (it was in the email), will that happen? I have recorded the events (including the gas main break - which you don't address - the Sonoma guys told me they were given inadequate maps..) in pictures of the area; it is now a serious mess. I know that after this kind of thing the city usually just levels the ground and throws grass seed. Worthless. It means that I get to do the recovery work. Also, I have spoken with most of the contractors, especially several of the men from Sonoma Underground (who were, they told me, contracted by Geneva Electric/Power - they were all very cordial, btw.). When I told them about the city's treatment of me and the property, they rolled their eyes and said "this always happens, cities don't care and do as they want..." A damning indictment.

I would still like to meet with you, Rich, and at least one of my aldermen (I assume that would be Dean, he has been very good about communication) here, so I can show you the destruction. I would like a definitive idea of what parts of the property aren't worth fixing (Sonoma said they would return to run power lines from the new pole at some point - more destruction), so I know exactly what you all control and what I have left to me. Finally, if the Roosevelt is this much of a mess, can you imagine the construction of a six story apartment block on the Mill Race lot?

Sincerely,  
Lee W. Eysturlid  
108 Oak St.

On Thu, Jan 8, 2026 at 8:55:AM Babica, Rich <[rbabica@geneva.il.us](mailto:rbabica@geneva.il.us)> wrote:  
Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

**Subject:** Re: Construction/digging/damage on 108 Oak st

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12?PM Lee Eysturlid <[levsturl@imsa.edu](mailto:levsturl@imsa.edu)> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct then the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

**Subject:** Re: Construction/digging/damage on 108 Oak st

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12?PM Lee Eysturlid <[levsturl@imsa.edu](mailto:levsturl@imsa.edu)> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct then the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

Sincerely,  
Lee Eysturlid

Hello:

That was a lot. I am not sure what my takeaway is supposed to be. I guess you are telling me the city failed in a number of its responsibilities to a resident/taxpayer/property owner that has striven for 25 years to maintain that property and a small greenspace, and what? Dean Kilburg said that you and he would come and talk with me, face-to-face (it was in the email), will that happen? I have recorded the events (including the gas main break - which you don't address - the Sonoma guys told me they were given inadequate maps..) in pictures of the area; it is now a serious mess. I know that after this kind of thing the city usually just levels the ground and throws grass seed. Worthless. It means that I get to do the recovery work. Also, I have spoken with most of the contractors, especially several of the men from Sonoma Underground (who were, they told me, contracted by Geneva Electric/Power - they were all very cordial, btw.). When I told them about the city's treatment of me and the property, they rolled their eyes and said "this always happens, cities don't care and do as they want..." A damning indictment.

I would still like to meet with you, Rich, and at least one of my aldermen (I assume that would be Dean, he has been very good about communication) here, so I can show you the destruction. I would like a definitive idea of what parts of the property aren't worth fixing (Sonoma said they would return to run power lines from the new pole at some point - more destruction), so I know exactly what you all control and what I have left to me. Finally, if the Roosevelt is this much of a mess, can you imagine the construction of a six story apartment block on the Mill Race lot?

Sincerely,  
Lee W. Eysturlid  
108 Oak St.

On Thu, Jan 8, 2026 at 8:55?AM Babica, Rich <[rbabica@geneva.il.us](mailto:rbabica@geneva.il.us)> wrote:  
Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

**Rich Babica**

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,  
Lee Eysturid

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

That was a lot. I am not sure what my takeaway is supposed to be. I guess you are telling me the city failed in a number of its responsibilities to a resident/taxpayer/property owner that has striven for 25 years to maintain that property and a small greenspace, and what? Dean Kilburg said that you and he would come and talk with me, face-to-face (it was in the email), will that happen? I have recorded the events (including the gas main break - which you don't address - the Sonoma guys told me they were given inadequate maps..) in pictures of the area; it is now a serious mess. I know that after this kind of thing the city usually just levels the ground and throws grass seed. Worthless. It means that I get to do the recovery work. Also, I have spoken with most of the contractors, especially several of the men from Sonoma Underground (who were, they told me, contracted by Geneva Electric/Power - they were all very cordial, btw.). When I told them about the city's treatment of me and the property, they rolled their eyes and said "this always happens, cities don't care and do as they want..." A damning indictment.

I would still like to meet with you, Rich, and at least one of my aldermen (I assume that would be Dean, he has been very good about communication) here, so I can show you the destruction. I would like a definitive idea of what parts of the property aren't worth fixing (Sonoma said they would return to run power lines from the new pole at some point - more destruction), so I know exactly what you all control and what I have left to me. Finally, if the Roosevelt is this much of a mess, can you imagine the construction of a six story apartment block on the Mill Race lot?

Sincerely,  
Lee W. Eysturlid  
108 Oak St.

On Thu, Jan 8, 2026 at 8:55?AM Babica, Rich <[rbabica@geneva.il.us](mailto:rbabica@geneva.il.us)> wrote:  
Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

**Rich Babica**

**Subject:** Re: Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch. Sincerely,  
Lee W. Eysturlid

On Thu, Dec 25, 2025 at 9:12?PM Lee Eysturlid <[leysturl@imsa.edu](mailto:leysturl@imsa.edu)> wrote:

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

On Thu, Dec 25, 2025 at 8:17?AM Dean Kilburg <[dkilburg49@gmail.com](mailto:dkilburg49@gmail.com)> wrote:

Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

Dean

Hello:

So this doesn't address my questions. And now there are police and fire trucks as their is gas leak. No one could bother to tell me that either, although when I went to ask I was told to go away. How would I know to go read that? Clearly I am bothering you, sorry. Do call or come by tomorrow if you can manage it.

On Mon, Dec 22, 2025 at 3:22?PM Landers, Nate <[nlanders@geneva.il.us](mailto:nlanders@geneva.il.us)> wrote:

Good afternoon Lee,

The work that is currently taking place on Oak and Chrissey is being performed by Archon who is a contractor for AT&T. This is a result of the E. State St project and the relocation of the utilities to accommodate that work. This information was published to resident's on the city's website and can be found at this link which is updated weekly.

[E. State Street Reconstruction Updates](#)

All work is occurring in the public right of way and not on any private property. Construction is scheduled to be wrapped up tomorrow and then restoration of the area will begin. Any existing piles will be removed and the area will be leveled back out. Unfortunately, full restoration will not occur until spring.

While I don't have time to meet with you today, I am available tomorrow for further discussion if you would like.

Thanks,

**Nate Landers**

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlid

And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch. Sincerely,  
Lee W. Eysturlid

Hello Dean:

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

Lee,

Certainly not the way you had planned your week leading up to Christmas. Considering the scope of the project to be undertaken, the communication with the residents in the area should have been much better. I was glad to see that Nate met with you and recognized that follow up will be necessary to right the damage created by Nicor. We all realize that it's difficult to replace landscaping that has taken sometime years to develop. Follow up will be important so every effort is made to address your concerns. Let me know if I can support your satisfaction with the repair work and the concerns you've expressed as conditions permit.

Dean

Hello:

So this doesn't address my questions. And now there are police and fire trucks as their is gas leak. No one could bother to tell me that either, although when I went to ask I was told to go away. How would I know to go read that? Clearly I am bothering you, sorry. Do call or come by tomorrow if you can manage it.

On Mon, Dec 22, 2025 at 3:22?PM Landers, Nate <[nlanders@geneva.il.us](mailto:nlanders@geneva.il.us)> wrote:

Good afternoon Lee,

The work that is currently taking place on Oak and Chrissey is being performed by Archon who is a contractor for AT&T. This is a result of the E. State St project and the relocation of the utilities to accommodate that work. This information was published to resident's on the city's website and can be found at this link which is updated weekly.

[E. State Street Reconstruction Updates](#)

All work is occurring in the public right of way and not on any private property. Construction is scheduled to be wrapped up tomorrow and then restoration of the area will begin. Any existing piles will be removed and the area will be leveled back out. Unfortunately, full restoration will not occur until spring.

While I don't have time to meet with you today, I am available tomorrow for further discussion if you would like.

Thanks,

**Subject:** Construction/digging/damage on 108 Oak st

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at 108 Oak St since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Lee Eysturlid

**To:** Schultze, Dustin; Helmrich, Jennifer  
**Cc:** Byrne, Brian  
**Subject:** RE: Data

Year	Residential	Commercial	Industrial	Other
2021	\$36,346,418.95	\$16,017,836.00	\$0	\$6,310,477.40
2022	\$97,389,387.48	\$67,585,137.42	\$0	\$5,220,418.40
2023	\$44,535,668.59	\$45,463,986.65	\$28,030,233.00	\$5,423,141.23
2024	\$24,500,650.13	\$27,209,487.37	\$0	\$4,542,592.00
2025	\$34,140,845.78	\$30,095,317.71	\$0	\$4,893,055.60

I was able to get Industrial to match previous year's numbers after working with the permit types in the reports.  
Commercial, residential and other are off by a couple of thousand either way. I have included a sample report of each of these so you can see what permit types are in each category.

Industrial has the following permit types:

Add/Exp-Ind  
Int Remodel-Ind  
New Industrial

Let me know if you need anything else.

Hi David,

If Shodeen's would appeal to the council for demolition on the Mill Race historic structure, what would be the supportive vote requirement? Is it a super majority of 10 or 11.....requiring 7 or 8 yes votes?

Thanks.

**To:** Collins, Peter  
**Subject:** RE: DRAFT: Data Center Move / I.T. Planning

A few small edits/suggestions. Let's chat.

All:

For discussion's sake, I just wanted to flesh out some upcoming needs/requirements/wants and make sure they are on the radar for the big picture. Most of this is spit-balling, but it needs to be part of the space needs and financial planning thoughts. Since Finance will also be impacted, there may be shared space opportunities to consider. Much of this is contingent upon what the plans are for the Police Station after a future move.

Data Center: Upon completion of a new GPDHQ, it would seem there are a few options:

- Keep Data Center at old police station (this has to be relocated before the building is sold or demolished, moving the data center is costly and ideally something we only want to do once).
- Move Data Center & IT Offices to:
  - City Hall
  - Library Building
  - Somewhere on PD/PW Campus
  - Some leased-to-own dead retail (think brick Shodeen building N/E of current PD on Rt. 38.)
  - If IT not located at City Hall, the data center should ideally move here. It can be relocated within City Hall at minimal cost in the future. This not ideal but we can make it work on a temporary basis until more permanent offices are available.

As I await more detailed costing, I think I can make some fairly broad costing estimates that would serve for planning purposes.

- New Core Fiber Switch and programming: 100k
- Relocation of fiber head end to City Hall /Library: 100k
- Relocation of fiber head end anywhere else:
  - Engineering study to address current fiber usage across plant & any "make ready" work across Geneva utility poles/easements: 50k
  - Actual fiber construction: 100 to 200k

Assuming a new Data Center build, regardless of location, I.T. staff should move with it. Making some broad future assumptions about staffing, I'd suggest the consideration of the following, long-term space needs:

- Office for I.T. Manager
- Office for I.T. Analyst
- Office for I.T./Video Tech
- Server room
- Storage Room
- Workspace for new machine deployment
- If I.T. were tasked with managing G.I.S. functions, 3 offices for G.I.S. staff.
- Access to Bathrooms/Meeting Rooms facilities

While we could live anywhere, I think it's important that we get ahead on thinking about where and when the data center is relocated, and where the IT Analyst will be relocated to in the future. There may be a possibility to share temporary facilities with Finance.

While much of this may have been considered when we were looking at this from a "City Facilities Referendum", I don't know how much of it carried over into cost estimates for relocating GPD. My guess is that the Police have not made any changes to absorb I.T. needs on a temporary basis into their designs (should that be the plan.)

As I've professed in the past, as a branch of Admin Services (and historically being under the direct lead of Administration), I.T. would hope to continue to exist in that scenario, and so our preference would be to keep the "data" under that guidance and control on a daily basis, and it's probably cheaper to keep us as "Near West Siders" from the get go.

Data Center: Upon completion of a new GPDHQ, it would seem there are a few options:

- Close Police functions of building, close off the Admin sections (everything under the flat roof), and leave Finance & Data Center (and move all of I.T.) in the existing arched roof section of the building. Flat roof section could be demo'd and removed.
- Close all functions of PD/Finance building. Demo. Move Data Center & IT to:
  - City Hall
  - Library Building
  - Somewhere on PD/PW Campus
  - Some leased-to-own dead retail (think brick Shodeen building N/E of current PD on Rt. 38.

For discussion's sake, I just wanted to flesh out some upcoming needs/requirements/wants and make sure they are on the radar for the big picture. Most of this is spit-balling, but it needs to be part of the space needs and financial planning thoughts. Since Finance will also be impacted, there may be shared space opportunities to consider. Much of this is contingent upon what the plans are for the Police Station after a future move.

Data Center: Upon completion of a new GPDHQ, it would seem there are a few options:

- Keep Data Center at old police station (this has to be relocated before the building is sold or demolished, moving the data center is costly and ideally something we only want to do once).
- Move Data Center & IT Offices to:
  - City Hall
  - Library Building
  - Somewhere on PD/PW Campus
  - Some leased-to-own dead retail (think brick Shodeen building N/E of current PD on Rt. 38.)
  - If IT not located at City Hall, the data center should ideally move here. It can be relocated within City Hall at minimal cost in the future. This not ideal but we can make it work on a temporary basis until more permanent offices are available.

As I await more detailed costing, I think I can make some fairly broad costing estimates that would serve for planning purposes.

- New Core Fiber Switch and programming: 100k
- Relocation of fiber head end to City Hall /Library: 100k
- Relocation of fiber head end anywhere else:
  - Engineering study to address current fiber usage across plant & any "make ready" work across Geneva utility poles/easements: 50k
  - Actual fiber construction: 100 to 200k

Assuming a new Data Center build, regardless of location, I.T. staff should move with it. Making some broad future assumptions about staffing, I'd suggest the consideration of the following, long-term space needs:

- Office for I.T. Manager
- Office for I.T. Analyst
- Office for I.T./Video Tech
- Server room
- Storage Room
- Workspace for new machine deployment
- If I.T. were tasked with managing G.I.S. functions, 3 offices for G.I.S. staff.
- Access to Bathrooms/Meeting Rooms facilities

While we could live anywhere, I think it's important that we get ahead on thinking about where and when the data center is relocated, and where the IT Analyst will be relocated to in the future. There may be a possibility to share temporary facilities with Finance.

While much of this may have been considered when we were looking at this from a "City Facilities Referendum", I don't know how much of it carried over into cost estimates for relocating GPD. My guess is that the Police have not made any changes to absorb I.T. needs on a temporary basis into their designs (should that be the plan.)

As I've professed in the past, as a branch of Admin Services (and historically being under the direct lead of Administration), I.T. would hope to continue to exist in that scenario, and so our preference would be to keep the "data" under that guidance and control on a daily basis, and it's probably cheaper to keep us as "Near West Siders" from the get go.

All:

For discussion's sake, I just wanted to flesh out some upcoming needs/requirements/wants and make sure they are on the radar for the big picture. Most of this is spit-balling, but it needs to be in your planning thoughts.

Data Center: Upon completion of a new GPDHQ, it would seem there are a few options:

- Close Police functions of building, close off the Admin sections (everything under the flat roof), and leave Finance & Data Center (and move all of I.T.) in the existing arched roof section of the building. Flat roof section could be demo'd and removed.
- Close all functions of PD/Finance building. Demo. Move Data Center & IT to:
  - City Hall
  - Library Building
  - Somewhere on PD/PW Campus
  - Some leased-to-own dead retail (think brick Shodeen building N/E of current PD on Rt. 38.

As I await more detailed costing, I think I can make some fairly broad costing estimates that would serve for planning purposes.

- New Core Fiber Switch and programming: 100k
- Relocation of fiber head end to City Hall /Library: 100k
- Relocation of fiber head end anywhere else:

Hey Jake,

Am I correct in assuming anything with a blue or green row was edited?

Also if you want to send over what ever files Mike Anderson had I can make sure our GIS database is up to date.

No rush im sure you have a lot to deal with with everyone out and all the changes!

I don't handle the apartment areas so I don't know if any of that work has been completed.  
If you want to get into the apartment common areas, you can use my code, it is either #5000 or 5000#.  
The main entry door is unlocked but my code will get you into the locked door which is next.  
By using my code you can get in whenever it works best for you.

I am not sure if the retail tenant is there , I can email them and find out the next time they will be there and let you know once they respond .

Bill,

The following were the violations we need to check on for the common areas on 500 S. Thirds St.

Emergency lights out NW Basement garage and south stairs between first and second floor  
Exit signs out Garage level south door  
Exit sign wrong direction – garage south side pointing to an area with no exit  
Fire extinguishers out of date in entire common area

Also had violations at Citywide Title, in suite 108, this had you listed as the contact person

Emergency lights out in back room and restroom  
Fire extinguisher by back door need to be serviced and mounted

Good Evening,

We need to complete a reinspection in the building at 500 S. Third St. in Geneva. We need to complete a reinspection of the common area and Citywide Title at suite 108, which has your email listed in their contact information.

We would like to stop by on Friday November 28<sup>th</sup>. Please email me back with a time that would work for you and we will stop by and complete the reinspection.

Thanks and Happy Thanksgiving.

Bill,

The following were the violations we need to check on for the common areas on 500 S. Third St.

- Emergency lights out NW Basement garage and south stairs between first and second floor
- Exit signs out Garage level south door
- Exit sign wrong direction – garage south side pointing to an area with no exit
- Fire extinguishers out of date in entire common area

Also had violations at Citywide Title, in suite 108, this had you listed as the contact person

- Emergency lights out in back room and restroom
- Fire extinguisher by back door need to be serviced and mounted

Dear Jeanne,

There's nothing in my personal email accounts for any of these search terms since I joined the City Council last April.

There are a few that predate my joining the City Council, including an HPC permit for us to install a fence on our property (2024), a CASA newsletter (2022), and a gentleman sending me an email about an upcoming Geneva election (which was unopened). The term "evidentiary record" yielded a large number of emails regarding California law and cold case investigations, all sent before I joined the City Council.

I hope this is of help.

Mark

Hi Jeanne:

Thanks much. Because the City's response to this request will likely be replete with legally protected materials, I want to make sure we do not release attorney-client materials accidentally. So, please let me know when we have gathered responsive emails/documents (including responsive personal emails) and I will come review the same to make sure our response is appropriate.

Thanks.

Ron

**Subject:** FOIA request, Aurora Beacon-News

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Dear FOIA Officer:

Please consider this a freedom of information request for the following records:

All emails sent or received by Dean Kilburg, Mark Reinecke, Anaïs Bowring, William Malecki, Richard Marks, Brad Kosirog, Larry Furnish, Martha Paschke, Amy Mayer, Jeff Palmquist and Kevin Burns between Dec. 1, 2025 and Jan. 16, 2026, that include any of the following search terms in the subject, body or attachments of the email (please do individual searches for these keywords if possible):

"Shodeen"  
"Dave Patzelt"  
"HPC"  
"evidentiary record"

If this search would yield a burdensome amount of results, please contact me, as I am willing to narrow the scope of my request.

Please note: I know of no exemption that would allow these records to not be released, absent pinpoint redactions for private information such as Social Security Numbers. If your agency believes any parts of any records are exempt from disclosure, please provide an explanation to justify the redaction or withholding, and then provide the rest of the records. Please note that statute does not allow your agency to withhold documents in their entirety if only parts of the records may be exempt.

I'm requesting the records in electronic format, if they can be provided in that format. Otherwise, please provide the records in whatever format they are kept.

I am a member of the news media doing research in the public interest and request fees be waived. Please call me if you believe this request will cost more than \$50 to fulfill.

Please contact me with any questions at [mmorrow@chicagotribune.com](mailto:mmorrow@chicagotribune.com) or (312) 237-6299. Thank you very much.

Best,  
Molly Morrow

**CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.**

Dear FOIA Officer:

Please consider this a freedom of information request for the following records:

All emails sent or received by Dean Kilburg, Mark Reinecke, Anaïs Bowring, William Malecki, Richard Marks, Brad Kosirog, Larry Furnish, Martha Paschke, Amy Mayer, Jeff Palmquist and Kevin Burns between Dec. 1, 2025 and Jan. 16, 2026, that include any of the following search terms in the subject, body or attachments of the email (please do individual searches for these keywords if possible):

"Shodeen"  
"Dave Patzelt"  
"HPC"  
"evidentiary record"

If this search would yield a burdensome amount of results, please contact me, as I am willing to narrow the scope of my request.

Please note: I know of no exemption that would allow these records to not be released, absent pinpoint redactions for private information such as Social Security Numbers. If your agency believes any parts of any records are exempt from disclosure, please provide an explanation to justify the redaction or withholding, and then provide the rest of the records. Please note that statute does not allow your agency to withhold documents in their entirety if only parts of the records may be exempt.

I'm requesting the records in electronic format, if they can be provided in that format. Otherwise, please provide the records in whatever format they are kept.

I am a member of the news media doing research in the public interest and request fees be waived. Please call me if you believe this request will cost more than \$50 to fulfill.

Please contact me with any questions at [mmorrow@chicagotribune.com](mailto:mmorrow@chicagotribune.com) or (312) 237-6299. Thank you very much.

Best,  
Molly Morrow

**To:** Debra Schrilla; Kilburg, Dean  
**Subject:** Re: Historic Blacksmith Location

Hi Debra

Thanks for your input on the blacksmith shop. The decision on this project has been kicked down the road for over 12 years. The Historic Preservation Commission voted last month to not let the developer demolish the blacksmith shop.

Now this application has been moved to the Jan 12 Special Council meeting for review. The council would need a 70% vote to override the Historic Preservation Commission's vote.

Lets hope that there is new information on the blacksmith shop to preserve the memory of the building.

Thanks for reaching out to Dean and me.

Larry Furnish

\*\*\*\*\*

Gentlemen,  
As a resident of Geneva's 3rd Ward, I just wanted to state how much I appreciate all that has been done to preserve the blacksmith location along the river. It is apparent that Shodeen has allowed that location to become an eyesore in an attempt to clear the way to develop that site without any preservation restrictions. I believe that with some creative thinking the property could be developed in a way that preserves some of Geneva's history and is an asset to our community. I hope that Geneva will continue to stand strong and search for a solution that will embrace our history and not erase it.  
Thank you for your service to our community,  
Debra Schrilla

Hi Debra

Thanks for your input on the blacksmith shop. The decision on this project has been kicked down the road for over 12 years. The Historic Preservation Commission voted last month to not let the developer demolish the blacksmith shop.

Now this application has been moved to the Jan 12 Special Council meeting for review. The council would need a 70% vote to override the Historic Preservation Commission's vote.

Lets hope that there is new information on the blacksmith shop to preserve the memory of the building.

Thanks for reaching out to Dean and me.

Larry Furnish

Gentlemen,  
As a resident of Geneva's 3rd Ward, I just wanted to state how much I appreciate all that has been done to preserve the blacksmith location along the river. It is apparent that Shodeen has allowed that location to become an eyesore in an attempt to clear the way to develop that site without any preservation restrictions. I believe that with some creative thinking the property could be developed in a way that preserves some of Geneva's history and is an asset to our community. I hope that Geneva will continue to stand strong and search for a solution that will embrace our history and not erase it.

Debra,

Thank you for your note. Larry responded and this topic will be before our council on 1/12. It's been nearly a decade since the demolition of the Mill Race Inn. The remains of the blacksmith building from the 1840's is in a very deteriorated state. The restoration of the building involves an important financial piece. This has been explored and previous demolition request denied by the city council. The building was offered for sale for \$1.00 with no interest. Since Shodeen's own the property it's future development is a business decision for their company. Since this requires a sizable investment it may be time to move forward. Monday evening we will decide if preservation is worth further delay or the time has come for the sites development.

Thank you for sharing your perspective.

Interesting that Landmarks Illinois & Preservation Partners are throwing out options to the City ... but apparently aren't doing so to the owner directly?

That aside, after a bit of time has passed, we should think through next steps because this situation only gets more intractable as time passes.

Kathleen,

The following memo from Landmarks Illinois contains information on funding historic preservation projects for municipalities. Has Geneva explored or submitted application for such funding that could play a possible role in reaching a possible resolution with the Blacksmith structure?

Thanks.

Dean

**Subject:** RE: Appeal of CASE 2025-114: 4 E. State Street

?  
Mr. Kilburg,

While the vote last night was the outcome that Landmarks Illinois hoped for, I completely appreciate that the lack of movement at this site is frustrating for all parties. As far as funding, Landmarks Illinois has two grant programs that 4 E. State Street is geographically eligible for. Our [Preservation Heritage Fund](#) is for brick and mortar work, while the [Donnelley Fund](#) is for project planning. Private entities like Shodeen are not eligible for either of these programs, but the City of Geneva would be an eligible applicant. We prioritize funding for places that have appeared on our Most Endangered Historic Places in Illinois list in the past, as 4 E. State Street has. We also have the [Reinvestment Program](#), a revolving loan fund that helps to fill gaps in financing for historic preservation projects. At present we're able to make loans of up to \$200,000 in communities outside of Chicago. We would also welcome the opportunity to help identify other potential funding sources, which depend in part on a proposed use and whether the building will continue to be privately owned.

Best,

**Kendra Parzen**

Ms. Parzen,

Thanks for your memo regarding the Geneva's special meeting last night. Your points are all appropriate and well taken. Unfortunately, we have had grid-lock and the site will remain an eye sore for our community. Without communication and some level of compromise, we are probably looking at the status quo for at least a few more years. I believe memorializing the structure as proposed will eventually play into the eventual development of the Mill Race. Some may call that would be surrendering to the Shodeen's (the developer), my vote reflected accepting the reality of the situation we find ourselves in. Denying demolition for nearly a decade hasn't worked. Maybe we need those very passionate about the preservation of these historic structures to provide financial resources so we can consider a different approach. What funding resources do you have available?

Thanks for your communication and interest with this very challenging issue for the city and our elected officials.

Good Morning,

Thank you for sending this information. We have explored these funding options in the past and have discussed them with the owner's representative. As we understand, owner participation is needed because an applicant must own or control the subject property for a project to be eligible for funding.

Thanks, Cathleen

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Kathleen,

The following memo from Landmarks Illinois contains information on funding historic preservation projects for municipalities. Has Geneva explored or submitted application for such funding that could play a possible role in reaching a possible resolution with the Blacksmith structure?

Thanks.

Dean

?  
Mr. Kilburg,

While the vote last night was the outcome that Landmarks Illinois hoped for, I completely appreciate that the lack of movement at this site is frustrating for all parties. As far as funding, Landmarks Illinois has two grant programs that 4 E. State Street is geographically eligible for. Our [Preservation Heritage Fund](#) is for brick and mortar work, while the [Donnelley Fund](#) is for project planning. Private entities like Shodeen are not eligible for either of these programs, but the City of Geneva would be an eligible applicant. We prioritize funding for places that have appeared on our Most Endangered Historic Places in Illinois list in the past, as 4 E. State Street has. We also have the [Reinvestment Program](#), a revolving loan fund that helps to fill gaps in financing for historic preservation projects. At present we're able to make loans of up to \$200,000 in communities outside of Chicago. We would also welcome the opportunity to help identify other potential funding sources, which depend in part on a proposed use and whether the building will continue to be privately owned.

Best,

**Kendra Parzen**  
Advocacy Manager

Ms. Parzen,

Thanks for your memo regarding the Geneva's special meeting last night. Your points are all appropriate and well taken. Unfortunately, we have had grid-lock and the site will remain an eye sore for our community. Without communication and some level of compromise, we are probably looking at the status quo for at least a few more years. I believe memorializing the structure as proposed will eventually play into the eventual development of the Mill Race. Some may call that would be surrendering to the Shodeen's (the developer), my vote reflected accepting the reality of the situation we find ourselves in. Denying demolition for nearly a decade hasn't worked. Maybe we need those very passionate about the preservation of these historic structures to provide financial resources so we can consider a different approach. What funding resources do you have available?

Thanks for your communication and interest with this very challenging issue for the city and our elected officials.

**From:** Tymoszenko, Cathleen  
**Sent:** Wednesday, January 14, 2026 10:46:02 AM  
**To:** Kilburg, Dean  
**Cc:** Voigt, Alex; Burns, Kevin; DeGroot, David  
**Subject:** RE: Landmarks Illinois Funding

Good Morning,

Thank you for sending this information. We have explored these funding options in the past and have discussed them with the owner's representative. As we understand, owner participation is needed because an applicant must own or control the subject property for a project to be eligible for funding.

Thanks, Cathleen

**Cathleen Tymoszenko**

Director of Economic Development

**City of Geneva, Illinois**  
Economic Development  
22 South First Street, Geneva, IL 60134

**Subject:** Landmarks Illinois Funding

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Kathleen,

The following memo from Landmarks Illinois contains information on funding historic preservation projects for municipalities. Has Geneva explored or submitted application for such funding that could play a possible role in reaching a possible resolution with the Blacksmith structure?

Thanks.

Dean

**Subject:** RE: Appeal of CASE 2025-114: 4 E. State Street

?

Mr. Kilburg,

While the vote last night was the outcome that Landmarks Illinois hoped for, I completely appreciate that the lack of movement at this site is frustrating for all parties. As far as funding, Landmarks Illinois has two grant programs that 4 E. State Street is geographically eligible for. Our [Preservation Heritage Fund](#) is for brick and mortar work, while the [Donnelley Fund](#) is for project planning. Private entities like Shodeen are not eligible for either of these programs, but the City of Geneva would be an eligible applicant. We prioritize funding for places that have appeared on our Most Endangered Historic Places in Illinois list in the past, as 4 E. State Street has. We also have the [Reinvestment Program](#), a revolving loan fund that helps to fill gaps in financing for historic preservation projects. At present we're able to make loans of up to \$200,000 in communities outside of Chicago. We would also welcome the opportunity to help identify other potential funding sources, which depend in part on a proposed use and whether the building will continue to be privately owned.

Best,

**Kendra Parzen**  
Advocacy Manager

Ms. Parzen,

Thanks for your memo regarding the Geneva's special meeting last night. Your points are all appropriate and well taken. Unfortunately, we have had grid-lock and the site will remain an eye sore for our community. Without communication and some level of compromise, we are probably looking at the status quo for at least a few more years. I believe memorializing the structure as proposed will eventually play into the eventual development of the Mill Race. Some may call that would be surrendering to the Shodeen's (the developer), my vote reflected accepting the reality of the situation we find ourselves in. Denying demolition for nearly a decade hasn't worked. Maybe we need those very passionate about the preservation of these historic structures to provide financial resources so we can consider a different approach. What funding resources do you have available?

Thanks for your communication and interest with this very challenging issue for the city and our elected officials.

Dean Kilburg

Mayor Burns and City Council Members:

??

Landmarks Illinois strongly opposes the application to demolish the historic landmark building at 4 E. State Street, also known as the Mill Race Inn or the Alexander Brothers Blacksmith Shop.?? Please find attached a letter further outlining our perspective.?? We urge you to not to overturn the Historic Preservation Commission??s vote to deny the demolition permit. Thank you for considering our comments.

??

Sincerely,

??

Mr Malecki,

Please put me in the camp of someone who is fed up with Shodeen Properties.

The City Council are nuts if they allow him to demolish the blacksmith building AND to also waive the fines that are due because of his distractions and resistance to properly prepare that building during this period of dispute. NO WAY does he get out of those fines. I was on record at the preservation meeting for tearing it down, having changed my mind after years of saying NO WAY. Then I listened the history teacher give the best presentation of the night about history erased, is history gone and NOW I am firmly back in the camp of KEEPING IT. The approach to the river is already marred by the ugly three story building blocking the view at the crest of the hill, so I can tolerate the look of the blacksmith shop as is until Shodeen does the right thing and preserves a patch of original Geneva the size of a postage stamp.

If, as I suspect, the council allow him to tear it down in tonight's meeting, DO NOT let him skate from his fines payable to Geneva, PLUS interest!!

Thanks for your time and consideration with regards to this decision.

Tom

Dave Patzelt with Shodeen is meeting with any council members interested in meeting prior to the 1/12 meeting as appropriate (no more than 3). This provides a chance for raising your questions not appropriate for the special meeting and for Dave to share possible ideas for the historic piece. Are you available next week during an afternoon? There is a meeting set for 1/5 at 1:30 and another 1/7 at 1:30. Would either work or a possible time for you that would? I'm just trying to facilitate communication to find a path forward. Let me know...

Hi,

Thanks for your response. What time would work if you are interested in meeting? I'm sure that David would make himself available if you have questions or ideas that might help resolve the development impasse.

**Subject:** Re: Meeting Invitation

Hi Dean,

Unfortunately, I am unable to arrange a meeting this week. I look forward to hearing what Mr. Patzelt has to say at the meeting 1/12.

Best,

Anaïs Bowring (she/her)

Aldersperson First Ward

City of Geneva, Illinois

22 South First Street

Geneva, IL, 60134

Phone: [630.232.0000](tel:630.232.0000) ext. 4001

\*\*\*\*\*

Dave Patzelt with Shodeen will meet with any council members interested in meeting prior to the 1/12 meeting as appropriate (no more than 3). This provides a chance for raising possibly your questions or ideas not appropriate for the special meeting and for Dave to hear your thoughts and share possible ideas for the historic piece. Are you available next week to possible meet?

I was asked and just trying to facilitate communication to find a path forward.

Let me know if interested and possible days that would work next week for you. Thanks.

Dean

**From:** Reinecke, Mark  
**Sent:** Wednesday, December 17, 2025 1:41:21 PM  
**To:** Mark Porter  
**Subject:** Re: Mill Race

Hi Mark,

Thanks for your insights on the LLC. Quite right--This was an unexpected twist. My assumption was that they sold it to themselves, raising the question--Why? What's the angle? You may be on to something. You were on my list of folks to contact. Sorry I had to leave quickly yesterday.

You'd raised a question about the pensions (which has been a concern of mine), and I'd wanted to circle back to you. If you look at this week's Packet (Page 144), you'll find Municipal Compliance Reports by our accountants (Latterbach & Amen) and actuaries (Foster & Foster) reviewing the performance of our Fire and Police pensions last year. Both appear to be doing well, stemming largely from investment performance (up 9.8% and 10.2%, respectively). Our percentage funded, then, appears to have improved. Age of employees and anticipated retirements are, of course, addressed in actuarial calculations. This is going to be a long climb out, but we are heading in the right direction.

Thanks for your note about the LLC. I'm going to be trying to meet with Shodeen and company. This needs to get resolved.

Have a very good week,

Mark

**CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.**

Well, that was an interesting way to waste everyone's time last night. I believe you were in the audience, and I applaud your attendance. It was hard to hear some of the back and forth, but if I heard correctly, Shodeen sold that property to a new LLC. I'll have to dig into the parcel records, but if so, the City just got played again. This likely means that they sold it at an appreciated price to take the remainder of their basis on the original buy, and stepped up their basis with the new LLC, likely including the liability accrued for the fines. It then restarts the clock on the basis for loss amortization for the new LLC. Just supposition until I'm willing to suffer the brain damage of looking it all up this weekend.

Here is my question. It is explicitly clear that they have no plans to do anything with that property until they are certain about the eyesore. That very important property to the City in terms of what impact it has on visitors will sit there and look like a stain on the downtown. Who is going to take the lead to get adults in the damn room and try to figure something out? The lawsuit is a BS excuse. You can have Counsel there and have any conversations covered as "settlement discussions" which are not allowable in court. Last year all Ms. Mayer said about Duke and Lee's was "it's the fastest way to get shovels in the ground." We give lip service to revenue sources and needing Home Rule to solve every problem, but we have a very important property sitting vacant because of egos. Let's call it what it is. The game was started when the City landmarked one of the biggest developer's private property without his consent in a rigged process to stop him from developing. Great job, you stopped him. Now what?

 Book time to meet with me

Hi Mary,

We are working on the public hearing notification process this week, and it looks like this folder link has been removed or sharing permissions have changed. Is it possible to get the link reactivated so that we can download the digital copy? If not, I can scan the hard copy we have, but I believe the digital copy had a higher image resolution which is useful for reviewers.

Thank you,

Hi Emily:

Here is the link to the final packet delivered on 10/31/25. I *believe* this is the correct one – 250 pages. I had saved a couple of versions, but this was the final version. If you could confirm this for me that would be great.

Hi Mary,

We are working on the public hearing notification process this week, and it looks like this folder link has been removed or sharing permissions have changed. Is it possible to get the link reactivated so that we can download the digital copy? If not, I can scan the hard copy we have, but I believe the digital copy had a higher image resolution which is useful for reviewers.

Thank you,

Hi Mary,

This looks to be correct, other than two things which I quickly fixed. It does include the check for the Mill Race gazebo, which I removed after speaking with Dave as that is for a different case. It also doesn't include the addition of item 2.i, the cost for site rehabilitation, but I was able to scan that in from the paper copy and include it. I saved the document to my files right away this time so I shouldn't have to reach out for that link again.

Thank you,

Hi Mark,

Thanks so much for your note. I very much appreciate your insights and recommendations regarding the Mill Race development project. If you have a moment, let's talk. My sense is that there's a path forward here, one that will allow us to move forward briskly. Talk with you soon,

Have a great week,

Mark

Mark,

To say that I'm disappointed in your vote to further forestall development at the Mill Race Inn site is an understatement. You've told me several times that you are fiscally conservative. If that were true and you truly understood the financial cliff that the City is marching towards, you'd be looking at any and every means possible to bring in new tax revenue and more residents. You might also take into consideration how this process unfolded and that this is a completely unforced error by the City. Landmarking the property against the owner's wishes when he worked with the City to preserve the structure, then throwing away \$300k plus on the charade, rather charrette. Shodeen is not my favorite person, as I've done business with him, but imagine what the south end of 3<sup>rd</sup> would look like today and what sales tax revenues would be without their developments. If they are willing to build something within code, and further from my understanding, within the bounds of the charrette, then the City should be doing everything in its power to make this happen, not delaying progress.

Every incremental dollar of revenue for the City takes the burden off of the residential taxes. "Affordability" of housing stock does not matter if the tax burden pushes it out of reach. While the City percentage is low, the raw dollars are not. The percentage is only a derivative of the high EAV which was magically and uniformly increased by 10% across the board last year in a random sample of 50 homes. I'd argue the assessor did the dirty work and the City thinks this looks good. Guess what, nobody cares. They are not informed, don't see it, and don't care. They see the total tax bill. They don't even know how it gets allocated generally speaking.

While I cannot run myself, I will be encouraging others to do so, and assisting anyone financially and with social media who chooses to run against any of the 4 of you who voted to continue this reckless path.

 Book time to meet with me

Mark Porter

**Subject:** Mill Race Inn Blacksmith site

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Good morning Emily,

My name is Frank J. Mugnaini and although I'm only a short time resident of Geneva, having moved in over 3 years ago, we have visited Geneva innumerable times over the decades for the awesome shops, restaurants, festivals and events!

I was at the historical meeting in mid December and arrived later due to a Christmas party and unfortunately missed the first 45 minutes and especially wanted to hear what Dan Shodeen had to impart on the process of the demolition and the plans to finally move Geneva forward with the Mill Race Inn site project.

After hearing the numerous resident's pleas and petitions, most in favor of demolition and finally moving on, I was appalled that your committee pretty much voted unanimously to kick the can down the road yet again! It's been 15 years since Mill Race Inn has closed and despite this time that has passed and the dilapidated state that the structure and site is in, it reflects the inept state of progress within Geneva! There is an old adage that basically says, what would Jesus do? I've revised it to, what would St. Charles do? I'm sure you've noticed how they've transformed their downtown with phenomenal development and riverside attractions over the past several years that have made it a centerpiece and destination stop for residents and non-residents alike. I realize that historic site consideration/redevelopment may not have been an issue but none the less, they have redeveloped their core downtown into nothing less than an entertainment mecca with nary an eyesore in sight!

I'm not sure just how many of your committee reside in Geneva but you all seem older, as I am, and have probably driven by the site numerous times. Does not its condition and the fact that nothing has been proposed to develop this site into a beautiful gateway development showcasing Geneva, and especially the Fox River, not irritate any of you? Not just a persistent eyesore, it could pose as an adventure interest for inquisitive kids or as shelter for an unhoused person with, God forbid, the remote possibility of collapse causing injury or death and a GREAT multi-million dollar liability settlement against Geneva or Shodeen or both!

I saw a news story about the site just last week and just heard recently that it's pretty much received final approval to remain as a historical preservation site. Mayor Kevin Burns may have previously sided with your opinion since had he dissented, I feel the ball would have moved on this project years ago. He was quoted in the June 2021 issue of Geneva Living, after having won his 6th term earlier in April of 2021, as saying " Geneva is a good community and is always striving to do better." This can't be further from the truth as other projects in the Tri-City area have broken ground and been completed over the past decade, especially as I mentioned earlier, with St. Charles exhibiting great civic pride and foresight in developing their downtown.

There is significant foregone real estate tax revenue and sales tax revenue that could have been used to fund other projects within Geneva, or as impossible as it sounds, to help hold the line on residents' real estate tax bills as that site probably would have contributed hundreds of thousands of dollars or more in beneficial tax revenue to the community. The former site of Duke and Lee's has also been caught in a political quagmire ( causing loss of significant tax revenue as well ) but that's another issue and not one that concerns your historical committee. There now also is the backdrop of the city looking to fund an over \$50 million new police station with an increased tax referendum...it never ends for the overly taxed residents.

Let me conclude with a couple of suggestions so I can cut to the chase while trying to maintain the recently sealed fate of the blacksmith shop:

1> The city needs a showplace, flagship development on the east side of the approach into downtown Geneva. The development of the site as a mixed use project, with a setback off the street, possibly with a fountain courtyard, leading to an arched pass-through underneath the building at ground level from State St. back down to the rivers edge, would provide just that destination if done right. Incorporating a restaurant with a dual decked patio section in the back of the building would provide unique, actual river side dining, drinking and relaxation unparalleled in either Batavia or St.Charles ( St.Charles dining options are up at ground level while Batavia's only actual riverside offering is a very unkempt and unattractive patio section at Pal Joey's). The proximity of this site at the rivers edge, which overlooks the State St. Bridge, and the back of the Harrington Hotel along with it being adjacent to the walking and biking paths, would make it a singular attraction in the area. The site could be developed with ground level shops on both State St. and Rt. 25 with several upper floors containing condominiums. The restored or shored up Blacksmith shop could therein be self contained and incorporated into the design to double as a historic museum offering entrance to this restaurant off of State St.

2> Batavia's historic windmill was moved from another site to where it resides presently. A consideration would be to move the Blacksmith Shop somewhere there to create yet another museum and to further enhance the windmill site as a stronger draw for people interested in visiting and learning about the area's great history.

3> Moving the Blacksmith Shop to the empty lot site on 3rd St. right across from the old Kane County Courthouse. It would stand out as a unique building in downtown Geneva, developed into a museum to complement the existing Geneva Historical Museum across and up the street.

I would think one of these ideas could advance the site into finally being developed for the betterment of the Geneva community, our taxpayers, Shodeen and our surrounding towns anchoring Geneva with something in addition to historic 3rd St.

Another saying, what came first, the chicken or the egg? Without a coordinated effort, which supports the wishes of our residents, the continued delays and what's viewed as Geneva's ineptness in getting "the job done", is just another black eye of embarrassment in the eyes of neighboring communities seeing us mired in years of senseless litigation over such issues as this site's development, that of Duke and Lee's and the Geneva Dam issue. The project on east State St. that will contain a flooring store and residences above it is being finalized and the massive apartment construction project north of State St. and just east of Rt.31 is in the breaking ground stages. I realize those did not have any historic site considerations but nonetheless, it's nice to see projects come to fruition soon.

Please make 2026 the year of change and doing better for Geneva by finally moving this project one way or another but to finally break ground. I choose # 1 Emily.

I'm here as a sounding block for you and your committee as we have become dyed in the wool Geneva residents in a short period of time and want to see significant progress taking Geneva beyond just what's on 3rd St. I know the residents and business owners on the east side of State St. strongly agree!

Thank you for taking the time to hear me out,

Sincerely,

Frank J. Mugnaini

1510 Turnberry Ct

Geneva

There is an old adage that basically says, what would Jesus do? I've revised it to, what would St. Charles do? I'm sure you've noticed how they've transformed their downtown with phenomenal development and riverside attractions over the past several years that have made it a centerpiece and destination stop for residents and non-residents alike. I realize that historic site consideration/redevelopment may not have been an issue but none the less, they have redeveloped their core downtown into nothing less than an entertainment mecca with nary an eyesore in sight!

I'm not sure just how many of your committee reside in Geneva but you all seem older, as I am, and have probably driven by the site numerous times. Does not its condition and the fact that nothing has been proposed to develop this site into a beautiful gateway development showcasing Geneva, and especially the Fox River, not irritate any of you? Not just a persistent eyesore, it could pose as an adventure interest for inquisitive kids or as shelter for an unhoused person with, God forbid, the remote possibility of collapse causing injury or death and a GREAT multi-million dollar liability settlement against Geneva or Shodeen or both!

I saw a news story about the site just last week and just heard recently that it's pretty much received final approval to remain as a historical preservation site. Mayor Kevin Burns may have previously sided with your opinion since he dissented, I feel the ball would have moved on this project years ago. He was quoted in the June 2021 issue of Geneva Living, after having won his 6th term earlier in April of 2021, as saying " Geneva is a good community and is always striving to do better." This can't be further from the truth as other projects in the Tri-City area have broken ground and been completed over the past decade, especially as I mentioned earlier, with St. Charles exhibiting great civic pride and foresight in developing their downtown.

There is significant foregone real estate tax revenue and sales tax revenue that could have been used to fund other projects within Geneva, or as impossible as it sounds, to help hold the line on residents' real estate tax bills as that site probably would have contributed hundreds of thousands of dollars or more in beneficial tax revenue to the community. The former site of Duke and Lee's has also been caught in a political quagmire ( causing loss of significant tax revenue as well ) but that's another issue and not one that concerns your historical committee. There now also is the backdrop of the city looking to fund an over \$50 million new police station with an increased tax referendum...it never ends for the overly taxed residents.

Let me conclude with a couple of suggestions so I can cut to the chase while trying to maintain the recently sealed fate of the blacksmith shop:

1> The city needs a showplace, flagship development on the east side of the approach into downtown Geneva. The development of the site as a mixed use project, with a setback off the street, possibly with a fountain courtyard, leading to an arched pass-through underneath the building at ground level from State St. back down to the rivers edge, would provide just that destination if done right. Incorporating a restaurant with a dual decked patio section in the back of the building would provide unique, actual river side dining, drinking and relaxation unparalleled in either Batavia or St. Charles ( St. Charles dining options are up at ground level while Batavia's only actual riverside offering is a very unkempt and unattractive patio section at Pal Joey's). The proximity of this site at the rivers edge, which overlooks the State St. Bridge, and the back of the Harrington Hotel along with it being adjacent to the walking and biking paths, would make it a singular attraction in the area. The site could be developed with ground level shops on both State St. and Rt. 25 with several upper floors containing condominiums. The restored or shored up Blacksmith shop could therein be self contained and incorporated into the design to double as a historic museum offering entrance to this restaurant off of State St.

2> Batavia's historic windmill was moved from another site to where it resides presently. A consideration would be to move the Blacksmith Shop somewhere there to create yet another museum and to further enhance the windmill site as a stronger draw for people interested in visiting and learning about the area's great history.

3> Moving the Blacksmith Shop to the empty lot site on 3rd St. right across from the old Kane County Courthouse. It would stand out as a unique building in downtown Geneva, developed into a museum to complement the existing Geneva Historical Museum across and up the street.

I would think one of these ideas could advance the site into finally being developed for the betterment of the Geneva community, our taxpayers, Shodeen and our surrounding towns anchoring Geneva with something in addition to historic 3rd St.

Another saying, what came first, the chicken or the egg? Without a coordinated effort, which supports the wishes of our residents, the continued delays and what's viewed as Geneva's ineptness in getting "the job done", is just another black eye of embarrassment in the eyes of neighboring communities seeing us mired in years of senseless litigation over such issues as this site's development, that of Duke and Lee's and the Geneva Dam issue. The project on east State St. that will contain a flooring store and residences above it is being finalized and the massive apartment construction project north of State St. and just east of Rt.31 is in the breaking ground stages. I realize those did not have any historic site considerations but nonetheless, it's nice to see projects come to fruition soon.

Please make 2026 the year of change and doing better for Geneva by finally moving this project one way or another but to finally break ground. I choose # 1 Emily.

I'm here as a sounding block for you and your committee as we have become dyed in the wool Geneva residents in a short period of time and want to see significant progress taking Geneva beyond just what's on 3rd St. I know the residents and business owners on the east side of State St. strongly agree!

Thank you for taking the time to hear me out,  
Sincerely,  
Frank J. Mugnaini

Good morning,  
The Tenant will be there, but I found out that the meter is split between two tenants so we need to keep the meter in Shodeen's name and bill back to tenants.

Good Morning,  
I was working on your request from the form below to be Moved into 407 s 3<sup>rd</sup> St Ste 150. Right now, I see Storybook Cake LLC had moved in on 12/16. Will they not be at this location no more? Just want to confirm before I work on this request.

Thanks,

Good morning,  
The Tenant will be there, but I found out that the meter is split between two tenants so we need to keep the meter in Shodeen's name and bill back to tenants.

Good Morning,  
I was working on your request from the form below to be Moved into 407 s 3<sup>rd</sup> St Ste 150. Right now, I see Storybook Cake LLC had moved in on 12/16. Will they not be at this location no more? Just want to confirm before I work on this request.

Thanks,

Dear Alderspersons Bowring and Malecki,

My name is Sherri Johnson, and I reside at 121 Peyton Street. I have been a resident of Geneva since 2013. The purpose of this email is to voice my opinion: please do not allow demolition of the Blacksmith Shop.

I agree again with the Commission's decision to deny Shodeen's request to demolish this structure. That was Shodeen's third request, and I agree with the Commission that nothing has changed since the first request. Shodeen has offered no redevelopment plans for the property, with or without the blacksmith shop, since the Charrette in 2019. More importantly, Shodeen has allowed the structure to deteriorate, against the directives from the City. This strategy has led to many Geneva residents to view it as an eyesore, which I believe has been part of Shodeen's plan to eventually be granted a demolition permit.

Thank you,  
Sherri Johnson

**Subject:** Oppose Blacksmith Shop Demolition

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Dear Alderspersons Bowring and Malecki,

My name is Sherri Johnson, and I reside at 121 Peyton Street. I have been a resident of Geneva since 2013. The purpose of this email is to voice my opinion: please do not allow demolition of the Blacksmith Shop.

I agree again with the Commission's decision to deny Shodeen's request to demolish this structure. That was Shodeen's third request, and I agree with the Commission that nothing has changed since the first request. Shodeen has offered no redevelopment plans for the property, with or without the blacksmith shop, since the Charrette in 2019. More importantly, Shodeen has allowed the structure to deteriorate, against the directives from the City. This strategy has led to many Geneva residents to view it as an eyesore, which I believe has been part of Shodeen's plan to eventually be granted a demolition permit.

Thank you,  
Sherri Johnson

**Subject:** Re: Petition to demolish Geneva's 1840s blacksmith shop

Dear Lee,

Thank you so much for your thoughtful note in support of preserving the Blacksmith Shop. I greatly appreciate your perspectives on this issue. You raise a number of excellent questions regarding what constitutes the "best interest" of the community, how one determines a community's views, and the absence of an alternative plan for evaluation. All give us pause.

Thank you again.

Very best to you,

Mark

**Subject:** Petition to demolish Geneva's 1840s blacksmith shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello:

This is my plea to you to uphold the good work of Geneva's Historical Preservation Commission (HPC) in its, and ideally your, denial of the request to demolish the 1840s Blacksmith shop.

I quote:

"In its arguments in front of the HPC, the owner noted that a large number of letters supporting demolition had been submitted to the HPC and therefore met criterion four in 10-6-10-B of the city code, "The retention of a building, structure, object, improvement or site **is not in the best interest of the majority of the community.**" Nothing materially had changed in the demolition request since the owner's last request in 2023, according to the HPC, other than the growing fine the owner is incurring for violating Geneva's building maintenance code. Furthermore, the HPC determined it was not the best body to determine what is in the best interest of the community. For these reasons, the HPC denied the demolition request."

The reasons to say no, I would offer, are:

1. The good work of the HBC makes it clear that the Shodden/Patzelt have not been honest with Geneva for years. The company has changed, plans have been changed, they have made no effort to pay their \$300K fine (why not? There was a court order. What happened here? Collected fines could be used to repair/save the structure.). They made it clear at the last HBC meeting that they would not fix the building or pay the fines, as ordered. It seems clear their strategy is to win by petition or until the building falls down. Ignoring the law will pay off and set a clear and dangerous precedent.
2. The claim that the "majority of the community" sees the structure as needing to go was based on zero evidence. None could be produced at the HBC meeting. When asked about the "eye-sore" argument (it's an eyes-sore, don't you know?) that also fell flat in that why weren't other vacant buildings (Capana, Little Owl) being demolished? This was an empty argument (although clearly some people would see it demolished.).
3. Why destroy this building/site when there is no clear offer of a plan for what will replace it? Will it come to sit vacant like the lot on the corner of Wilson and Washington in Batavia? The lot that once held a historic church and that was demolished for what? Bad or no planning dictates failure.
4. The idea of "moving" of a historic structure sounds good, but it clearly robs the site and the building of their historic meaning. Historical structures having meaning in place. The historic house removed to make way for the "Roosevelt" on 38 is now a residence over on E. Side Dr, but does anyone know or care? It has lost all meaning as a historical structure. And now the space and area it once occupied are ahistorical. Demolition of the Shop will accomplish the demolition of the area as a historical area, period. This, it seems, was not part of that original plan - Shodden himself (quoted in the Tribune in 2014) was supposedly dedicated to working with/preserving historical sites.
5. Why do this until we know for sure what will replace it and if those plans will even move forward with IL State approval. It is on a floodplain, for example.

I have sat through most of the petitions and heard arguments for and against. I cannot see how Shodden/Patzelt's most recent series of arguments have changed anything. I strongly encourage you, therefore, to say no to the demolition of this building without further effort from the owner.

Thank you,  
Lee W. Eysturlid

**Subject:** Re: Police Station Bond Issue

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

First, thank you. The tax rate went down because EAV's went up 10% almost across the board in the township. We pulled 50 random parcels and it's easy to see what they did. All were 9.8 to 10.2. Intellectually very lazy. Not the City's fault. That said, this debt load puts us in a position where you cannot have even a slight hiccup. The rest of the master plan will cost money, and we are going to fall further behind on the police pension based on the nature of the upcoming retirements, the highest paid and oldest leaving with very large benefits under the old Tier 1 plans. The new Tier 2 sweetener that was passed will hit next year's analysis too. Any dip in EAV and the rate will be an issue.

That being said, what is the City doing to try and work with developers on some of the prime sites to make things happen? Shodeen trying yet again on Mill Race. The City should be all in on making something happen there. Duke and Lee's, she's turning down offers for that site because she wildly overpaid. The City needs to be thinking about how to get revenue generation from these sites. Mill Race would bring residents with money downtown and strengthen the East Side, which we are spending all this TIF money. He's not even asking for TIF. The City needs a full court press on these and any other sites like the old library to get people in there and make them productive, not to mention, "not eyesores".

 Book time to meet with me

Hi Mark,

Thanks so much for your note. As regards the police station, I agree--It's a heavy lift. I'm a fiscal conservative, and this makes my eyes water. If there were a way to avoid developing new municipal facilities, I certainly would. Unfortunately, that's not prudent. In looking at the data, the costs of not moving forward are far greater than the costs of staying with what we have. It's a necessary investment in the community. A great deal of information about the Master Building Plan, the police station, architectural plans, budgets, and issues surrounding the proposed bond issue can be found on the city website. Openness and transparency are key--with this in mind, more information is posted virtually every day. We've also posted an "Estimated Tax Impact Calculator" on the website, so that every resident can know exactly what the bond will cost (It varies by Equalized Home Value and their deductions). Worth noting, I was pleased we were able to reduce our property tax rate (from .4779 to .4575, a 3.25% reduction) tthis year. That's the goal.

I hope this is of help. I'm happy to answer any questions you may have and, as always, appreciate your recommendations. Feel free to call. My door is always open...

Thanks again for your note.

Very best to you,

Mark

**Subject:** Re: Police Station Bond Issue

Hi Mark,

A lot of issues here. I'm pleased that property values are going up in Geneva. That's a positive thing, and reflects how folks feel about our town. At the same time, I'm pleased our Geneva tax rate is trending down. Both are things we can feel positively about, even if overall property taxes here in Illinois remain painfully high (as you know, the lion's share of property tax goes to schools and the county). This is worthy of a discussion! I'm troubled by county budgets since the pandemic, and by what we hear of budgets coming out of Springfield. As regards Geneva taxes, I'm pleased our property tax rate is lower than both St. Charles and Batavia, and substantially below the cap set by the State of Illinois. As for hiccups, that keeps me up. Our cash-on-hand balance is strong, but I fear a recession. If revenues drop, tightening will be in order. Tier 1 and Tier 2 pensions are a concern as well. I would very much like to increase our fire and police pension coverage. This can be done in several ways, and has been a topic for discussion. As for Mill Race and Duke & Lee's, let's talk some time. I have ideas for a path forward.

I'm heading out for the meeting. Let's talk more later. Have a good evening,  
Mark

Happy 2026! ;)

Mr. Patzelt's availability on 1-7-26 does not work for me. But I am available on 1-8-26 after 1pm, so whenever convenient for you and David that afternoon.

As for 1-9-26 (my preferred day for this call, for several reasons), I am open almost all day.

Let me know.

**Subject:** Procedural Check In

Good Afternoon Dave,

We are in receipt of your email, and appreciate the sentiment. I am reaching out to see if you are available for a brief discussion to reconfirm the procedural steps for the 1/12/26 meeting. It would be myself, Ron Sandack and David DeGroot, a phone call will be sufficient.

We will work around your availability, let me know what works for your schedule.

Thank you,

Alex

Sounds fine.

Since I am across the street, I can certainly stop by. I also can bring along a plan that I had prepared that I thought I would share with the Council that provides some initial thoughts on paper of 3 different ideas of the legacy/homage/memory monument, plaque, benches, etc. I won't leave a copy of the plan but as they say, a picture is worth thousand words. The picture certainly helps define pictorially what I was describing when we last met.

Otherwise, if you don't want me to stop in, call my desk phone number which is 630-444-8252

Hi Kevin and Emily

This is Molly Morrow from the Aurora Beacon-News. I hope you're doing well.

I'm reaching out because I've heard that Shodeen has filed an appeal on the demolition request for the Mill Race Inn structure, which was shot down by the Historic Preservation Commission on Tuesday. I was wondering if you could confirm whether that's the case, and, if so, let me know when the issue is set to come before the City Council?

If you could let me know this afternoon sometime, I would appreciate it. Thank you as always!

Best,  
Molly

I strongly urge city council members to confirm the Dec 16 decision of Geneva's Historic Preservation Comm, denying the Shodeen corporation proposal to demolish the original blacksmith shop.

In their third application to get approval for demolition, the Corp has not presented any new factors that would override earlier decisions,

In 2014, the Chicago Tribune quoted Shodeen's intention to respect and retain the historic features of this site. Instead, he has defied the will of the community and the courts ---- and the end result may well be **demolition by neglect**.

If the demolition proposal is rejected ( with your help), then the community can pursue creative options for future development of the site.

With gratitude for all the time and energy you devote to community issues:

Hi Rich -

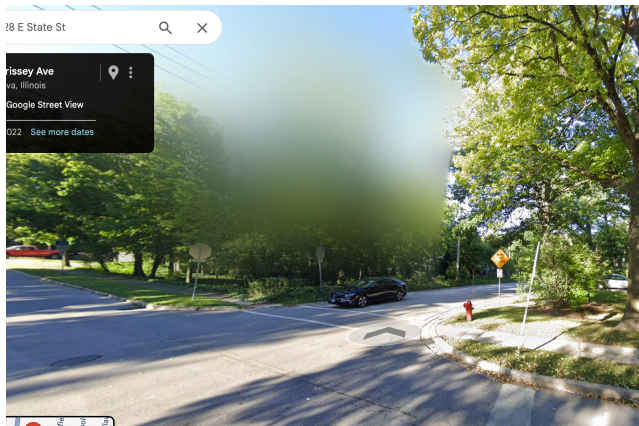

I spoke to the project manager from Sonoma who was onsite during the gas leak. He personally spoke to the homeowner and said the homeowner did express frustration that the City did not contact him about this work and implied that Sonoma was working for the City. The project manager corrected him and explained the situation, specifically explaining (a) Sonoma was not employed by the City (b) the work was related to The Roosevelt development and (c) Sonoma was employed by us, a private developer. My project manager said he remembers this interaction very clearly, the homeowner assumed this was City work which prompted Sonoma to explain. The homeowner accepted this response, he didn't appear to debate it & it wasn't discussed further.

Based on this detailed account from Sonoma, I'm inclined to believe him. Furthermore, this interaction was with a supervisor who is one of two of my primary contacts. He knows the job, who employs him etc. There would be no motivation from Sonoma to claim they were employed by the City.

Apologies this has gotten out of hand and is wasting City time and resources. We would like to make this right with our neighbor and propose restoring the landscaping. A Google picture from 2022 is below. The prior landscaping is a bit of an organized mess of ground cover, I'm confident we can come to an agreement with the homeowner on restoration.

Thanks,

Josh Voit

I am sending you a rather lengthy email chain regarding the interactions we have had with this resident, and I have removed their name, emails and contact information to provide you the basis for and the latest issue.

From the City perspective, we cannot allow for a contractor not working for the City state to a resident that they are. I need you to discuss this with Sonoma Construction, and determine how best to correct his mis-statement. Also, the project team should be aware that there is at least one unhappy neighbor to your project:

01/08

Hello:

That was a lot. I am not sure what my takeaway is supposed to be. I guess you are telling me the city failed in a number of its responsibilities to a resident/taxpayer/property owner that has striven for 25 years to maintain that property and a small greenspace, and what? Dean Kilburg said that you and he would come and talk with me, face-to-face (it was in the email), will that happen? I have recorded the events (including the gas main break - which you don't address - the Sonoma guys told me they were given inadequate maps..) in pictures of the area; it is now a serious mess. I know that after this kind of thing the city usually just levels the ground and throws grass seed. Worthless. It means that I get to do the recovery work. Also, I have spoken with most of the contractors, especially several of the men from Sonoma Underground (who were, they told me, contracted by Geneva Electric/Power - they were all very cordial, btw.). When I told them about the city's treatment of me and the property, they rolled their eyes and said "this always happens, cities don't care and do as they want..." A damning indictment.

I would still like to meet with you, Rich, and at least one of my aldermen (I assume that would be Dean, he has been very good about communication) here, so I can show you the destruction. I would like a definitive idea of what parts of the property aren't worth fixing (Sonoma said they would return to run power lines from the new pole at some point - more destruction), so I know exactly what you all control and what I have left to me. Finally, if the Roosevelt is this much of a mess, can you imagine the construction of a six story apartment block on the Mill Race lot?

01/08

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

**Rich Babica**

Director of Public Works

01/02

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

12/25

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

12/22

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Hi Rich -

Following up on this. We are happy to meet with the homeowner to work something out. Let us know what you think the best approach is.

Thanks,

Josh

Hi Rich -

I spoke to the project manager from Sonoma who was onsite during the gas leak. He personally spoke to the homeowner and said the homeowner did express frustration that the City did not contact him about this work and implied that Sonoma was working for the City. The project manager corrected him and explained the situation, specifically explaining (a) Sonoma was not employed by the City (b) the work was related to The Roosevelt development and (c) Sonoma was employed by us, a private developer. My project manager said he remembers this interaction very clearly, the homeowner assumed this was City work which prompted Sonoma to explain. The homeowner accepted this response, he didn't appear to debate it & it wasn't discussed further.

Based on this detailed account from Sonoma, I'm inclined to believe him. Furthermore, this interaction was with a supervisor who is one of two of my primary contacts. He knows the job, who employs him etc. There would be no motivation from Sonoma to claim they were employed by the City.

Apologies this has gotten out of hand and is wasting City time and resources. We would like to make this right with our neighbor and propose restoring the landscaping. A Google picture from 2022 is below. The prior landscaping is a bit of an organized mess of ground cover, I'm confident we can come to an agreement with the homeowner on restoration.

Thanks,

Josh Voit

I am sending you a rather lengthy email chain regarding the interactions we have had with this resident, and I have removed their name, emails and contact information to provide you the basis for and the latest issue.

From the City perspective, we cannot allow for a contractor not working for the City state to a resident that they are. I need you to discuss this with Sonoma Construction, and determine how best to correct his mis-statement. Also, the project team should be aware that there is at least one unhappy neighbor to your project:

01/08

Hello:

That was a lot. I am not sure what my takeaway is supposed to be. I guess you are telling me the city failed in a number of its responsibilities to a resident/taxpayer/property owner that has striven for 25 years to maintain that property and a small greenspace, and what? Dean Kilburg said that you and he would come and talk with me, face-to-face (it was in the email), will that happen? I have recorded the events (including the gas main break - which you don't address - the Sonoma guys told me they were given inadequate maps..) in pictures of the area; it is now a serious mess. I know that after this kind of thing the city usually just levels the ground and throws grass seed. Worthless. It means that I get to do the recovery work. Also, I have spoken with most of the contractors, especially several of the men from Sonoma Underground (who were, they told me, contracted by Geneva Electric/Power - they were all very cordial, btw.). When I told them about the city's treatment of me and the property, they rolled their eyes and said "this always happens, cities don't care and do as they want..." A damning indictment.

I would still like to meet with you, Rich, and at least one of my aldermen (I assume that would be Dean, he has been very good about communication) here, so I can show you the destruction. I would like a definitive idea of what parts of the property aren't worth fixing (Sonoma said they would return to run power lines from the new pole at some point - more destruction), so I know exactly what you all control and what I have left to me. Finally, if the Roosevelt is this much of a mess, can you imagine the construction of a six story apartment block on the Mill Race lot?

01/08

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

**Rich Babica**

01/02

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch.

Sincerely,

12/25

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct then the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

12/22

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

**Rich Babica**

Hi Rich -

I spoke to the project manager from Sonoma who was onsite during the gas leak. He personally spoke to the homeowner and said the homeowner did express frustration that the City did not contact him about this work and implied that Sonoma was working for the City. The project manager corrected him and explained the situation, specifically explaining (a) Sonoma was not employed by the City (b) the work was related to The Roosevelt development and (c) Sonoma was employed by us, a private developer. My project manager said he remembers this interaction very clearly, the homeowner assumed this was City work which prompted Sonoma to explain. The homeowner accepted this response, he didn't appear to debate it & it wasn't discussed further.

Based on this detailed account from Sonoma, I'm inclined to believe him. Furthermore, this interaction was with a supervisor who is one of two of my primary contacts. He knows the job, who employs him etc. There would be no motivation from Sonoma to claim they were employed by the City.

Apologies this has gotten out of hand and is wasting City time and resources. We would like to make this right with our neighbor and propose restoring the landscaping. A Google picture from 2022 is below. The prior landscaping is a bit of an organized mess of ground cover, I'm confident we can come to an agreement with the homeowner on restoration.

Thanks,

Josh Voit

On Thu, Jan 8, 2026 at 11:07?AM Babica, Rich <[rbabica@geneva.il.us](mailto:rbabica@geneva.il.us)> wrote:

I am sending you a rather lengthy email chain regarding the interactions we have had with this resident, and I have removed their name, emails and contact information to provide you the basis for and the latest issue.

From the City perspective, we cannot allow for a contractor not working for the City state to a resident that they are. I need you to discuss this with Sonoma Construction, and determine how best to correct his mis-statement. Also, the project team should be aware that there is at least one unhappy neighbor to your project:

01/08

Hello:

That was a lot. I am not sure what my takeaway is supposed to be. I guess you are telling me the city failed in a number of its responsibilities to a resident/taxpayer/property owner that has striven for 25 years to

maintain that property and a small greenspace, and what? Dean Kilburg said that you and he would come and talk with me, face-to-face (it was in the email), will that happen? I have recorded the events (including the gas main break - which you don't address - the Sonoma guys told me they were given inadequate maps..) in pictures of the area; it is now a serious mess. I know that after this kind of thing the city usually just levels the ground and throws grass seed. Worthless. It means that I get to do the recovery work. Also, I have spoken with most of the contractors, especially several of the men from Sonoma Underground (who were, they told me, contracted by Geneva Electric/Power - they were all very cordial, btw.). When I told them about the city's treatment of me and the property, they rolled their eyes and said "this always happens, cities don't care and do as they want..." A damning indictment.

I would still like to meet with you, Rich, and at least one of my aldermen (I assume that would be Dean, he has been very good about communication) here, so I can show you the destruction. I would like a definitive idea of what parts of the property aren't worth fixing (Sonoma said they would return to run power lines from the new pole at some point - more destruction), so I know exactly what you all control and what I have left to me. Finally, if the Roosevelt is this much of a mess, can you imagine the construction of a six story apartment block on the Mill Race lot?

01/08

Lee,

Your emails have expressed your frustrations with the construction inconveniences and disruptions you have encountered at your home.

There are multiple projects underway in the area, and I understand how the overlapping of these projects contributed to that frustration.

These projects include the East State Street (IL RT 38) Reconstruction Project, the Roosevelt Development and the Honeybird Chicken Shack remodel. These three projects are all underway simultaneously and all less than 1000 feet from your home. Of these projects the second and third projects are private development projects that require various improvements to the utilities that serve them. The Roosevelt Project has perhaps the greatest impact as this development required new electric service which is connecting to the City utility pole located on Oak Street in the Right of Way (ROW) to the front of your home. This work is being completed by contractors employed by the Roosevelt Project to extend electric service from the transformer bank on that pole east to Oak and then north to their site. This work, as well as the new water, drainage and sanitary services were designed and permitted by the City to be installed by the developer over the course of the project review process completed by staff, consultants and City Council in accordance with the City Code.

In your emails, you reference that you were not notified that this work would be ongoing in the ROW adjacent to your property. You are correct. When the City undertakes a project, we notify the adjacent properties of the work to not only inform them of the project, but to coordinate any special needs. When the City reviews and permits other utility installation (such as AT&T, Comcast or others), we also require them to notify the properties in the construction zone of the project and anticipated schedules. With your email, the realization became evident that this was not being undertaken when redevelopment projects were installing improvements off-site from their construction project. Most redevelopment projects, such as the Honeybird Chicken Shack remodel, the construction and utility impacts are often limited within the immediate property, and so this results with disruptions within the immediate project site. What you have brought to our attention is that when the improvements extend off-site, that there is a significant potential for lack of information being relayed to those adjacent properties of why, what, and when to expect any potential disruptions.

With that realization, the City can review our processes and determine how we can address this to limit the likelihood of future disruptions to the community.

Unfortunately, that does not do much to address easing your frustrations. Hopefully, this email will ensure that your concerns were heard, were reviewed and will be addressed to reduce such an occurrence again.

Sincerely,

**Rich Babica**

Director of Public Works

01/02

Hello:

I am again emailing the city concerning the on-going mess on Oak st, and specifically the intersection of Oak and Crissey on the East Side of Geneva. I thought I would go to the "East State Street Reconstruction - Dec. 19 Update" portal, but if you go, you will see that it is not up-to-date. Why no map? Still an issue. What is going on and when is all this work projected to end? I currently have a mess of pipe pieces sprawled across my yard (many over the 12' mark). Why does that need to be there? And the truck-machines in use make a near constant and loud noise along with the vibration - so from 9am to 5 pm; to say nothing of the smell/fumes. Finally there is what ever sprays from the water tanks that is all over the yard that faces Crissey. Safe?

I would love someone from the city to come and look at this with me and explain how it is safe and why it is ok (maybe Rich this time, vs Nate, since he clearly expressed no concern?). Or maybe a member of the city council for this new part of the 3rd Ward? I can send along pics with audio if you like, I have taken a bunch. Sincerely,

12/25

A short reply as I will be out of town till December 30. I would be happy to fill you in on the details that are not included here, or to hear how to proceed. However, it seems from my conversation(s) with folks from the city that I am essentially powerless in the disposal of my own property within (this was made clear to me by Landers) 12 feet of the street. I had been told recently it was 6, and then told by the myriad of different workers I have met in the past several days that it is 6 feet from where the cables hang, which is about 12 (who knew?).

Things to note:

1. No one let me know any of this was going to happen. I was told by Landers that this information is on the website, but how was I to know to check on a regular basis? Better yet, it turns out that what was posted was not correct, and that my conversations with the workers (who were all really polite and helpful) were far more informative/correct than the city people/site.
2. Landers informed me that there are just too many projects to keep track of and that mistakes get made. Oops. (No really, that is what I was told.) Interesting after the rather sharp email he sent me about not being aware of information on the website. Who am I to trust and where am I to seek correct information?
3. Landers informed me as well that it's "really the builders' responsibility" to inform residents that these things are happening. Really? Where is that written? And why should the builder - out on rt 38 - care? And if the company fails to do this, are they punished? No. (Like Shodeen not paying his \$300K fines?) I found this to be an abandonment of responsibility.
4. Then there was a serious gas leak from someone drilling and breaking a line (I talked with the guy that did it.) (How much did that 12 hour, all night work-fest cost??), as I was told by several folks working, it was because the city has no effective map of the pipes (I saw the hole in the ground and the maze of old pipes, the clay tile drains, old drains, and the "new" pipes - safe?). Also that the guys with the detection wands that have been wandering the area must have failed.
5. Several hundred dollars of bushes/shrubs and vine ground cover were destroyed. Best I could get from Landers about this was a "too bad" shrug. It's "in the right of way" so it appears the city can give or take as it pleases, and say nothing. The city will dump dirt and grass seed, but that is it. When I asked why I shouldn't leave that 12 feet in ruins, another shrug. I am sure the fellow in the sun-glasses accompanying Landers and standing there taking notes while I talked to Landers wrote interesting things.

In the end I suspect I am out of luck here, and will just have to lump it. Or am I wrong? *Why is this ok?* It breeds contempt for city government. Finally, all of the construction folks I spoke with just rolled their eyes and made a "pfff..." noise when I said, "well the city says..." Why is that?

However, I do appreciate that you contacted me - you are the only person with the city to do so in a civil manner (or at all).

Please feel free to contact me if you want to discuss this. I am not the only person affected.

12/22

Rich and/or Nate:

Hello. I am a long time resident of the East Side and have lived at since 2001. Currently there are machines and workers (they told me they are working for the Geneva Electric Dept) tearing up my yard as well as the street. There are diggers, trucks, a giant palate of soap water (yes I know what it's for), a drilling machine and a large, future electric box (for a switching box for my yard??) all sprawled on my space. This is clearly to feed the new three story building on SR 38.

No one said anything to me about this. No written note, no email, nothing. That can't be right, can it? They have destroyed old-growth ground cover (ivy), bushes, etc. Who will pay for or replace all this? This is really

insulting, especially as this makes clear that you don't see my property as mine. I would like a phone call and someone to come here and explain this to me face-to-face. I don't want to wait for the New Year, that will be too late.

Sincerely,

Save the Blacksmith shop. I go by there daily and appreciate its rustic essence. Shodeen is intentionally not maintaining it so it will crumble. Millrace inn was able to incorporate it into their building. Why can't Shodeen?

Jake,

I went though the lead list and it looks good. On my copy attached, I removed those that were sent letters in 2025. Can you work on getting these letters out? PW has a machine to fold the letters. You just need to add the date on the letter. Cam can print out the address labels. What do you need from me?

Bob,

I know mike worked hard last week to clean up some of the service line material list in GIS and he did make a dent in it.

Lead is down to 430  
Galv. Is down to 109  
And unknown is 1089

Attached is the separate filters I applied to come up with that. How would you like for me to proceed with this to get it mailed out to avoid a violation.

To: Historic Preservation Commission  
From: John Martin, 1017 Brigham Way, Geneva, Illinois

Members of the Commission:

I am unable to attend the December 16th meeting and am submitting this letter in support of the Shodeen petition to demolish the Mill Race blacksmith shop.

By way of introduction, my wife Jane and I have lived in Geneva for over 50 years and are both supporters of the Commission's efforts to constructively preserve and protect our community's architectural heritage. I have had the privilege of serving on the City's Plan Commission, Zoning Commission and Affordable Housing Committee. Additionally, I served two terms on the County Board, have been involved in many of the City's volunteer organizations and have a deep respect and love for this community.

Cutting to the chase, I am in complete support of this structure's demolition. Remembering its only marginal utility when part of the Mill Race Inn, attempting to integrate this remnant of history into a new project, in my opinion is little more than a fool's errand. Constructive re-use, such as the Pure Oil stations conversion into a bank drive-thru, leaves history visible and preserved. Embedding this structure into the walls of new construction, will preserve no truly visible architecture and be a waste of money and effort.

Cognizant of the fact that demolition is a difficult decision for a "preservation" commission I nonetheless respectfully urge that this body realistically and constructively grant the petition.

John Martin

**From:** Davids, Brian  
**Sent:** Monday, January 12, 2026 2:30:14 PM  
**To:** Buesing, Matthew; DeGroot, David  
**Cc:** Landers, Nate; Babica, Rich; Byrne, Brian  
**Subject:** RE: Small Group Development Staff Meeting - Jan. 13, 2026

Reference items for discussion tomorrow.

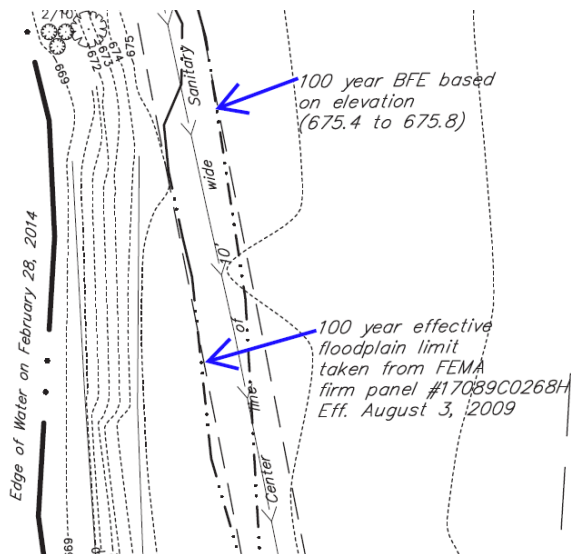

Please see attached items:

1. 2025 Floodplain Submittal for demolition of gazebo on site
2. WBK Review Comments
3. [FEMA NFHL FIRMette](#)
4. [FEMA FIRM Panel](#) (Flood Insurance Rate Map) ([this separate link](#) is a higher quality download, not hosted)
5. [KC Stormwater Ordinance](#)
6. [USACE FAQs](#)

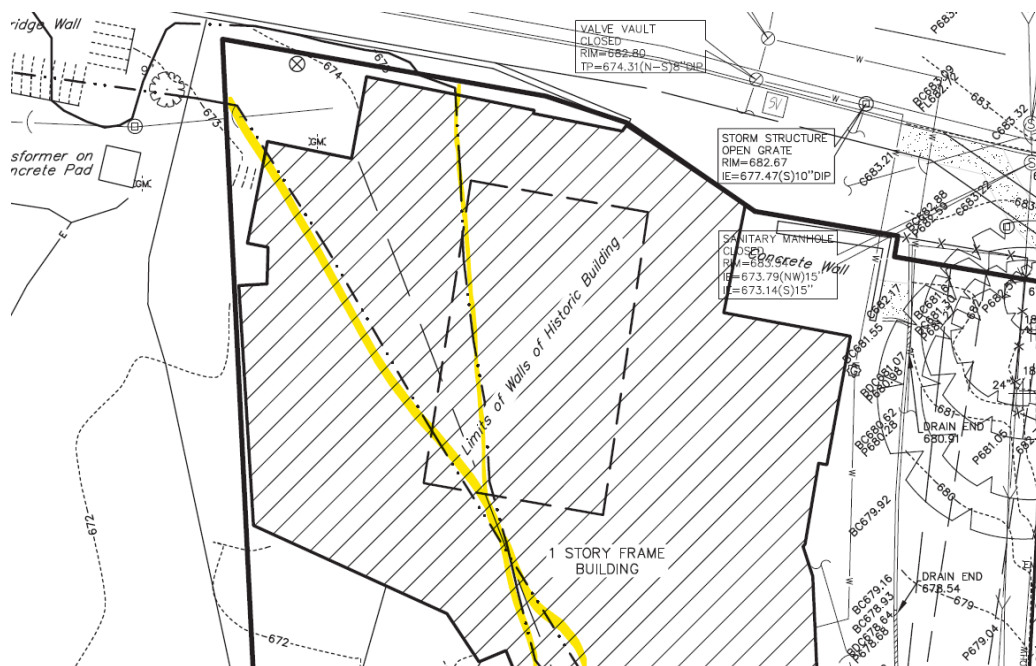

As you can see in the below FIRM snip, the building in question lies along the boundary of Zone AE (1% annual flood chance, or 'floodplain', with a known base flood elevation):

Were I consulting for this client, my opinion would be that this map is too high level to confirm that this is actually inside of the floodplain and recommend that they get it surveyed to confirm elevations. Luckily for us, the applicant has already done that. Please see below snip showing the line labels as well as the lines overlapping the building, confirming for us that not only is it inside of the floodplain as geometrically defined by the FIRM, but also is inside of it based on the elevations found by survey:

(yellow highlight mine)

For reference, the KCSO defines on p. 156 floodplain as FLOODPLAIN: That land typically adjacent to a body of water with ground surface elevations at or below the Base Flood including detached Special Flood Hazard Areas, ponding areas and the like. The Floodplain is also known as the Special Flood Hazard Area (SFHA).

And section 9-30 (p.14) shows requirement for Floodplain Submittal as necessary for "all sites with Floodplain", which from the above items, this site has been confirmed to contain:

**TABLE 9-30**  
**PERMIT SUBMITTAL REQUIREMENTS**

Type of Development	Section/Number Descriptions								
	9-31 Applications and project overview	9-32 Plan Set Submittal	9-86 Stormwater Submittal	9-110 Stormwater Mitigation/ BMP and Watershed Benefit Submittal	9-145 Floodplain Submittal	9-180 Wetland Submittal	9-33 Performance Security	9-34 Maintenance Schedule and Funding	9-35 Record Drawings
All requiring a permit	X	X					X	X	X
All sites with Floodplain	X	X			X		X	X	X
All sites with or adjacent to Linear Watercourse, nonlinear waterbodies, or Wetlands	X	X				X	X	X	X
All applications for variances	X	X			If on-site	If on-site	X	X	X
All requiring Detention Storage Facilities	X	X	X				X	X	X
All requiring Stormwater Mitigation/ BMPs or Watershed Benefit Measures	X	X		X			X	X	X

Additionally, the applicant should show that they have applied and either been granted or provided a letter indicating no permit is necessary from the US Army Corps of Engineers. USACE indicates that "There are generally two types of activities which require a permit from the Corps of Engineers. The first includes activities within navigable waters" which would include this site.

In summary, any work on this site would require a floodplain submittal to us as a check by the KCSO, and they should also confirm with the USACE whether the proposed work requires a permit.

Subject: Small Group Development Staff Meeting - Jan. 13, 2026

Good morning,

Please see the attached agenda and packet for next Tuesday's small group development staff meeting. We will have a group joining us at 9:30 am to discuss a new tenant buildout and proposed rail extension at 2088 Geneva Drive.

If there are any questions or concerns, just let me know.

Thanks,

***Matt Buesing***

City Planner

**Cc:** Buesing, Matthew; Milewski, Jennifer; DeGroot, David; DeGrace, Michael  
**Subject:** RE: Solar Text Amendment & Special Use Checks

Thanks for the information, Jessie. I have attached the Stormwater and Hearing spreadsheets. We can go through those spreadsheets next week and Finance can make adjustments if there are errors. I have also attached Kim's outstanding invoice listing. These are items that she has billed, but have not been paid. I am also going to pull Mike into the process so that he can keep Finance up-to-date.

Here are the items I was hoping we could discuss on Monday.

- Check handling process
- Project code creation process
- Monthly items Finance to provide to Planning
  - Stormwater spreadsheet
  - Hearing spreadsheet
  - Outstanding Accounts Receivable invoices
- Monthly items requested from Planning
  - Which projects can be closed out?
  - If a project is over their deposit, should we bill them the overage plus another deposit?
  - Are there any errors noted in the monthly reports?

Thanks so much!

**Subject:** RE: Solar Text Amendment & Special Use Checks

Hi Heather,

Thank you very much! I'll set up a meeting for us. As for the project number, I create a new project number when I fill out the Check Receipt Form on our end, because I need to write it in the top right corner of that sheet. I know whether I need a hearing deposit (and) stormwater deposit at that same time, though I have not always told you guys that early. I just made a draft edit of the Check Receipt Form that would show the certain type(s) of deposits which I would need you guys to make numbers for. Let me know if it makes sense or if you like it.

Thanks,

**Subject:** RE: Solar Text Amendment & Special Use Checks

Jessie,

I have entered in both of the checks and created the project codes. I'll have the deposit accounts for you by tomorrow.

Can we setup a time next week to discuss the balances and process? I can see where we are getting tripped up on our side and I will discuss some changes with Jen and Kim. Also, at what point in the project do you know that you need a new project number? It seems that is the holdup for entering in the invoices and the checks.

Thanks,

**Heather Collins**

Hello Kim,

I just checked the two solar planning projects in New World (2025-00000010 & 2026-00000001) and I see the checks have not been inputted yet. I would like the checks to be inputted by tomorrow and their hearing / stormwater deposits created (more of a Heather question) so I can process a backlog of invoices for one of the projects.

Thanks,

Good Morning Mayor & City Council (bcc'd):

I have received questions regarding 4 E. State Street from various Council members. As is the practice, I am providing the answers to the entire City Council.

***Previous meeting dates regarding 4 E. State Street:***

Please see page 2 of the staff report (page 21 of [this meeting packet](#)) for a summary of prior meetings including the landmark nomination, charrette, landmark boundary amendment, and demolition request.

***Previous discussions about integrating the structure into future projects:***

The short answer is that Shodeen was presenting this information to support their previous request for demolition, claiming that they met standard 3 and that the "retention of the structure would cause the owner undue economic hardship". The plan to adaptively reuse the structure was submitted with a detailed proforma to show the high cost per square foot to bring the building to a habitable condition and the low return on that investment. The HPC and CC denied demolition based on economic hardship because the applicant did not factor in that the structure as part of a larger redevelopment site where TIF assistance is needed, and concluded (with the help of a 3<sup>rd</sup> party consultant review the proforma) that preserving the structure as part of a larger redevelopment site with TIF assistance would not cause undue economic hardship.

Thank you, wishing you all a safe and Happy New Year!

Good morning Mayor & City Council (bcc'd):

Please mark your calendars for a Special City Council Meeting on **Monday, January 12, 2026**. A summary of the meeting purpose has been provided below by Director DeGroot.

*On December 16<sup>th</sup> the Historic Preservation Commission unanimously voted to deny the demolition of the historic landmark located at 4 E State Street. On December 17<sup>th</sup> the applicant requested an appeal of the decision. The ordinance requires that the appeal be considered by the City Council within 30 days. A special City Council meeting will be held on January 12<sup>th</sup> where both the applicant and the historic preservation commission will have the right to be heard. A reversal or modification of the commission's determination requires not less than 2/3 of the alderpersons holding office.*

Information on the case can be found on the [development projects page](#) and in the [agenda center](#).

Please do not hesitate to reach out with any questions.

Thank you,

Alex

Hi Alex,

I've had a chance to review the attached files and have a question. The Shodeens had Altus Works complete a Mill Race Assessment Report outlining the development of the Blacksmith Shop. The report summary states that it will support "an adaptive reuse of historic Mill Race to serve as an office or retail space." It would "preserve and repair historic building elements while incorporating new elements that are sympathetic to existing building fabric." It included rebuilt masonry and steel supports, as well as mechanical, electrical, and plumbing. The total cost of design and construction was estimated to be \$ 1,461,849. Why have they walked away from this plan? Are there things that might be done to induce them to reconsider it? This would seem to be a sensible path forward. What are your thoughts?

Thanks very much,  
Mark

Good Morning Mayor & City Council (bcc'd):

I have received questions regarding 4 E. State Street from various Council members. As is the practice, I am providing the answers to the entire City Council.

***Previous meeting dates regarding 4 E. State Street:***

Please see page 2 of the staff report (page 21 of [this meeting packet](#)) for a summary of prior meetings including the landmark nomination, charrette, landmark boundary amendment, and demolition request.

***Previous discussions about integrating the structure into future projects:***

The short answer is that Shodeen was presenting this information to support their previous request for demolition, claiming that they met standard 3 and that the "retention of the structure would cause the owner undue economic hardship". The plan to adaptively reuse the structure was submitted with a detailed proforma to show the high cost per square foot to bring the building to a habitable condition and the low return on that investment. The HPC and CC denied demolition based on economic hardship because the applicant did not factor in that the structure as part of a larger redevelopment site where TIF assistance is needed, and concluded (with the help of a 3<sup>rd</sup> party consultant review the proforma) that preserving the structure as part of a larger redevelopment site with TIF assistance would not cause undue economic hardship.

Thank you, wishing you all a safe and Happy New Year!

Alex

Good morning Mayor & City Council (bcc'd):

Please mark your calendars for a Special City Council Meeting on **Monday, January 12, 2026**. A summary of the meeting purpose has been provided below by Director DeGroot.

*On December 16<sup>th</sup> the Historic Preservation Commission unanimously voted to deny the demolition of the historic landmark located at 4 E State Street. On December 17<sup>th</sup> the applicant requested an appeal of the decision. The ordinance requires that the appeal be considered by the City Council within 30 days. A special City Council meeting will be held on January 12<sup>th</sup> where both the applicant and the historic preservation commission will have the right to be heard. A reversal or modification of the commission's determination requires not less than 2/3 of the alderpersons holding office.*

*Information on the case can be found on the [development projects page](#) and in the [agenda center](#).*

Please do not hesitate to reach out with any questions.

Thank you,

Alex

Good afternoon,

The staff report for 4 E State Street states that the Resolution 2019-73 is attached, but it was not and is not on the Development Projects page. Can we please correct this?

Thanks!

Good Morning Mayor & City Council (bcc'd):

I have received questions regarding 4 E. State Street from various Council members. As is the practice, I am providing the answers to the entire City Council.

***Previous meeting dates regarding 4 E. State Street:***

Please see page 2 of the staff report (page 21 of [this meeting packet](#)) for a summary of prior meetings including the landmark nomination, charrette, landmark boundary amendment, and demolition request.

***Previous discussions about integrating the structure into future projects:***

The short answer is that Shodeen was presenting this information to support their previous request for demolition, claiming that they met standard 3 and that the "retention of the structure would cause the owner undue economic hardship". The plan to adaptively reuse the structure was submitted with a detailed proforma to show the high cost per square foot to bring the building to a habitable condition and the low return on that investment. The HPC and CC denied demolition based on economic hardship because the applicant did not factor in that the structure as part of a larger redevelopment site where TIF assistance is needed, and concluded (with the help of

a 3<sup>rd</sup> party consultant review the proforma) that preserving the structure as part of a larger redevelopment site with TIF assistance would not cause undue economic hardship.

Thank you, wishing you all a safe and Happy New Year!

Good Morning Mayor & City Council (bcc'd):

I have received questions regarding 4 E. State Street from various Council members. As is the practice, I am providing the answers to the entire City Council.

**Previous meeting dates regarding 4 E. State Street:**

Please see page 2 of the staff report (page 21 of [this meeting packet](#)) for a summary of prior meetings including the landmark nomination, charrette, landmark boundary amendment, and demolition request.

**Previous discussions about integrating the structure into future projects:**

The short answer is that Shodeen was presenting this information to support their previous request for demolition, claiming that they met standard 3 and that the "retention of the structure would cause the owner undue economic hardship". The plan to adaptively reuse the structure was submitted with a detailed proforma to show the high cost per square foot to bring the building to a habitable condition and the low return on that investment. The HPC and CC denied demolition based on economic hardship because the applicant did not factor in that the structure as part of a larger redevelopment site where TIF assistance is needed, and concluded (with the help of a 3<sup>rd</sup> party consultant review the proforma) that preserving the structure as part of a larger redevelopment site with TIF assistance would not cause undue economic hardship.

Thank you, wishing you all a safe and Happy New Year!

Alex

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Dear Ms. Emily Stood,

I am contacting you to voice my firm support for granting the demolition permit for the landmarked limestone structure at 4 E. State Street, known as the blacksmith shop.  
The property is an abandoned eyesore which holds zero appeal or functionality to the City of Geneva or it's residents. Please approve the demolition permit for the structure.  
I have full confidence in Shodeen Development making sufficient improvements to the entire site including the razed Mill Race Inn. This charade that the city has placed against the citizens in Geneva has gone on for many years and the waste of tax payer dollars is Abhorrent.

If this project would of been approved in a timely fashion , the City of Geneva would of received tax dollars into the city coffers instead of the excessive spending fighting the project.

Regards,

Jeff Conforti  
2559 Walnut Ave, Geneva, IL 60134

CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hi Emily,

I'd like to register my support for approving the demolition permit for the structure at 4 E. State Street, aka the blacksmith shop.

The lot has been an eyesore for years now and after closely following the proceedings on this, there looks to be no financially reasonable solution the city has offered to preserve what is now nothing more than a dilapidated foundation.

If the city was so keen on preserving the site they should have done so years ago. So in my opinion, it is unfair to lay the burden of preservation at the feet of Shodeen when the city and the previous owners of the site were far more instrumental in the demise of the structure. I've lived in Geneva for over 27 years now and as much as I love how the city keeps its historical charm, I am 100% in favor of moving forward with demolition.

Thank you.

Sincerely,

Tim Dreyer

**Subject:** SUBJECT: Support for Approving Demolition Of the Blacksmith Shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hi Emily,  
I'd like to register my support for approving the demolition permit for the structure at 4 E. State Street, aka the blacksmith shop. The lot has been an eyesore for years now and after closely following the proceedings on this, there looks to be no financially reasonable solution the city has offered to preserve what is now nothing more than a dilapidated foundation.

If the city was so keen on preserving the site they should have done so years ago. So in my opinion, it is unfair to lay the burden of preservation at the feet of Shodeen when the city and the previous owners of the site were far more instrumental in the demise of the structure. I've lived in Geneva for over 27 years now and as much as I love how the city keeps its historical charm, I am 100% in favor of moving forward with demolition.

Thank you.  
Sincerely,

Tim Dreyer  
8 S. Greenwich Ln.  
Geneva

Hi Mark,

Thank you for getting back to me. You are absolutely right that this is a solvable problem. Sometimes the City inadvertently gets in their own way by handcuffing the Aldermen.

Your understanding is also correct, you can only consider whether the HPC's vote was correct, but you are allowed to discuss anything that HPC was allowed to discuss at their meeting, whether or not they actually discussed it or not. Bringing the issue back for reconsideration would allow Aldermen time to reach out to Dave Rogers, Geneva's former Planning Commission Chairman and Wood Award winner, to ask him why in this instance he chose to write to HPC in support of demolition. They could reach out to Chris Aiston, Geneva's former Economic Development Director, and ask why he chose to write to HPC in support of demolition. The list of who's who in Geneva goes on with who reached out to HPC in support of demolition. There has to be a reason so many people that undeniably have Geneva's best interests at heart would come forward with their support.

The amendment that was voted on and passed last Monday should also allow Aldermen to ask what type of commemoration of the site would be acceptable to the City. The Shodeen Family has always been willing to discuss what can or cannot be saved and how best to commemorate the site, and the Aldermen have always been willing to listen. The interpretation of rules are making it difficult for you to do your job.

Bringing this issue up for a re-vote will give everyone time to ask a few more questions and keep the discussion going. At this time I'm not asking you to change your vote (but I will in time), I'm just asking you not to let the issue die right now. Please make the motion for reconsideration. There is absolutely no downside to at least ask.

Dear Joe,

Thank you so much for your thoughtful note regarding last night's vote on the referendum. I'm always open to more discussion and to considering alternative ways of resolving issues. I'll share this with other members of the City Council to see if there is an interest in revisiting the vote. My understanding is that the issues you bring up, while important, would not have been appropriate to raise at this week's meeting. By statute, we could only consider the question of whether the HPC's vote was incorrect, and decide this based on one issue--Does demolition of the site serve the "best interests" of the "majority of the community?" Beyond this, the testimony had to be in the record of the HPC prior to their last vote. We were limited, then, in the questions we could ask and the information we could use to make a decision. That said, I believe there is a path forward that will enable development on the site to begin. I would be open to talking with the developers and members of the City Council about strategies that might be of help in accomplishing this. My approach is collaborative. This is a solvable problem.

Thank you again for your suggestion. I greatly appreciate it.

Very best to you,  
Mark Reinecke

Aldermen Malecki and Reinecke,

The City Code allows for any alderman from the prevailing side to ask for a re-vote. I am hoping you would consider making that motion and seconding it at the next meeting. I believe too much misinformation has worked its way into discussions.

First as an introduction. I have been a resident of Geneva for over 40 years and for fifteen years I attended, in person, every Committee of the Whole and City Council meeting. After COVID I've enjoyed the luxury of watching online from my couch. With the exception of the mayor, no one has attended or watched more meetings than I have. I point this out so you know this isn't a single issue complaint from an activist, it is a well informed opinion of someone who has worked to stay informed on the facts and that cares about Geneva.

Here are a few of my comments:

- This property is not in the Historic District. When the Shodeen's purchased the property, they could have applied for a demo permit and received it before anyone had a chance to comment. Instead, because they knew that there may be remnants of an historic structure inside the building they decided, at great expense to themselves, to expose the structure for inspection. After inspection they decided saving the structure "as is" was not practical. It was only then that a group of people moved to have the site landmarked behind their back. That never should have been allowed to happen. It was certainly an instance of "No good deed goes unpunished".

- It's claimed that the Shodeen's are committing "Demolition by Neglect". This is nonsense. The building is in the same shape that it was in when it was originally exposed.
- It's being ignored that the structure sits in a flood plain. Making use of the structure "as is" and where it is located would be a cost prohibitive and impractical endeavor.
- Opponents to demolition like to refer to it as the Blacksmith Shop. It's had many uses over the years, but they chose to call it that for impact. I believe it was also the site of bathrooms for the Mill Race Inn at one time.
- The Shodeen's have continually showed strong support of Historic Preservation. Geneva on the Dam, their corporate offices on First Street, The Herrington, The Creamery, Dodson Place are all impressive examples of their cooperation. But because in this instance they don't agree with saving the structure as is, they are made to be villains.
- It is often repeated "Show us a plan on how you can incorporate the structure and demolition will be approved". How many tens of thousands of dollars in drawings would have to be presented to get this done? It's like saying I don't know what I want from you, but I'll know when I see it. What they are offering is what you want. They have always been willing to incorporate or pay homage to the history if given the chance.
- Many letters and emails were sent to HPC in support of saving the structure, but more than half were not from Geneva residents. Three times that amount were sent supporting demolition. Those supporting demolition include a former Planning Commissioner, the former Chairman of the Planning Commission, a former Alderman, the former Economic Development Director of Geneva, two Wood Award winners, etc. These are not activists with a single propose, these are residents that care about Geneva.
- Please consider bringing this back up for additional discussion. Asking for a re-vote doesn't mean you have changed your mind. It only means you are willing to listen.

Dear Joe,

Thanks for your note. You're raising important points and are asking all the right questions. I'd like to talk with Dave, and hope to talk with Chris in the near future. I'd also look forward to talking with Dave and Shodeen representatives. I'm interested in their perspectives and in working together to move through the impasse. There's a solution to be found.

Thanks again,

Mark

\*\*\*\*\*

Dear Mayor Burns and Aldermen,

In 1983 my husband and I moved our family to Geneva. After only one visit we knew it was exactly where we wanted to raise our children. We never once regretted our decision. Geneva was a dream come true small town. The Fox River, tree lined streets, train, wonderful shops, a great school system, and very important to us, it was dotted with history throughout the town. Every one of my friends and neighbors feels the same way. We all chose Geneva.

Geneva can continue on its plan for growth without removing its history.

The Alexander Blacksmith Shop is an essential part of the towns history.

It's well documented that Kent Shodeen said he would incorporate the shop in whatever he was allowed to build on the Mill Race property. He adaptively reused Community Hospital, The Rock Springs Creamery and Pump House.

There is no reason why the Blacksmith Shop can't be reused.

The Shodeen Group claims its condition is too severe. That responsibility is a direct result of them not doing one thing to protect it since the Mill Race in was demolished.

They have the means and the opportunity to right this wrong and keep their promise to the City and its residents. They also have the means to pay the fines they have incurred on the property.

I'm very concerned an unfortunate precedent will be set for future developers here if the Shodeen Family is allowed to renege on their original commitment, and the monetary obligations with seemingly no regard for Geneva and the residents.

I'm very concerned an unfortunate precedent will be set for future developers here if the Shodeen Family is allowed to renege on their original commitment, and the monetary obligations with seemingly no regard for Geneva and the residents.

Dear Erica,

Thank you very much for your thoughtful note regarding this evening's vote on the Blacksmith Shop. I appreciate your comments and insights, and hope you will be able to join us this evening.

Very best to you,

Mark Reinecke

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello,

I am contacting you to encourage you to say no to the most recent petition from the Shodeen group to demolish the Blacksmith Shop on the site of the previous Mill Race Inn property. The Historical Preservation Committee has denied this request on multiple occasions. I implore to honor their sound reasoning for this and uphold their decision. In a recent HPC meeting, the following was stated:

"In its arguments in front of the HPC, the owner noted that a large number of letters supporting demolition had been submitted to the HPC and therefore met criterion four in 10-6-10-B of the city code, "The retention of a building, structure, object, improvement or site **is not in the best interest of the majority of the community.**" Nothing materially had changed in the demolition request since the owner's last request in 2023, according to the HPC, other than the growing fine the owner is incurring for violating Geneva's building maintenance code. Furthermore, the HPC determined it was not the best body to determine what is in the best interest of the community. For these reasons, the HPC denied the demolition request."

**Shodeen shot down in showdown: Judge affirms Geneva ruling on 1840s blac...**

Kane County Circuit Judge Elizabeth Flood ruled this week that Geneva developer Shodeen Group cannot evade the c...

There are many reasons to uphold the HPC decision. In support of them, I provide the following rationale:

1. The good work of the HBC makes it clear that the Shodden/Patzelt have not been honest with Geneva for years. The company has changed, plans have been changed, *they have made no effort to pay their \$300K fine, even though there is a court order to do so*. I am confused as to why a public entity is allowed to disregard the law and why the local governing body allows this. Collected fines could be used to repair/save the structure. They made it clear at the last HBC meeting that they would not fix the building or pay the fines, as ordered. It seems clear their strategy is to win by petition or until the building falls down. Ignoring the law will pay off and set a clear and dangerous precedent.
2. The claim that the "majority of the community" sees the structure as needing to go was based on zero evidence. None could be produced at the HBC meeting. When asked about the "eye-sore" argument, that also fell flat as why weren't other vacant buildings (Campana, Little Owl) being demolished? This was an empty argument (although clearly some people would see it demolished.).
3. Why destroy this building/site when there is no clear offer of a plan for what will replace it? Will it come to sit vacant like the lot on the corner of Wilson and Washington in Batavia? The lot that once held a historic church and that was demolished for what? Bad or no planning dictates failure.
4. Historical structures having meaning in place. The historic house removed to make way for the "Roosevelt" on 38 is now a residence over on E. Side Dr. It has lost all meaning as a historical structure. Now the space and area it once occupied are ahistorical. Demolition of the Shop will accomplish the demolition of the area as a historical area, period. This, it seems, was not part of that original plan - Shodden himself (quoted in the Tribune in 2014) was supposedly dedicated to working with/preserving historical sites.
5. The Shodeen/Patzelt group has not pursued any available funding from historical societies. There are grants available from a number of resources that have been mentioned to this group at a previous HPC meeting *by representatives from the state historical entities*. These suggestions and resources have been blatantly ignored.
6. Why destroy a historical building and site if we have no idea what will replace it and if those plans will even move forward with IL State approval? It is on a floodplain, would require allowances for ingress and egress for two state highways, and no environmental impact study has been completed. Until these items

are completed, why is a "possible construction project" even being considered?

I have sat through most of the petitions and heard arguments for and against. I cannot see how Shodden/Patzelt's most recent series of arguments have changed anything. I strongly encourage you, therefore, to say no to the demolition of this building without further effort from the owner. Geneva claims to be a historical community. It is time to keep history from being destroyed.

Respectfully,  
Erica Eysturid

**Subject:** Re: vote no to petition to demolish historic Blacksmith shop

Hi Erica

This is the only email that I have on this account. You mentioned that you text me also. I could not find any text messages . I would like you to resend the text to 6303637854.

I do respond to people in Geneva that reach out to my email or text. Some questions are directed to multiple people and if someone else sends the question to the responsible party, I usually do not duplicate the message. I also talk to people while out in the community.

I would be available to meet with you to talk about the Mill Race Inn or any other issues.

Thanks

Larry Furnish

**To:** Reinecke, Mark  
**Subject:** Request for demolition

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

I strongly urge city council members to confirm the Dec 16 decision of Geneva's Historic Preservation Comm, denying the Shodeen corporation proposal to demolish the original blacksmith shop.

In his third application to get approval for demolition, the Corp has not presented any new factors that would override earlier decisions,

In 2014, the Chicago Tribune quoted Shodeen's intention to respect and retain the historic features of this site. Instead, he has defied the will of the community and the courts ---- and the end result may well be ***demolition by neglect***.

If the demolition proposal is rejected ( with your help), then the community can pursue creative options for future development of the site.

With gratitude for all the time and energy you devote to community issues:

**Subject:** Reviewing Open Hearing Deposits

Hi Heather,

Please see only the first page of this document. I made the font red for all of the "Open" hearing deposits that can be closed out and billed out. The remaining projects are as follows:

- Prairie Grove – There are two errors: 1) I accidentally coded hearing deposit invoice # 640444 as a stormwater invoice for this same project. Please let me know if I need to do anything to remedy this mistake. 2) The hearing deposit excel sheet shows a WBK invoice # 640079 as in the hearing deposit section – this is actually a Kane County Recorder invoice and is correctly located in the hearing deposit section. (There is nothing to fix here in NewWorld, only a new naming in the hearing excel sheet.)
- 601 N 1<sup>st</sup> St Porch Variation – I mistakenly coded invoice #667143 in batch #2026-00000508 as applying to the Bullock Campus project. This invoice should be applied to the 601 N 1st Porch Variation project. After it is applied to this project, the project can be closed and billed out.
- Bullock Campus – 1) I need to somehow move the invoice #667143 from Bullock to the 601 N 1<sup>st</sup> St Porch Variation; 2) I believe we are waiting on an IGA with Kane County to be recorded before we can close this out
- Historic Review PP 2025-011 4 E State Street Demo – I want to wait until the City Council decision to decide whether we need to close this out or not.

Please let me know how I can help to reattribute invoices #640444 and #667143.

Going forward, I will generate a Project Transaction Report monthly the Friday before our 2<sup>nd</sup>-of-the-month Development Staff meeting (a Tuesday). This will usually be the 3<sup>rd</sup> Friday of the month, but sometimes the 4<sup>th</sup> (depending on the date of the Development Staff meeting). I will review which hearing deposits need to remain open and which can be closed and billed out, and I will review with Brian Davids at the Development Staff meeting which planning stormwater deposits can be closed out.

Save the Blacksmith shop. I go by there daily and appreciate its rustic essence. Shodeen is intentionally not maintaining it so it will crumble. Millrace inn was able to incorporate it into their building. Why can't Shodeen?

**Subject:** SHodeen's appeal

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Jeff,

In late December, i attended the HPC meeting where the members carefully reviewed the SHodeen request to allow demolition of the blacksmith shop. There was much public commentary, including a strong statement from Patrice Berteau urging demolition. As you probably know, she also orchestrated a letter campaign among her neighbors and political allies; most of the letters followed a template and were identical.

I was quite disappointed that you ended up taking the same position she did, allowing demolition of the structure.

I thought Billy Malecki and Anais Bowring explained their vote with clarity - and conscience - supporting the unanimous decision of the HPC. THis should not be taken lightly; the HPC rebutted Shodeen's 3<sup>rd</sup> demolition request, with NO NEW DATA or proposal. Nothing had changed ..... until Amy Mayer offered her misguided amendment based on NEW proposals from Shodeen, not on the record of deliberations to date. YES, the blacksmith shop is an eyesore, partly due to SHodeen's total neglect of the structure .

I simply cannot believe that 6 aldermen ignored the careful homework of the HPC, including public hearings where a variety of opinions were shared, many opposed to demolition.

We have heard that Shodeen can, and probably will, appeal again in 12 months.  
And what has happened to those fines? A fine mess.

Liz and Carl Safanda  
1013 Dunstan

**To:** Stood, Emily  
**Subject:** Stong Support for Demolition Permit for Blacksmith Shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Dear Ms. Emily Stood,

I am contacting you to voice my firm support for granting the demolition permit for the landmarked limestone structure at 4 E. State Street, known as the blacksmith shop. The property is an abandoned eyesore which holds zero appeal or functionality to the City of Geneva or it's residents. Please approve the demolition permit for the structure. I have full confidence in Shodeen Development making sufficient improvements to the entire site including the razed Mill Race Inn. This charade that the city has placed against the citizens in Geneva has gone on for many years and the waste of tax payer dollars is Abhorrent.

If this project would of been approved in a timely fashion , the City of Geneva would of received tax dollars into the city coffers instead of the excessive spending fighting the project.

Regards,

Jeff Conforti  
2559 Walnut Ave, Geneva, IL 60134

**Subject:** SUBJECT: Support for Approving Demolition Of the Blacksmith Shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hi Emily,

I'd like to register my support for approving the demolition permit for the structure at 4 E. State Street, aka the blacksmith shop.

The lot has been an eyesore for years now and after closely following the proceedings on this, there looks to be no financially reasonable solution the city has offered to preserve what is now nothing more than a dilapidated foundation.

If the city was so keen on preserving the site they should have done so years ago. So in my opinion, it is unfair to lay the burden of preservation at the feet of Shodeen when the city and the previous owners of the site were far more instrumental in the demise of the structure. I've lived in Geneva for over 27 years now and as much as I love how the city keeps its historical charm, I am 100% in favor of moving forward with demolition.  
Thank you.

Sincerely,

Tim Dreyer

**Subject:** The Mill Race development

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello Jeff,

I strongly urge city council members to confirm the Dec 16 decision of Geneva's Historic Preservation Comm, denying the Shodeen corporation proposal to demolish the original blacksmith shop.

In his third application to get approval for demolition, the Corp has not presented any new factors that would override earlier decisions,

In 2014, the Chicago Tribune quoted Shodeen's intention to respect and retain the historic features of this site. Instead, he has defied the will of the community and the courts ---- and the end result may well be ***demolition by neglect***.

If the demolition proposal is rejected ( with your help), then the community can pursue creative options for future development of the site.

With gratitude for all the time and energy you devote to community issues:

Liz Safanda

\*\*\*\*\*

Dear Mayor Burns and Aldermen,

In 1983 my husband and I moved our family to Geneva. After only one visit we knew it was exactly where we wanted to raise our children. We never once regretted our decision. Geneva was a dream come true small town. The Fox River, tree lined streets, train, wonderful shops, a great school system, and very important to us, it was dotted with history throughout the town. Every one of my friends and neighbors feels the same way. We all chose Geneva.

Geneva can continue on its plan for growth without removing its history.

The Alexander Blacksmith Shop is an essential part of the towns history.

It's well documented that Kent Shodeen said he would incorporate the shop in whatever he was allowed to build on the Mill Race property. He adaptively reused

Community Hospital, The Rock Springs Creamery and Pump House.

There is no reason why the Blacksmith Shop can't be reused.

The Shodeen Group claims its condition is too severe. That responsibility is a direct result of them not doing one thing to protect it since the Mill Race in was demolished.

They have the means and the opportunity to right this wrong and keep their promise to the City and its residents. They also have the means to pay the fines they have incurred on the property.

I'm very concerned an unfortunate precedent will be set for future developers here if the Shodeen Family is allowed to renege on their original commitment, and the monetary obligations with seemingly no regard for Geneva and the residents.

**Subject:** vote no to petition to demolish historic Blacksmith shop

**CAUTION:** This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.

Hello,

I am contacting you to encourage you to say no to the most recent petition from the Shodeen group to demolish the Blacksmith Shop on the site of the previous Mill Race Inn property. The Historical Preservation Committee has denied this request on multiple occasions. I implore to honor their sound reasoning for this and uphold their decision. In a recent HPC meeting, the following was stated:

"In its arguments in front of the HPC, the owner noted that a large number of letters supporting demolition had been submitted to the HPC and therefore met criterion four in 10-6-10-B of the city code, "The retention of a building, structure, object, improvement or site **is not in the best interest of the majority of the community.**" Nothing materially had changed in the demolition request since the owner's last request in 2023, according to the HPC, other than the growing fine the owner is incurring for violating Geneva's building maintenance code. Furthermore, the HPC determined it was not the best body to determine what is in the best interest of the community. For these reasons, the HPC denied the demolition request."

**Shodeen shot down in showdown: Judge affirms Geneva ruling on 1840s blac..**

Kane County Circuit Judge Elizabeth Flood ruled this week that Geneva developer Shodeen Group cannot evade the c...

There are many reasons to uphold the HPC decision. In support of them, I provide the following rationale:

1. The good work of the HBC makes it clear that the Shodden/Patzelt have not been honest with Geneva for years. The company has changed, plans have been changed, *they have made no effort to pay their \$300K fine, even though there is a court order to do so*. I am confused as to why a public entity is allowed to disregard the law and why the local governing body allows this. Collected fines could be used to repair/save the structure. They made it clear at the last HBC meeting that they would not fix the building or pay the fines, as ordered. It seems clear their strategy is to win by petition or until the building falls down. Ignoring the law will pay off and set a clear and dangerous precedent.
2. The claim that the "majority of the community" sees the structure as needing to go was based on zero evidence. None could be produced at the HBC meeting. When asked about the "eye-sore" argument, that also fell flat as why weren't other vacant buildings (Campana, Little Owl) being demolished? This was an empty argument (although clearly some people would see it demolished.).
3. Why destroy this building/site when there is no clear offer of a plan for what will replace it? Will it come to sit vacant like the lot on the corner of Wilson and Washington in Batavia? The lot that once held a historic church and that was demolished for what? Bad or no planning dictates failure.
4. Historical structures having meaning in place. The historic house removed to make way for the "Roosevelt" on 38 is now a residence over on E. Side Dr. It has lost all meaning as a historical structure. Now the space and area it once occupied are ahistorical. Demolition of the Shop will accomplish the demolition of the area as a historical area, period. This, it seems, was not part of that original plan - Shodden himself (quoted in the Tribune in 2014) was supposedly dedicated to working with/preserving historical sites.
5. The Shodeen/Patzelt group has not pursued any available funding from historical societies. There are grants available from a number of resources that have been mentioned to this group at a previous HPC meeting *by representatives from the state historical entities*. These suggestions and resources have been blatantly ignored.
6. Why destroy a historical building and site if we have no idea what will replace it and if those plans will even move forward with IL State approval? It is on a floodplain, would require allowances for ingress and egress for two state highways, and no environmental impact study has been completed. Until these items are completed, why is a "possible construction project" even being considered?

I have sat through most of the petitions and heard arguments for and against. I cannot see how Shodden/Patzelt's most recent series of arguments have changed anything. I strongly encourage you, therefore, to say no to the demolition of this building without further effort from the owner. Geneva claims to be a historical community. It is time to keep history from being destroyed.

Respectfully,  
Erica Eysturlid

Hello,

I am contacting you to encourage you to say no to the most recent petition from the Shodeen group to demolish the Blacksmith Shop on the site of the previous Mill Race Inn property. The Historical Preservation Committee has denied this request on multiple occasions. I implore to honor their sound reasoning for this and uphold their decision. In a recent HPC meeting, the following was stated:

"In its arguments in front of the HPC, the owner noted that a large number of letters supporting demolition had been submitted to the HPC and therefore met criterion four in 10-6-10-B of the city code, "The retention of a building, structure, object, improvement or site **is not in the best interest of the majority of the community.**" Nothing materially had changed in the demolition request since the owner's last request in 2023, according to the HPC, other than the growing fine the owner is incurring for violating Geneva's building maintenance code. Furthermore, the HPC determined it was not the best body to determine what is in the best interest of the community. For these reasons, the HPC denied the demolition request."

**Shodeen shot down in showdown: Judge affirms Geneva ruling on 1840s blac...**

Kane County Circuit Judge Elizabeth Flood ruled this week that Geneva developer Shodeen Group cannot evade the c...

There are many reasons to uphold the HPC decision. In support of them, I provide the following rationale:

1. The good work of the HBC makes it clear that the Shodden/Patzelt have not been honest with Geneva for years. The company has changed, plans have been changed, *they have made no effort to pay their \$300K fine, even though there is a court order to do so*. I am confused as to why a public entity is allowed to disregard the law and why the local governing body allows this. Collected fines could be used to repair/save the structure. They made it clear at the last HBC meeting that they would not fix the building or pay the fines, as ordered. It seems clear their strategy is to win by petition or until the building falls down. Ignoring the law will pay off and set a clear and dangerous precedent.
2. The claim that the "majority of the community" sees the structure as needing to go was based on zero evidence. None could be produced at the HBC meeting. When asked about the "eye-sore" argument, that also fell flat as why weren't other vacant buildings (Campana, Little Owl) being demolished? This was an empty argument (although clearly some people would see it demolished.).
3. Why destroy this building/site when there is no clear offer of a plan for what will replace it? Will it come to sit vacant like the lot on the corner of Wilson and Washington in Batavia? The lot that once held a historic church and that was demolished for what? Bad or no planning dictates failure.
4. Historical structures having meaning in place. The historic house removed to make way for the "Roosevelt" on 38 is now a residence over on E. Side Dr. It has lost all meaning as a historical structure. Now the space and area it once occupied are ahistorical. Demolition of the Shop will accomplish the demolition of the area as a historical area, period. This, it seems, was not part of that original plan - Shodden himself (quoted in the Tribune in 2014) was supposedly dedicated to working with/preserving historical sites.

**Subject:** Your vote on the demolition at 4 E. State Street

**CAUTION: This email originated from outside the City of Geneva. Exercise caution when opening attachments or on clicking links from unknown senders.**

I'm writing to thank you for your reasoned, accurate comments and vote on the question to reverse the HPC decision to reject Shodeen's demolition request. I'm SO SO SO SO SO disappointed that the HPC decision was upheld.

I've lived on the east side for 33 years. The Mill Race Inn was a favorite, particularly the Gazebo, the Mill Grill (especially the steak sandwich), and the Duck Inn. Every Mother's Day once my children were old enough to be left alone in the morning, I walked there and ordered one bloody mary, sat on the deck chairs, watched the ducks, and pretended I was on my own deck. It was always a lovely time that I miss, even though I don't drink alcohol anymore.

I observed as the Mill Grill had to be closed, then the entire restaurant and Gazebo. It was devastating but inevitable. I participated in the Charette as well as the council meetings debating and voting on the output. In general, what I observed was that most participants from the community wanted a reincarnation of the Mill Race Inn. They had no stomach for a plan without a restaurant. A friend of mine actually left the city because of that, which frankly, I think was ridiculous, but it's evidence of the emotional investment in the property and concern over what will be developed.

I attended a council meeting sometime last year which had a very sparse attendance and since every person who spoke was in favor of retaining the structure, I didn't feel confident in speaking up. My bad but it really seemed a lost cause to speak against demolition. Tonight proved that there's much more of a split in opinions and, perhaps, more people in favor of demolition even if the council voted against. I should have stayed in the game, but I also had some family issues over the past few months, so I didn't keep tabs on the meetings preceding the council meeting tonight. Again, my bad.

In my opinion, you nailed it. What's left of the structure is a shadow of its former self and bears no real value that would serve as any sort of attraction. It's unsafe, really unmanageable, and I'm actually embarrassed that the city has saddled Shodeen with the monstrosity after they invested in the site when there weren't many (any?) other takers. There's enough problems with the flood plain but the city gave them a giant stone headache to boot. And the city wants them to invest in maintenance of a structure that's barely standing? It's ridiculous. (Sorry, I'm ranting now.)

I was very disappointed in the discussion that went beyond the question. Of course there will be a plan for development. Shodeen bought the property for that reason. Many people at the Charette proposed that something be done with the remnants that are left and tonight was not the first time that this idea had been discussed but others don't want to hear about that: They just want to preserve what can't be preserved without enormous expense and negative impact on what could be built.

I joke with my friends and neighbors that I'll be dead before anything happens with that property. I'm 73, but I'm hoping to survive long enough to see a development come to fruition. The arguments that alderpersons need to know what will be built or shouldn't overturn the work of the HPC are short-sighted and self-centered. Those arguments don't consider us residents sitting and waiting for something – of course, I'm sure west side residents are just as eager to see something happen since the view coming into the city is compromised by the half-standing stone nothing. The question tonight was about keeping the remnants or demolishing the remnants. There is absolutely nothing that can be made of that building and what will happen now is that everybody who knows nothing about the history will be throwing darts at the wall to propose a visitor's center, a museum, a restaurant, a water stop, a retail shop, a beer garden, you name it. Not one of those proposals is a marketable idea, so none of those darts can stick.

I had emailed my alderperson, Billy, but very late and just prior to the meeting start, but I will contact him to expand on the brief opinion I stated in that email and also register my disagreement. I shudder to think how much of a delay tonight will have and how much less time I have to wait for . . . . something? anything? I don't even care what at this point. Just SOMETHING!

Sincerely,

Denise Ward
